STERN
PINBALL, INC.

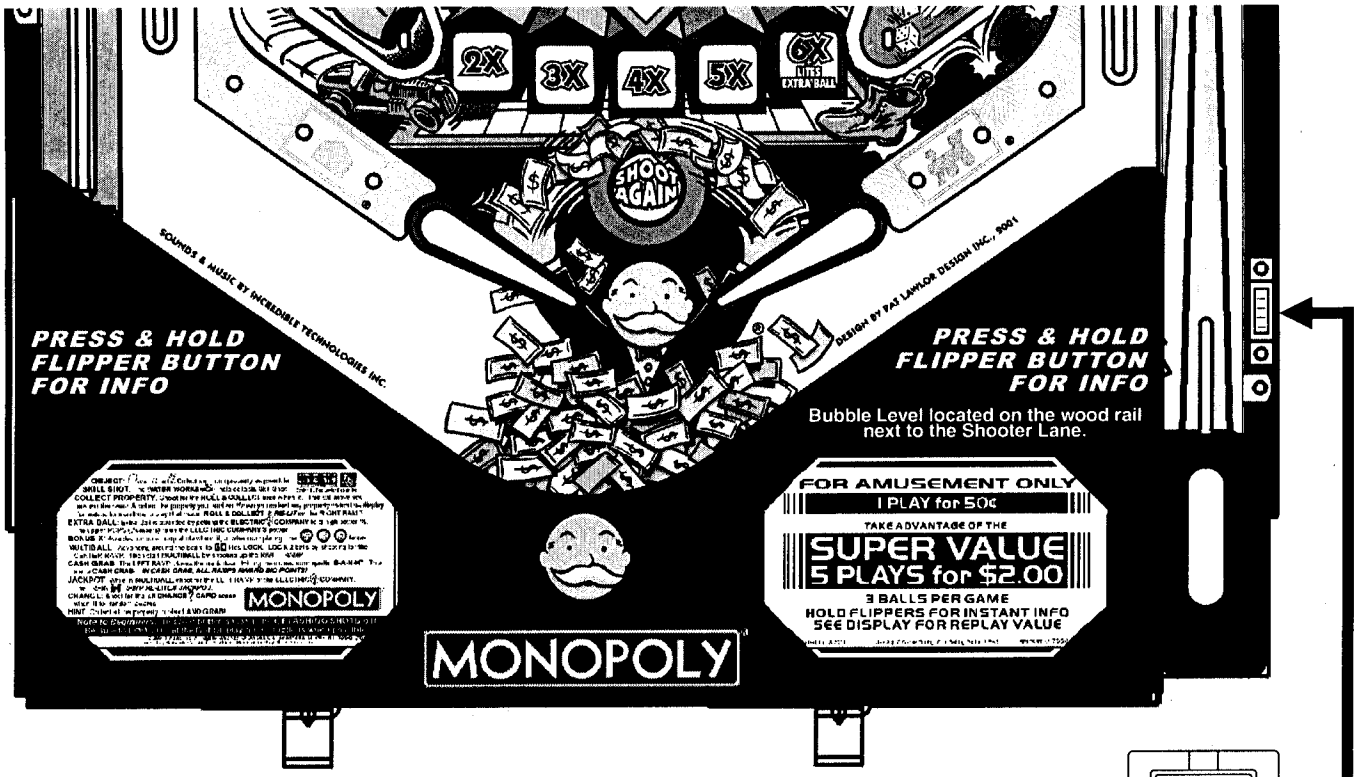
The Bubble Level is back!

This will ensure Game Pitch is 6.5° (recommended) for proper game play.

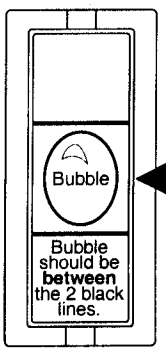
Leg Leveler Adjustment and use of the Bubble Level

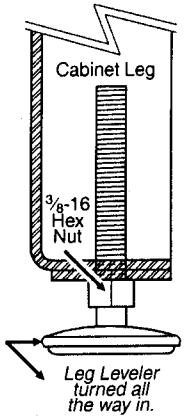
On a LEVEL FLOOR, this cabinet is designed to automatically have a 6.5° pitch without adjusting levelers.

Start adjustment with the leg levelers *turned all the way in.*



View the *bubble* in the level provided on the right side wood rail (see above).





Adjust the front or rear levelers as necessary to cause the bubble to float between the two (2) black lines.

Use a pinball to roll down the center of the playfield for side-to-side leveling.

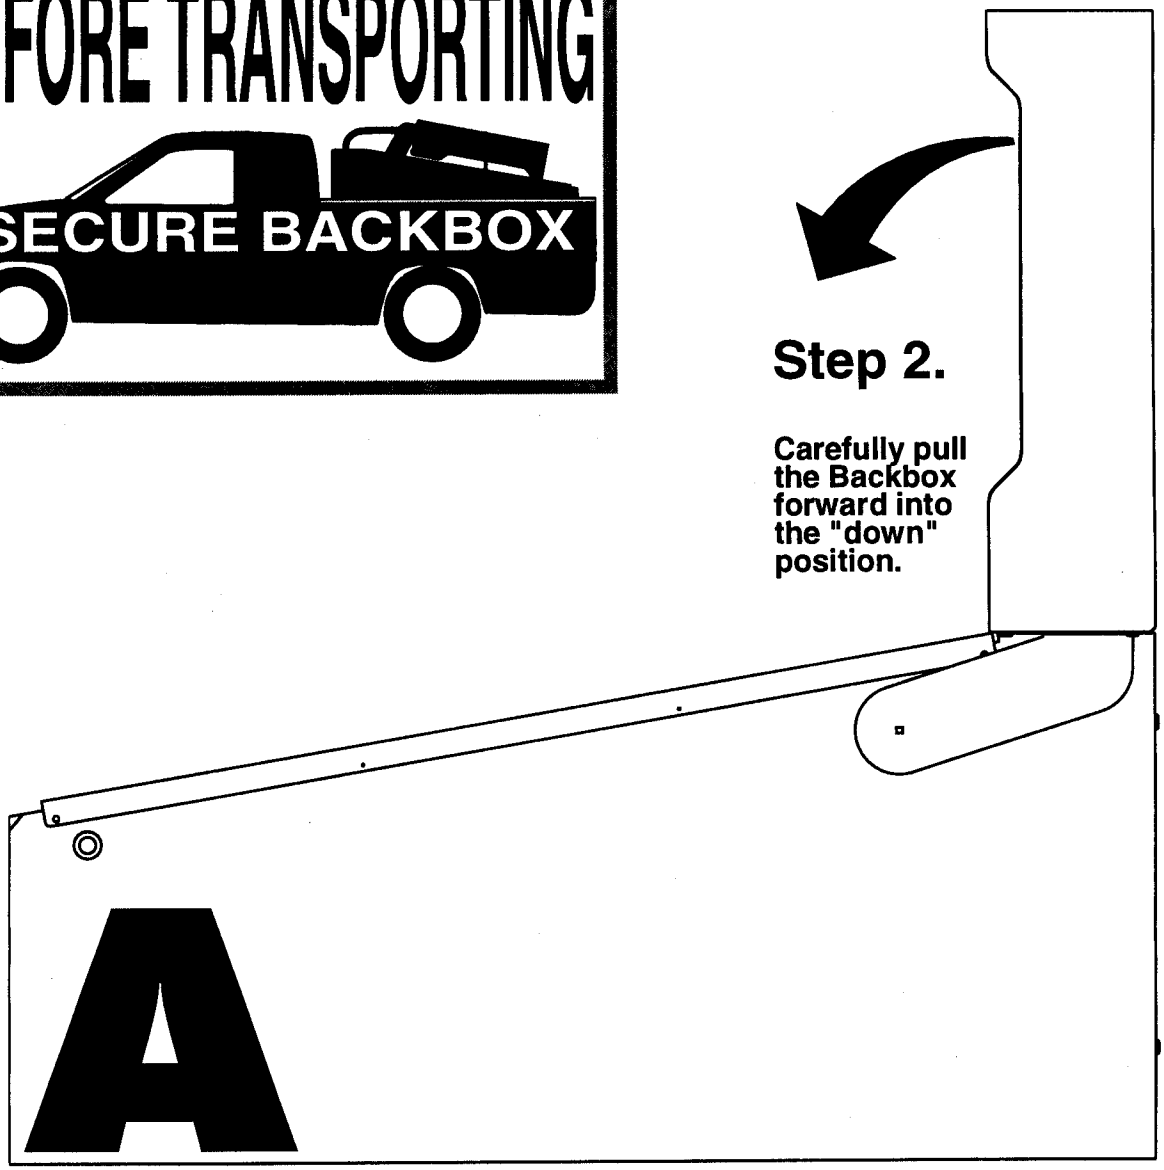
YOUR PLAYFIELD PITCH IS NOW AT 6.5° AS REQUIRED FOR PROPER GAME PLAY!

For custom adjustment greater than >6.5° can be acheived by turning out the rear leg leveler(s), however, ***it is not recommended.***

New to our Pinball Games?

Don't forget to go over **Section 3, Chapter 1, Portals™ Service Menu Introduction**. *If using Diagnostics...very useful!* Got confused? Comments? Questions? Call Technical Support at 800-542-5377 or 708-345-7700 (Option 1).

BEFORE TRANSPORTING



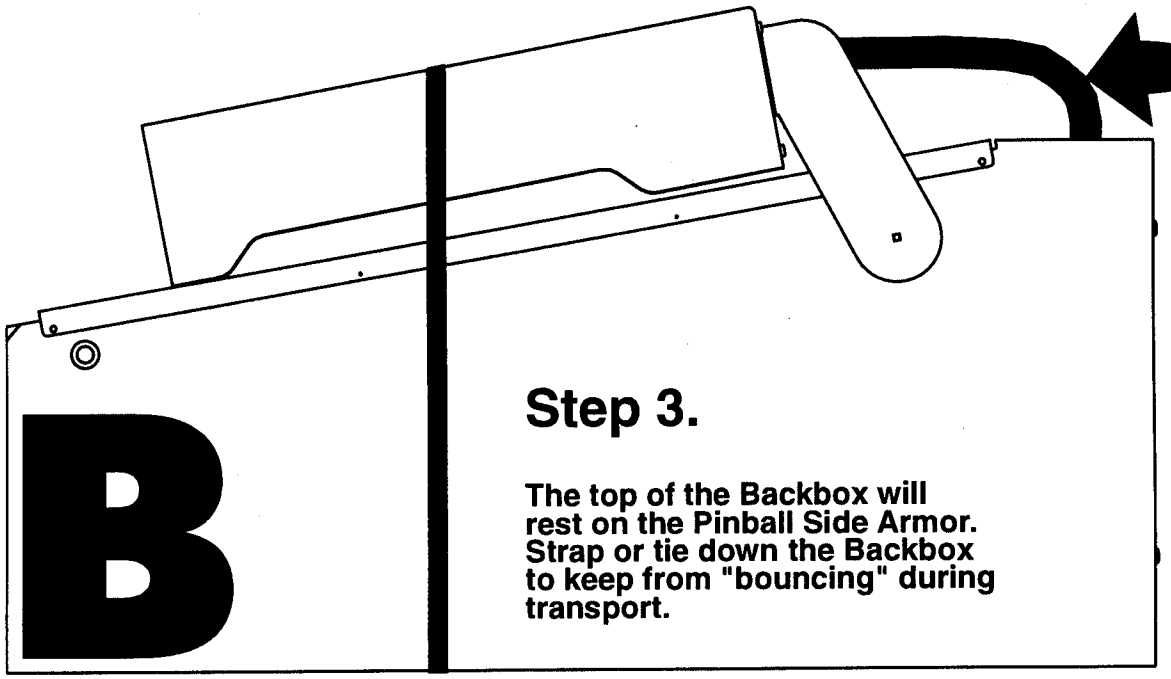
Step 2.

Carefully pull the Backbox forward into the "down" position.

Step 1.

Unlock the Roto-Lock (Counter-Clockwise)

A



Ensure Cables do not bind, pinch or are being pulled tight. Hand-Feed out with Backbox so Cables are not tight.

Step 3.

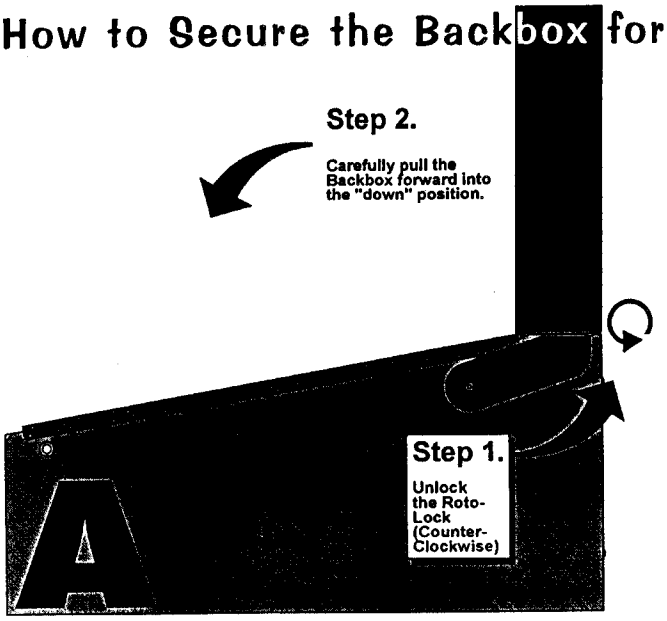
The top of the Backbox will rest on the Pinball Side Armor. Strap or tie down the Backbox to keep from "bouncing" during transport.

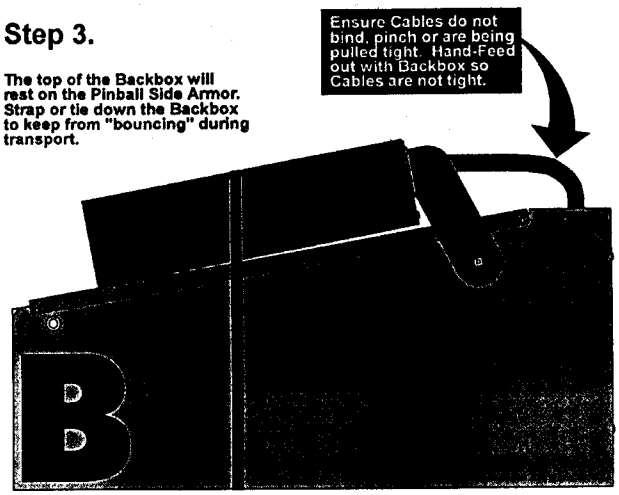
B

Stern Part №: 755-5085-02 © OCT 1999

How to Secure the Backbox for Transporting

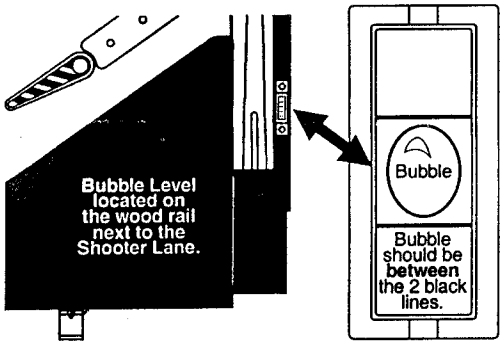
For more Backbox details & part numbers, see Section 4, hapter 1, Backbox Assembly, Pages 50-51.





Leg Leveler Adjustment

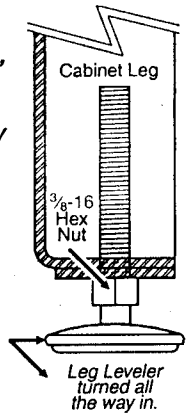
On a LEVEL FLOOR, this cabinet is designed to automatically have a 6.5° pitch without adjusting levelers.



Attach the four (4) Leg Assemblies to cabinet corners with the eight (8) leg bolts provided *(See Sec. 4, Chp. 1, Cabinet - General Parts & Switches, Page 52).*

Start adjustment with the leg levelers *turned all the way in.* **View** the *bubble* in the level provided on the right side wood rail. **Adjust** the front or rear levelers as necessary to cause the bubble to float between the two (2) black lines. **Use** a pinball to roll down the center of the playfield for side-to-side leveling.

YOUR PLAYFIELD PITCH IS NOW AT 6.5° AS REQUIRED FOR PROPER GAME PLAY!



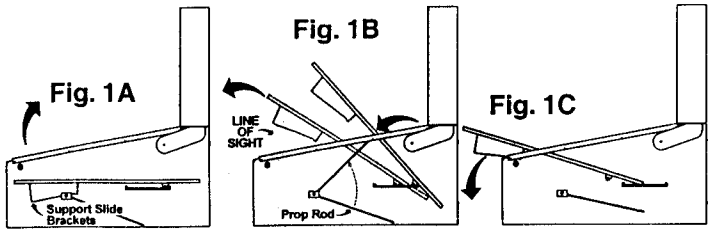
For custom adjustment greater than >6.5° can be acheived by turning out the rear leg leveler(s), however, ***it is not recommended.***

Easy Access Service System - 3 Positions

With the front molding & glass removed, carefully lift the playfield (take care when using the Bottom Arch to hoist).

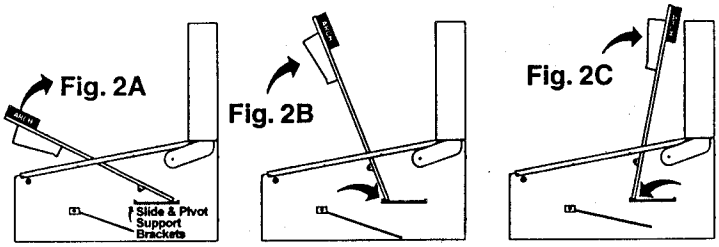
Positions 1 & 2

When lifted high enough, the ***Playfield Support Slide Brackets*** **(Fig. 1A)** can be seen & can clear the cabinet front. At this time, pull the playfield toward the front of the cabinet, checking that the mechanical components clear the cabinet front, then rest the playfield on the ***Playfield Support Slide Brackets*** at the front channel of cabinet **(Fig. 1C)**; Or, the ***Prop Rod*** (located on the right inside of cabinet) can be used by positioning the ***Prop Rod*** end into the receiving playfield hole **(Fig. 1B)**.



Position 3

With the playfield at rest, hold the sides & pull toward the front of the cabinet (approx. 6" to 8"), until resistance is felt from ***Edge Slide Brackets*** stopping against the ***Slide & Pivot Support Brackets*** located on either side of the cabinet **(Fig. 2A)**. At this time, swivel the playfield toward the Backbox, then rest on the top edge **(Fig. 2B & 2C)**.



The Bubble Level is back!
This will ensure Game Pitch is 6.5° (recommended) for proper game play.

Le niveau à bulle est de retour! Celui-ci garantira l'inclinaison de 6,5° recommandée pour jouer sur le "Game Pitch".

Die Wasserwaage ist wieder da! Sie gewährleistet eine empfohlene Spielfeldneigung von 6,5°, die für ein ordnungsgemäßes Spiel erforderlich ist.

Ritorna la livella a bolla! Questo assicura l'inclinazione a 6,5° (raccomandata) per assicurare condizioni corrette per il gioco.

¡Regresa el Nivel de Burbuja! Esto garantiza que el campo de juego del Game Pitch esté a 6.5° (lo recomendado) para jugar apropiadamente.

Leg Leveler Adjustment and use of the Bubble Level

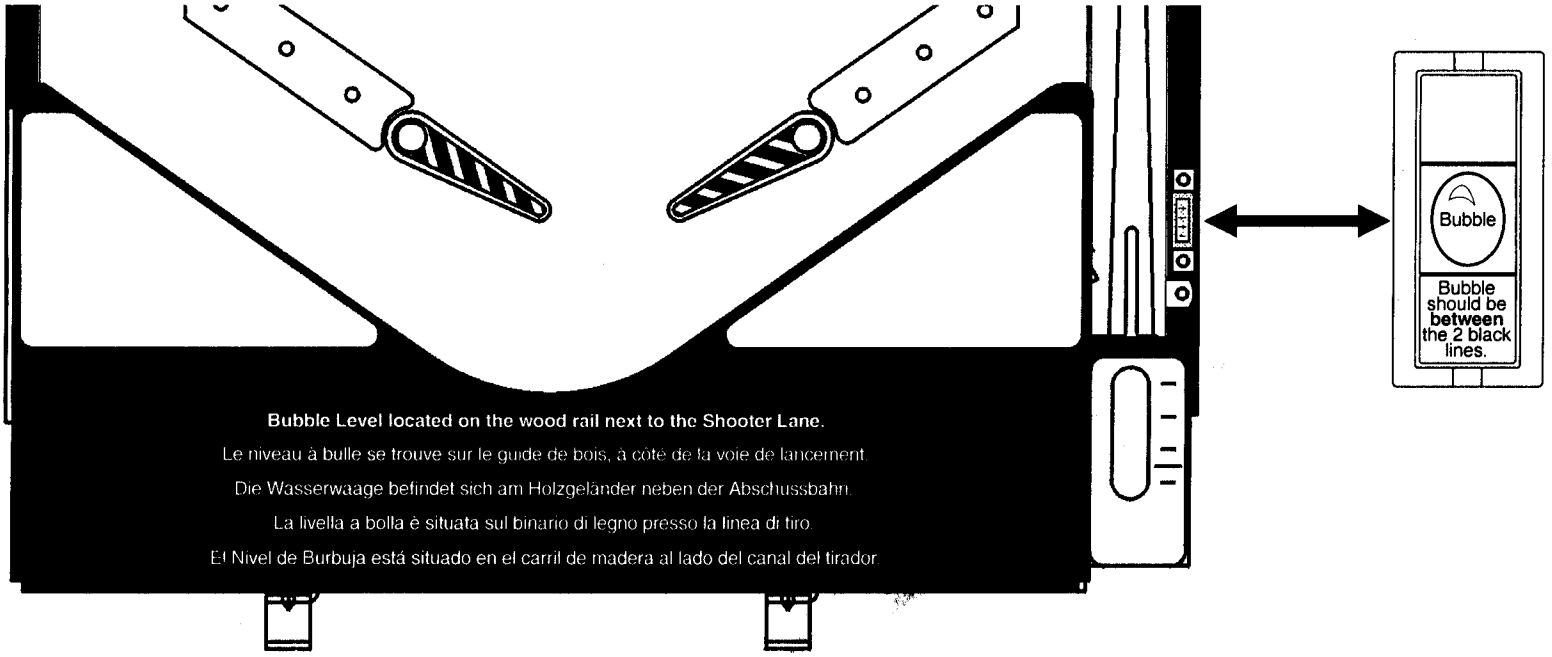
Réglage du niveau du pied et utilisation du niveau à bulle

Verstellen der Beine und Gebrauch der Wasserwaage

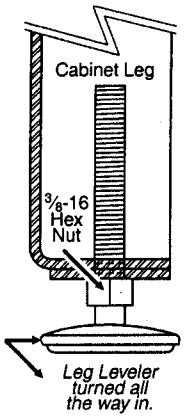
Regolazione dei livellatori delle gambe e uso della livella a bolla

Ajuste del nivelador de patas y uso del nivel de burbuja

Start adjustment with the leg levelers *turned all the way in.*
Commencer le réglage avec le mécanisme d'ajustement du pied entièrement à l'intérieur de celui-ci.
Beim Beginnen mit dem Verstellen müssen die Nivelliervorrichtungen an den Beinen ganz nach innen gedreht sein.
Iniziare la regolazione con i livellatori delle gambe girati completamente all'interno.
Comience el ajuste con los niveladores de patas metidos totalmente hacia dentro.



View the *bubble* in the level provided on the right side wood rail (see above).
Observer la bulle à l'intérieur du niveau situé sur le guide de bois, à droite (voir ci-dessus).
Visieren Sie die „Blase" in der Wasserwaage am rechten Holzgeländer an (siehe oben).
Osservare la "bolla" nella livella che si trova a destra del binario di legno (vedere più sopra).
Vea la *burbuja* en el nivel provisto en el carril de madera del lado derecho (vea arriba).



Adjust the front or rear leg levelers as necessary to cause the bubble to float between the 2 black lines.
Régler les dispositifs de mise à niveau à l'avant et à l'arrière de telle sorte que la bulle flotte entre les deux lignes.
Verstellen Sie bei Bedarf die vorderen oder hinteren Beine, so dass die Blase zwischen den beiden schwarzen Linien schwimmt.
Regolare i livellatori delle gambe anteriori o posteriori fino a che la bolla flotti tra le due linee nere.
Ajuste los niveladores de las patas delanteras o traseras según sea necesario para que la burbuja flote entre las dos líneas negras.

Use a pinball to roll down the center of the playfield for side-to-side leveling.
Faire rouler une balle vers le centre de l'aire de jeu pour niveler d'un côté à l'autre.
Lassen Sie einen Pinball in der Mitte des Spielfelds entlang rollen, um das Spielfeld seitlich zu nivellieren.
Usare un flipper per rotolare verso il basso al centro del campo di gioco per la livellazione lato a lato.
Use una bola que ruede hacia abajo por el centro del campo de juego para conseguir la nivelación de lado a lado.

FIND-IT-IN-FRONT: Dr. Pinball Section Explained

The key technical data from various parts of the manual were extracted and combined into the **"Find- It-In-Front: Dr. Pinball Section."** This section (pages **DR. ❶ - ⑩**) will assist the technician in locating important technical information needed to troubleshoot the Pinball Machine. **Dr. Pinball** is also available in a Flow Chart Help Format in the Game Display. To access, enter the **Portals™ Service Menu**.

How It Works

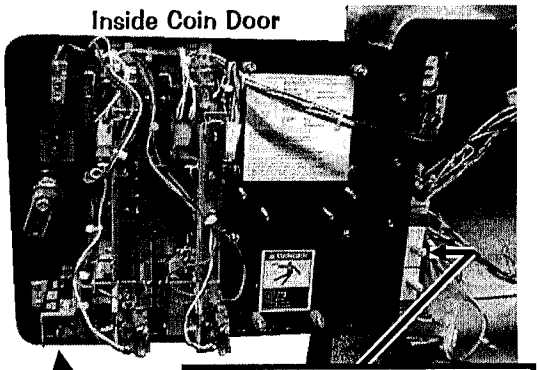
First, the operator / technician must enter the ***Service Menu Mode*** (for a complete description of the **Portals™ Service Menu** and **ICONS *Read!*** Section 3, Chapter 1). To get into the ***Service Menu Mode***, power-up the game (if not already) and open the **Coin Door**. On the **Coin Door** is the **Portals™ Service Switch Set** (**Red**, **Green** & **Black Buttons**).

Step 1: Push down the **Black "BEGIN TEST" Button**. Looking at the Video Display you will momentarily see the introductory screen followed by the **MAIN MENU**.

Step 2: Move through the Menus by pushing the **Red "LEFT"** or **Green "RIGHT" Buttons**.

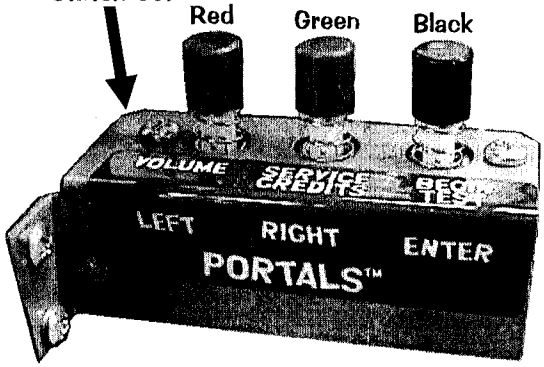
Step 3: Select or activate the *Icons* by pushing the **Black "ENTER" Button**.

Inside Coin Door



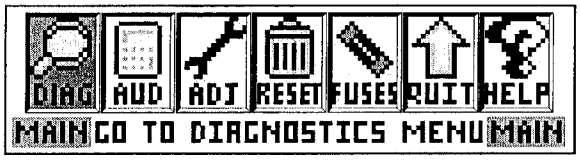
If Coil & Flashlamp Testing, the Playfield Power Interlock Switch must be pulled out.

Portals™ Service Switch Set



While in the **Portals™ Service Menu**, the **Start Button** can be used in lieu of the **Black Button**; the **Left** & **Right Flipper Buttons** can be used in lieu of the **Red** & **Green Buttons**. However, in *Switch* or *Active Switch Tests* ***only*** the **Red** & **Green Buttons** can be used.

In our **Portals™ Service Menu**, selecting the "DR." *Icon* will bring the operator/technician into Dr. Pinball (Flow Chart Menus), the "on-screen" diagnostic aide. This is a feature that will allow you to utilize the power of the microprocessor assisting in troubleshooting a problem with the machine in a Flow Chart format *(Just follow along & answer the questions.)*.



While in the **MAIN MENU**, select the "DIAG" *Icon*, then select the Cross "DR." *Icon* (the last *Icon* before the "PREV" *Icon*). This will bring you (the operator / technician) into **DR. PINBALL** (Flow Chart Menus) which offers you a choice of three (3) Sub-Menus: Coil "DR.," Switch "DR." & Lamp "DR." *Icons*. Selecting a particular sub-menu will give you a choice of which specific Flipper, Coil, Switch or Lamp circuit needs to be diagnosed. The display will now ask a question or give a procedure to follow such as *"Does the lamp turn on?"* or *"Check bridge rectifier BR-20, if short replace."* When *Dr. Pinball* asks a question or requests a procedure, respond by selecting the appropriate *Mini-Icon*, and continue.

From the Main Menu in Portals™ GO TO DIAGNOSTICS MENU →

From the Diagnostics Menu GO TO DR. PINBALL →

From the Dr. Pinball Menu

GO TO COIL, SWITCH OR LAMP FLOW CHARTS

The following are the *Mini-Icons* with explanations for the **Dr. Pinball Sub-Menus**:

Select a Coil, Lamp, Switch or Flipper to diagnose with the "-" or "+" *Icon*; select the "RUN" *Icon* to activate the choice. The "PREV" *Icon* goes back to previous question. The "QUIT" *Icon* exits Portals completely.

Seen when a question is being asked on the Display. Select the "YES" *Icon* or "NO" *Icon* to answer the question given. The "END" *Icon* lets you select a new item to test.

Seen when diagnosis is given. Select any *Icon* for your next step. The "?" *Icon* gives Help.

In Coil Flow Chart Menu, select the "PULSE" *Icon* to pulse the coil selected.

For proper operation of MONOPOLY® Pinball,

FOUR (4) PINBALLS MUST BE INSTALLED!

DIAGNOSTIC AIDS

The *display reads* "OPERATOR ALERT..."

— A message displayed during Game Mode or Power-Up to alert the operator of a problem.

OPERATOR ALERT works by monitoring any *switch activated coil* that has the potential to trap a ball when disabled (e.g. in the Auto Launch, Scoop, Eject, etc.). If this assembly has a closed switch indicating a ball is stuck or the switch is *stuck closed*, the **CPU/Sound Board** will activate the coil ten times. If the switch remains closed, the game will display a message indicating there is a problem (e.g. "**OPERATOR ALERT AUTO LAUNCH NOT WORKING**"). This not only warns the operator of a problem immediately, but indicates exactly where the operator should look to resolve it.

The *display flashes* "OPEN THE COIN DOOR"

— This indicates that CMOS RAM memory (CPU Loc. U212) has been corrupted.

This is caused by either failure in memory (e.g. batteries are dead or faulty **RAM**) or upon installation of updated version of code. Opening the Coin Door will initiate a Factory Restore, by opening the Memory Protect Switch. Check battery voltage at **VBATT Test Point** on the **CPU/Sound Board**.

CPU DIP SWITCH SETTINGS

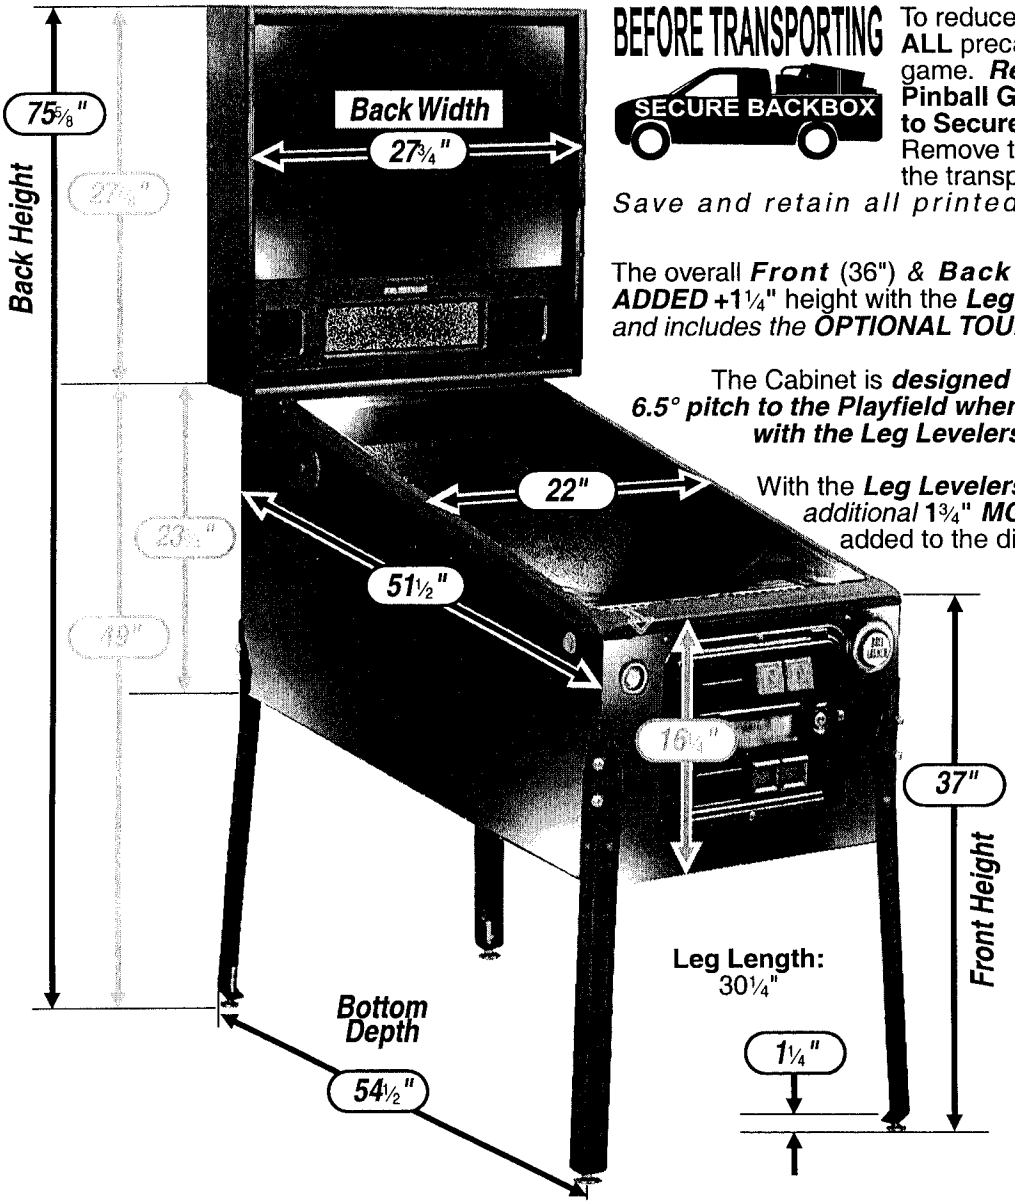
POWER REQUIREMENTS

This game ***must be connected to a properly grounded outlet to reduce shock hazard*** & insure proper game operation. See Sec. 5, Schematics & Troubleshooting, Chp. 3, Cabinet Wiring (Transformer Power Wiring), for transformer connections required for **Normal**, **High**, and **Low Line** conditions.

Normal Line:	**110v AC - 125v AC @ 60Hz**	
Domestic uses an 8AMP 250v Slo-Blo Fuse.	**AVG OPERATION** CURRENT: **2.8AMP** WATTAGE: **329w**	**MAX OPERATION** CURRENT: **8AMP** WATTAGE: **940w**
High Line:	**218v AC - 240v AC @ 50Hz**	
Export uses 5AMP 250v Slo-Blo Fuses. (*England & Hong Kong use an 8AMP 250v S/B Fuse.)	**AVG OPERATION** CURRENT: **1.8AMP** WATTAGE: **412w**	**MAX OPERATION** CURRENT: **5AMP** | **8AMP*** (England & Hong Kong use an 8A Fuse.) WATTAGE: **1145w** | **1832w***
Low Line:	**95v AC - 108v AC @ 50Hz / 60Hz**	
Export Japan Only uses an 8AMP 250v Slo-Blo Fuse.	**AVG OPERATION** CURRENT: **2.6AMP** WATTAGE: **264w**	**MAX OPERATION** CURRENT: **8AMP** WATTAGE: **812w**

TRANSPORTATION



BEFORE TRANSPORTING

To reduce the possibility of damage, observe **ALL** precautions whenever transporting the game. ***Read & follow*** *Section 1, Chapter 1,* **Pinball Game Set-Up Procedures**, & **How to Secure the Backbox for Transporting**. Remove the legs & secure the game within the transporting vehicle.

Save and retain all printed information on the game.

The overall ***Front*** (36") *&* ***Back*** (85½") dimensions reflect the ***ADDED*** **+1¼"** height with the ***Leg Levelers*** *turned all the way* ***in*** *and includes the* ***OPTIONAL TOURNAMENT HEADER;***

The Cabinet is ***designed*** *to give the recommended* ***6.5° pitch to the Playfield when all four (4) Legs are installed with the Leg Levelers*** *turned all the way* ***in***.

With the ***Leg Levelers*** *turned all the way* ***out***, *an additional* **1¾"** ***MORE*** to the overall height should be added to the dimensions.

Shipping Box Dimensions

Height: 56"
Width: 31"
Depth: 31"

Approximate Unboxed Weight:

Wt. 260lbs. (+/- 10)

CAUTION

At least 2 people are required to move and maneuver this game. Use proper moving equipment & extreme care while handling!

GAME DIMENSIONS

Pinball Game Service Manual General Table of Contents

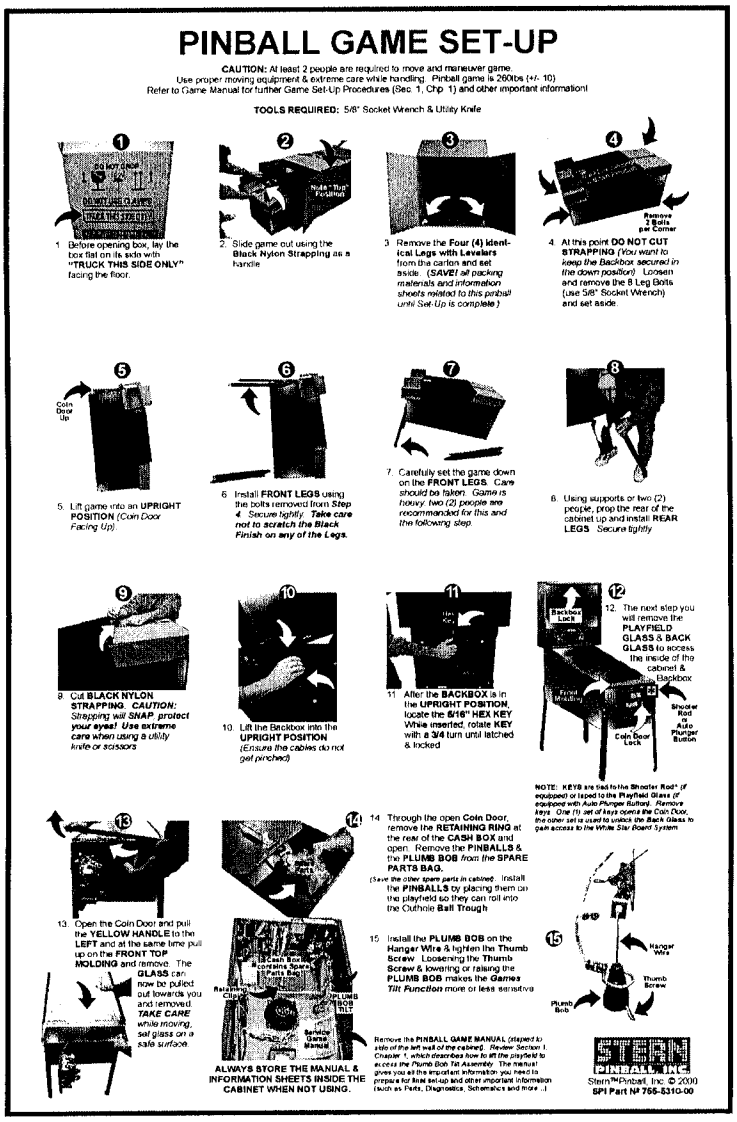
See Sections 3 & 5, Table Of Contents, for details of that Section and it's Chapters.

Section 4, Chapter 1, Parts Identification & Location (The Pink Pages) Continued on the Next Page

After Set-Up

Pinball Game Set-Up Procedures

...after reading the Pinball Game Set-Up Instruction Sheet (SPI Part Nº 755-5310-00) included with your New Pinball Game, continue with the below procedures:



With the Back Glass Removed:

1. Check all connectors in the Backbox for loose wire terminations. Reseat any loose wire by pushing in on the terminal. **Push on all** connectors plugged into the CPU/Sound Board, I/O Power Driver Board, and the Display Power Bd. to check that they are properly seated. Ensure Fluorescent Light Tube is seated correctly. Check that all fuses are seated properly. *Close and lock the Backbox and secure its' keys back inside the Coin Door.*

With the Playfield Glass Removed:

2. Make sure the proper amount of pinballs were installed *(Amount of balls are always specified on decal attached to the lock down assembly and top of Page* ***DR.*** ❸ *in the beginning of this manual).*

3. Remove all shipping tie downs, shipping blocks, packing foam, shipping instruction pages, etc. (if any) from the game. ***READ ALL PRINTED INFORMATION!*** Shipping instructions, labels and/or decals describe warnings, cautions, and/or important information specific to the game. **SAVE ALL PRINTED INFORMATION.**

4. Raise the playfield and support it, by lifting the **Prop Rod** *(located on the left, inside the cabinet).* The end of the Prop Rod should be placed into the hole under playfield. See the illustration **"Easy Access Service System"** *on Page 4.*

5. Visually inspect all cabinet cables and connector terminations; ensure no wires or cables are pinched and that cable harnesses are not pulled tight.

6. Lower the playfield and ensure game is **level side-to-side** by adjusting Leg Levelers, if required. See the illustration **"Leg Leveler Adjustment"** *on Page 4.* With the Leg Levelers turned all the way in (1.25" **from floor to bottom of leg)**, the **game pitch is 6.5°**; *depending on the condition of the floor, adjust the Leg Levelers as required.*

USE THE BUBBLE LEVEL ON THE WOOD RAIL (LOWER RIGHT) TO DETERMINE IF LEVEL IS ACHEIVED. BUBBLE SHOULD APPEAR BETWEEN THE 2 BLACK LINES. SEE PAGE 4 FOR AN ILLUSTRATION.

The playfield incline affects difficulty of play. Use the recommended incline; Game difficulty is best varied using game adjustments.

With the Coin Door Open:

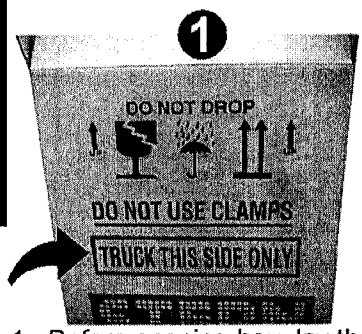
7. If desired, perform any self tests at this time. See **Section 3, Chapter 1, Portals™ Service Menu Introduction**, and **Chapter 2, Go To Diagnostics Menu**, for instructions on how to *enter "Begin Play Test"* and *"Game Specific"* to test components on the game.

8. If desired, make **Game Pricing (Standard and/or Custom)** and **Add-A-Ball, Novelty,** or **X-Ball Play** adjustments at this time. See **Section 3, Chapter 4, Go To Adjustments Menu**, for instructions on how to enter adjustments. Follow instructions in the tables provided in the manual for suggestions of customizing.

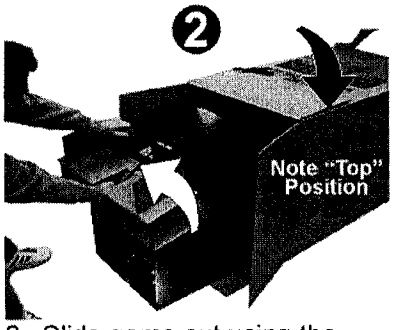
CE **Per CE:** "The appliance has to be placed in a horizontal position." "This appliance is not to be cleaned by a Water Jet."

Pinball Game Set-Up Future Reference

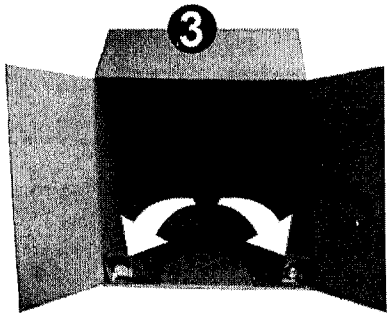
CAUTION: At least 2 people are required to move and maneuver game.
Use proper moving equipment & extreme care while handling. Pinball game is 260lbs (+/- 10).
Refer to Game Manual for further Game Set-Up Procedures (Sec. 1, Chp. 1) and other important information!
TOOLS REQUIRED: 5/8" Socket Wrench & Utility Knife



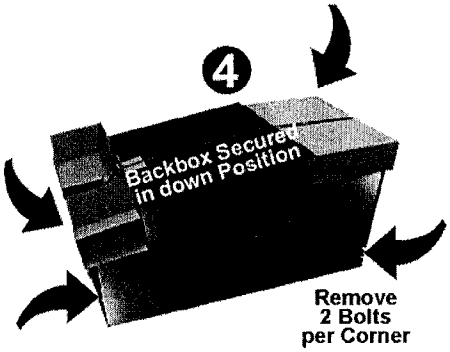
1. Before opening box, lay the box flat on its side with **"TRUCK THIS SIDE ONLY"** facing the floor.



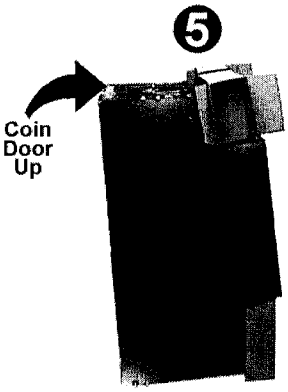
2. Slide game out using the **Black Nylon Strapping** as a handle.



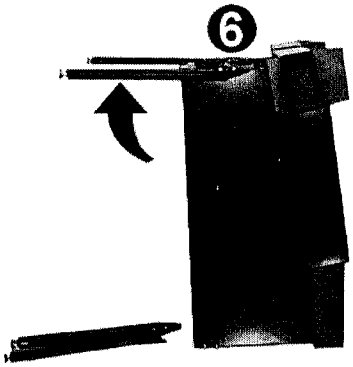
3. Remove the **Four (4) Identical Legs with Levelers** from the carton and set aside. (***SAVE!*** *all packing materials and information sheets related to this pinball until Set-Up is complete.)*



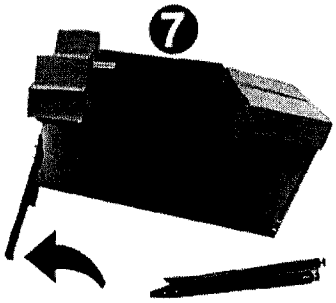
4. At this point **DO NOT CUT STRAPPING** *(You want to keep the Backbox secured in the down position).* Loosen and remove the 8 Leg Bolts (use 5/8" Socket Wrench) and set aside.



5. Lift game into an **UPRIGHT POSITION** *(Coin Door Facing Up).*



6. Install **FRONT LEGS** using the bolts removed from ***Step 4***. *Secure tightly.* ***Take care not to scratch the Black Finish on any of the Legs.***

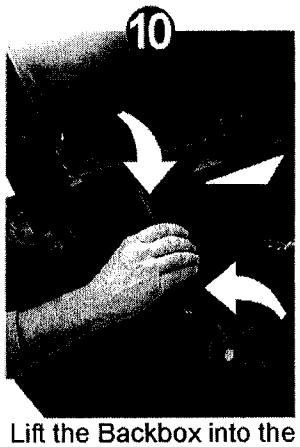


7. Carefully set the game down on the **FRONT LEGS**. *Care should be taken...Game is heavy, two (2) people are recommended for this and the following step.*

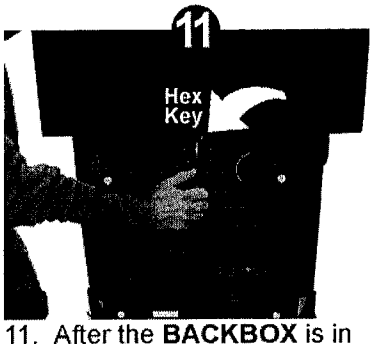
8. Using supports or two (2) people, prop the rear of the cabinet up and install **REAR LEGS**. *Secure tightly.*

9. Cut **BLACK NYLON STRAPPING**. ***CAUTION:*** *Strapping will* ***SNAP, protect your eyes! Use extreme care*** *when using a utility knife or scissors.*

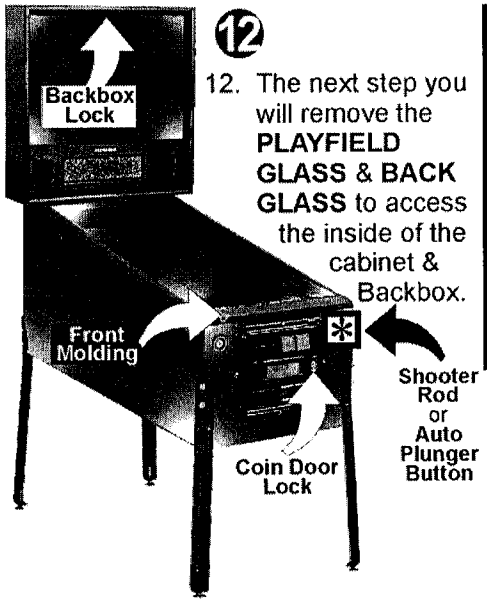
Pinball Game Set-Up Future Reference Continued



10. Lift the Backbox into the **UPRIGHT POSITION** *(Ensure the cables do not get pinched).*



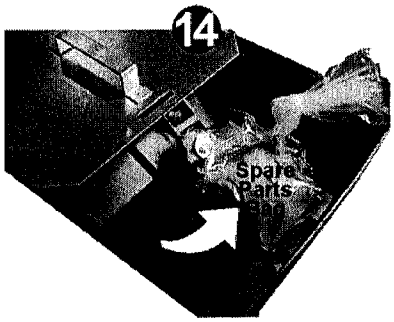
11. After the **BACKBOX** is in the **UPRIGHT POSITION**, locate the **5/16" HEX KEY**. While inserted, rotate **KEY** with a **3/4** turn until latched & locked.



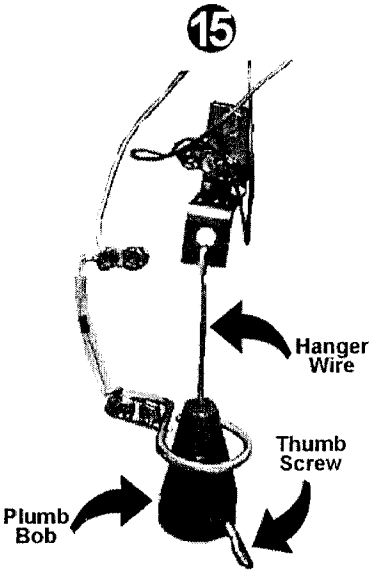
12. The next step you will remove the **PLAYFIELD GLASS** & **BACK GLASS** to access the inside of the cabinet & Backbox.

NOTE: KEYS are tied to the **Shooter Rod*** *(if equipped)* or taped to the **Playfield Glass** *(if equipped with Auto Plunger Button). Remove keys. One (1) set of keys opens the Coin Door, the other set is used to unlock the* ***Back Glass*** *to gain access to the White Star Board System.*

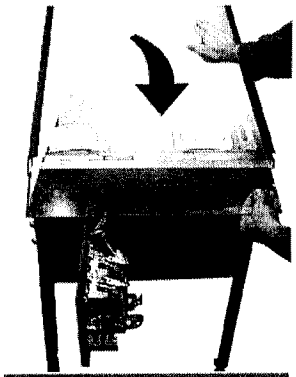
13. Open the Coin Door and pull the **YELLOW HANDLE** to the **LEFT** and at the same time pull up on the **FRONT TOP MOLDING** and remove. The **GLASS** can now be pulled out towards you and removed. ***TAKE CARE*** *while moving; set glass on a safe surface.*

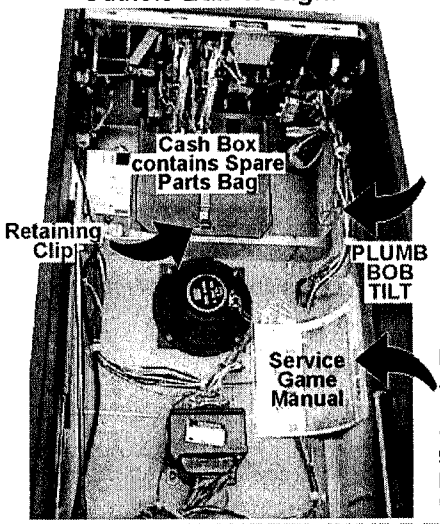


14. Through the open **Coin Door**, remove the **RETAINING RING** at the rear of the **CASH BOX** and open. Remove the **PINBALLS** & the **PLUMB BOB** *from the* **SPARE PARTS BAG.**
(Save the other spare parts in cabinet).
Install the **PINBALLS** by placing them on the playfield so they can roll into the Outhole **Ball Trough**.



15. Install the **PLUMB BOB** on the **Hanger Wire** & tighten the **Thumb Screw**. Loosening the **Thumb Screw** & lowering or raising the **PLUMB BOB** makes the ***Games Tilt Function*** more or less sensitive.



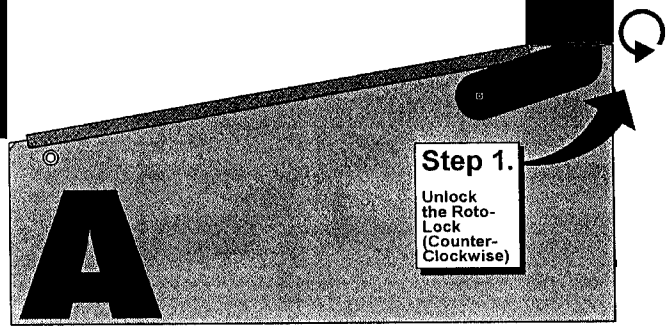


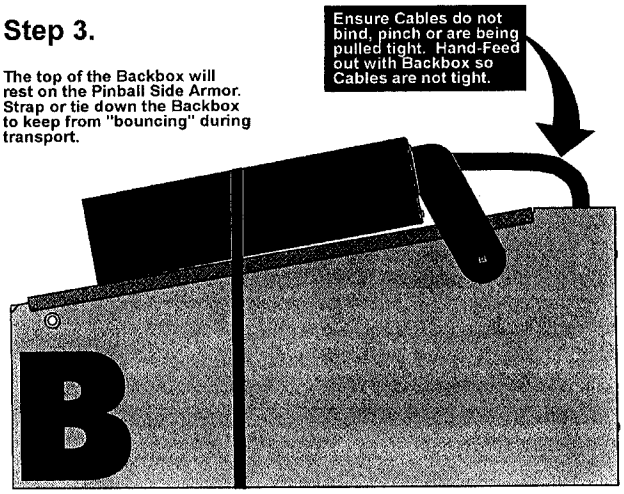
Remove the **PINBALL GAME MANUAL** *(stapled to side of the left wall of the cabinet). Review Section 1, Chapter 1, which describes how to lift the playfield to access the Plumb Bob Tilt Assembly.* The manual gives you all the important information you need to prepare for final set-up and other important information (such as Parts, Diagnostics, Schematics and more...).

ALWAYS STORE THE MANUAL & INFORMATION SHEETS INSIDE THE CABINET WHEN NOT USING.

How to Secure the Backbox for Transporting

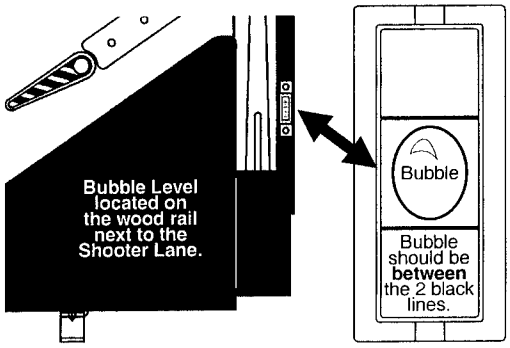
For more Backbox details & part numbers, see Section 4, hapter 1, Backbox Assembly, Pages 50-51.





Leg Leveler Adjustment

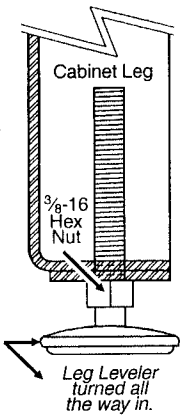
On a LEVEL FLOOR, this cabinet is designed to automatically have a 6.5° pitch without adjusting levelers.



Attach the four (4) Leg Assemblies to cabinet corners with the eight (8) leg bolts provided *(See Sec. 4, Chp. 1, Cabinet - General Parts & Switches, Page 52).*

Start adjustment with the leg levelers *turned all the way in.* **View** the *bubble* in the level provided on the right side wood rail. **Adjust** the front or rear levelers as necessary to cause the bubble to float between the two (2) black lines. **Use** a pinball to roll down the center of the playfield for side-to-side leveling.

YOUR PLAYFIELD PITCH IS NOW AT 6.5° AS REQUIRED FOR PROPER GAME PLAY!



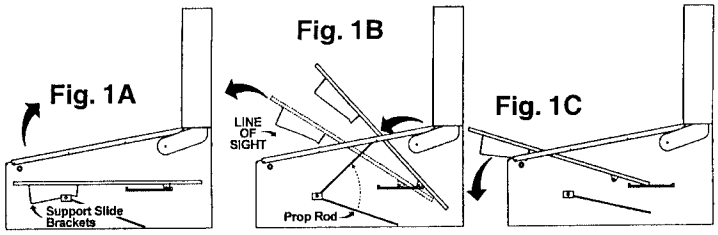
For custom adjustment greater than >6.5° can be acheived by turning out the rear leg leveler(s), however, ***it is not recommended.***

Easy Access Service System - 3 Positions

With the front molding & glass removed, carefully lift the playfield (take care when using the Bottom Arch to hoist).

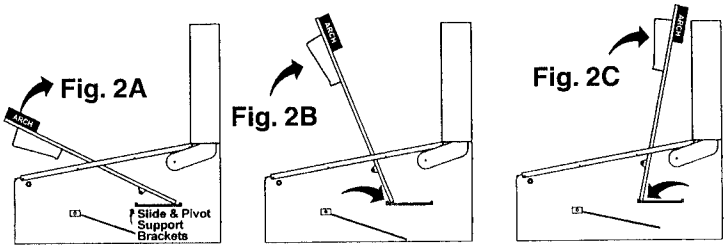
Positions 1 & 2

When lifted high enough, the ***Playfield Support Slide Brackets*** (**Fig. 1A**) can be seen & can clear the cabinet front. At this time, pull the playfield toward the front of the cabinet, checking that the mechanical components clear the cabinet front, then rest the playfield on the ***Playfield Support Slide Brackets*** at the front channel of cabinet (**Fig. 1C**); Or, the ***Prop Rod*** (located on the right inside of cabinet) can be used by positioning the ***Prop Rod*** end into the receiving playfield hole (**Fig. 1B**).



Position 3

With the playfield at rest, hold the sides & pull toward the front of the cabinet (approx. 6" to 8"), until resistance is felt from ***Edge Slide Brackets*** stopping against the ***Slide & Pivot Support Brackets*** located on either side of the cabinet (**Fig. 2A**). At this time, swivel the playfield toward the Backbox, then rest on the top edge (**Fig. 2B & 2C**).



Game Operation & Features

Start of Game Features

Starting a Normal Game

Insert coin(s). The game generates a sound for the first coin & for each subsequent coin with the display indicating the number of credits posted. Press the **Start Button** and a start-up sound is produced, and the posted credits are reduced by one. Subsequent players can be added (**up to 4 can play!**) by pressing the **Start Button** before the end of ball 1 (with sufficient credit in the game).

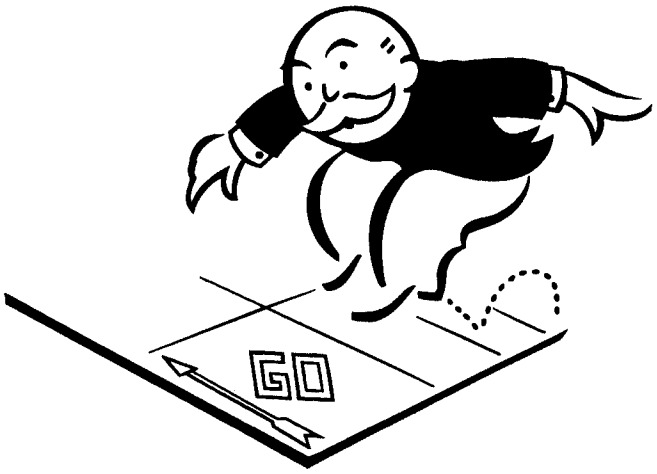
The display now indicates the player or # of players selected from the total depressions of the **Start Button**. The display indicates the ball in play, and a ball is served to the *Shooter Lane*. An introduction is shown followed by Skill Shot Graphics and/or instructions. Pressing the **Start Button** after ball 1 of any player will start a new game (if credits are available), ***but only*** if the **Start Button** is depressed for 2-3 seconds. This delay is to avoid accidental "re-starts" of a game. *(Note: Any partial credit remaining during game play after the end of ball 1, or power down, will be eliminated.)*

Starting Team Play (Doubles!)

Team Play is a four player game. The totals for players 1 & 3 (Team 1) and players 2 & 4 (Team 2) are displayed individually as well as the combined score for both teams. Team Play only works in a 4-Player game. In all other cases, the individual scores are shown.

Starting League Play

After credit is posted, while holding in the **Left Flipper Button**, press the **Start Button**. League Play has now begun. The differences between Normal Game Play and League/Tournament Play are: There is no "auto-percentaging" (awarding extra balls, specials, etc. to players with very low scores on the second or third ball). Mystery Features are awarded in a set order rather than random in Normal Game Play. Percentage Game Features are not automatically advanced as they are for the Regular Play Features.



During Game Features

Feature Mode & Combination Shots

Features are lit on the playfield and started by completing *certain shots* (e.g. completion of Target Banks, Orbit(s), Ramp(s) and/or any combination of the shots).

Multiball

Multiball is started after completion of certain features. Multiball may vary with the amount of balls used depending on game style.

Replay Feature

Replay awards are given as the player exceeds a High Score Level during game play. This can be adjusted with **Adj. 3, Replay Awards** (Default = **CREDIT**). Players exceeding the High Score Levels can receive: **CREDIT**, **EXTRA BALL**, or **SPECIAL**. Adjust to **NONE** if a replay award is not desired.

End of Game Features

Game Endings

When all player(s) have played all balls (including any Extra Balls), the game ends. If power is interrupted during the course of a game, it will end that game (***see Starting a Normal Game***). Closure of the Plumb Bob Tilt Switch according to the number of tilts set, **Adj. 13, Tilt Warnings** (Default = **1**) or prolonged closure, will end the current Ball-In-Play. Closure of the Slam Tilt Switch on the Coin Door ends the current game(s).

Match Feature

At the end of each ball, earned bonuses are collected. At the end of the last ball of a game (including any extra balls, if applicable), earned bonuses are collected, then the system produces a random 2-digit number (a multiple of 10; 00 to 90). Matching the last 2 digits of the player's score with this number awards a credit. In **Adj. 11, Match Percentage** (Default = **8%**) can be changed from 0-10%. Changing the percentage to **0% displays** the *"Match Animation"* at the end of the game, however, will never match nor award anything. Changing this adjustment to **OFF** will **not display** the *"Match Animation"* nor award anything.

Entering Initials/Name

If player achieved a new high score in a game or acheived a special feature (if given) the player may enter 3 Initials. In **Adj. 32, High Score Initials** (Default = **3 Initials**) can also be changed to **10-Letter Name**. Use the **Flipper Buttons** to choose a letter or character as seen on the Dot Display. Hitting the **Start Button** locks in the letter or character and proceeds to the next letter. The game then proceeds into the *Game-Over Mode* and then to the *Attract Mode*.

*Note: **Adj. 34, Custom Message** (Default = **ON**) can be displayed during the Attract Mode; enter letters in the same fashion.*

For more details with Adjustments, see Sec. 3, Chp. 4.

Continued Next Page.

Auto Percentaging

This game is equipped with Auto Percentaging, **Adjustment 1, Replays: Fixed/Auto** (Default = **12%**, adjustable). The *Replay Percent* is automatically adjusted or you can set a *Fixed Replay Score*. Four levels may be selected. Adjustments allow awarding of a "CREDIT" (or your setting) as each level is exceeded. This can be adjusted with, **Adj. 3, Replay Award** (Default = **Credit**). With the ***Autopercentage Feature***, if the actual replay percentage is higher or lower than that desired, the game will automatically adjust for the new recommended percentage score(s). You may choose to make a different "score-to-beat" adjustment; this is done by utilizing **Adj. 2, Replay Levels**. *For more details with Adjustments, see Section 3, Chapter 4, Go To Adjustments Menu.*

Instruction Card

Below is a **COPY** of the Game Instruction Card (SPI Nº: 755-5175-00 USA) which is included with every game. If your card is lost or damaged, simply **COPY** this page and *cut out* the Instruction Card as a *temporary replacement* until a *new card is ordered.*

(***Hint:*** **COPY & CUT** along the dotted line and fold in the center to keep the "COPY" sturdy.)

COPY & CUT

MONOPOLY®

For more detailed game rules, visit our website @ www.SternPinball.com and click on the "MONOPOLY®" or "Game Archive" Pop Bumper Link.

FOLD HERE

OBJECT: *Own it all.* Collect as much property as possible.

STERN PINBALL INC. Design by Pat Lawlor Design Inc.

SKILL SHOT: The **WATER WORKS** hole collects Skill Shot.

COLLECT PROPERTY: Shoot for the **ROLL & COLLECT** area when lit. This will move you around the board & collect the property you land on. When you collect any property watch the display for instructions on how to play that mode. **ROLL & COLLECT** IS ***RE-LIT*** on the RIGHT RAMP.

EXTRA BALL: Extra Ball is awarded by getting the **ELECTRIC COMPANY** to a high power **%**. The upper POPS (Bumpers) raise the **ELECTRIC COMPANY'S** power.

BONUS X: Awarded on outer loop shots when lit, or when completing the Ⓐ Ⓑ Ⓖ lanes.

MULTIBALL: Advancing around the board to **GO** lites **LOCK**. **LOCK 2** balls by shooting for the CENTER RAMP. Then start **MULTIBALL** by shooting up the RIGHT RAMP.

CASH GRAB: The LEFT RAMP closes the bank door. Hitting the closed door spells "**B-A-N-K**". This starts **CASH GRAB**. ***IN CASH GRAB, ALL RAMPS AWARD BIG POINTS!***

JACKPOT: While in **MULTIBALL** shoot for the LEFT RAMP or the **ELECTRIC COMPANY**. The TRAIN RAMP ***RE-LITES JACKPOT.***

CHANCE: Shoot for the left **CHANCE ? CARD** scoop when lit for random awards.

HINT: Collect all the property to play **LAND GRAB**!

MONOPOLY®

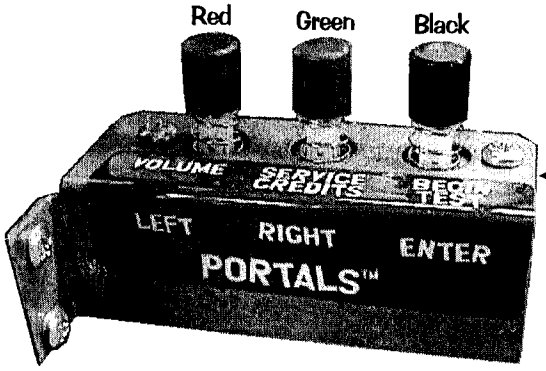
Note to Beginners: To score better, shoot at the **((FLASHING SHOTS))** *!!*
Be sure to LOOK UP at the Dot Display for instructions when possible.

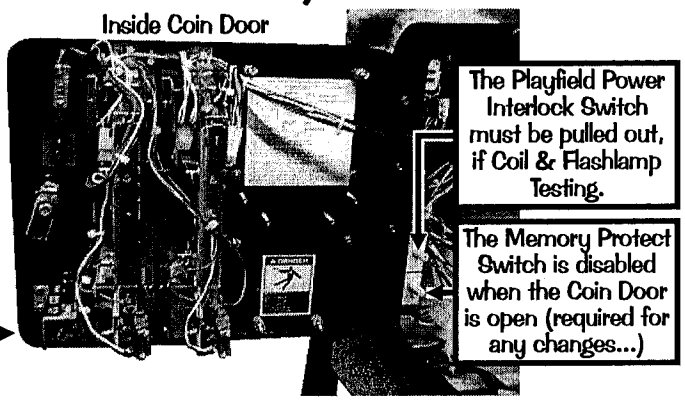
Portals™ Service Menu Introduction

Section 3
Table of Contents

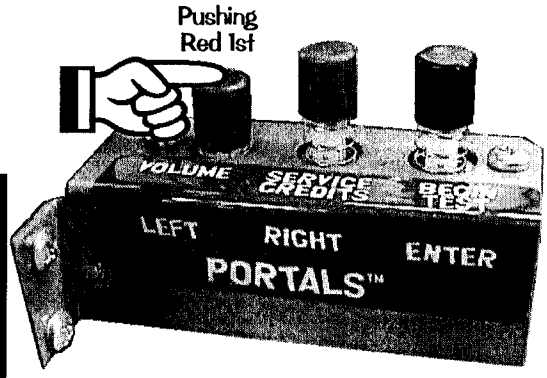
Service Switch Set (Red, Green & Black Buttons) Access & Use

The ***Service Switch Set*** provides access for ***three (3) functions*** available for your use. They are **Volume Menu, Service Credits Menu** and **Portals™ Service Menu**. All are accessed separately depending on which colored button (**Red, Green** or **Black**) is ***pushed first.***





To access any of these ***three (3) functions*** you must first open the **Coin Door** (see pictorial above) with the Game in the ***Attract Mode*** *(not already in any Function or Menu stated below).*

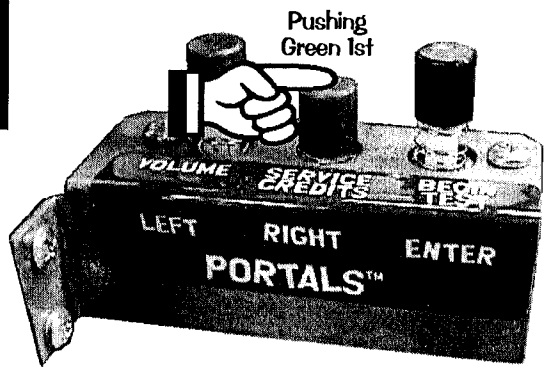


Function 1, Volume Menu

Pushing the ***Red Button*** first, enters the ***Volume Menu***. While in this Mode, to **DECREASE** the volume, hold down or depress the **Red "LEFT" Button** until desired the volume is achieved; to **INCREASE** the volume, hold down or depress the **Green "RIGHT" Button** until the desired volume is achieved.

Note: *Pushing the **Left** or **Right Flipper Buttons** operates the same as the **Red** or **Green Buttons** of the Service Switch Set, while in this Volume Mode.*

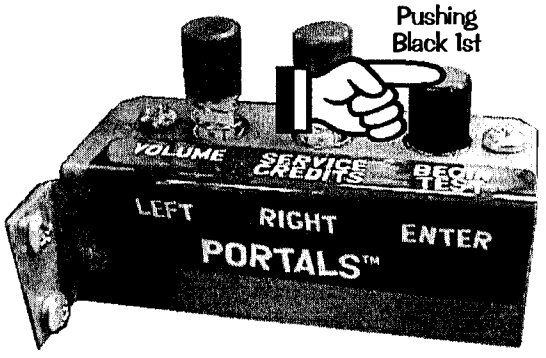
Set between **0** and **31**; **15** is the *Factory Default*. Once your adjustments are made, this menu will ***automatically exit*** a few seconds after the last button depression.



Function 2, Service Credits Menu

Pushing the ***Green Button*** first, adds ***Service Credits*** *(will not affect your audits as "paid" credits).* This is useful for the technician to test the game in regular play without affecting the game audits. Each depression adds **1 credit**; up to **50 credits** can be applied. **Adjustment 15, Credit Limit**, (Default = **30**) determines this, however, it can be changed from 04-50; see Chapter 4 of this Section for details). Once your credits are added, this menu will ***automatically exit*** a few seconds after the last button depression.

Note: *This function is disabled if **Adjustment 33, Free Play,** is set to **YES**. The Service Credits are limited to the Credit Limit in addition to any paid credits present in the game (e.g. If the Credit Limit is 30, and there are 8 paid credits present, only 22 Service Credits can be applied.).*



Function 3, Portals™ Service Menu

Pushing the ***Black Button*** first, enters the ***Portals™ Service Menu***. Once in, move through the menus and sub-menus by pushing down or depressing the **Red "LEFT"** or **Green "RIGHT" Buttons**.

Note: *Pushing the **Left** or **Right Flipper Buttons** operates the same as the **Red** or **Green Buttons** of the Service Switch Set, while in this Service Mode.*

Select or activate the *Icon* chosen *(the Icon will be "flashing")* by pushing down or depressing the **Black "ENTER" Button**.

Note: *Pushing the **Start Button** operates the same as the **Black Button** of the Service Switch Set, while in this Service Mode.*

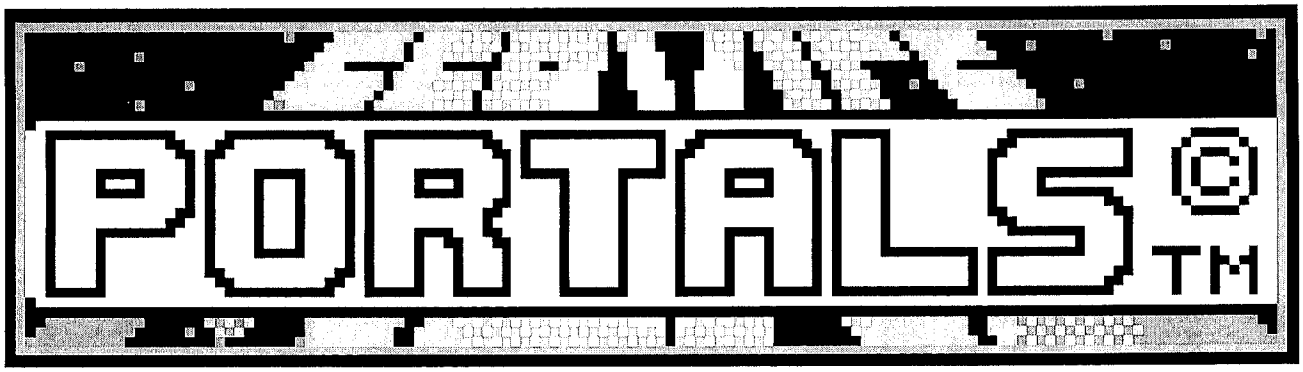
Please read *the remainder of this Chapter for more information on the **Portals™ Service Menu**. The remaining six (6) Chapters of this Section explains all **Icons & Menus** in detail. **Read! Read! Read!***

Important: The ***Dual Switch Bracket*** holds the ***Playfield Power Interlock*** & ***Memory Protect Switches***. It is located just inside the Coin Door frame *(see pictorial of the **Coin Door** on the previous page)*. The Button Switch at the top is the ***Playfield Power Interlock Switch***. It must be pulled out for electro-mechanical device testing or diagnostic purposes (this is required). If this button is pushed in, the ***Playfield Power*** is diasabled while the **Coin Door** is **OPEN**. The Button Switch at the bottom is the ***Memory Protect Switch***. It is enabled while the **Coin Door** is **CLOSED**; *meaning any adjustment changes that are made **will not be written to memory***. If changing adjustments is required, ensure the **Coin Door** is **OPEN** to disable this switch, thus allowing for desired changes.

How to Use This Section

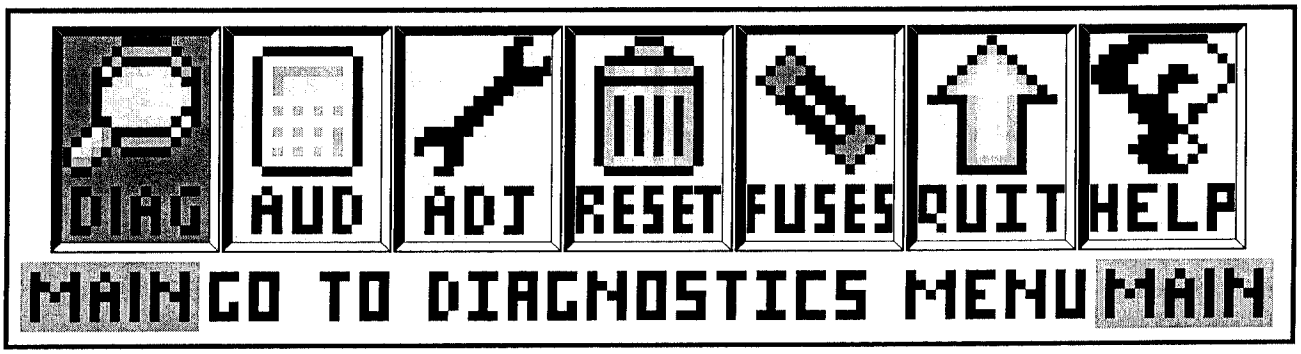
This section will cover all functions available in the **Portals™ Service Menu** in a *Step-By-Step* process. This section is divided into chapters which coincide with the **MAIN MENU**. The following pages in this chapter will instruct the operator on how to move through the menus. It's simple, easy and fun to use!

To get into the **Service Menu Mode** review **"Function 3, Portals™ Service Menu"** on the previous page. Push down the **Black "BEGIN TEST" Button** to begin. Looking at the Video Display you will momentarily see the introductory screen **"Service Menu"** with a *satellite flying from right to left pulling a banner* **"Portals©TM"** followed by the **MAIN MENU**:



Use the **Red "LEFT" & Green "RIGHT" Buttons** (or **Left** & **Right Flipper Buttons**) to move the selected ***Icon*** left or right, and the **Black "ENTER" Button** (or **Start Button**) to activate the selected ***Icon***. The use of the Service Switch Set (**Red, Green, & Black Buttons**) *is required* in **Switch Test** or **Active Switch Test**, as the **Start & Flipper Buttons** are a part of this test.

The **MAIN MENU** now appears with the "DIAG" *Icon* (**DIAGNOSTICS MENU**) flashing:



As the operator views the Menu Screen(s), the MORE MORE symbols indicates that there are more *Icons* to select in each direction. The *Icon* selected will blink. Pushing the **Black "ENTER" Button** (or **Start Button**) will select the *Icon* and the Menu Screen will change to the menu selected. Select the **"PREV"** *Icons* to move backwards through the menu levels. Select the **"QUIT"** *Icon* to completely exit the Service Mode.

View the **Portals™ Service Menu Icon Tree** on the next pages for a complete overview of all menus used in this system. View the last chapter (HELP) if more information is required. Selecting the "QUIT" *Icon* with the **Red "LEFT" or Green "RIGHT" Buttons** (or either **Flipper Button**), then pressing the **Black "ENTER" Button** (or **Start Button**) will exit the Service Mode. This applies to the large and small "QUIT" *Icons*.

The **chapters** in this **section**, which coincide with the **MAIN MENU**, will also provide more detailed information which could not fit in the display. Use both the manual and the display to help customize, troubleshoot and/or diagnose faults, if any.

Portals™ Service Menu Example

This example will demonstrate activation of *Icons* in the **DIAGNOSTICS MENU**. The example will show activation of the "SW" *Icon* (**GO TO SWITCH MENU**). In this menu, the switches can be tested individually and also all active switches can be tested. Use the same technique to access all the *Icons* in the **Portals™ Service Menu**. Follow **Portals™ Service Menu Icon Tree** on the previous pages as a guide to help navigate through the entire system (Also, go to the chapter in this manual explaining the icon(s) selected.).

If the display is in any other menu other than the **MAIN MENU**, use the **Red "LEFT" & Green "RIGHT" Buttons** to select the "PREV" *Icon* and press the **Black "ENTER" Button** to activate the **ICON** thus moving back to the previous menu. Do so until **MAIN MENU** appears.

Chapters 2 through 7 will cover all menu items within the **Portals™ Service Menu**. The *Icon* is shown preceding the text. Find the *Icon* in the **Portals™ Service Menu** by navigating with the **Red** or **Green Buttons**. Each chapter started is from the **MAIN MENU**. Within the chapter, the sub-menu's will be covered sequentially with their explanation & function. If the operator *"gets lost"*, select and activate the "PREV" *Icon* until the display indicates **MAIN MENU**. For more help, see Chapter 7.

The "MORE" *symbols* are indicating that *"more icons"* are available which don't appear in the display and which way to move the selection to view the *Icons*.

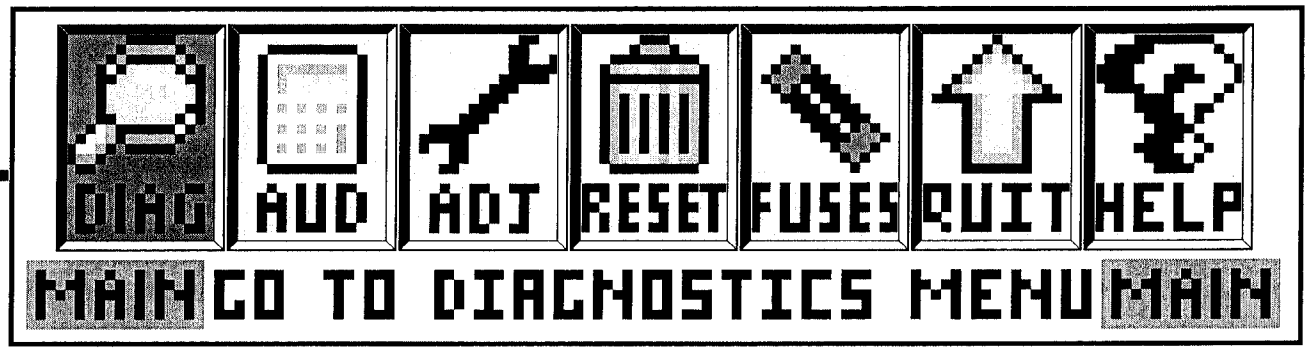
Important Note:

Exit any sub-menu and return to the **MAIN MENU** by selecting & activating the "PREV" *Icons*. ***If no Icons appear in the display because of a testing function or special display (e.g. Help, Schematic Display, etc.), press any service button to exit to the previous menu or sub-menu.***

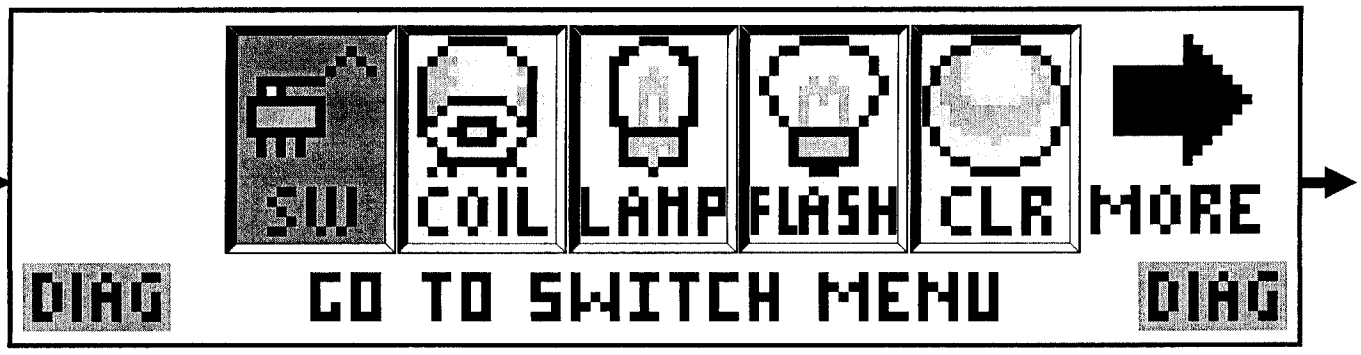
Selecting & activating the "QUIT" *Icon* from any display will exit the *Service Session.*

Selecting & activating the "HELP" *Icon* will show a help screen. (An explanation of each *Mini-Icon* at that level will cycle continuously until any active button is pressed.)

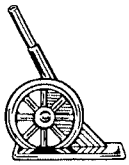
Example: From the **MAIN MENU**, use the **Red "LEFT"** or **Green "RIGHT" Buttons** to select the "DIAG" *Icon* (**GO TO DIAGNOSTICS MENU**).



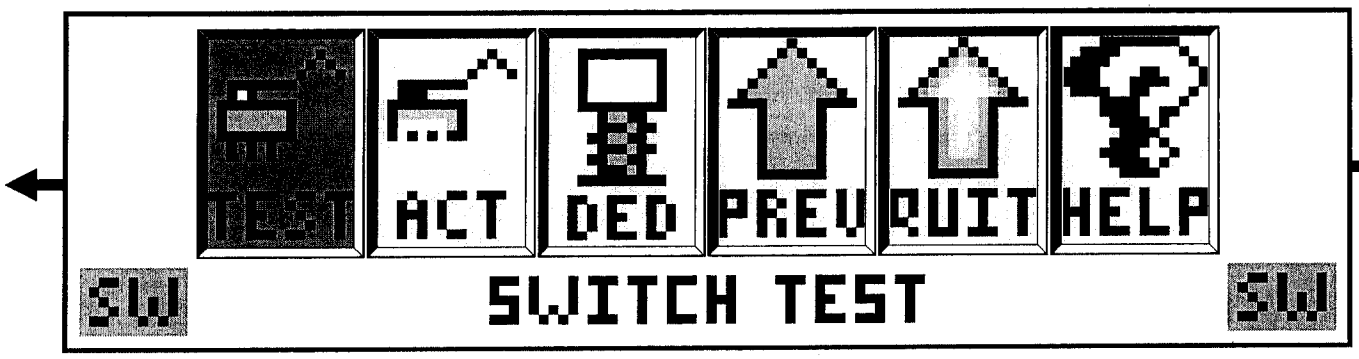
Press the **Black "ENTER" Button** to activate this **ICON**. This will bring up the **DIAGNOSTICS MENU**.



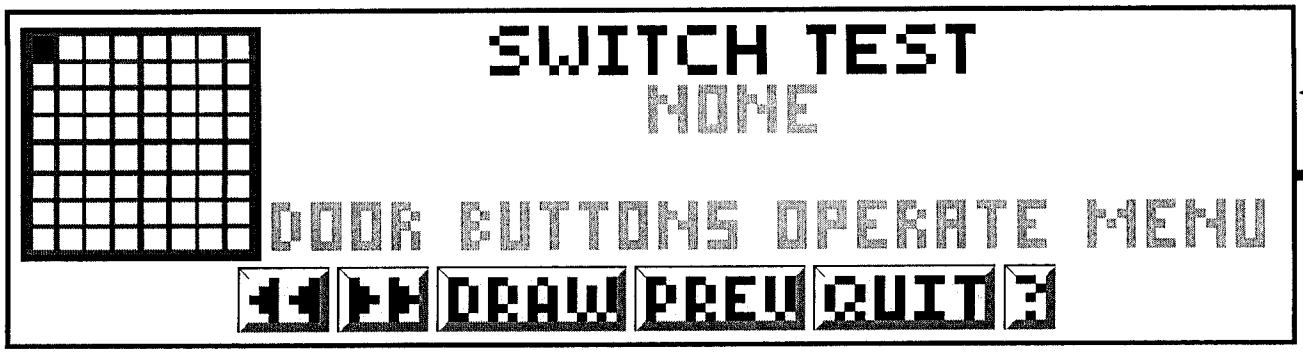
The **DIAGNOSTICS MENU** now appears with the "SW" *Icon* (**GO TO SWITCH MENU**) flashing. Press the **Black Button** to *activate* this icon. This will bring up the **SWITCH TEST MENU**.



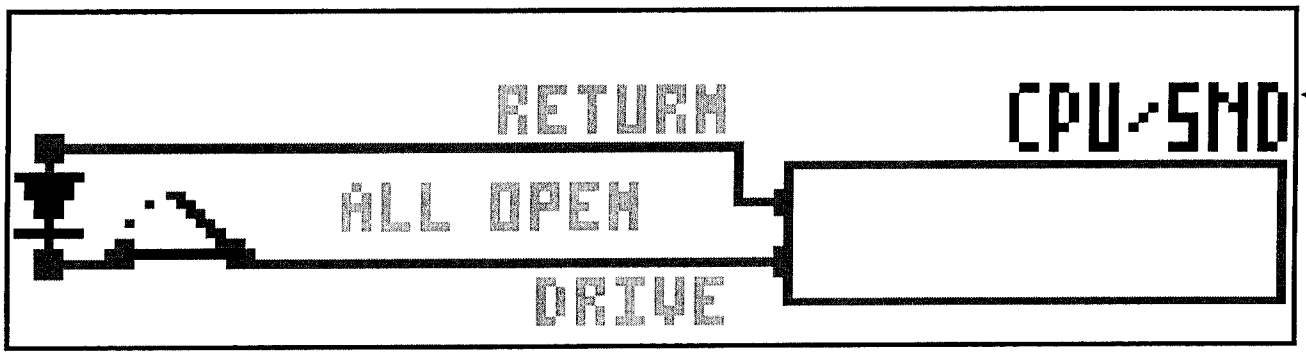
The **SWITCH TEST MENU** now appears with the "TEST" *Icon* (**SWITCH TEST**) flashing:
Press the **Black "ENTER" Button** to *activate* this icon. This will bring up the **Switch Test Display**.



The **Switch Test Display** now appears.



All switches can be tested one at a time (When possible, use a pinball to close any playfield switches; rolling the ball at Stand-Up Targets or over/under switches is suggested. Use finger for all non-playfield switches.) As each switch is closed, the respective Switch Matrix Grid Position (1-64) will be lit. To view the schematic for the switch selected, press either the **Red** or **Green Button** to select the "DRAW" *Mini-Icon*. Press the **Black Button** to *activate* this *Mini-Icon*; do so while the switch is momentarily closed. This will bring up the **Switch Schematic Display**. The display describes the switch in the Switch Matrix which includes the name of the switch, the Return (Row) Wire and the Drive (Column) Wire, drive transistor, and the "Pin-Outs" from the CPU/Sound Board. Activating the "DRAW" *Icon* when a switch is not closed, will give the generic switch schematic as shown below.



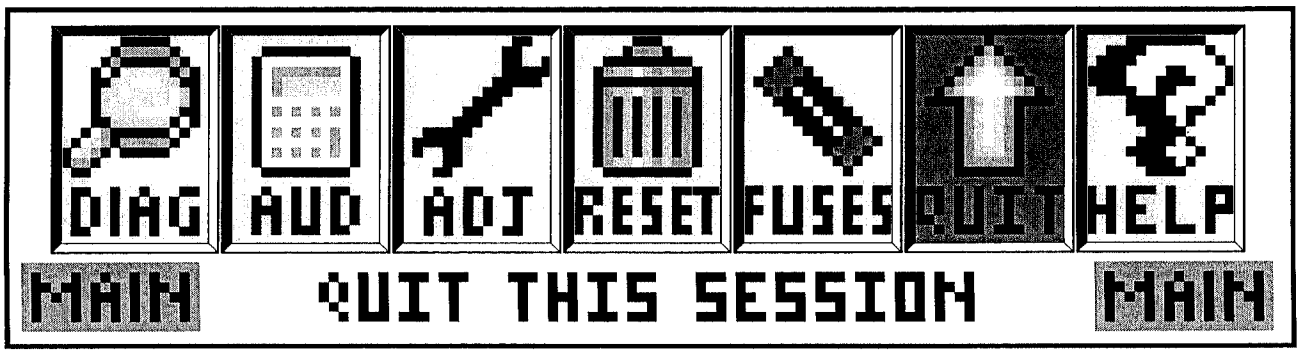
While in Switch or Active Switch Tests, the **Flipper & Start Buttons** are deactivated. Use the **Red "LEFT," Green "RIGHT"** and/or **Black "ENTER" Buttons** to select and activate the **"MINI-ICONS"** at the bottom of the display. In Switch Test, if the "Left Arrow" or "Right Arrow" *Mini-Icon* is activated, the display will go to the previous tests (Active and Dedicated Switch Tests). Use either the **Red** or **Green Button** to change the selected **ICON** to "PREV"*Mini-Icon.* Press the **Black "ENTER" Button** to go to the previous menu.

Note: In **Dedicated Switch Test**, the **Flipper & Start Buttons** are to be used instead of the **Red, Green** & **Black Service Buttons**, as these buttons are deactivated for this test.

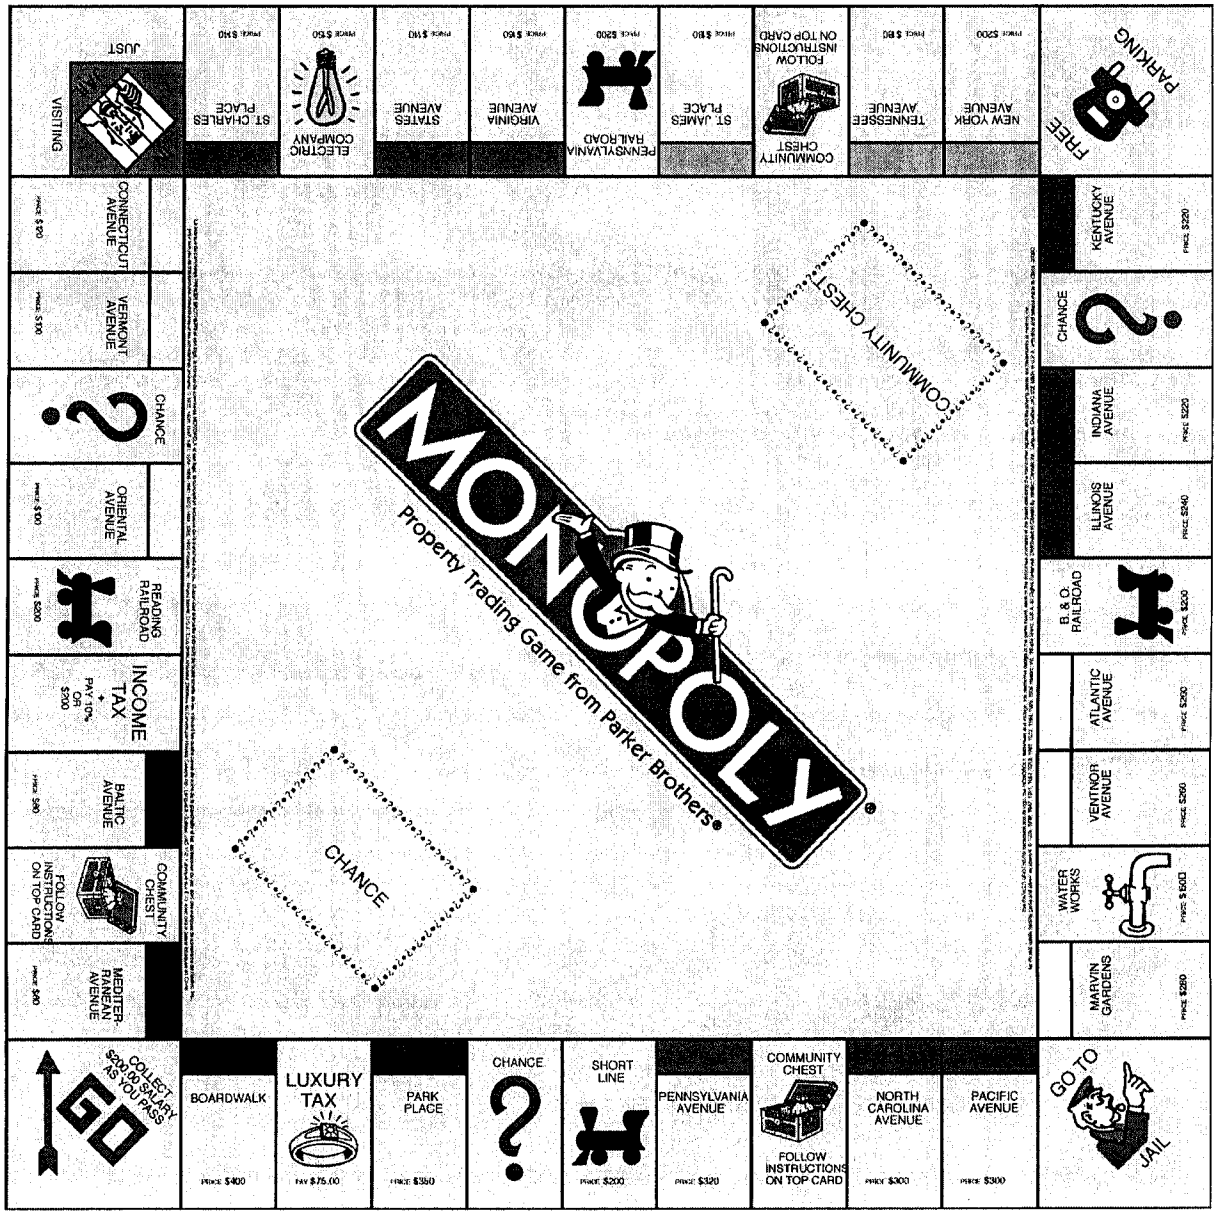
Exit out of the sub-menu by activating the big "PREV" *Mini-Icon* in the menu. This will bring up the **DIAGNOSTICS MENU**. The Switch Test Session is now complete. See the next page about exiting the **Portals™ Service Menu**.

Exiting the Portals™ Service Menu

All *Icons* will be covered in the chapters of this section with the exception of the "QUIT" *Icon*, in the **MAIN MENU**. Both the large and small *Icons* if selected and activated, will exit the user from the **Portals™ Service Menu**. The display will return back to the **ATTRACT MODE**! To re-enter the **Portals™ Service Menu** follow the instructions at the beginning of this chapter.



If more help is required, see Chapter 7 of this section, and view the various help displays in the game.



Go To Diagnostics Menu

Special Note: If the ***display flashes*** **"OPEN THE DOOR"** the game is indicating that memory has been corrupted. This is caused be either failure in memory (e.g. batteries are dead and/or faulty **RAM**) or upon installation of updated version of game code. Opening the **Coin Door** will initiate a *Factory Restore (Reset)*, by opening the ***Memory Protect Switch***. Check battery voltage at **VBATT Test Point** on the **CPU/Sound Board**.

Overview

The **Portals™ Service Menu System** provides tests for sounds, display, lamps, switches and coils. Each feature may be tested manually or automatically after entering the **Portals™ Service Menu** (see Chapter 1 of this section). Select the "DIAG" *Icon* from the **MAIN MENU** to go to the **DIAGNOSTICS MENU**. The automatic tests (e.g. ***Cycling Coils***, ***Test Flash Lamps***) may be used for a quick verification of automatic test functions and the manual tests (***Begin Play Test***, ***Single Lamp / All / Row / Column Tests***, and ***Game Specific Test(s)***.) may be used for troubleshooting. All *Icons* and there usages are explained throughout this chapter.

During game play, activation of switches and operation of coils with associated switches are monitored. If the **CPU/Sound Board** does not detect a switch transition ("Stuck Open" / "Stuck Closed") for 50 games, it is considered faulty. When operation of a coil should close or open a switch and does not, the coil is considered faulty. In the Attract Mode, faulty switches and coils (if any) are reported (Select the "TECH" *Icon*, ***Technician Alert***, from the **DIAGNOSTICS MENU**). *Note that reporting of an unused switch does not constitute a problem and that a bad coil could mean that the associated switch requires adjustment.*

⚠ **CAUTION:** Remove pinballs from the Ball Trough prior to lifting the playfield for servicing. This can easily be done in the **Portals™ Service Menu System**. Select the "DIAG" *Icon* from the **MAIN MENU** to go to the **DIAGNOSTICS MENU**. Select the "CLR" *Icon* to enter the **CLEAR BALL TROUGH MENU**. Select the "RUN" *Icon* & press the **Start Button** to remove one ball at a time. This is also useful to retrieve one ball for game testing in ***Begin Play Test*** & ***Game Specific Test***. ***Important:*** The **Power Interlock Switch** must be pulled out.

GO TO DIAGNOSTICS MENU

With the game in the Attract Mode, open the Coin Door and press the **Black "BEGIN TEST" Button**. Select the "DIAG" *Icon* in the **MAIN MENU** with either **Flipper** or **Red "LEFT"** & **Green "Right" Buttons** (upon entry of the **Portals™ Service Menu**, the system defaults with the selection of the "DIAG" *Icon* flashing) and press the **Start** or **Black "ENTER" Buttons**. The **DIAGNOSTICS MENU** appears.

The "MORE" *symbols* are indicating that *"more icons"* are available which don't appear in the display and which way to move the selection to view the *Icons*.

Important Notes:

Exit any sub-menu and return to the **MAIN MENU** by selecting & activating the "PREV" *Icons*. If no *Icons* appear in the display because of a testing function or special display (e.g. "Help"), press any button to exit.

Selecting & activating the "HELP" *Icon* from any display will show a help screen. (An explanation of each *Mini-Icon* at that level will cycle continuously until any active button is pressed.)

Selecting & activating the "QUIT" *Icon* from any display will exit the Service Session.

In Diagnostics, selecting & activating the "-" or "+" *Icons* moves test forwards/backwards. Selecting & activating the "RUN" *Icon* repeats the test on the coil or flash lamp left off at. Selecting & activating the "ARROW" *Icons* moves between tests in the sub-menu. Selecting & activating the "DRAW" *Icon* will show the schematic for that switch or coil.

Some tests require navigation through the menu(s) and selection of the *Icons* with **ONLY** the **Red "LEFT," Green "RIGHT"** and **Black "ENTER" Buttons**. This is required in ***Switch*** & ***Active Switch Tests***, as the **Flipper** & **Start Buttons** are a part of the test.

In ***Single Coil Test***, ***Cycling Coil Test***, ***Test Flash Lamps***, ***Clear Ball Trough, Begin Play Test*** & ***Monopoly Tests*** Menu's, ***the*** **Power Interlock Switch** (inside Coin Door) must be pulled out. (See ***Access & Use*** in Chapter 1 of this section for the location.)

If the Power Interlock Switch is not pulled out, all electro-mechanical devices (such as Coils) cannot be tested (20v & 50v DC power is disabled). Closing the Coin Door will automatically reset this switch.

Go To Switch Menu

From the **DIAGNOSTICS MENU**, select the "SW" *Icon* with either **Red "LEFT"** or **Green "RIGHT" Button** and press the **Black "ENTER" Button**. Switches are configured in an 8 x 8 Matrix of Columns (Switch Drives) and Rows (Switch Returns) with up to 64 switches possible. The Switch Test Menu consists of three (3) parts: Switch Test, Active Switches, and Dedicated Switch Test.

Note: The Flipper & Start Buttons are deactivated during Switch Tests.

Switch Test

To initiate, from the **SWITCH MENU**, select the "TEST" *Icon* with the **Red** or **Green Button** & press the **Black Button**. In Switch Test, close each switch and observe the display. The display will describe the switch in the Switch Matrix, which includes the switch name, Return (Row) Wire, Drive (Column) Wire and the "Pin-Outs" from the CPU/SOUND Board. When the switch is closed, the information if displayed momentarily. To view the schematic for the switch selected, press either the **Red** or **Green Button** to select the "DRAW" *Mini-Icon*. Press the **Black Button** to activate this *Mini-Icon*; do so while the switch is momentarily closed. To return to Switch Test, press the **Black Button** again.

Active Switch Test

To initiate, from the **SWITCH MENU**, select the "ACT" *Icon* with either **Red** or **Green Button** & press the **Black Button**. If still in a previous test, select the "PREV" *Icon* to return to Switch Menu or selecting either of the "ARROW" *Icons* will move through the tests. If any switches are stuck closed (or made from the presence of a pinball), the display sequences through the Switch Names, Return (Row) Wire, Drive (Column) Wire, Drive Transistor, Part Nº, and the "Pin-Outs" from the CPU/SOUND Board. This cycle continues until all switches are cleared or until the test is exited.

Dedicated Switch Test

To initiate, from the **SWITCH MENU**, select the "DED" *Icon* with either **Flipper Button** & press the **Start Button** (The service switches are deactivated during this test.). The display will describe the switch which includes the Switch Name, Return (Row) Wire, Drive (Column) Wire, Part Nº, and the "Pin-Outs" from the CPU/SOUND Board.

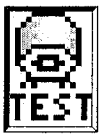
Note 5: Switch located in/on Cabinet.
Note 6: Future Use.
Note 7: UK Only.

Go To Coil Menu

From the **DIAGNOSTICS MENU**, select the "COIL" *Icon* with either **Red "LEFT"** or **Green "RIGHT" Button** and press the **Black "ENTER" Button**. The coils are listed in groups. Coils 01-16 are typically High Current Coils (although Low Current Coils may be used in these positions & will be noted). Coils 17-32 are typically Low Current Coils. Flash Lamps are typically used in positions 26-32 (although may be used in any position & will be noted), read **Single Coil Test** below.



Single Coil Test

To initiate, from the **COIL MENU**, select the "TEST" *Icon* with either **Red** or **Green Button** and press the **Black Button**. Ensure the **Power Interlock Switch** is pulled out. Select either the "-" or "+" *Icons*. Start with the "+" *Icon* to start the manual Coil Test from #1 (The test runs through all Coils and Flash Lamps #1-#32 & AUX 1-3 *(Auxilliary Positions are Optional UK Only)*. Press the **Black Button** on the "+" *Icon*, as each coil is selected, the display will describe the Coil or Flash Lamp Name with the corresponding number, the wire with colors, the "Pin-Outs" from the I/O Power Driver Board, the Coil Voltage & Gauge-Turns (e.g. 23-800). Press the **Black Button** again to move forward in the test. To test and view a particular Coil or Flash Lamp, select the "RUN" *Icon* and press the **Black Button**. Each time the **Black Button** is pushed, the Coil or Flash Lamp will fire on the Playfield and/or Backbox, with the display indicating the Coil or Flash Lamp information. Continue with the same procedure to run through the entire test.

Important: The **Power Interlock Switch** must be pulled out for this *test to function* while the **Coin Door** is **OPEN**.

Cycling Coil Test

To initiate, from the **COIL MENU**, select the "CYC" *Icon* with either **Red** or **Green Button** and press the **Black Button**. If still in a previous test, select the "PREV" *Icon* to return to Coil Menu or selecting either of the "ARROW" *Icons* will move to Cycling Coil Test (selecting again will return to Coil Test). The test pulses each regular Coil or Flash Lamp sequentially (cycling) on the Playfield and Backbox. The display indicates "CYCLING COILS."

Important: The **Power Interlock Switch** must be pulled out for this *test to function* while the **Coin Door** is **OPEN**.

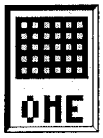
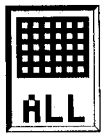
Go To Lamp Menu

From the **DIAGNOSTICS MENU**, select the "LAMP" *Icon* with either **Red "LEFT"** or **Green "RIGHT" Button** and press the **Black "ENTER" Button**. Controlled lamps are configured in and 8 x 10 Matrix of Columns (Lamp Drives) and Rows (Lamp Returns) with up to 80 lamps possible. The Lamp Test Menu consists of four (4) parts: Single Lamp Test, Test All Lamps, Row Lamp Test and Column Lamp Test.



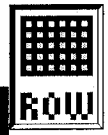
Single Lamp Test

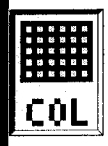
To initiate, from the **LAMP MENU**, select the "ONE" *Icon* with either **Red** or **Green Button** and press the **Black Button**. Select either the "-" or "+" *Icons*. Start with the "+" *Icon* to start the manual Lamp Test from Column 1, Row 1, Switch 1. Press the **Black Button** on the "+" *Icon*, as each lamp is selected, the lamp will light at it's location on the playfield as well as the display, indicating the Lamp Matrix Grid Position, lamp name with the corresponding number, Return (Row) Wire & Color, Drive (Column) Wire & Color, and associated drive transistors. Press the **Black Button** again to move forward in the test. To test and view a particular lamp, select the "RUN" *Icon* and press the **Black Button**. Each time the **Black Button** is pushed, the lamp will light-up on the playfield, with the display indicating the lamp information. Continue with the same procedure to run through the entire test.



Test All Lamps

To initiate, from the **LAMP MENU**, select the "ALL" *Icon* with either **Red** or **Green Button** and press the **Black Button**. If still in Single Lamp Test (or any 1 of the 4 tests), select the "PREV" *Icon* to return to Lamp Menu or selecting either of the "ARROW" *Icons* will move through the tests, keep activating until Test All Lamps is displayed. The display will indicate "ALL LAMPS ON" and the lamps on the playfield will be lit, alternating between the rows in the Lamp Matrix Grid.





Row & Column Lamp Tests

To initiate, from the **LAMP MENU**, select the "ROW" or "COL" *Icon* with either **Red "LEFT"** or **Green "RIGHT" Button** and press the **Black Button**. If still in a previous test, select the "PREV" *Icon* to return to Lamp Menu or selecting either of the "ARROW" *Icons* will move through the tests, keep activating until Row or Column Lamp Test (whichever desired) is displayed. In this test, each set of lamps in each Row or Column of the Lamp Matrix Grid (respective to each test) will light-up on the playfield and is indicated in the display.

Lamp Matrix Grid Locations

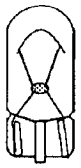
The lamp locations correspond with the Lamp Nº in the Lamp Matrix Grid on the previous page.

Legend Note:

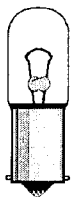
□ = Lamps mounted above playfield.

■ = Lamps mounted below playfield.

The following Bulbs are used in the Lamp Matrix Grid (See Table Grid on previous page for details):

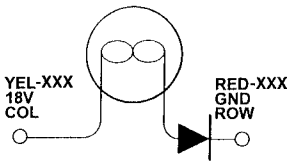


#555 Bulb (Wedge)
165-5002-00

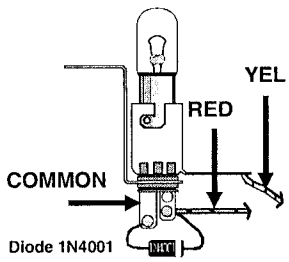


#44 Bulb (Bayonet)
165-5000-44

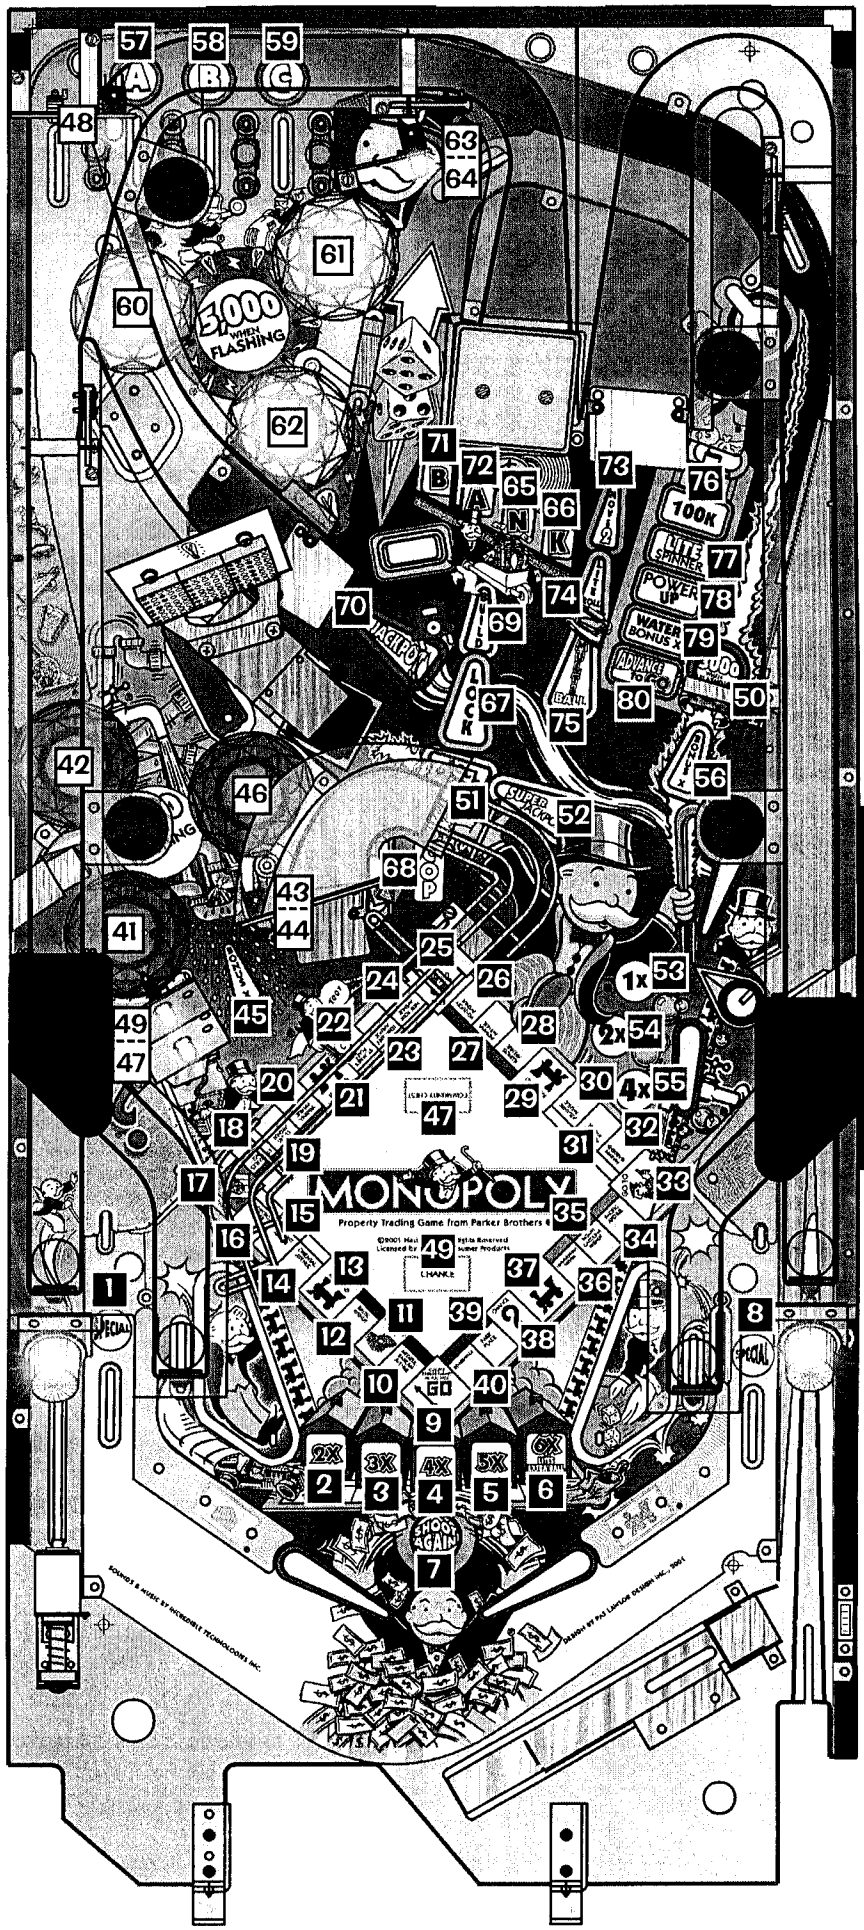
Typical Lamp Schematic



Typical Lamp Wiring



Note:
All Lamps require diodes. Some diodes are located on Terminal Strips (under the playfield) and not on the lamp itself. DOTS: Diode On Terminal Strip



Test Flash Lamps

From the **DIAGNOSTICS MENU**, select the "FLASH" *Icon* with either **Red "LEFT"** or **Green "RIGHT" Button** and press the **Black "ENTER" Button**. After selecting this *Icon* the display will indicate "CYCLING FLASHERS" and all the Flash Lamps will cycle continuously until the test is exited. This test is allows the technician to easily spot any burned-out bulbs and replace them. Flashers tested are Flash Lamps in Positions: **Q1-Q32** and in this game Flash Lamp(s) are in Position(s): **Q19-23** & **Q29**.

Important: The **Power Interlock Switch** must be pulled out for this *test to function* while the **Coin Door** is **OPEN**.

Clear Ball Trough

From the **DIAGNOSTICS MENU**, select the "CLR" *Icon* with either **Red "LEFT"** or **Green "RIGHT" Button** and press the **Black "ENTER" Button**. This is provided to allow the technician a simple method of removing the balls from the trough and also, to test functionality of the trough, ensuring proper trough operation. After selecting this *Icon* the display will show a graphic of the ball trough with balls in the trough with it's corresponding switch number. Select the "RUN" *Icon* to eject the ball in the first position. Simultaneously, the display and the playfield will eject the ball to the Trough Up-Kicker, eject from the Trough Up-Kicker into the Shooter Lane and will be ejected onto the playfield where the technician can easily retrieve the pinball or allow the ball(s) to re-enter the trough to continue Clear Ball Trough Test. ***Important:*** The **Power Interlock Switch** must be pulled out. ⚠ **Caution:** *Continuous use of above test may overheat the Trough Up-Kicker Coil.* ⚠

Technician Alerts

From the **DIAGNOSTICS MENU**, select the "TECH" *Icon* with either **Red "LEFT"** or **Green "RIGHT" Button** and press the **Black "ENTER" Button**. After selecting this *Icon* the display will indicate if there are any faulty switches (i.e., switches that are normally closed but remain open or open switches that have not been closed (activated) in 50 games.)

Service Phone

From the **DIAGNOSTICS MENU**, select the "SERV" *Icon* with either **Red "LEFT"** or **Green "RIGHT" Button** and press the **Black "ENTER" Button**. After selecting this *Icon* the display will indicate a phone number to call if technical assistance is required *(In USA code the number is 1-800-KICKERS).*

Begin Play Test

From the **DIAGNOSTICS MENU**, select the "PLAY" *Icon* with either **Red "LEFT"** or **Green "RIGHT" Button** and press the **Black "ENTER" Button**. After selecting this *Icon* the technician can test certain play functions to insure all switch activated coils function without entering game play. For example, by rolling the ball over the Shooter Lane switch, the Autoplunger should fire. If it kicks to early or too late, the switch actuator should be adjusted to compensate for this error. If it fails to fire, use the Switch Test or Coil Test to help determine the cause of the failure. During this function, similar tests may be performed on the "Ejects", Slingshots, Vertical Up-Kickers, Pop Bumpers, etc. in the game. For unique Play Test functions, select the "GAME SPECIFIC" *Icon* in the **DIAGNOSTICS MENU**. ***Important:*** The **Power Interlock Switch** must be pulled out.

Fire Knocker

From the **DIAGNOSTICS MENU**, select the "KNOCKER" *Icon* with either **Red "LEFT"** or **Green "RIGHT" Button** and press the **Black "ENTER" Button**. The digitally mastered "Knocker" is sounded.

Sound / Speaker Test

From the **DIAGNOSTICS MENU**, select the "SPKR" *Icon* with either **Red "LEFT"** or **Green "RIGHT" Button** and press the **Black "ENTER" Button**. The BSMT 2000 Sound System produces true digital stereo sound from Backbox & Cabinet Speakers or *"Mono"* on the Cabinet Speaker (when used by itself). After selecting this *Icon*, select the "-" or "+" *Icons* and press the **Black "ENTER" Button** to activate the first test. Repeat to visually see & hear all tests. Select the "RUN" *Icon* to activate the test chosen without moving to the next test.

Note: *During Sound Tests, the display shows the speaker identification and the corresponding sound(s). The sound functions allow verification that both channels are functioning properly & that the speaker connections are correct.*

Sound / Speaker Test Continued Next Page

Speaker Phase Testing

Continued

Connections to each of speakers are polarized and each must be connected appropriately for the best quality sound. If one speaker has the positive and negative connections reversed with respect to the other one, bass frequencies will not be produced properly and the overall sound quality will be poor. To test for proper speaker phasing, use the sound test to cycle through the Backbox & Cabinet, and Backbox Sine (repeated) functions. If the Cabinet Sine produces more volume and bass than the Left Sine, the speakers are connected properly. If it produces the same or less, one speaker is connected improperly. To isolate and correct reversed speaker connections, one of two methods may be used.

1. Check each speaker for polarity markings. If the speakers have polarity markings, verify that the Backbox Speaker RED-WHT Wire and the Cabinet Speaker YEL-WHT Wire is connected to the negative (-) terminal.

2. Disconnect the speaker output connector from the CPU / Sound Board and connect a 1.5-volt battery across each speaker pair one at a time while observing the speakers. Make sure the positive battery terminal is connected to the positive lead (CN4, Pin-3 (RED-BLK) or Pin-6 (YEL-BLK)) each time. As the connection is made, check speaker cone movement; proper connections are indicated by outward movement.

Auto / Manual Tests	Sounds Produced
Speaker Test	Tone
Sound/OPSYS EPROM (Loc. U7)	Level 1-3+ (Music Test)
Voice ROMs: 1 (U17) 2 (U21) 3 (U36) 4 (U37)	Speech Pattern 1-3+

Note: For ROM Locations, see Page* DR. ❶. *For ROM Usage (Summary Table) see Page* DR. ❸ *in the "Find-It-In-Front: Dr. Pinball Section". Voice ROMs (U17, U21, U36 & U37) which are 8MB must have a Jumper at W6 on the CPU/Sound Board to function properly.

Begin Burn In

From the **DIAGNOSTICS MENU**, select the "BURN" *Icon* with either **Red "LEFT"** or **Green "RIGHT" Button** and press the **Black "ENTER" Button**. After selecting this *Icon* the Begin Burn-In Test will start. At this stage the game will exercise all CPU I/O Functions (Dot Matrix Display Test, Coil Testing, Lamp Testing, Sound, etc.). This is provided to constantly exercise sounds, coils, etc... Cumulative Burn-In minutes will be displayed. To reset Burn-In minutes to 00, select the "RESET" *Icon* in the **MAIN MENU** and select the "FACT" *Icon* (Factory Reset). See Chapter 5, Go To Reset Menu, of this section.

Dot Matrix Test

From the **DIAGNOSTICS MENU**, select the "DOT TEST" *Icon* with either **Red "LEFT"** or **Green "RIGHT" Button** and press the **Black "ENTER" Button**. After selecting this *Icon* the Dot Matrix Test immediately begins. The display will immediately illuminate & cycle for 1 pass of each test continuously for each of the following tests:

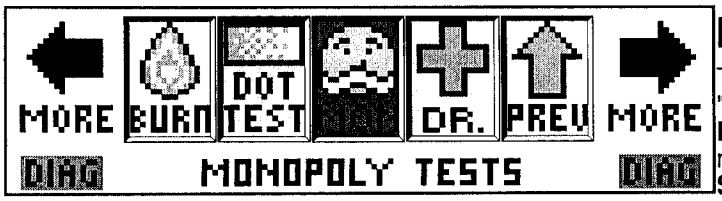
1. Illuminates 1 vertical column of dots, turning it off & illuminating the next column, until each column has been individually lit, while the other columns are off.
2. Illuminates 1 horizontal row of dots, turning it off & illuminating the next row, until each row has been individually lit, while the other rows are off.
3. Illuminates all the dots, except for one column from left to right.
4. Illuminates all the dots, except for one row from top to bottom.
5. Illuminates every other dot lit, in both the rows and columns.

Note: Pressing any button will exit the test & return to **DIAGNOSTICS MENU**.

Dot Matrix Display Explained

The display utilizes a Micro-Processor Control Board mounted in piggyback fashion to the Dot Matrix Display (128 X 32) Driver Board. The purpose behind this board is to provide more information to the operator as well as displaying graphics to the player.

The board is controlled by a 6809E Microprocessor and its personality ROM (Unique to the Game). It receives Data, Reset & Clock Information from the CPU/Sound Board via the ribbon cable and sends back multiple Status and Busy Signals to the CPU. This is to insure synchronized communication between the CPU and the Display Controller Board. The Drivers for the rows and columns are provided on 5 surface mounted integrated circuits on the Dot Matrix Display Driver Board.



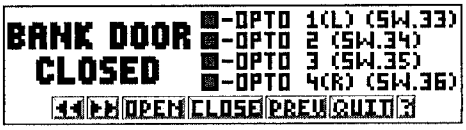
Monopoly Tests

To initiate, from the **DIAGNOSTICS MENU**, select the "MON" *Icon* with either the **Red "LT"** or **Green "RT" Button** (the **FLIPPER Buttons** operates in the same manner) & press the **Black "ENTER" Button** (the **START Button** operates in the same manner).

This will bring up the **MONOPOLY TESTS MENU**. This Sub-Menu is used to test the operation of the **Bank Door (Open & Close) Coils & OPTO Switches** ("BNK" *Icon*), **Water Works Mini-Flipper & Water Works Motor Home Switch** ("WTR" *Icon*) & **Electric Company Sign Dot Test** ("ELEC" *Icon*). To initiate, from the **MONOPOLY TESTS MENU**, select one of the 3 *Icons* with either the **Red "LEFT"** or **Green "RIGHT" Button** (the **LEFT** and **RIGHT FLIPPER Buttons** operates in the same manner) and press the **Black "ENTER" Button** (the **START Button** operates in the same manner). After finishing the Test, select the "PREV" *Icon* to return to the Sub-Menu or select either of the ">>" *Icons* to slip between the 3 Testing Menus.

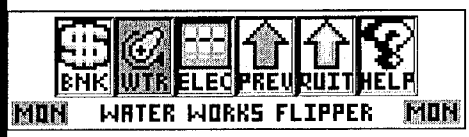
CAUTION: Beware of MOVING PARTS!

Important: The **Power Interlock Switch** must be pulled out for all *tests to function* while the **Coin Door** is **OPEN**.

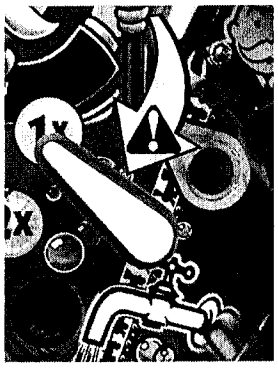


Bank Door Test

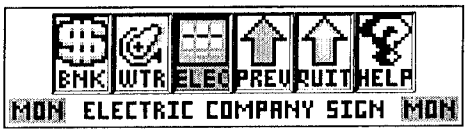
Selecting the"BNK" *Icon* will bring up the **BANK DOOR TEST MENU**. This test is provided to allow a method of testing the **Bank Close (Q6)**, **Bank Open (Q13)**, and the **Bank OPTO Switches (Sw. 33-36)**. Upon entering the test, the display will indicate the status of the Bank Door (the "CLOSE" *Mini-Icon* will be flashing). Select the "OPEN" *Mini-Icon* to ***OPEN*** the Bank Door (**Q13** will be energized), the display will indicate **BANK DOOR OPEN**; select the "CLOSE" *Mini-Icon* to ***CLOSE*** the Bank Door (**Q6** will be energized), the display will indicate **BANK DOOR CLOSED**. With *ball-in-hand*, roll a pinball into the Bank Door and watch the display. As the pinball breaks the OPTO beam at any of the 4 positions, the the solid ■ box will turn □.

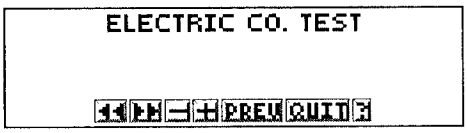


Water Works Flipper

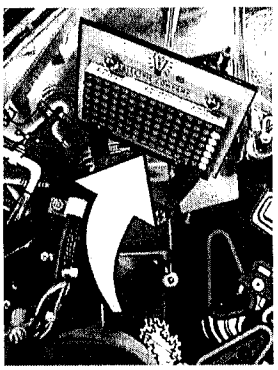


Selecting the"WTR" *Icon* will bring up the **WATER WORKS FLIPPER TEST MENU**. This test is provided to allow a method of testing the **Water Works Motor (Q25)** in conjunction with the **Motor Relay Board (Q27)** and the **Water Works Motor Home Switch (Sw. 40)**. Upon entering the test, the display will indicate the status of the Relay Board (either **OFF/Counterclockwise** or **ON/Clockwise**) and the **Motor Home Switch** (the "RUN" *Mini-Icon* will be flashing). Select the "REVERSE" *Mini-Icon* to change the direction of the Mini-Flipper (clockwise or counterclockwise); then select either the "RUN" or "PULSE" *Mini-Icons*. Activating the "RUN" *Mini-Icon* will cycle the motor continuously until another *Mini-Icon* is selected or the test is exited. Activating the "PULSE" *Mini-Icon* will pulse the motor about 270°. Watch the display, as the Mini-Flipper is rotating the **Home Switch (Sw. 40)** will be closed (the □ box will turn solid ■) once every complete rotation.





Electric Company Sign



Selecting the"ELEC" *Icon* will bring up the **ELECTRIC COMPANY SIGN TEST MENU**. This test is provided to allow a method of testing the triple 5X7 Dot Display on the **Electric Company Sign**. Upon entering the test, the display will indicate the status of the *Dot Display* which should be "off" or "blank" (the "+" *Mini-Icon* will be flashing). Select either the "-" or "+" *Mini-Icons* to step through all **six tests** *(as shown below)*. As each menu appears, the corresponding test is demonstrated on the **Electric Company Sign Dot Display**.

1. 

2. 

3. 

4. 

5. 

6. 

NOTE:
For more details of the PC Boards which are tested on this page, see Sec. 5, Chp. 4, Pages 130-133, Printed Circuit Boards (PCBs).

Dr. Pinball (Flow Chart Menus)

To initiate, from the **DIAGNOSTICS MENU**, select the Cross "DR." *Icon* with either the **Red "LEFT"** or **Green "RIGHT" Button** and press the **Black "ENTER" Button**. This will bring you (the operator / technician) into **DR. PINBALL** (Flow Chart Menus) which offers you a choice of three sub-menus: Coil "DR.," Switch "DR." and Lamp "DR." *Icons.* Selecting a particular sub-menu will give you a choice of which specific Coil (any and all coil assemblies such as Flippers, VUKs, Magnets, etc.), Switch or Lamp circuit needs to be diagnosed. The display will now ask a question or give a procedure to follow such as "Does the lamp turn on?" or "Check bridge rectifier BR-20, if short replace." When Dr. Pinball asks a question or request a procedure the Dr. will expect a response such as "NO" or "YES" (see below examples of the *Mini-Icons* which will prompt the operator). You the operator/technician must respond by using your **Flipper Buttons** to "SELECT" a *Mini-Icon* and the **Start Button** to "ENTER" your selection.

The following are the *Mini-Icons* with explanations for the Dr. Pinball Sub-Menus to follow:

→ Select a Coil, Lamp or Switch to diagnose with "-" or "+" *Icon*; Then select the "RUN" *Icon* to activate the choice.
"PREV" goes back to previous question.
"QUIT" exits Portals completely.
Help "?" gives direction on button usage.

→ Seen when a question is being asked on the Display. Select "YES" or "NO" to answer the question given.
"END" lets you select a new item to test.
"PREV", "QUIT" and "?" (see first example above).

→ Seen when diagnosis is given. Select any *Icon* for your next step.
"END" lets you select a new item to test.
"PREV", "QUIT" and "?" (see first example above).

→ In Coil Flow Chart Menu, select "PULSE" to pulse the coil selected.
"END" lets you select a new item to test.
"PREV", "QUIT" and "?" (see first example above).

Coil Flow Chart

To initiate, from the **DR. PINBALL MENU**, select the Coil "DR." *Icon* with either the **Red** or **Green Button** and press the **Black Button**. This is the Coil Flow Chart. Follow the questions, answering by using the *Mini-Icons* in the display.

Switch Flow Chart

To initiate, from the **DR. PINBALL MENU**, select the Switch "DR." *Icon* with either the **Red** or **Green Button** and press the **Black Button**. This is the Switch Flow Chart. Follow the questions, answering by using the *Mini-Icons* in the display.

Lamp Flow Chart

To initiate, from the **DR. PINBALL MENU**, select the Lamp "DR." *Icon* with either the **Red** or **Green Button** and press the **Black Button**. This is the Lamp Flow Chart. Follow the questions, answering by using the *Mini-Icons* in the display.

Comments:

Go To Audits Menu

Overview

The **Portals™Service Menu System** provides 110 Audit Functions for accounting purposes and for evaluation of *Game Difficulty Adjustments*. The Audit Functions are divided into 3 groups: • **Earnings (Coin) Audits**, are the first 12 most-used Audits • **S.P.I. Audits**, are the Game Play Generic Audits 13-55 •**MONOPOLY®Audits**, are the Game Play Specific Audits 56-110 (**//// Programming Use Only ////**); Audits left open (blank space *in gray*, e.g. Audits 43-51, 54 & 55) are currently ***Not Used,*** allowing for ***Future Expansion,*** if any, or are ***Proprietary***. If the code version is upgraded, view Audits in the display & write the audit(s) in the blank(s) if any audit(s) were added. Each group may be viewed in the **Portals™Service Menu** (see Chapter 1, **Portals™Service Menu Introduction**, of this Section). View all audits with the **Game Audit Table** provided on the previous page.

GO TO AUDITS MENU

With the game in the Attract Mode, open the Coin Door and press the **Black "BEGIN TEST" Button**. Select the "AUD" *Icon* in the **MAIN MENU** with either **Red "LEFT"** or **Green "RIGHT" Button** and press the **Black "ENTER" Button**. The **AUDITS MENU** appears.

Important Notes:

Exit any sub-menu and return to the **MAIN MENU** by selecting & activating the "PREV" *Icons*. If no *Icons* appear in the display because of a testing function or special display (e.g. "Help"), press any button to exit.

Selecting & activating the "QUIT" *Icon* from any display will exit the Service Session.

Selecting & activating the "HELP" *Icon* from any display will show a help screen. (An explanation of each *Mini-Icon* at that level will cycle continuously until any active button is pressed.)

Selecting & activating the "ARROW" *Icons* selects the next or previous audit in the group.

Earnings Audits (1-12)

From the **AUDITS MENU**, select the "EARN" *Icon* with either **Red "LEFT"** or **Green "RIGHT" Button** and press the **Black "ENTER" Button**. Select and activate the "RIGHT ARROW" *Icon* to view the 1st audit in this group. Continue to select either of the "ARROW" *Icons* to view each audit one at a time. The display will describe the audit number, the audit name, and the audit total or value. The current audit will remain in the display until the next audit is chosen or when the sub-menu is exited.

Au. Nº	Audit Name	Audit Definition
Au. 1	TOTAL PAID CREDITS	Provides the total number of paid credits.
Au. 2	FREE GAME PERCENTAGE	This percentage is derived from dividing Audit 25, Total Free Plays, by Audit 26, Total Plays.
Au. 3	AVERAGE BALL TIME	In seconds, the average ball time is derived from the total play time divided by Audit 13, Total Balls Played.
Au. 4	AVERAGE GAME TIME	The average game time is expressed in minutes and seconds.
Au. 5	COINS THRU LEFT SLOT	Provides the total number of times Coin Switch (Sw. 6) was closed.
Au. 6	COINS THRU RIGHT SLOT	Provides the total number of times Coin Switch (Sw. 4) was closed.
Au. 7	COINS THRU CENTER SLOT	Provides the total number of times Coin Switch (Sw. 5) was closed.
Au. 8	COINS THRU 4TH SLOT	Provides the total number of times Coin Switch (Sw. 2) was closed.
Au. 9	TOTAL COINS	Provides the total amount of coins registered through all the slots.
Au. 10	TOTAL EARNINGS	The total cash value accumulated since the last *Factory Restore* occurred (see Chapter 5, Go to Reset Menu, of this section).
Au. 11	METER CLICKS	Provides the total number of money clicks accumulated. (Based on the country's lowest coin denomination used for the game credit.)
Au. 12	SOFTWARE METER	Provides the continuing total of Meter Clicks. This audit cannot be reset; the display shows the constant addition of Meter Clicks.

S.P.I. Audits (13-55)

From the **AUDITS MENU**, select the "S.P.I." *Icon* with either **Red "LEFT"** or **Green "RIGHT" Button** and press the **Black "ENTER" Button**. Select and activate the "RIGHT ARROW" *Icon* to view the 1st audit in this group. Continue to select either of the "ARROW" *Icons* to view each audit one at a time. The display will describe the audit number, the audit name, and the audit total or value. The current audit will remain in the display until the next audit is chosen or when the sub-menu is exited.

Au. Nº	Audit Name	Audit Definition
Au. 13	TOTAL BALLS PLAYED	Provides the total number of regular and extra balls.
Au. 14	TOTAL EXTRA BALLS	Provides the total number of extra balls awarded.
Au. 15	EXTRA BALLS PERCENT	Provides the percentage total from dividing Audit 14, Total Extra Balls, by Audit 26, Total Plays.
Au. 16	REPLAY 1 AWARDS	Provides the total awards (Credit, Extra Ball, Or Audit) for level 1.
Au. 17	REPLAY 2+ AWARDS	Provides the total awards (Credit, Extra Ball, Or Audit) for level(s) 2 or higher.
Au. 18	TOTAL REPLAYS	Provides the total awards (Credits, Extra Balls, Or Audit Only) for exceeding replay score levels.
Au. 19	REPLAY PERCENT	Provides the percentage total from dividing Audit 18, Total Replays, by Audit 26, Total Plays. The percentage reflects replay total awards for exceeding replay score levels.
Au. 20	TOTAL SPECIALS	Provides the total awards (Credits, Extra Balls, Or Scores) for making specials.
Au. 21	SPECIAL PERCENT	This percentage is derived from dividing Audit 20, Total Specials, by Audit 26, Total Plays.
Au. 22	TOTAL MATCHES	Provides the total credits awarded for matching the last two digits of the score with the system-generated Match Number at the end of the game. Percentage of match credits is adjustable from 0% to 10% by Adjustment 11, Match Percentage, if enabled. (See Chapter 4, Go to Adjustments Menu, of this section.)
Au. 23	HIGH SCORE AWARDS	Provides the total credits awarded for exceeding the High-Score-To-Date scores.
Au. 24	HIGH SCORE PERCENT	This percentage is derived from dividing Audit 23, High Score Awards, by Audit 26, Total Plays.
Au. 25	TOTAL FREE PLAYS	Provides the total free credits for replays, High-Score-To-Date, Specials, and Match.
Au. 26	TOTAL PLAYS	This total is derived by adding the sum of Audit 1, Total Paid Credits, and Audit 25, Total Free Plays. Note that free credits are not recorded in the Audit until they are actually used.
Au. 27	0 - 999K SCORES	Provides the total number of games the Player's final score was between 0 and 999,990 points.
Au. 28	1M - 1.9M SCORES	Provides the total number of games the Player's final score was between 1,000,000 and 1,999,990 points.
Au. 29	2M - 4.9M SCORES	Provides the total number of games the Player's final score was between 2,000,000 and 4,999,990 points.
Au. 30	5M - 9.9M SCORES	Provides the total number of games the Player's final score was between 5,000,000 and 9,999,990 points.
Au. 31	10M - 14.9M SCORES	Provides the total number of games the Player's final score was between 10,000,000 and 14,999,990 points.
Au. 32	15M+ SCORES	Provides the total number of games the Player's final score was over 15,000,000 points.
Au. 33	AVERAGE SCORES	This total is derived from adding the Final Score of each game to a table and dividing this sum by Audit 26, Total Plays.
Au. 34	SERVICE CREDITS	Provides the total number of times Dedicated Switch (DS-7) was closed, not in the Portals™ Service Menu. (See Chapter 1, Introduction [*Access & Use*] for instructions on how to receive Service Credits.)
Au. 35	BALL SEARCH STARTED	Provides the total number of times the game performed a ball search.
Au. 36	LOST BALL FEEDS	Provides the total number of times the game added a ball to play when it could not find a ball after ball search.

S.P.I. Audits Continued.

Audit Name		Audit Definition
Au. 37	LOST BALL GAME STARTS	Provides the total number of times the game started with a ball missing from the ball trough at the start of a game.
Au. 38	LEFT DRAINS	Provides the total number of times Rollover Switch 57 was closed.
Au. 39	CENTER DRAINS	Provides the total number of times the game ball had drained with the last switch closed was not Sw. 57 or Sw. 60.
Au. 40	RIGHT DRAINS	Provides the total number of times Rollover Switch 60 was closed.
Au. 41	SLAM TILTS	Provides the total number of times Contact Switch 55 was closed.
Au. 42	TOTAL BALLS SAVED	Provides the total number of times this feature was used. This feature is enabled at the start of each ball and is disabled as soon as the ball makes contact with 5 game switches or allocated time expired.
Au. 43-Au. 51		These audits are ***Not Used***, allowing for ***Future Expansion***, if any, and/or ***Proprietary*** (used for programming).
Au. 52	LEFT FLIPPER USED	Provides the total number of times Dedicated Sw. (DS-1) was closed.
Au. 53	RIGHT FLIPPER USED	Provides the total number of times Dedicated Sw. (DS-3) was closed.
Au. 54-Au. 55		These audits are ***Not Used***, allowing for ***Future Expansion***, if any, and/or ***Proprietary*** (used for programming).

Monopoly Audits (56-110)

Programming Use Only

From the **AUDITS MENU**, select the "MON" *Icon* with either **Red "LEFT"** or **Green "RIGHT" Button** and press the **Black "ENTER" Button**. Select and activate the "RIGHT ARROW" *Icon* to view the 1st audit in this group. Continue to select either of the "ARROW" *Icons* to view each audit one at a time. The display will describe the audit number, the audit name, and the audit total or value. The current audit will remain in the display until the next audit is chosen or when the sub-menu is exited. These Game Specific Audits are primarily used for programming. They provide the total number of times a feature was started, awarded, lit, played and/or completed. They also may indicate the total number of Switch Closures during certain modes or features. Multiple variations of switch closures (see Diagnostics) are used to determine the lighting and/or completion of the feature stated.

Go To Printer Menu

From the **AUDITS MENU**, select the "PRNT" *Icon* with either **Red "LEFT"** or **Green "RIGHT" Button** and press the **Black "ENTER" Button**. The **PRINTER MENU** appears.

☞ Special equipment is required for this Sub-Menu

The **Portals™ Service Menu System** provides 3 Audit Printing Adjustment Functions to print information on a "Hand-Held" printer, download game information to a Laptop PC or clear the printout count. A printer interface board, hand-held printer and/or a special software program is required to run this menu. Entering this menu and selection/activation of the *Icons* without this equipment/software will not affect the game.

Quick Printout (Printer Interface)

From the **PRINTER MENU**, select the "QUIK" *Icon* with either **Red** or **Green Button** and press the **Black Button**. Select the "+" *Icon* and press the **Black Button** to start the printout. Only the Earnings Audits can be printed out to a "Hand-Held" Printer.

Full Printout (Alison Interface Program)

From the **PRINTER MENU**, select the "ALISON" *Icon* with either **Red** or **Green Button** and press the **Black Button**. Select the "+" *Icon* and press the **Black Button** to start the download. A special software program & a Lap Top PC is required. All game audits (Earnings, S.P.I. & Game Specific) can be retrieved.

Reset Printer (Nº of Copies Printed Reset)

From the **PRINTER MENU**, select the "RESET" *Icon* with either **Red** or **Green Button** and press the **Black Button**. Select the "+" *Icon* and press the **Black Button** to start the clear the "Nº of copies printed" count total.

RESETTING AUDIT NOTES:

Audit Note: 1st Way to Reset Audits

To reset audits, from the **MAIN MENU**, select the "ADJ" *Icon*. See Chapter 4, Go to Adjustments Menu, of this section.

Select the "S.P.I." *Icon*, from the **ADJUSTMENT MENU**, and advance to Adj. 8, Reset Coin Audits, with the "RIGHT ARROW" *Icon*. Select the "+" *Icon* to change setting to **YES**. When enabled, the *Coin Audits* (5-11) will be reset to zero. Advance to Adj. 9, Reset Game Audits, with the "RIGHT ARROW" *Icon*. Select the "+" *Icon* to change setting to **YES**. When enabled, *all the audits* will be reset to zero, **except** for the *Coin Audits* (5-11) ***and*** Audit 12, Software Meter (the only audit which cannot be reset to zero).

Audit Note: 2nd Way to Reset Audits

To reset audits, from the **MAIN MENU**, select the "RESET" *Icon*. See Chapter 5, Go to Reset Menu, of this section.

Selection of the "COIN" *Icon*, from the **RESET MENU**, will reset the *Coin Audits* (5-11) to zero.

Selection of the "AUD" *Icon*, from the **RESET MENU**, will reset all audits to zero, **except** for the *Coin Audits* (5-11) ***and*** Audit 12, Software Meter (the only audit which cannot be reset to zero).

Go To Adjustments Menu

Overview

The **Portals™ Service Menu System** provides **63** Adjustment Functions to vary game difficulty or to customize (e.g. Adjusting: High Score Levels; Balls per game; Game Pricing; Default High Scores; etc.). The Adjustment Functions are divided into 2 groups: • **S.P.I. Adjustments**, are the Game Play Generic Adjustments (**1-45**) • **MONOPOLY® Adjustments**, are the Game Play Specific Adjustments (**46-63**); Any Adjustment(s) left open or are currently *Not Used*, are allowing for Future Expansion, if any, or are Proprietary. If the code version is upgraded, view Adjustments in the display & write the adjustment(s) in the blank(s) if any adjustment(s) were added. Each group may be viewed manually after entering the **Portals™ Service Menu** (see Chapter 1, **Portals™ Service Menu Introduction**, of this Section). All adjustments can be viewed at a glance with the **Game Adjustment Table** provided on the previous page. If a value is changed, the display will indicate **REQUEST INSTALLED.**

Important: *The **Coin Door** must be **OPEN** allowing the **Memory Protect Switch** to be disabled so changes can be made.*

GO TO ADJUSTMENTS MENU

With the game in the Attract Mode, open the Coin Door and press the **Black "BEGIN TEST" Button.** Select the "ADJ" *Icon* in the **MAIN MENU** with either **Red "LEFT"** or **Green "RIGHT" Button** and press the **Black "ENTER" Button.** The **ADJUSTMENTS MENU** appears.

Important Notes:

Exit any sub-menu and return to the **MAIN MENU** by selecting & activating the "PREV" *Icons*. If no *Icons* appear in the display because of a testing function or special display (e.g. "Help"), press any button to exit.

Selecting & activating the "QUIT" *Icon* from any display will exit the Service Session.

Selecting & activating the "HELP" *Icon* from any display will show a help screen. (An explanation of each *Mini-Icon* at that level will cycle continuously until any active button is pressed.)

In Adjustments, selecting & activating the "-" *Icon* decrements the value setting. Selecting & activating the "+" *Icon* increments the value setting.

Selecting & activating the "ARROW" *Icons* selects the next or previous adj. in the group.

S.P.I. Adjustments (1-45)

From the **ADJUSTMENTS MENU**, select the "S.P.I." *Icon* with either **Red "LEFT"** or **Green "RIGHT" Button** and press the **Black "ENTER" Button.** Select and activate the "RIGHT ARROW" *Icon* to view the 1st adjustment in this group. Continue to select either of the "ARROW" *Icons* to view each adjustment one at a time. Select either the "-" or "+" *Icons* to change the value, if desired. The display will describe the adjustment number, the adjustment name, and the adjustment total or value. The current adjustment will remain in the display until the next adjustment is chosen or when the sub-menu is exited.

Adj. Nº	Adjustment Name	Adjustment Definition
Adj. 1	REPLAYS: FIXED / AUTO	Set between **01% - 50%** and **Fixed** (0%) for Replay Levels. Default is **12%**. Four levels may be selected. Adjustments allow awarding of a credit or an extra ball as each level is exceeded. With the ***Autopercentage Feature***, if the actual replay percentage is higher or lower than that desired, the game will automatically adjust for the new recommended percentage score(s).
Adj. 2	REPLAY LEVELS	Set between **1 - 4** or **NONE** for the number of replay levels to be active. A "Drop-Down" Table appears (after selection of number of replay levels) showing Replay Level 1. Adjust Replay Level 1 between 10M - 9.99B. Adjust Replay Level 2, 3 and/or 4 respectively.
Adj. 3	REPLAY AWARD	Set for replays to award: **CREDIT, EXTRA BALL, NONE** or **SPECIAL** (When score threshold is achieved, a Playfield Special is lit.) Default is **CREDIT**.
Adj. 4	FREE GAME LIMIT	Set between **01 - 09** or **NO FREE GAMES**. Default is **05**. Adjust the maximum number of *Free Games* that may be accumulated per game.
Adj. 5	EXTRA BALL LIMIT	Set between **01 - 09** or **NO EXTRA BALLS**. Default is **03**. Adjust the maximum number of *Extra Balls* that may be accumulated per game.

Adjustment Name	Adjustment Definition
Adj. 6 GAME DIFFICULTY	Set to **EXTRA EASY**, **EASY**, **MODERATE**, **HARD** or **EXTRA HARD.** *(Note: Additional game features which are not adjusted may also change when adjusting this adjustment; see below table.)* Default is **MODERATE**. Any one of the ***INSTALL*** settings (in a "Drop-Down" Table) for this adjustment may be activated to automatically select settings for multiple adjustments affecting game difficulty. Select and activate the "-" or "+" *Icons* to choose the difficulty level required. After activation, the individual adjustments may be readjusted, if desired. Adjustments which typically automatically get changed when changing this adjustment are Game Specific with adjustments values of **EXTRA EASY**, **EASY**, **MODERATE**, **HARD**, **EXTRA HARD**, **ON** or **OFF**. After changing this adjustment, make note of it in the Table on Page 34 (in pencil), and check all Game Specific adjustments, noting all changes in the "Your Setting" Column. *Performing a Factory Reset will revert all adjustments back to the defaults.*

Play Rules: Novelty & 4-Ball, plus Add-A-Ball Settings

The following three combinations are recommended for situations where local laws restrict certain game features regarding the use of replays or the number of balls per game:

Novelty Play Rules - Set to establish recommended settings for no Free Play or Extra Balls:

Adj.	Adjustment Name	Setting	Adj.	Adjustment Name	Setting
1	Replays: Fixed/Auto	Fixed	5	Extra Ball Limit	00
2	Replay Levels	None	11	Match Percentage	Off
3	Replay Award	None	17	High Score #1 Awards	1
4	Free Game Limit	0	18	High Score #2 Awards	0

4-Ball Play Rules - Set to establish recommended settings for 4-Ball Play:

Adj.	Adjustment Name	Setting	Adj.	Adjustment Name	Setting
1	Replays: Fixed/Auto	07%	5	Extra Ball Limit	3
2	Replay Levels	1	11	Match Percentage	4
3	Replay Award	Credit	12	Balls Per Game	5
4	Free Game Limit	5	17	High Score #1 Awards	1
			18	High Score #2 Awards	0

Add-A-Ball Settings -To disable awarding of credits and provide awards with an Extra Ball:

Adj.	Adjustment Name	Setting	Adj.	Adjustment Name	Setting
3	Replay Award	Extra Ball	16	Allow High Scores	No
4	Free Game Limit	00	17-20	High Score #1 - #4 Awards	0
11	Match Percentage	Off			

Adj. 7 GAME PRICING	Set between **USA1** thru **UK6** or **CUSTOM**. Default is **USA5** *(foreign Game Pricing Options are in the Standard Pricing Select Table on the following pages)*. There are two methods available for coin switch programming: Standard & Custom. Standard pricing uses a single adjustment as seen in the first display. See the Standard Pricing Table. If "Custom" is selected, a "Drop-Down" Table appears. Select a pricing scheme shown in the Custom Pricing Table as seen below. With Adjustment 7 set to **CUSTOM** operating the **Black "Enter" Button** again initiates a drop down menu representing coin switch pulses for the LEFT, CENTER, RIGHT and 4TH Coin Slots. The prescribed the number of pulses are required for 1 Credit. For example, if *Left Coin Pulses,* was set to 02 and *Coin Switch Pulses Required for 1 Credit*, to 01 a coin in the Left Slot would produce 2 Credits. Further, if *Left Coin Pulses,* was set to 01 and *Coin Switch Pulses Required for 1 Credit*, to 02, 2 Coins in the Left Slot would be required for 1 Credit. Coin Switch Pulses Required for Bonus Credit may be set to post bonus credits when a minimum amount of coins are inserted at one time. For example, if *Left Coin Pulses* was set to 01, *Coin Switch Pulses Required for 1 Credit* to 01 and *Coin Switch Pulses Required for Bonus Credit* to 04, 1 Credit would be posted for each of the first 3 Coins in the Left Slot and 2 Credits for the 4th Coin.

S.P.I. Adjustment 7 Continues on the next page.

S.P.I. Adjustment 7 Continued.

Standard/Custom Pricing - Set for the desired pricing scheme from the Standard Pricing Table as indicated on the Dot Matrix Display. For Custom Pricing, set to **CUSTOM**. When set to **CUSTOM**, the following adjustments are utilized to tailor each individual coin chute:

Left Coin Switch Pulses	Set the number of pulses registered for closure of the Left Coin Switch; **00** to **99**.
Right Coin Switch Pulses	Set the number of pulses registered for closure of the Right Coin Switch; **00** to **99**.
Center Coin Switch Pulses	Set the number of pulses registered for closure of the Center Coin Switch; **00** to **99**.
4th Coin Switch Pulses	Set the number of pulses registered for closure of the Fourth Coin Switch; **00** to **99**.
Coin Switch Pulses Required for 1 Credit	Set the number of pulses required to post one credit; **00** to **99**.
Coin Switch Pulses Required for Bonus Credit	Set the number of pulses required to award the 1st Bonus credit(s); **00** to **99**.
Coin Sw. Pulses Req. for 2nd Bonus Credit	Set the number of pulses required to award the 2nd Bonus credit; **00** to **99**.
Credits awarded for 1st Bonus	Set the number of credits awarded for achieving the first Bonus level; **00** to **99**.

Below and the following page is the **Standard Pricing Select Table** for the individual countries listed. The *Pricing Scheme* is determined in two ways - **1:** The CPU/Sound Board Dip Switch (Sw. 300) Setting; and, **2:** The Country Setting Option. For each country listed, the Dip Switch Setting is shown (Column 1). At this time, not all countries have a *unique* Dip Switch Setting. For the countries without a unique setting, the USA Setting (or all positions in the "OFF" position) is used. In lieu of determining the best *Pricing Scheme* for your location, "pre-sets" were made available which would best suit any given situation. If the Factory Default setting is not the selection you feel is best for your location, choose any of the other pre-set settings. If any of these settings do not suit your needs, then **CUSTOM PRICING** will need to be accomplished (however, any "custom" changes made here will be lost after a **FACTORY RESET** so it is suggested to write down your unique set-up).

The Standard Pricing Select Table Explained:

Column 1: CPU/Sound Board Dip Switch 300 Settings: (self-explanatory). **Column 2:** Country Setting Option: The different available pre-sets are listed. **Columns 3-6:** Coin Mechanisms - These show the coinage through the available slots on the Coin Doors. Different countries use different Coin Doors. For example, USA style Coin Doors, which have only 2 coin acceptors (left & right) may utilize the "Center" slot cable for an optional Bill Validator. Different Coin Doors may have up to 4 coin acceptors. **Columns 7-10:** Pricing Scheme Explained - Shows the number of plays received for the monies required determined by the setting selected.

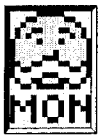
	Adjustment Name	Adjustment Definition
Adj. 8	RESET COIN AUDITS	Set to **YES** or **NO**. Default is **NO**. ⚠When set to **YES** *(select the "+" Icon to change)* all *Coin Audits* (Audits 5-11), will be reset to zero.
Adj. 9	RESET GAME AUDITS	Set to **YES** or **NO**. Default is **NO**. ⚠When set to **YES** *(select the "+" Icon to change)* all audits will be reset to zero, except for the *Coin Audits* (Audits 5-11) and Audit 12, Software Meter (the only audit which cannot be reset to zero).
Adj. 10	RESET HIGH SCORES	Set to **YES** or **NO**. Default is **NO**. When set to **YES** *(select the "+" Icon to change)* all the High Score Levels and associated initials will be restored to the backup settings.
Adj. 11	MATCH PERCENTAGE	Set between **0% - 10%** or **OFF**. Default is **8%**. At **0%** the match display occurs at the end of the game but never awards a credit.
Adj. 12	BALLS PER GAME	Set between **02 - 05**. Default is **03**. Adjusts the number of balls per game.
Adj. 13	TILT WARNINGS	Set to **00**, **01** or **03**. Default is **01**. Adjusts the number of plumb bob tilt switch closures before the ball in play is tilted.
Adj. 14	REPLAY BOOST	Set to **YES** or **NO**. Default is **YES**. When set to **YES**, exceeding a replay will set a temporary replay level for each time a replay level is surpassed. This new level will equal the previous replay level (when the replay was awarded) plus 50M for each following game, until the replays have all been played (then the previous level is resumed).
Adj. 15	CREDIT LIMIT	Set between **04 - 50**. Default is **30**. Adjusts the maximum number of credits that may be posted.
Adj. 16	ALLOW HIGH SCORES	Set to **YES** or **NO**. Default is **YES**. When set to **YES** if a player exceeds any 1 of the 4 High Scores, the player may receive an award (depending on Adj. 3, Replay Award). Set to **NO** to disable this feature. There are 10 High Scores that will allow the player to enter their initials (or name) (See **Adj. 32, High Score Initials**), however, only the top 4 can receive an award if this adjustment is enabled.
Adj. 17	HIGH SCORE #1 AWARDS	Set between **00 - 05**. Default is **01**. Adjusts the number of awards awarded for exceeding Level 1 *(the highest of the four (4) Levels).*
Adj. 18	HIGH SCORE #2 AWARDS	Set between **00 - 03**. Default is **01**. Adjusts the number of awards awarded for exceeding Level 2.
Adj. 19	HIGH SCORE #3 AWARDS	Set between **00 - 02**. Default is **01**. Adjusts the number of awards awarded for exceeding Level 3.
Adj. 20	HIGH SCORE #4 AWARDS	Set between **00 - 01**. Default is **00**. Adjusts the number of awards awarded for exceeding Level 4.
Adj. 21	DEFAULT HIGH SCORE #1	Set between **1,000,000 - 9,999,000,000** or **00** *(increments of 1M).* Default is **30,000,000**. Adjusts the desired ***High Score Level*** to which Level 1 may be achieved (not affected by **Adj. 31**).
Adj. 22	DEFAULT HIGH SCORE #2	Set between **1,000,000 - 9,999,000,000** or **00** *(increments of 1M).* Default is **26,000,000**. Adjusts the desired ***High Score Level*** to which Level 2 may be achieved (not affected by **Adj. 31**).
Adj. 23	DEFAULT HIGH SCORE #3	Set between **1,000,000 - 9,999,000,000** or **00** *(increments of 1M).* Default is **22,000,000**. Adjusts the desired ***High Score Level*** to which Level 3 may be achieved (not affected by **Adj. 31**).
Adj. 24	DEFAULT HIGH SCORE #4	Set between **1,000,000 - 9,999,000,000** or **00** *(increments of 1M).* Default is **20,500,000**. Adjusts the desired ***High Score Level*** to which Level 4 may be achieved (not affected by **Adj. 31**).
Adj. 25 Adj. 30	DEFAULT HIGH SCORE #5- DEFAULT HIGH SCORE #10	Set between **1,000,000 - 9,999,000,000** or **00** *(increments of 1M).* Default is... *(see table on page 34).* Adjusts the desired ***High Score Level*** to which Level 5 may be achieved (not affected by **Adj. 31**).
Adj. 31	HSTD RESET COUNT	Set between **100 - 9,900** or **OFF** *(increments of 100).* Default is **2,000**. **HSTD** (**H**igh **S**core **T**o **D**ate). Adjusts the number of games between automatic resets of high score levels to backup settings and ball time averager adjustments. Set to **OFF** for "no reset or adjustment".
Adj. 32	HIGH SCORE INITIALS	Set to **3 INITIALS** or **10 LETTER**. Default is **3 INITIALS**. When set to **3 INITIALS**, player is allowed only 3 initials to input. When set to **10 LETTER NAME**, player is allowed to enter 10 initials to input.

Adjustment Name		Adjustment Definition
Adj. 33	FREE PLAY	Set to **YES** or **NO**. Default is **NO**. When set to **YES**, no coins are required for *Game Play.*
Adj. 34	CUSTOM MESSAGE	Set to **ON, CHANGE** or **OFF**. Default is **ON**. When set to **CHANGE** *(select the "+" Icon to change settings until "CHANGE" appears in the display, then select the ">>" Icon to access.) This adjustment can be accessed in two (2) ways by either selecting the "S.P.I." Icon* and advancing to this **Adjustment 34**, or can be directly accessed by selecting the "ABCD CUST MSG" *Icon* in the **ADJUSTMENTS MENU**. View the definition at the end of this chapter under the **Custom Message** entry for the operation explanation.
Adj. 35	FLASH LAMP POWER	Set to **NORMAL, DIM** or **OFF**. Default is **NORMAL**. When set to **DIM** the Flash Lamps impulse power is reduced by **25%** and when set to **OFF** the Flash Lamps will not flash.
Adj. 36	COIL PULSE POWER	Set to **NORMAL, HARD** or **SOFT**. Default is **NORMAL**. When **HARD** the coil pulse power is ***increased*** by **12.5%** of the normal pulse rate. When set to **SOFT** the coil pulse power is ***decreased*** by **12.5%** of the normal pulse rate. These adjustments are provided to compensate for Low Line or High Line voltage conditions where the solenoids appear to kicking too weak or too hard. Adjust as required.
Adj. 37	KNOCKER VOLUME	Set to **NORMAL, LOW** or **OFF**. Default is **LOW**. When set to **LOW**, the volume is decreased 50%. When set to **OFF**, no sound is heard when the "knocker" is sounded.
Adj. 38	GAME RESTART	Set to **YES** or **NO**. Default is **YES**. When set to **YES**, a new game may be started during any ball after the first ball is completed (if credits are available). Pressing the **Start Button** during the first ball will add additional players. When set to **NO**, the game disables the **Start Button** after the first ball until the final ball is in play. Review Section 2, Chapter 1, Game Operations & Features for details.
Adj. 39	EXTRA BALL PERCENTAGE	Set between **0% - 50%**. Default is **20%**. This adjustment allows the operator to adjust how frequently the ***Extra Ball Feature*** is made available to the player.
Adj. 40	BILL VALIDATOR	Set to **YES** or **NO**. Default is **NO**. When set to **YES**, in *Game Attract Mode* the Display will show an "*Insert Bill Animation.*" When set to **NO**, the Display will show an "*Insert Coin Animation.*"
Adj. 41	TOURNAMENT MODE	Set to **NONE, IFPA, EXPO, PAPA** or **HOME**. Default is **NONE**. Tournament Mode determines the default conditions to quickly prepare a game for tournament play. When this setting is changed ***all audits will be reset*** and ***all adjustments will be initiated*** to the particular style selected. The game will then return to *Game Over Attract Mode*, as if a *Factory Reset* had been performed. **NONE** - Same as a Factory Reset conditions. **IFPA** - Straight 50¢ play, No Replay, No Extra Ball, No High Scores, 2 Tilt Warnings and No Match. **EXPO or PAPA** - Same as **IFPA** settings except ***Free Play*** is enabled. **HOME** - Sets game for ***Free Play, Extra Ball Play, No Replay, 10% Match*** & ***30% Extra Ball.***
Adj. 42	UK COIN MECH. TYPE	////////// **UK Only Dip Switch Set @ Option 2** ////////// Set to **CURRENT: 2 POUND AT #5** if using a Coin Control Mech 74-1129-104**U** (latest version). Set to **OLD: 2 POUND AT #6** if using older version Coin Control Mech 74-1129-104. Default is **CURRENT: 2 POUND AT #5.**
Adj. 43	BKGRND (BACKGROUND) MUSIC VOLUME	Set between **01** - **15**. Default is **01**. After volume is set via Portals Service Buttons (See Sec. 3, Chp. 1, ...Intro) this adjustment can be utilized to adjust the background music (1 all the way on, 15 all the way off) while keeping the Special Sound FX the same level.
Adj. 44	LOCATION ID	Set between **00** to **9999**. Default is **00**. This adjustment allows the operator to assign a location identification number to the audit print-out sheet. *(Will not be affected by Factory Reset.)*
Adj. 45	GAME ID	Set between **00** to **9999**. Default is **00**. This adjustment allows the operator to assign a game identification number to the audit print-out sheet. *(Will not be affected by Factory Reset.)*

Please Note: *For more details on Audit Printing, review Section 3, Chapter 3, Go To Audits Menu (Go To Printer Menu, Page 33). For more details on Factory Reset, review Section 3, Chapter 5, Go To Reset Menu.*



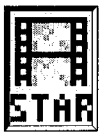
MONOPOLY® Adjustments (46-63)

From the **ADJUSTMENTS MENU**, select the "MON" *Icon* with either **Red "LEFT"** or **Green "RIGHT" Button** and press the **Black "ENTER" Button**. Select and activate the "RIGHT ARROW" *Icon* to view the 1st adjustment in this group. Continue to select either of the "ARROW" *Icons* to view each adjustment one at a time. Select either the "-" or "+" *Icons* to change the value, if desired. The display will describe the adjustment number, the adjustment name, and the adjustment total or value. The current adjustment will remain in the display until the next adjustment is chosen or when the sub-menu is exited.

Adj. Nº	Adjustment Name	Adjustment Definition
Adj. 46	EXTRA BALL MEMORY	Set to **YES** or **NO**. Default is **NO**. When set to **YES**, this feature bonus will be retained in memory from ball-to-ball for the same player. When set to **NO**, this feature will go out at the end of each ball.
Adj. 47	SPECIAL MEMORY	Set to **YES** or **NO**. Default is **YES**. When set to **YES**, this feature bonus will be retained in memory from ball-to-ball for the same player. When set to **NO**, this feature will go out at the end of each ball.
Adj. 48	UK POST SAVE ENABLED	**UK Only Dip Switch Set @ Option 2** Set to **YES** or **NO**. Default is **NO**, (UK Default is **YES**). When set to **YES** this feature is available when lit. Set to **NO** to disable this feature. (UK Games have Outlane & Center Post Save Devices which are accessed in a different way; Non-UK Games cannot adjust this setting.)
Adj. 49	FREEZE TIME (BALL SAVE)	Set to **OFF**, **0:01-0:15** or **AUTO**. Default is **OFF**. When set to **OFF** this feature is unavailable. Set between **0:01** through **0:15** (single increments) for the ball to be sent back into play if the time set is not met (per ball). Set to **AUTO** to automatically adjust the Freeze Timer based on the average ball time.
Adj. 50	BANK DIFFICULTY	Set to **EXEASY, EASY, MODERATE, HARD** or **EXHARD**. Default is **MODERATE**. Determines how this Feature is started and played.
Adj. 51	REMATCH DIFFICULTY	Set to **EXEASY, EASY, MODERATE, HARD** or **EXHARD**. Default is **MODERATE**. Determines how this Feature is started and played.
Adj. 52	BONUS X DIFFICULTY	Set to **EXEASY, EASY, MODERATE, HARD** or **EXHARD**. Default is **MODERATE**. Determines how this Feature is started and played.
Adj. 53	DISABLE BANK	Set to **YES** or **NO**. Default is **NO**.
Adj. 54	TIMED PLUNGER	Set to **OFF** or **0:15 - 1:00**. Default is **OFF**. When set to **0:15** to **1:00**, the plunger will "Autoplunge" the ball (at the time set) when the ball is at the beginning of play, awaiting the skill shot by the player.
Adj. 55	ELECTRIC CO DIFF	Set to **EXEASY, EASY, MODERATE, HARD** or **EXHARD**. Default is **MODERATE**. Determines how this Feature is started and played.
Adj. 56	B-A-N-K LETTERS	Set between **00 - 04**. Default is **01**. Determines how many letters are spotted at game start.
Adj. 57	CHASE BALL	Set to **YES** or **NO**. Default is **YES**. Determines if another ball is given in the game after a ball is trapped/missing & ball search did not find it.
Adj. 58	POPS HITS TO MOVE TOKEN	Set between **00 - 06**. Default is **05**. Determines how many pop switch closures are required for a move of 1 space on the game board.
Adj. 59	ADV BANK AT NEW BALL	Set to **YES** or **NO**. Default is **YES**.
Adj. 60	RIGHT STANDUP SPOTS	Set between **00 - 04**. Default is **03**. Determines how many lights (modes "completed") are lit at game start by the Right Standup Target.
Adj. 61	CHANCE VUK STRENGTH	Set to **EXEASY, EASY, MODERATE, HARD** or **EXHARD**. Default is **MODERATE**. Determines VUK strength.
Adj. 62	START AT 1500 PTS	Set to **YES** or **NO**. Default is **YES**.
Adj. 63	ELEC. EB AT %	Set between **20 - 80**. Default is **30**. Determines the percentage required to get to in *Electric Company Increase Power Mode.*

Custom Message

To go directly to ***Adjustment 34, Custom Message,*** from the **ADJUSTMENT MENU**, select the "CUST MSG" *Icon* either **Red "LEFT"** or **Green "RIGHT" Button** and press the **Black "ENTER" Button**. At the top left corner of the Display, the letter **A** is indicated (blinking) in the first available position (Thirty-Six (36) characters including spaces are available). Vary the letter(s) by operating the Left and Right Flipper Buttons (or **"RED"** or **"GREEN" Buttons**). With the desired letter indicated, depress the **Start Button** to lock in the letter and advance to the next character. Repeat this procedure until the desired message is completed in the display. Select the "<" or ">" characters to back-space (erase) and/or to move forward in an already typed message. After completion, press the **"BLACK" Button**, **"REQUEST INSTALLED"** is indicated and then exits this sub-menu.

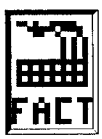


Film Star Reset (For the Home Setting)

To reset the game with *Special Home Settings* (*not the normal Factory Setting*), from the **ADJUSTMENT MENU**, select the "STAR" *Icon* either **Red "LEFT"** or **Green "RIGHT" Button** and press the **Black "ENTER" Button**. This *Special Setting* automatically changes ***Adjustment 6, Game Difficulty,*** to **EASY** and ***Adjustment 33, Free Play,*** to **YES**. This setting is determined to be ideal for the home environment.

Take Note:

To **Restore** or **Reset** any of the adjustments to the *Factory Settings (Default)*, review Sec. 3, Chp. 5, **Go To Reset Menu**. Follow the "RESET" *Icon* or "FACT" *Icon* and their explanations.



Go To Reset Menu

Overview

The **Portals™ Service Menu System** provides three (3) functions to reset adjustments and/or audits back to the *Factory Setting*. See Chapter 3, Go to Audits Menu, and Chapter 4, Go to Adjustments Menu, for the Game Audits & Adjustments Information. If a reset of ***Coin*** or ***Game Audits*** is performed, the display will indicate **REQUEST INSTALLED** and return to the **RESET MENU**. If a **Factory Reset** is performed, the display will indicate **REQUEST INSTALLED**, the ***Service Session*** is *exited* & returns to the ***Attract Mode***. Please note that once reset, all customized settings are lost! Certain *Audits & Adjustments* cannot be reset (refer to the details below).

GO TO RESET MENU

With the game in the Attract Mode, open the Coin Door and press the **Black "BEGIN TEST" Button**. Select the "RESET" *Icon* in the **MAIN MENU** with either **Red "LEFT"** or **Green "RIGHT" Button** and press the **Black "ENTER" Button**. The **RESET MENU** appears.

Important Notes:

Exit any sub-menu and return to the **MAIN MENU** by selecting & activating the "PREV" *Icon*.

Selecting & activating the "QUIT" *Icon* from the display will exit the Service Session.

Selecting & activating the "HELP" *Icon* from the display will show a help screen. (An explanation of each *Mini-Icon* at that level will cycle continuously until any active button is pressed.)

Reset Coin Audits

From the **RESET MENU**, select the "COIN" *Icon* with either **Red** or **Green Button** and press the **Black Button**. ⚠ All Coin Audits (See **Fig. 1**) will be reset to Factory Settings. The display will indicate **REQUEST INSTALLED** and return to the **RESET MENU**. Coin Audits can also be reset from the **ADJUSTMENTS MENU, S.P.I. ADJUSTMENT 8**. See Chapter 4, Go to Adjustments Menu, of this section. After selecting this *Icon*, all of the ***Coin Audits (5-11)*** are reset to zero.

Reset Game Audits

From the **RESET MENU**, select the "AUD" *Icon* with either **Red** or **Green Button** and press the **Black Button**. ⚠ All Game Audits (See **Fig. 2**) will be reset to Factory Settings. The display will indicate **REQUEST INSTALLED** and return to the **RESET MENU**. Game Audits can also be reset from the **ADJUSTMENTS MENU, S.P.I. ADJUSTMENT 9**. See Chapter 4, Go to Adjustments Menu, of this section. After selecting this *Icon*, all of the ***Audits*** are reset to zero, except for the Coin Audits (Audits 5-11) and Audit 12, Software Meter. Audit 12 is the only audit which cannot be reset.

Fig. 1

• Reset Coin Audits	
Earnings Audits (Coin Audits Only 5-11)

12	Software Meter
13 +	The remainder of the Audits.

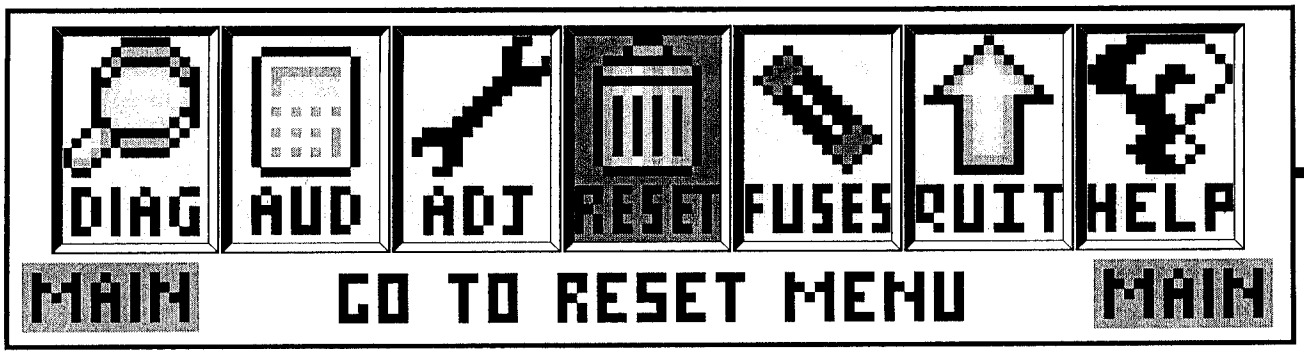
Factory Reset

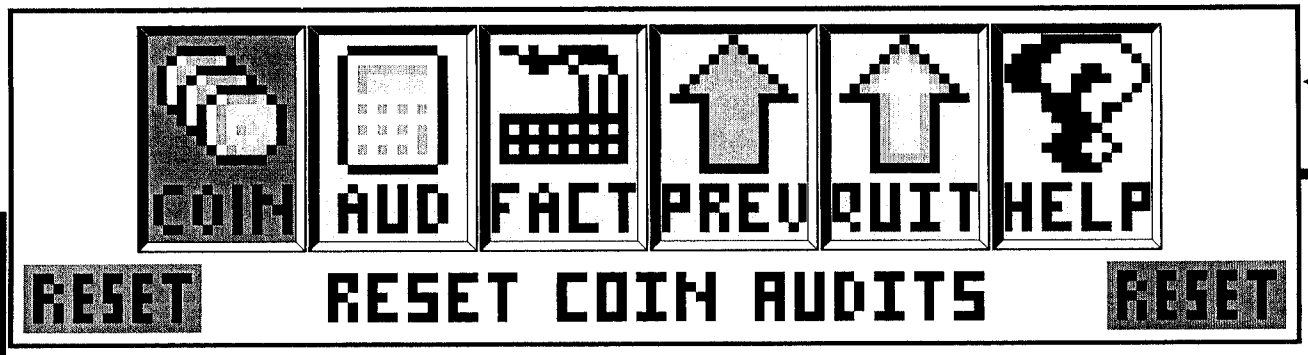
From the **RESET MENU**, select the "FACT" *Icon* with either **Red** or **Green Button** and press the **Black Button**. ⚠ All adjustments will be reset to *Factory Settings* (except for Proprietary Adjustments). The display will indicate **REQUEST INSTALLED** and exit the Service Session. See Chapter 4, Go to Adjustments Menu, of this section, for the *Factory Settings* in the **Game Adjustment Table**.

Example:

From the **MAIN MENU**, use the **Red** or **Green Buttons** to select the "RESET" *Icon* (**GO TO RESET MENU**).



Press the **Black Button** to activate this **ICON**. This will bring up the **RESET MENU**.



The **RESET MENU** now appears with the "COIN" *Icon* (**RESET COIN AUDITS**) flashing:

! *DO NOT PRESS THE START BUTTON* AFTER SELECTING ANY THREE OF THESE ICONS UNLESS THIS IS WHAT IS DESIRED (SETTINGS WILL BE LOST)! PLEASE READ THE PREVIOUS PAGE FOR EXACTLY WHAT WILL HAPPEN IF ANY OF THESE THREE ICONS ARE ACTIVATED. !

From the **RESET MENU**, select any of the *Icons* ("COIN", "AUD" or "FACT") with either **Red** or **Green Button** and press the **Black Button** to activate the **ICON** chosen.

If the "COIN" or "AUD" *Icons* are chosen and activated, the affected audits (see previous page) will be reset, the display will indicate **REQUEST INSTALLED** and the display will return to the **RESET MENU**.

If the "FACT" *Icon* is chosen and activated, all adjustments will be reset back to the *Factory Settings*. The display will indicate **REQUEST INSTALLED** (momentarily), the ***Service Session*** is automatically *exited* and returns to the ***Attract Mode***.

Go To Fuse Table

Overview

The **Portals™ Service Menu System** provides a current Fuse Table for this game. The fuses are located in the Backbox (on the Display Power Supply Board and the I/O Power Driver Board), and also in the Cabinet (under the playfield by the Flippers and/or by any unique assembly, such as magnets). For the complete Fuse List in the *Quick Reference Fuse Chart & Pictorials*, see the next page (identical to page **DR. ❶** in the front of this manual).

GO TO FUSE TABLE

With the game in the Attract Mode, open the Coin Door and press the **Black "BEGIN TEST" Button**. Select the "FUSES" *Icon* in the **MAIN MENU** with either **Red "LEFT"** or **Green "RIGHT" Button** and press the **Black "ENTER" Button**. Select and activate the "+" *Icon* to view the 1st fuse in this group. Continue to select either the "+" or "-" *Icons* to view each fuse one at a time. The display will describe the fuse identification number (e.g. F1, F6, F7, etc.), location of fuse (i.e. Backbox: Board name located on; or Cabinet: Under the playfield or in Service Outlet), rating of fuse (e.g. 5A 250v S.B. - i.e. 5 Amp, 250 volt, Slo-Blo), and 'use of fuse' (e.g. 90v DC High Voltage Power, etc.). The current fuse listed will remain in the display until the next fuse is chosen or when the sub-menu is exited.

Important Notes:

Exit any sub-menu and return to the **MAIN MENU** by selecting & activating the "PREV" *Icons*. If no *Icons* appear in the display because of a testing function or special display (e.g. "Help"), press any button to exit.

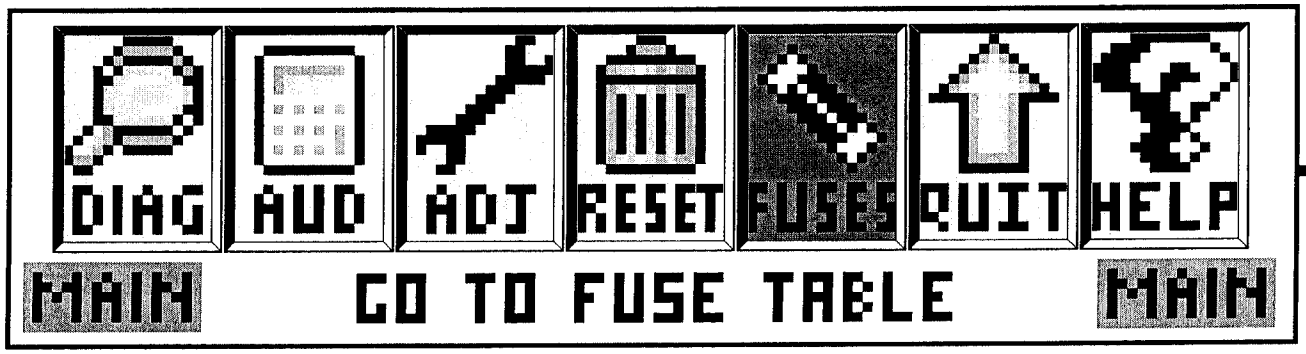
Selecting & activating the "QUIT" *Icon* from any display will exit the Service Session.

Selecting & activating the "HELP" *Icon* from any display will show a help screen. (An explanation of each *Mini-Icon* at that level will cycle continuously until any active button is pressed.)

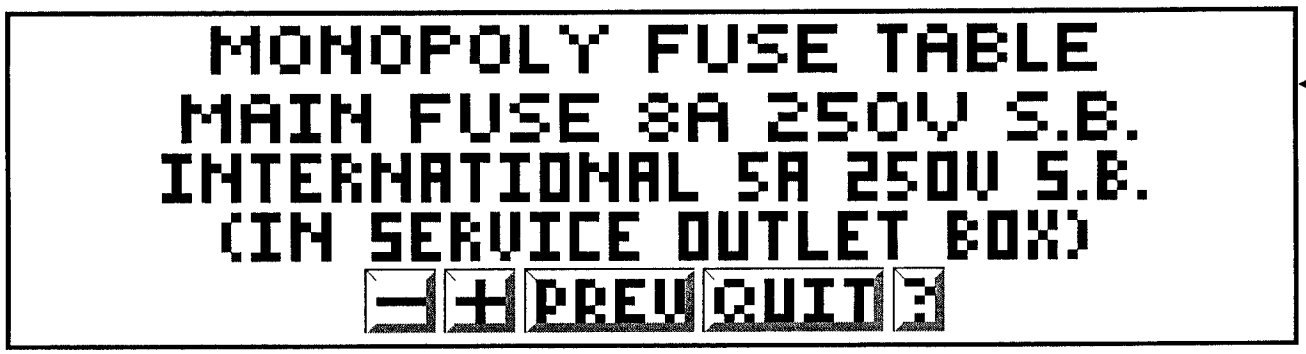
Selecting & activating the "+ " or "-" *Icons* selects the next or previous fuse in this group.

Example:

From the **MAIN MENU**, use the **Red** or **Green Buttons** to select the "FUSES" *Icon* (**GO TO FUSE TABLE**).



Press the **Black Button** to activate this **ICON**. This will bring up the **MONOPOLY FUSE TABLE**.



▼ BACKBOX LAYOUT LOCATIONS: Fuses, Bridges, Relays & ROMs ▼

CAUTION: *For continued protection against risk of fire, replace only with same type of fuse having the same electrical rating!*

Section 3, Chapter 6: Go To Fuse Table

Go To Help Screen

Overview

The **Portals™ Service Menu System** provides help screens in each display (except if the display is in a testing mode). Help Screens provide different information depending on where the "HELP" or "?" *Icons* are selected. Read all chapters in this section for a complete understanding of this pinball game. For more help, utilize the "Dr." *Icon* in the **DIAGNOSTICS MENU** (see the end of Chapter 2 in this section). The table on the next page was designed to provide solutions to some common problems frequently asked.

GO TO HELP SCREEN

With the game in the Attract Mode, open the Coin Door and press the **Black "BEGIN TEST" Button**. Select the "HELP" *Icon* in the **MAIN MENU** with either **Red "LEFT"** or **Green "RIGHT" Button** and press the **Black "ENTER" Button**. The below screens appear and will continuously cycle until any **Button** is pressed bringing back the **MAIN MENU**.

Important Notes:

Exit any sub-menu and return to the **MAIN MENU** by selecting & activating the "PREV" *Icons*. If no *Icons* appear in the display because of a testing function or special display (e.g. "Help"), press any button to exit.

Selecting & activating the "HELP" *Icon* from any display will show a help screen. (An explanation of each *Mini-Icon* at that level will cycle continuously until any active button is pressed.)

Selecting & activating the "QUIT" *Icon* from any display will exit the Service Session.

These "Mini-Icons" vary in functionality depending in what sub-menu they are used. Refer to the beginning of each chapter in this section for the function they serve in that menu or select the "HELP" *Icons* in the display where the *Icon* in question is being used.

Help Screens from the MAIN MENU:

```
USE FLIPPER BUTTONS
(OR RED AND GREEN COIN
DOOR BUTTONS) TO CHANGE
THE SELECTED ICON.
```

```
PRESS START BUTTON
(OR ENTER) TO
ACTIVATE THE
SELECTED ICON.
```

This concludes the **Portals™ Service Menu**. Review the Table of Contents at the beginning of this manual, and the detailed Table of Contents for Section 3 to quickly find the information required. The remainder of the sections in this manual cover all the parts in this game and provide helpful information to aide in troubleshooting. If questions still arise after reading this section completely, call TECH SUPPORT or visit our website at www.sternpinball.com.

PORTALS™ SERVICE MENU
PROBLEM/SOLUTION TABLE

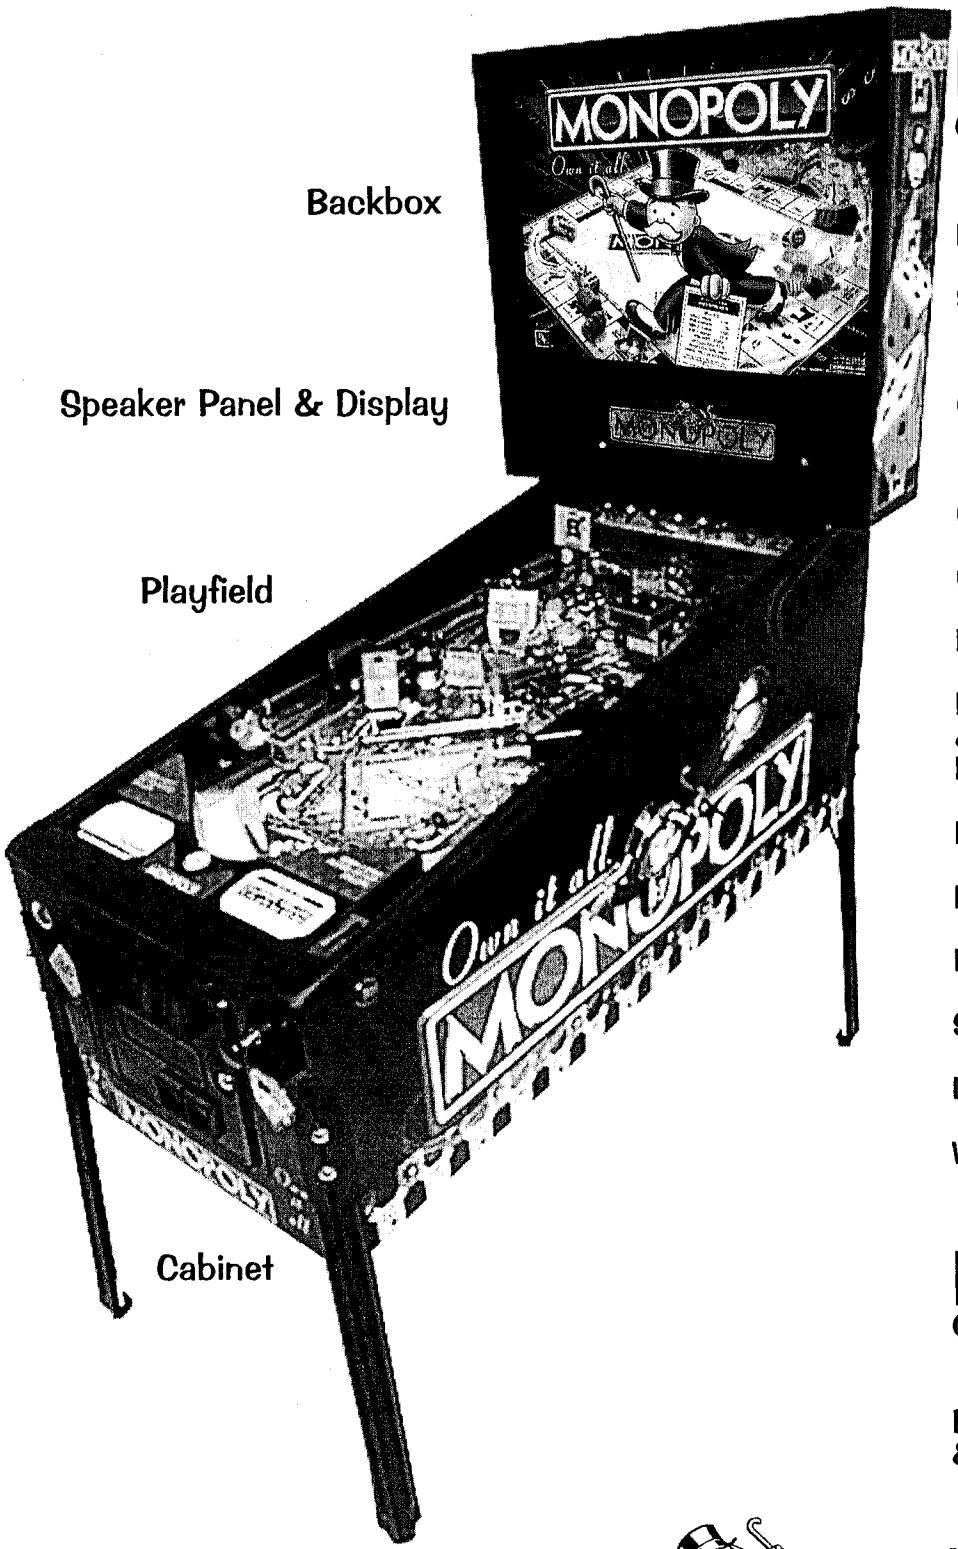
Use this table for a quick simple solution(s) guide. For more technical assistance view Section 5.

PROBLEM	SOLUTION
Will not enter the Service Mode after depressing the **Black "BEGIN TEST" Button**.	• Check the Service Switch(es) (**Red, Green & Black Buttons**) for loose connections or bad Ground. • Check the associated wiring harness to/from the CPU Board Connector CN6. • Check CPU Board, possibly failed.
All Service Buttons (**Red, Green** and **Black**) appear nonfunctional.	• Check the Service Switches for poor connections or broken wires.
The **Green Service Button** in the Attract Mode will not enter the Service Credits Menu to add Service Credits.	• Check to make sure the Game is not in "Free Play." *If the game is set to Free Play, adding Service Credits is not required.* • Check the Service Switche(s) for poor connections or broken wires.
The display blanks out.	• Check the Dot Matrix Display for loose wiring harness connections. • Check F1 (3/4A Fuse) on the Display Pwr. Supply Bd. Refer to Section 5, Chapter 4, Schematics & Troubleshooting.
Icons *"scroll"* along continuously in the **MAIN MENU**.	• If the Service Switch Set and/or the Coin Door was replaced, ensure the Locking Mechanism on the **Green Button** is removed. If the Green Button "clicks" and locks into an up/down position, the Green Button has this lock switch. Remove it. (Ref. to Svc. Bulletin #74.)
The **Start** and **Flipper Buttons** do not select or activate *Icons* in the **SWITCH TEST MENU**.	• This is normal. These switches are deactivated, as they are a part of the Switch Test. Use the **Red "LEFT" or Green "RIGHT" & Black "ENTER" Buttons** in this Sub-Menu (see Chapter 1).
Can't move selection of *Icon* with the **Left** and/or **Right Flipper Buttons**.	• Check the **Flipper Buttons** for loose connections or bad Ground and refer to Section 5, Chapter 2, Playfield Wiring, #-Flipper Circuit Wiring Diagram. • This is normal ***only*** in Diagnostic's Switch & Active Switch Tests (see previous Problem).
Some *Icons* appear non-functional in the **PRINTER MENU(S)**.	• If no printing equipment is connected, the "-" *Icon*, "+" *Icon* and "RUN" *Icon* will appear not to function (see the end of Chapter 3).
Some *Icons* appear non-functional in the **GAME SPECIFIC MENU** under the **DIAGNOSTICS MENU**.	• If there is no other test under this Menu, the "Left Arrow" & "Right Arrow" *Icons* will appear not to function. The remaining *Icons* should function as normal. *Note: If there is no Game Specific Special Test, the "**GAME SPECIFIC**" Icon will not invoke another display.*
The display returns to the **ATTRACT MODE** exiting the Service Session from the **FACTORY RESET MENU**.	• This is normal. After a **FACTORY RESET**, the Service Session is automatically exited (see Chapter 4 (end) or Chapter 6).
In **COIL TEST MENU**, the coils and flashlamps ***do not*** fire after activating the "RUN" *Icon*.	• Ensure the **POWER INTERLOCK SWITCH*is pulled out*** (see Chapter 1).
In **ADJUSTMENTS MENU**, with the Coin Door **CLOSED**, adjustments are not getting changed as desired while using the **Flipper** & **Start Buttons** to select *Icons* and change values.	• This is normal. The ***Memory Protect Switch*** is enabled when the Coin Door is **CLOSED**. Changes can be made with the Coin Door **OPEN** only.
In **Portals™ Service Menu**, the volume cannot be adjusted with the **Red** or **Green Buttons**.	• The Volume adjustment can only be made when in the **Attract Mode**. The **Volume Mode** is entered by pressing the **Red "VOLUME" Button**. Then use the **Red** or **Green Button** to increase/decrease volume. (Red "LEFT" decrements; Green "RIGHT" increments.)
In **Portals™ Service Menu**, the display seems to lock up, or the Help Display appears to be non-functional.	• If you cannot clear the situation by exiting back one Menu, exit completely out of the **Portals™ Service Menu**, and re-enter. If the problem persists, call Technical Support for additional help.

Parts Identification & Location (The Pink Pages)

Overview

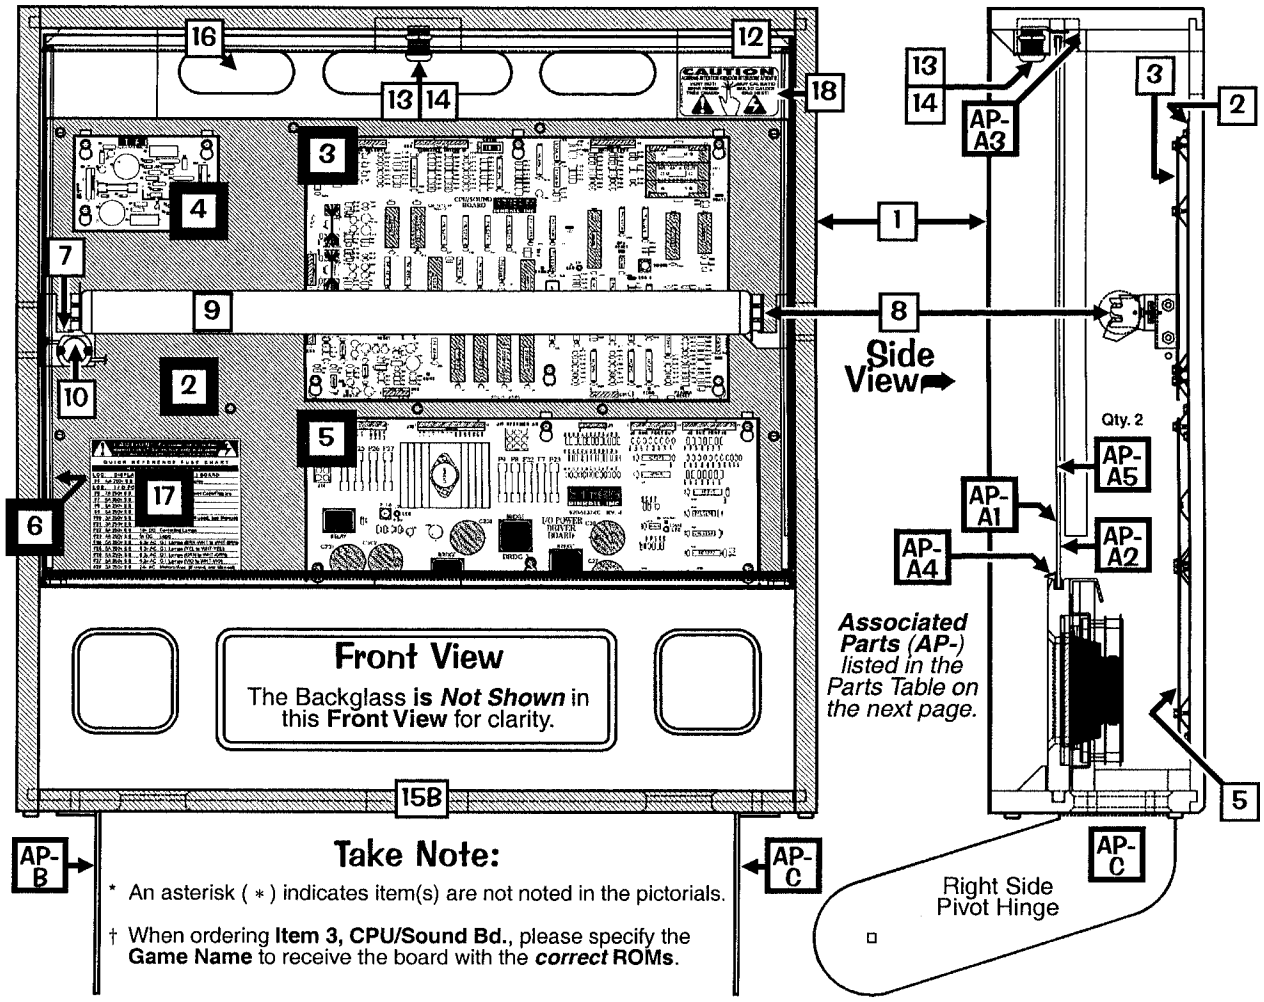
This section provides the Part Nºs and locations of all the components in this pinball machine. The parts are arranged in three groups: **BACKBOX**, **CABINET** & **PLAYFIELD**. Generic parts which may change as production continues (quantity and/or size) are listed together. Quantities greater than 0 indicates that the part is used in this game. Since quantity changes *may occur*, an item indicating "0" may be used. Compare the item which needs to be replaced with the drawings provided (the *Posts, Sockets, Bulbs & Rubber Rings* are drawn actual size). Major Assemblies & Ramps are detailed in the Blue Pages, Chapter 2. **Important:** Read all "**Take Note:**" items.



Section 4, Table of Contents

MONOPOLY Backbox Assembly, 505-6002-75-75 (Items 1-26)

Not sold as an assembly, order the individual part(s) actually required.



Take Note:

* An asterisk (*) indicates item(s) are not noted in the pictorials.

† When ordering **Item 3, CPU/Sound Bd.**, please specify the **Game Name** to receive the board with the ***correct* ROMs**.

Sec. 4: Parts Id. ...

№	BACKBOX PART NAME	QTY.	SPI PART №
1	Backbox (MONOPOLY®)	1	525-5558-75
	Item 1 Note: Black Textured T-Molding is installed and cannot be ordered separately.		
2	PCB Metal Mounting Plate	1	535-5809-04
	Item 2 is secured to Item 1 by: #8 X 1/2" SHWH AB (Zinc) (Qty. 13) (234-5101-00) **and** #10 Washer 7/32" I.D. X .5" O.D. X 1/16" Thick (Qty. 4) (242-5003-00)

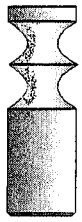
E	Speed Bump Metal Ramp Riv. Assy.	1	515-7202-00

Note on Item E: *For securing hardware and a break-down of parts on this item, see the Blue Pages, Sec. 4, Chp. 2, Drawings for Major Assemblies & Ramps, Page 87.*

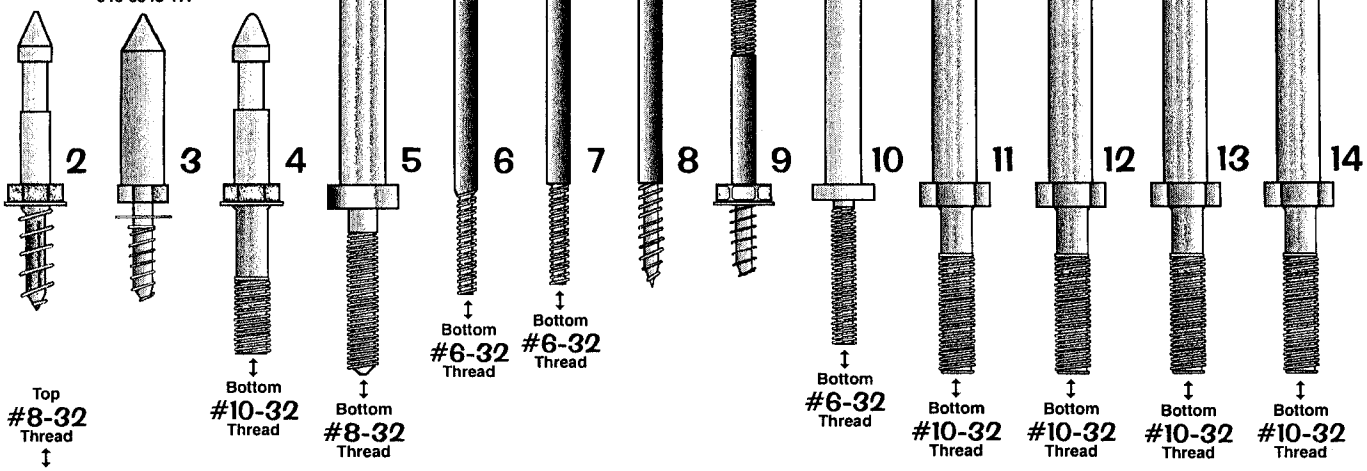
Playfield - Metal Posts (Screws) and Nuts (Actual Size) †

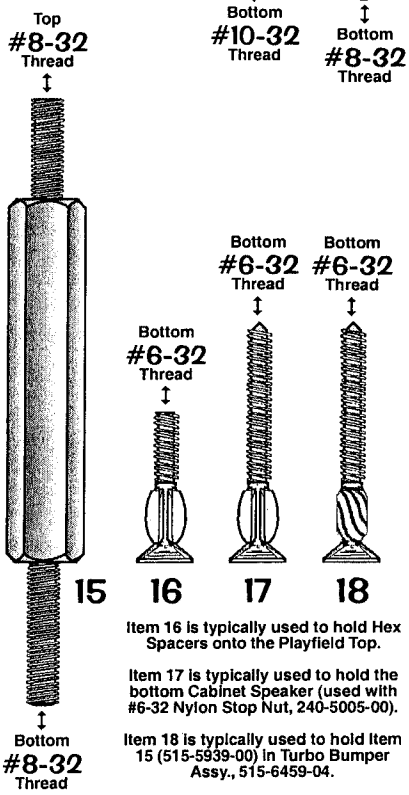


1

Item 1 Post can use 3/16" I.D. Rubber Ring, 545-5348-01; or if Item 1 Post is used in pairs, can use 3/4" — 3" Rubber Rings.

Items 2 & 4 Posts can use 7/16" O.D. Rubber Ring, 545-5348-17.





Item 16 is typically used to hold Hex Spacers onto the Playfield Top.

Item 17 is typically used to hold the bottom Cabinet Speaker (used with #6-32 Nylon Stop Nut, 240-5005-00).

Item 18 is typically used to hold Item 15 (515-5939-00) in Turbo Bumper Assy., 515-6459-04.

Note: The "Fins" keep the screw from turning inside the wood hole.

Nut Note: All nuts shown with a " ✔ " are used in this game. The quantities (not specified) vary. The remaining items listed are not used in this game and are noted for reference only (used in prior games).

THIS GAME ONLY:

Like Item 1 above, but with #8-32 Tap (Qty. 1) (254-5031-01) used on Bank Assy. (Item 10, Page 79).

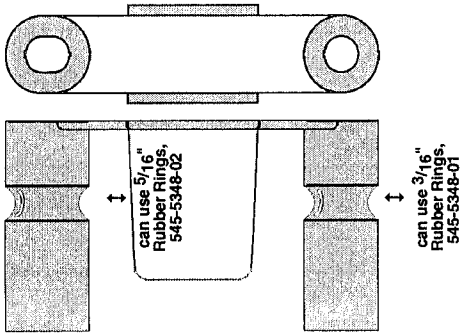
Similiar to Item 16 above, but 1.9" & Male End #8-32 (Qty. 1) (254-5031-03) see Left Ramp (Page 83).

Like Item 16 above, but with Male End #8-32 (Qty. 1) (254-5031-04) see Rt. Ramp (Page 85).

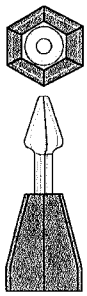
† Items with a Zero Qty. are not used in this game. Size and/or quantities may change during production.

Playfield - Plastic Posts and Spacers (Actual Size) †

1** Various Colors

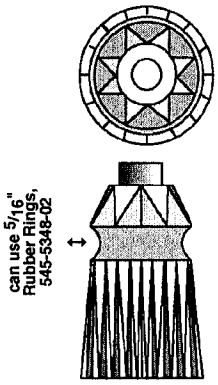


2** Various Colors



3** Limited Colors

4** Various Colors



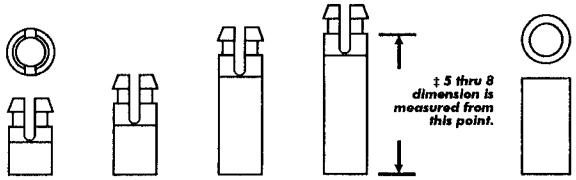
Items 3-4 Posts used in pairs can use 3/4" through 3" Rubber Rings, (See Rubber Parts for Part Nºs).

Take Note:

PLASTIC PART COLOR CHART					
Nº	Color	Nº	Color	Nº	Color
-00	Black	-06	Yellow	-12	Fluor. Blue
-01	Clear	-07	Orange	-13	Teal Green
-02	Red	-08	White	-14	Gray
-03	Amber	-09	Purple	-15	Luminescent
-04	Green	-10	Fluor. Orange	-16	Gold
-05	Blue	-11	Fluor. Green		

** Items **1, 2 & 4** come in various colors (may not be available in every color). Item **3** is currently only available in the color stated in this game manual (other colors used in prior games may no longer be available). The "-XX" in Part Nºs which may come in various colors should be replaced with the desired 2-Digit Nº. corresponding to the color desired. *Some colors may no longer be available for desired item.*

5 ‡ 6 ‡ 7 ‡ 8 ‡ 9



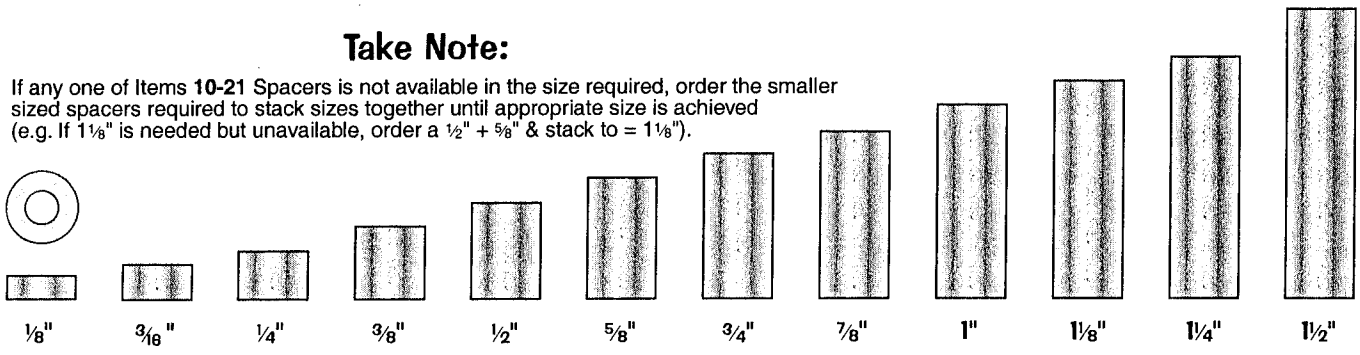
1/4" 3/8" 5/8" 3/4" 1/2"

‡ Items **5** through **8** (Board Spacers) dimensions are measured from bottom to just under cut-away (see pictorial with Item 8 above).

10 11 12 13 14 15 16 17 18 19 20 21

Take Note:

If any one of Items **10-21** Spacers is not available in the size required, order the smaller sized spacers required to stack sizes together until appropriate size is achieved (e.g. If 1⅛" is needed but unavailable, order a ½" + ⅝" & stack to = 1⅛").



⅛" 3/16" ¼" ⅜" ½" ⅝" ¾" ⅞" 1" 1⅛" 1¼" 1½"

† Items with a Zero Qty. are not used in this game. Size and/or quantities may change during production.

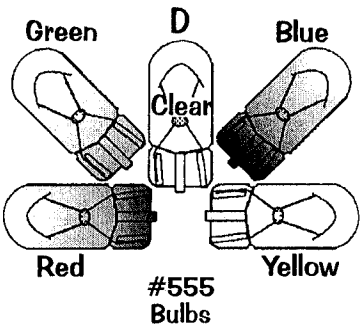
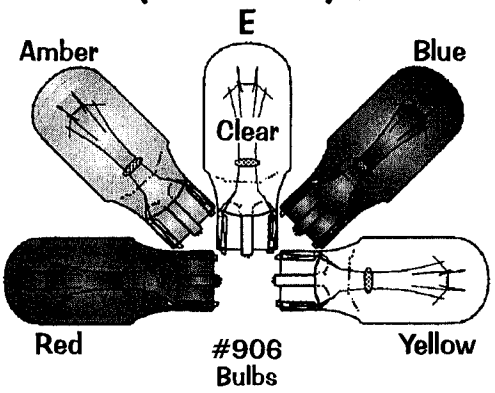
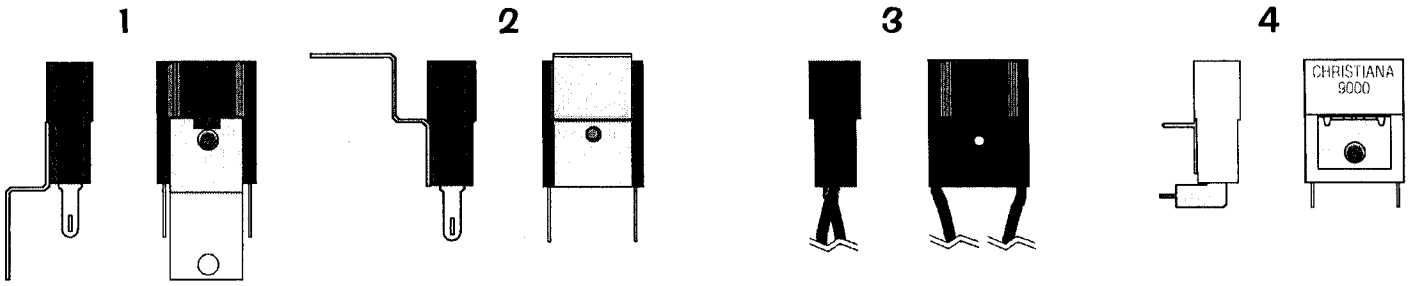
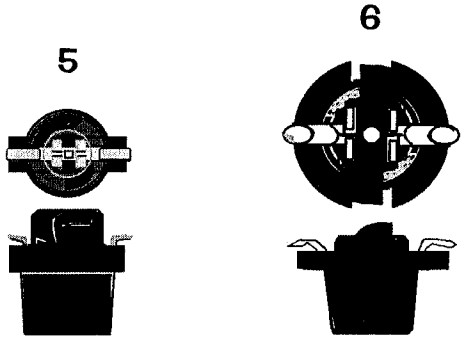
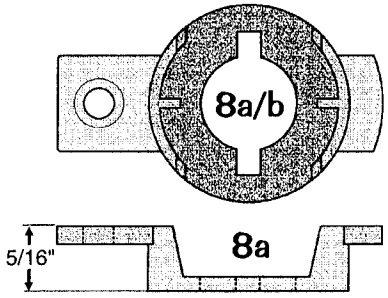
Playfield - Wedge Base Bulbs and Sockets (Actual Size) †











Take Special Note

Item 7a is an **IDC** (Insulation Displacement Connection) Style Socket (this style is solderless). This socket is secured to the playfield or component by Items **8a** or **8b** Snap-On Socket Brackets, or *may* also be snapped into **Item 9** Socket Mounting Plastic Board (used only when sockets are positioned closely together).

Just squeeze the "side arms" of the socket together and pull away from the bracket or mounting board for easy Bulb replacement.

Take Note:

* An asterisk (*) indicates item(s) are not noted in the pictorials.

1. Item **3** Socket has 2 Wires attached are approximately 12" ea.
2. Item **4** Socket **was** used on PC Light Boards to position bulbs horizontally; Item **4** Socket is secured by soldering into place.
3. Item **5** Socket **was** used on PC Light Boards to position bulbs vertically; Item **5** Socket is secured by "twisting" into place.
4. Item **E** Bulb (#906) is normally used in conjunction with Item **6** Socket, but ***can*** be used with Items **1, 2, 4** or **7a/b.**
5. Item **7a** Socket is equipped with a *built-in* Diode, 1N4003 (112-5003-00), however, replacement can be made with a 1N4001 Diode (112-5001-00).
   Item **7b** Socket is ***NOT*** equipped with a diode (not required).

Note: Always replace with same type bulb in original application.

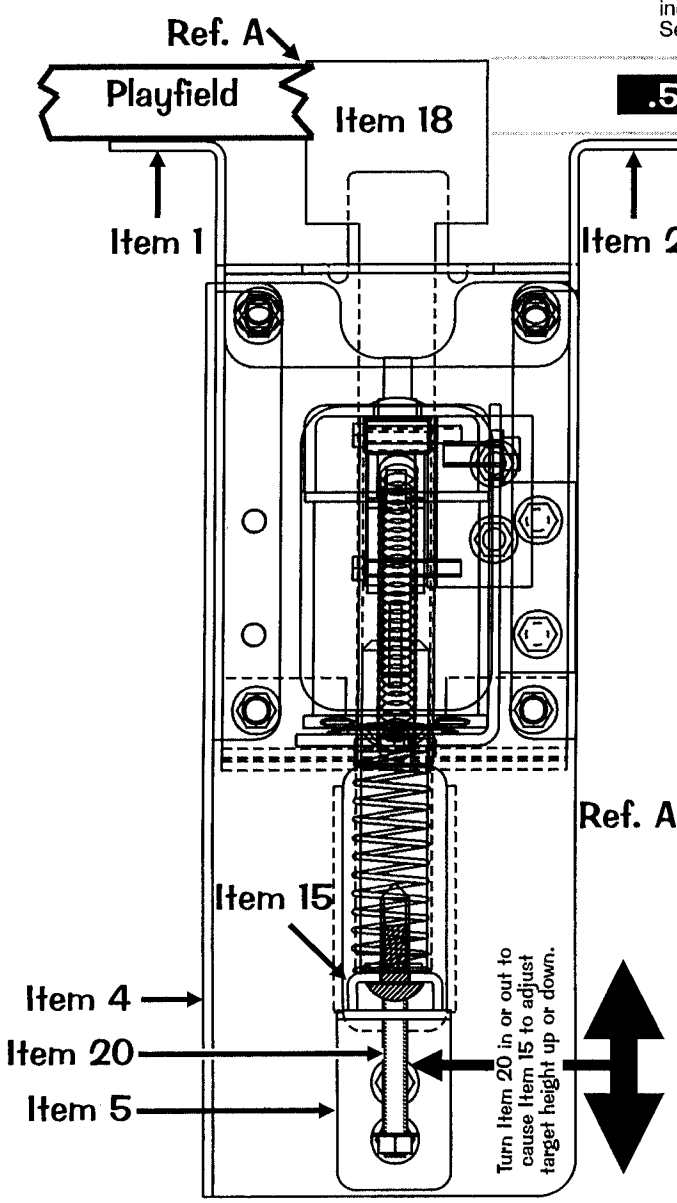
6	Bracket, Target Retainer (1-Bank D/T)	1	535-7728-00
7	Bracket, Coil Housing	1	535-7707-00
8	Bracket Cap, Coil Housing	1	515-6533-00
	Items 1-3, 5, 7-8 are secured to Item 4 by: #8-32 X 3/8" HWH Swg. (Qty. 16) (237-5975-00)		
9	Coil, 24-940	1	090-5036-00B
	ORDERING ABOVE (ITEM 9) COIL PART № WILL INCLUDE:		
—	Diode, 1N4004 (positioned at bottom)	1	112-5003-00
10	Coil Sleeve	1	545-5709-00
11	Spring Washer (17/32" ID X 3/4" X 1")	1	269-5002-00
	To order Items 7-11 assembled with securing hardware, use SPI №: 515-6535-01.		

№	INDIVIDUAL PART NAME	QTY.	SPI PART №
12	Bracket, Switch (1-Bank D/T)	1	535-7710-00
13	Switch (D/T)	1	180-5158-00
	Item 13 is secured to Item 12 by: #4-40 X 5/8" HWH TF (Qty. 2) (237-5945-00)		
14	Switch Diode, 1N4001	0	112-5001-00
	See "Take Note" below.		
15	Bracket, Target Lift (1-Bank D/T)	1	535-7706-01
16	Plunger (Drive Coil)	1	530-5410-00
	Item 16 is secured to Item 15 by: #10-32 X 3/8" PPH (Sems) (Qty. 1) (232-5401-00)		
	To order Items 15-16 assembled with securing hardware, use SPI №: 515-6537-00.		
17	Compression (Return) Spring	1	266-5020-00
18	Drop Target White (Rollover Target)	1	545-5533-01
	***Note:** Individual Decal Not Available. The entire decal sheet must be ordered for replacement. See Page 57 for part number.*		
19	Spring, Target Reset	1	265-5003-00
20	Height Adj. Screw (#8-32 X 1" HWH)	1	237-6003-00

Ordering Note: If **500-6440-21** *is unavailable,* order the individual part(s) actually required or try **500-6440-01** and remove the Trip Coil & Bracket from Item 4 *(Note: Item 5, Height Adj. Bracket may differ slightly).* ***Also, ensure the diode on the switch is soldered correctly.***

Take Note:

The Switch Diode, 1N4001, is not located on this assembly (nor included); it's located on a Terminal Strip under the playfield. See Section 5, Chapter 2, Playfield Terminal Strips..., Page 95.



Target Height Adjustment Procedure:

1. Adjust the height of the top of ***Item 18*** (Rollover Target) at .52" (+/- .01"), relative to ***Items 1 & 2*** (Left & Right Side Brackets), as shown left. *Adjustment should be made with* ***Item 18*** *(Drop Target) in the* ***DOWN POSITION.***

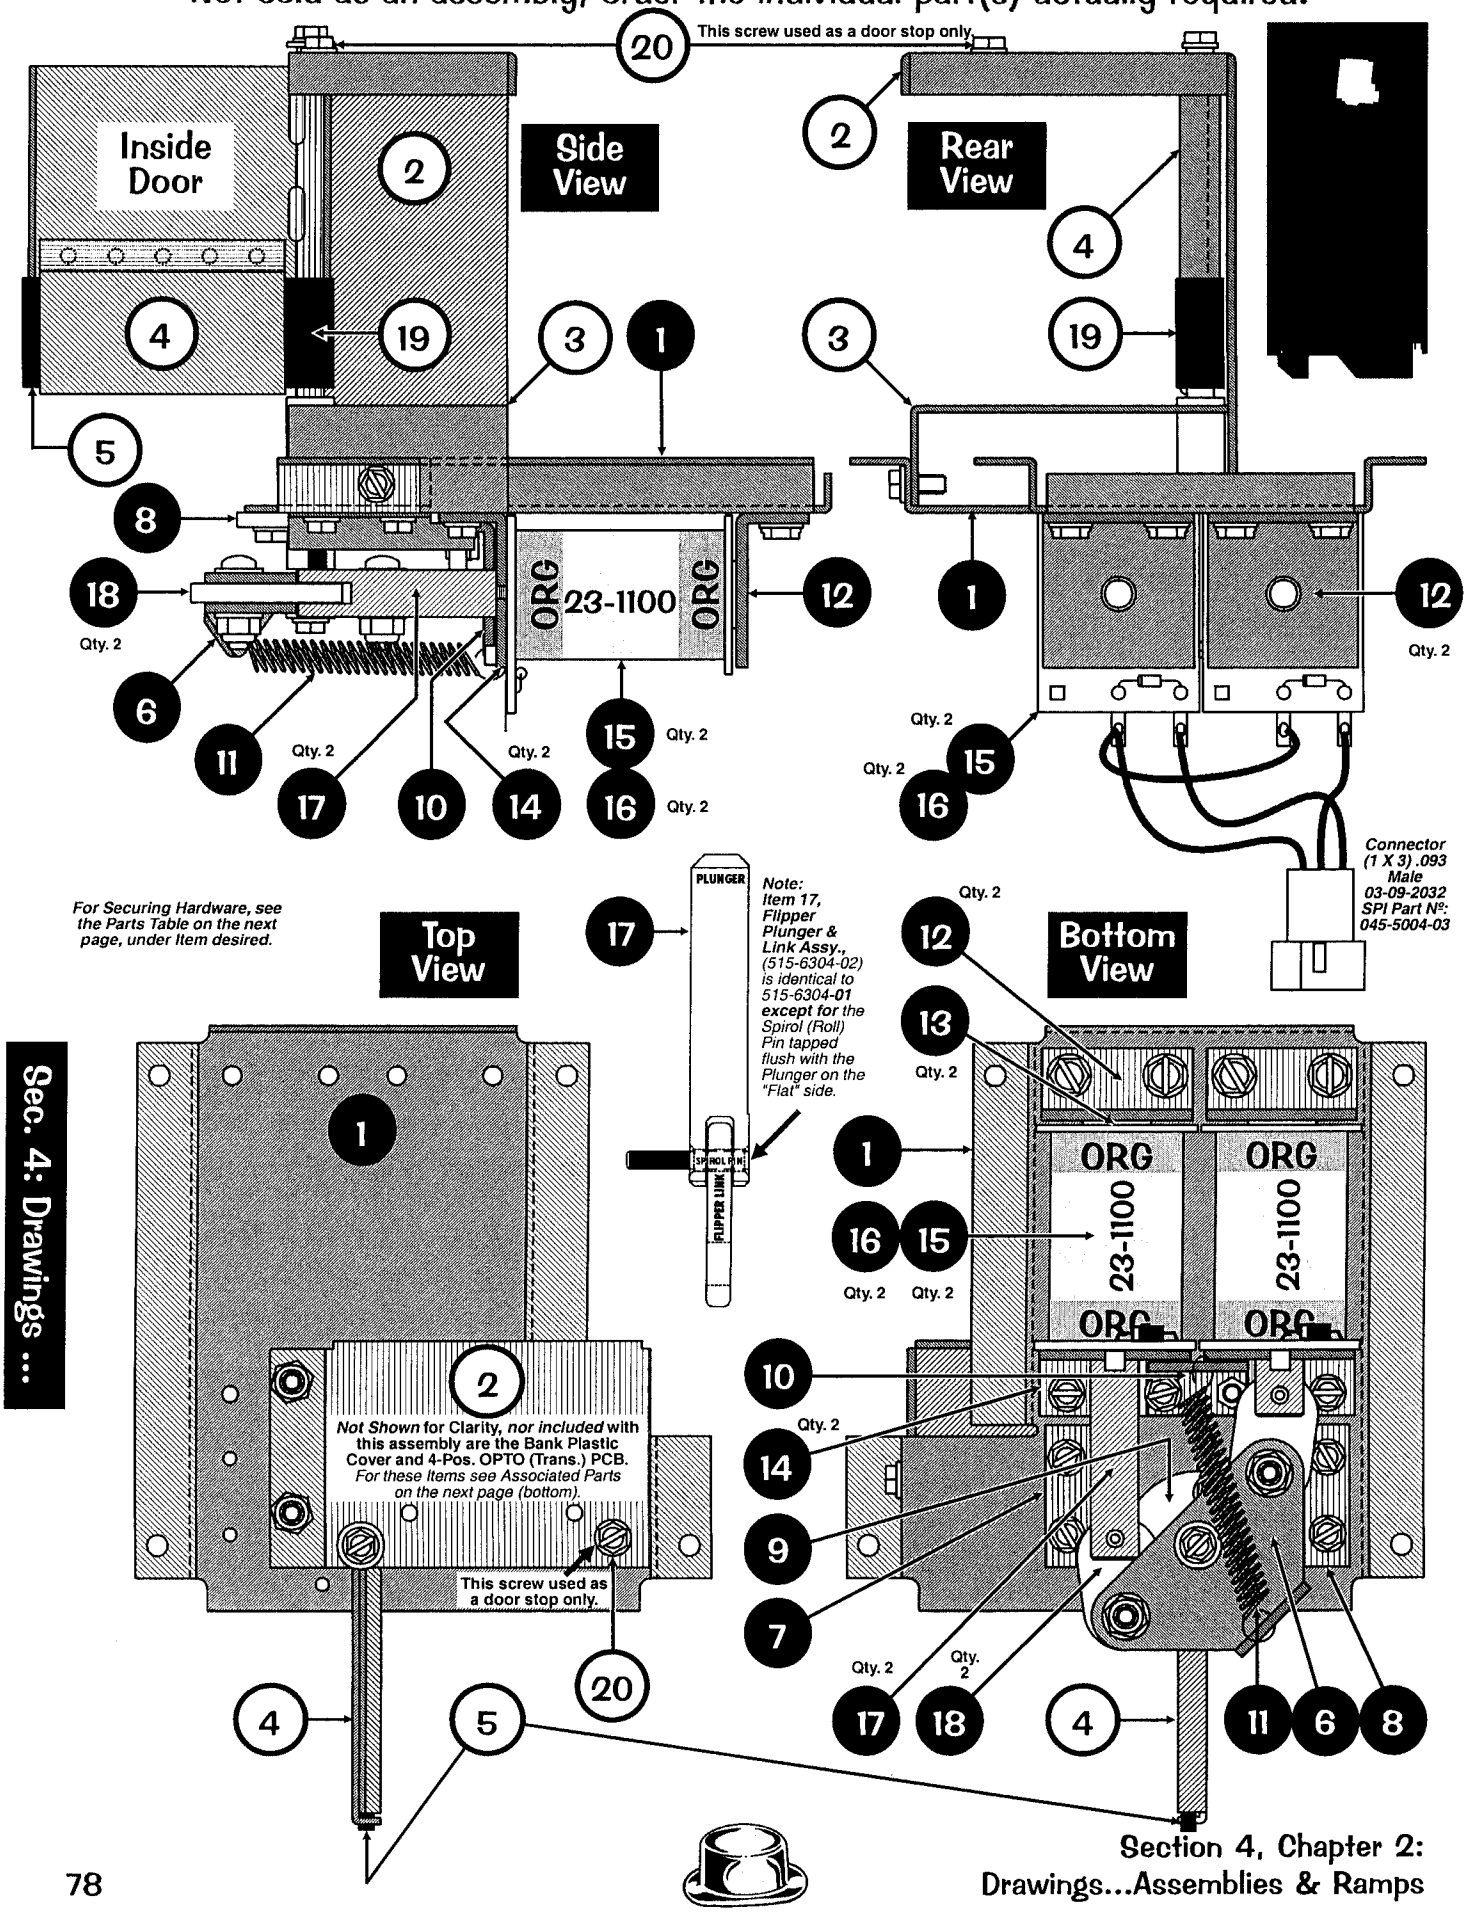
Keep in Mind: This adjustment procedure should have the **TOP SIDE** of ***Item 18*** (Drop Target) *"flush to slightly above"* the *playfield surface* after reinstalling to the underside of the Playfield. This will ensure a **BALL TRAP** is not created where the ball can rest in the target hole above the playfield.

2. Using a Flat Head Screwdriver or a 1/4" Nut Driver, loosen or tighten (turn in or out) ***Item 20*** (Height Adjustment Screw) through ***Item 5*** (Height Adjustment Bracket) to raise or lower ***Item 15*** (Target Lift Bracket) causing ***Item 18*** (Drop Target) to reach desired height as stated above.

MONOPOLY® Bank Assembly, 500-6512-00 (Items 1-20)

The Parts Table for this assembly is on the next page.

Not sold as an assembly, order the individual part(s) actually required.



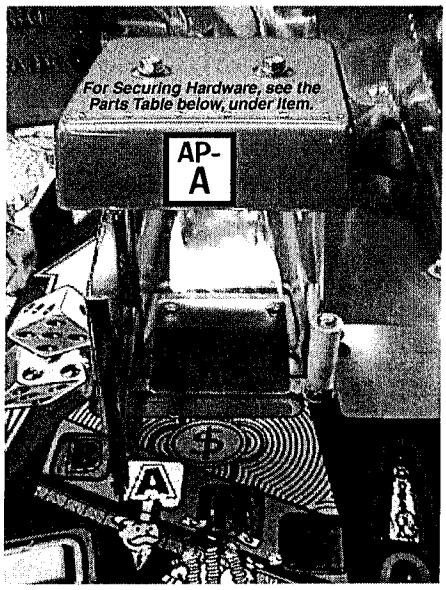
Sec. 4: Drawings ...

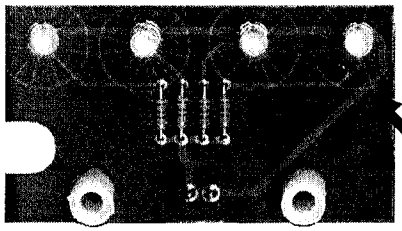
MONOPOLY® Bank Assembly, 500-6512-00 (Items 1-20) Continued

The Drawings for this assembly are on the previous page, also reference pictures below.
Not sold as an assembly, order the individual part(s) actually required.

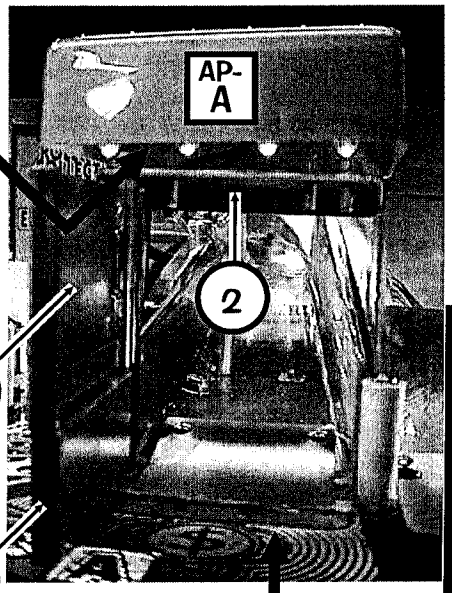
Nº	INDIVIDUAL PART NAME	QTY.	SPI PART Nº
1	Bottom Mounting Bracket	1	535-8924-00
	Item 1 is secured below the playfield by: #8 X 1/2" HWH AB (Zinc) (Qty. 4) (234-5101-00)		
2	Housing (Left Wall & Ceiling) Bracket	1	535-8926-00
	Item 2 is secured to Item 1 at Pem Studs by: #8-32 Nylon Stop Nut (Qty. 2) (240-5102-00)		
3	Floor (Bracket)	1	535-8925-00
	Item 3 is secured to Item 1 at side by: #8-32 X 3/8" HWH Swage (Serr) Zinc (Qty. 2) (237-5975-00) **and is secured into Item 2's slot holes.**		
4	Door	1	515-7222-00
	Item 4 is secured at the top by: #6-32 X 3/8" HWH Swg (Sr.) Zinc (Qty. 1) (237-5976-02) **and** #6 Washer (Qty. 1) (242-5001-00) *Note: Door with no pad use 535-8927-00*		
	ORDERING DOOR (ITEM 4) WILL INCLUDE RUBBER PAD (ITEM 5) ATTACHED.		
5	Impact Blue Rubber Pad **(Self-Adhesive)**	1	545-5994-00
6	Toggle Bracket	1	535-8929-00
	Item 6 is secured at the center by: #6-32 X 3/8" HWH Swage (Serr) Zinc (Qty. 1) (237-5976-02) **and** #6 Washer (Qty. 1) (242-5001-00)		
7	Roll-Pin Guide Bracket, Left	1	535-9015-00
8	Roll-Pin Guide Bracket, Right	1	535-9015-01
9	Flipper Bat Bushing	1	545-5594-00
	Items 7-9 are secured to Item 1 by: #6-32 X 3/8" HWH Sw. (Sr.) Zc. (Qty. 7) (237-5976-02)		
10	Spring Bracket	1	535-8928-00
	Item 10 is secured to both Item 14's by: #8-32 X 3/8" HWH Swage (Serr) Zinc (Qty. 1) (237-5975-00) **and** 1/4" X 1/4" Hex Spacer,#8-32 Tap (Qty. 1) (254-5031-01)		
11	Flipper Return Spring	1	265-5035-00
12	Coil Stop Bracket Sub-Assembly	2	515-6308-01
	Item 12 is secured to Item 1 by: #10-32 X 3/8" SHWH Swg. (Sr.) Zc. (Qty. 2) (237-5985-00)		
13	Spring Washer (17/32" ID X 3/4" X 1")	2	269-5002-00
14	Coil Support Bracket	2	535-7356-00
	Item 14 is secured to Item 1 by: #8-32 X 3/8" HWH Swage (Serr) Zinc (Qty. 1/per) (237-5975-00) **and secured by Item 10**		
15	Coil, 23-1100 (ORG)	2	090-5030-00T
	ORDERING ABOVE (ITEM 15) COIL PART Nº WILL INCLUDE:		
—	Diode, 1N4004 (positioned at top)	1/per	112-5003-00
16	Coil Sleeve	2	545-5388-00
17	Flipper Plunger & Link Sub-Assy.	2	515-6304-**02**
	includes : Plunger "Flipper" Link	*1*	*545-5611-00*
	includes : Spirol Pin ø 5/32" X 3/4" Lg. ***See Note***	*1*	*251-5015-02*
	include : Flipper Plunger with "Flat"	*1*	*530-5349-01*
	Ordering Note: If **515-6304-02** *is unavailable*, order the individual part(s) actually required, or try **515-6304-01** and **tap the Spirol Pin flush with the Plunger on the "Flat" side** *(all parts otherwise are identical).*		
18	Flipper Link Bushing (Metal, Ext.)	2	530-5139-01
	Specifications: .385" Lg. X .192" ID X .312" OD		
	Item 18 is secured to Item 6 by: #8-32 X 3/4" PPH MS (Zinc) (Qty. 2/per) (237-5604-00), #8 Washer (Qty. 2/per) (242-5005-00) **and** #8-32 Nylon Stop Nut (Qty. 2/per) (240-5102-00)		
19	Post Black Rubber (Sleeve Tall)	1	545-5308-00
20	"Door Stop" #8-32 X 3/8" HWH Sw.	1	237-5975-00
	Ordering Note: If **500-6512-00** *is unavailable*, order the individual part(s) actually required.		

Associated Parts: Bank Plastic Cover, 4-Pos. OPTO (Trans. & Rec.) PCBs (Items AP-A - AP-C)





AP-B **Top View**



Take Note:

The Individual Decal (BANK) is Not Available. The entire decal sheet must be ordered for replacement. See Page 57 for part number.

Take Note:

For a break-down of parts of Items AP-B & AP-C (below), see Sec. 5, Chp. 4, 4-Position OPTO (Receiver) PC Board Component Layout & Parts, Page 130, or 4-Position OPTO (Transmitter) PC Board Component Layout & Parts, Page 131.

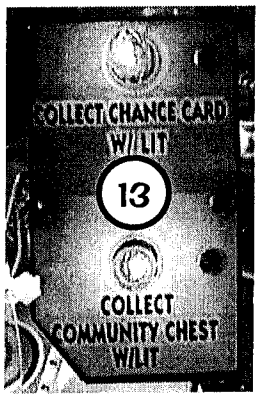
14®	Screened Plastic (Butyrate) -22	1	830-5985-22
Item 14 is secured to Item 15 by: #6-32 X 3/4" HWH Swage (Sr) Zc (Qty. 2) (237-5976-05)			
Special Ordering note on Items 13 & 14: *The individual piece may not be available in which case the entire sheet must be ordered. See Sec. 4, Chp. 1, Parts Id. & Loc., Page 57.*			
15®	Bracket (Free Parking), Sign Mounting	1	535-8974-00
16®	Bracket (Collect...), Sign Mounting	1	535-8975-00
Items 15 & 16 are secured to Item 1 by: #8-32 X 3/8" HWH MS (Zinc) (Qty. 2/per) (237-5868-00) **and** #8-32 Nylon Stop Nut (Qty. 2/per) (240-5102-00)			
17®	#555 Wedge Base Socket (Offset)	3	077-5029-00
Item 17 is secured to Items 13 & 14 by: Rivet, 1/8" ø X 3/16" Lg. (Nickel) (Qty. 1/per) (249-5001-00) **and** #6 Riveting Lock Washer (Qty. 1/per) (246-5000-00)			
18	#555 Wedge Base Bulb (Yel)	3	165-5054-06
19	Switch & Target Assy. Narrow (Yel)	1	515-5967-06
20	Bracket, Switch Back Plate	1	535-6452-00
Items 20 & 21 are secured with the same hardware used to secure Item 14 into Item 15.			
21*	Foam Pad (Switch Back) Self-Adh.	1	626-5029-00
22*	Insulator (Fische Paper)	1	545-6024-01
Item 22 is positioned between Items 15 & 19 at mounting point.			

Left Plastic Ramp is secured above the playfield by:

A▲▼	#4 X 5/8" PFH (Black)	Qty. 4	237-5833-00
B▲	2⅛" X 1/4" Hex Spacer #6-32 Tap	Qty. 2	254-5008-32
C▲	2⅝" X 1/4" Hex Spacer #6-32 Tap	Qty. 1	254-5008-08
D▲	#6-32 X 3/8" PPH MS (Sems) Zinc	Qty. 3	232-5201-00
E▲	#6 Washer	Qty. 2	242-5001-00
F▼	1.9" X 1/4" Hex Spacer #8-32 Tap	Qty. 1	254-5031-03
G▼	#8-32 X 3/8" PPH MS (Sems) Zinc	Qty. 1	232-5301-00
H▼	#8 Washer	Qty. 3	242-5005-00

This Ramp is secured into the Back Panel by: *Back Edge Lip into Back Panel Slot.*

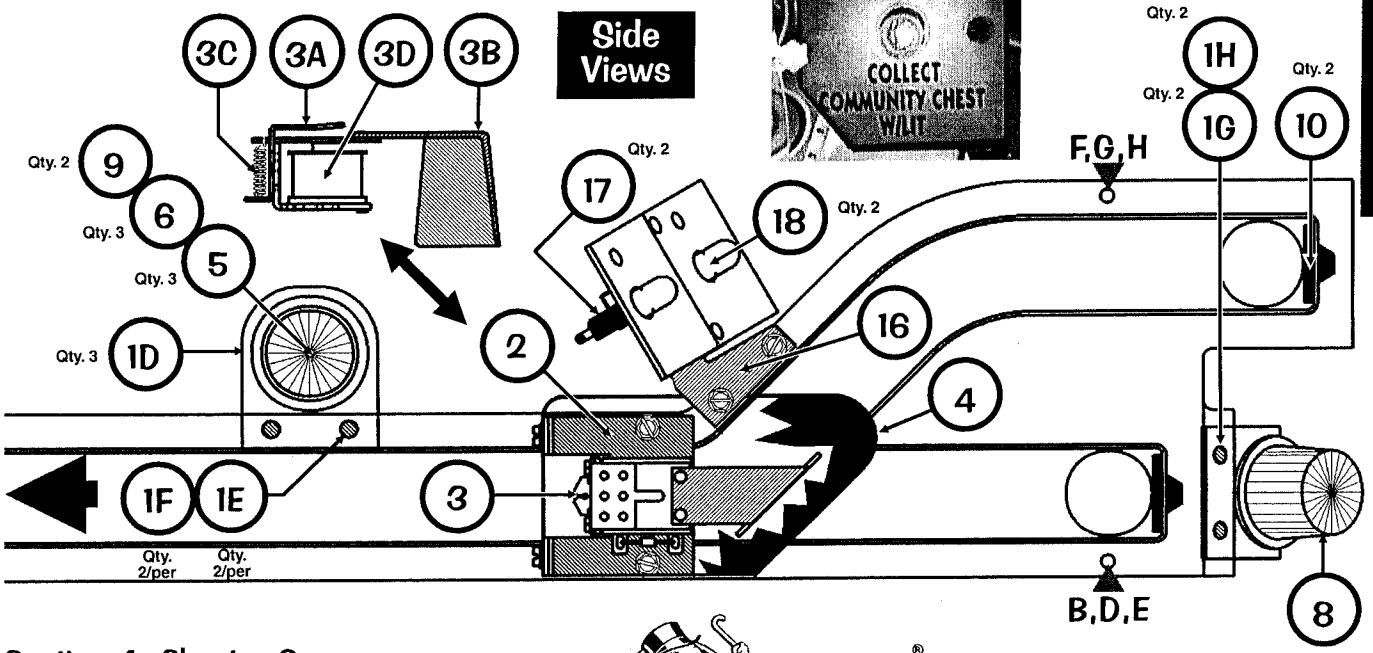
***Note: Item B ▲ is mounted on a Ramp Mounting Bracket** (515-6508-00) on the wood rail.*



Take Note:

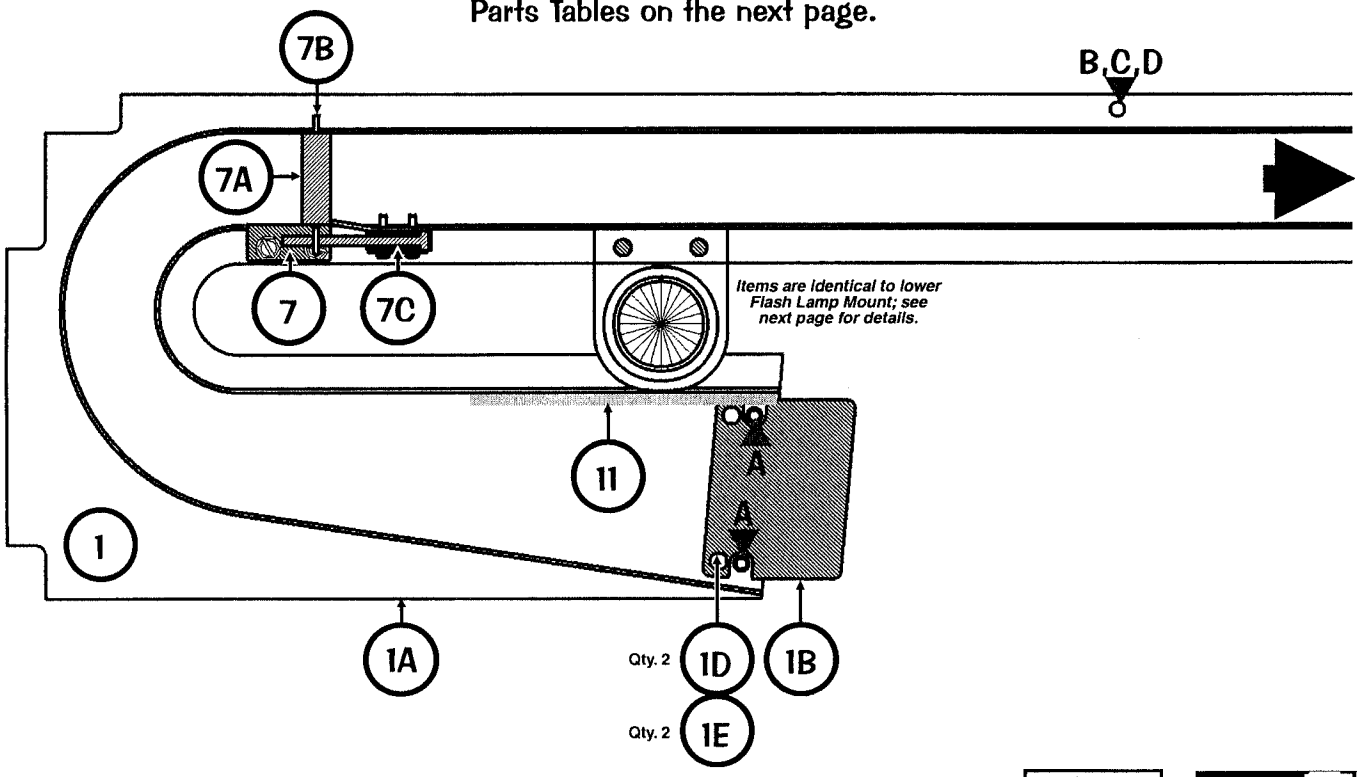
* An asterisk (*) indicates item(s) are not noted in the pictorials.

® "R" indicates Item noted is secured with rivet(s) as listed.

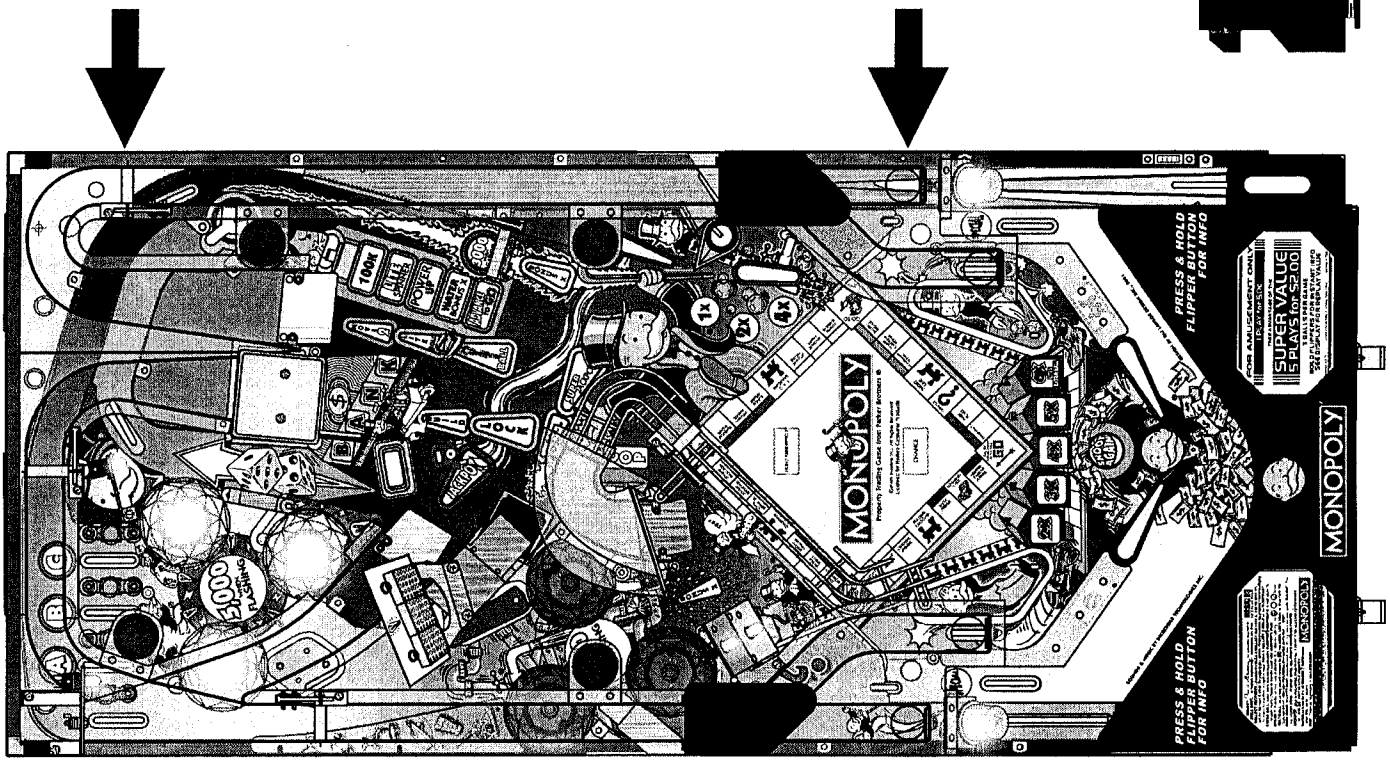


Right Plastic Ramp, 515-7220-00 (Item 1) & Individual Parts (Items 2-11)

Parts Tables on the next page.



For the securing hardware on this ramp, see the Parts Table (under Item 11) on the next page.



Right Plastic Ramp, 515-7220-00 (Item 1) & Individual Parts (Items 2-11) Continued

Schematics & Troubleshooting
Table of Contents

Visit **www.SternPinball.com/schematics.htm** for the latest 11" X 17" Schematics (or "Split 8-1/2" X 11") for the **Display Power Supply, Display Controller, I/O Power Driver & CPU/Sound Boards** (White Star™ System Only). Along with the schematics you'll find the component layout and theory of operation. Keep visiting as these files are continuously improved with more "search" links in the documents. The files are in PDF Format (Adobe® Reader required). They may be slow to open in the website only, but once on your harddrive they'll open fast. Inside the schematics you can utilize internal links where addresses may direct you to another sheet in the schematic set (further instructions within documents). To "download" once open, in your browser click "File" "Send" "Page by eMail". It will be sent to your eMail Address, where there you can save the file to your harddrive.

Use the below ***Coils Detailed Chart Table*** in conjunction with Sec. 5, Chp. 1, Backbox I/O Power Driver Board Detailed Wiring Diagram (I/O Board Connectors J6, J7, J8 & J9) and Backbox Board Layout Wiring Diagram:

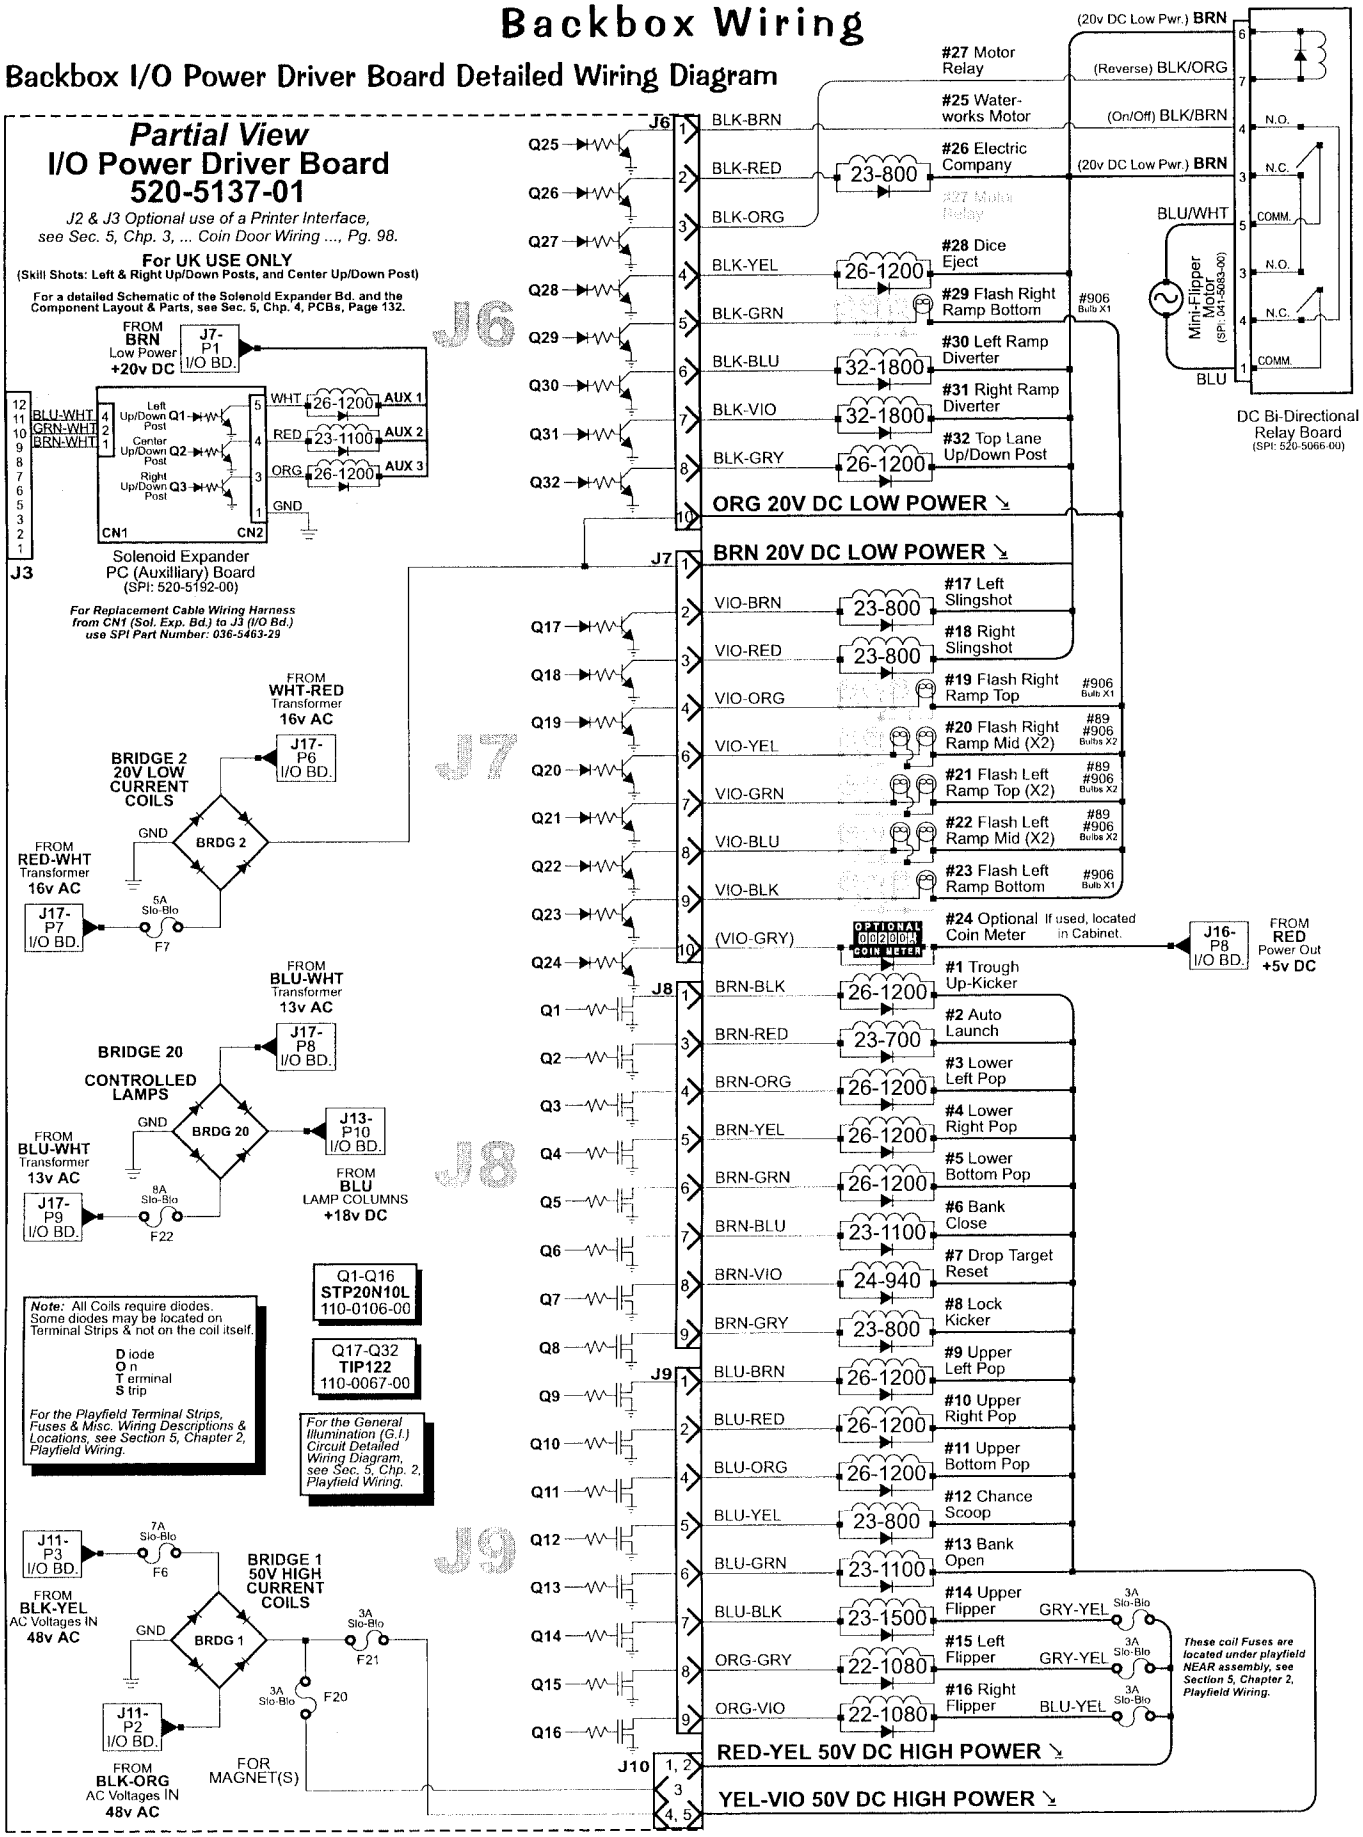
Backbox Wiring

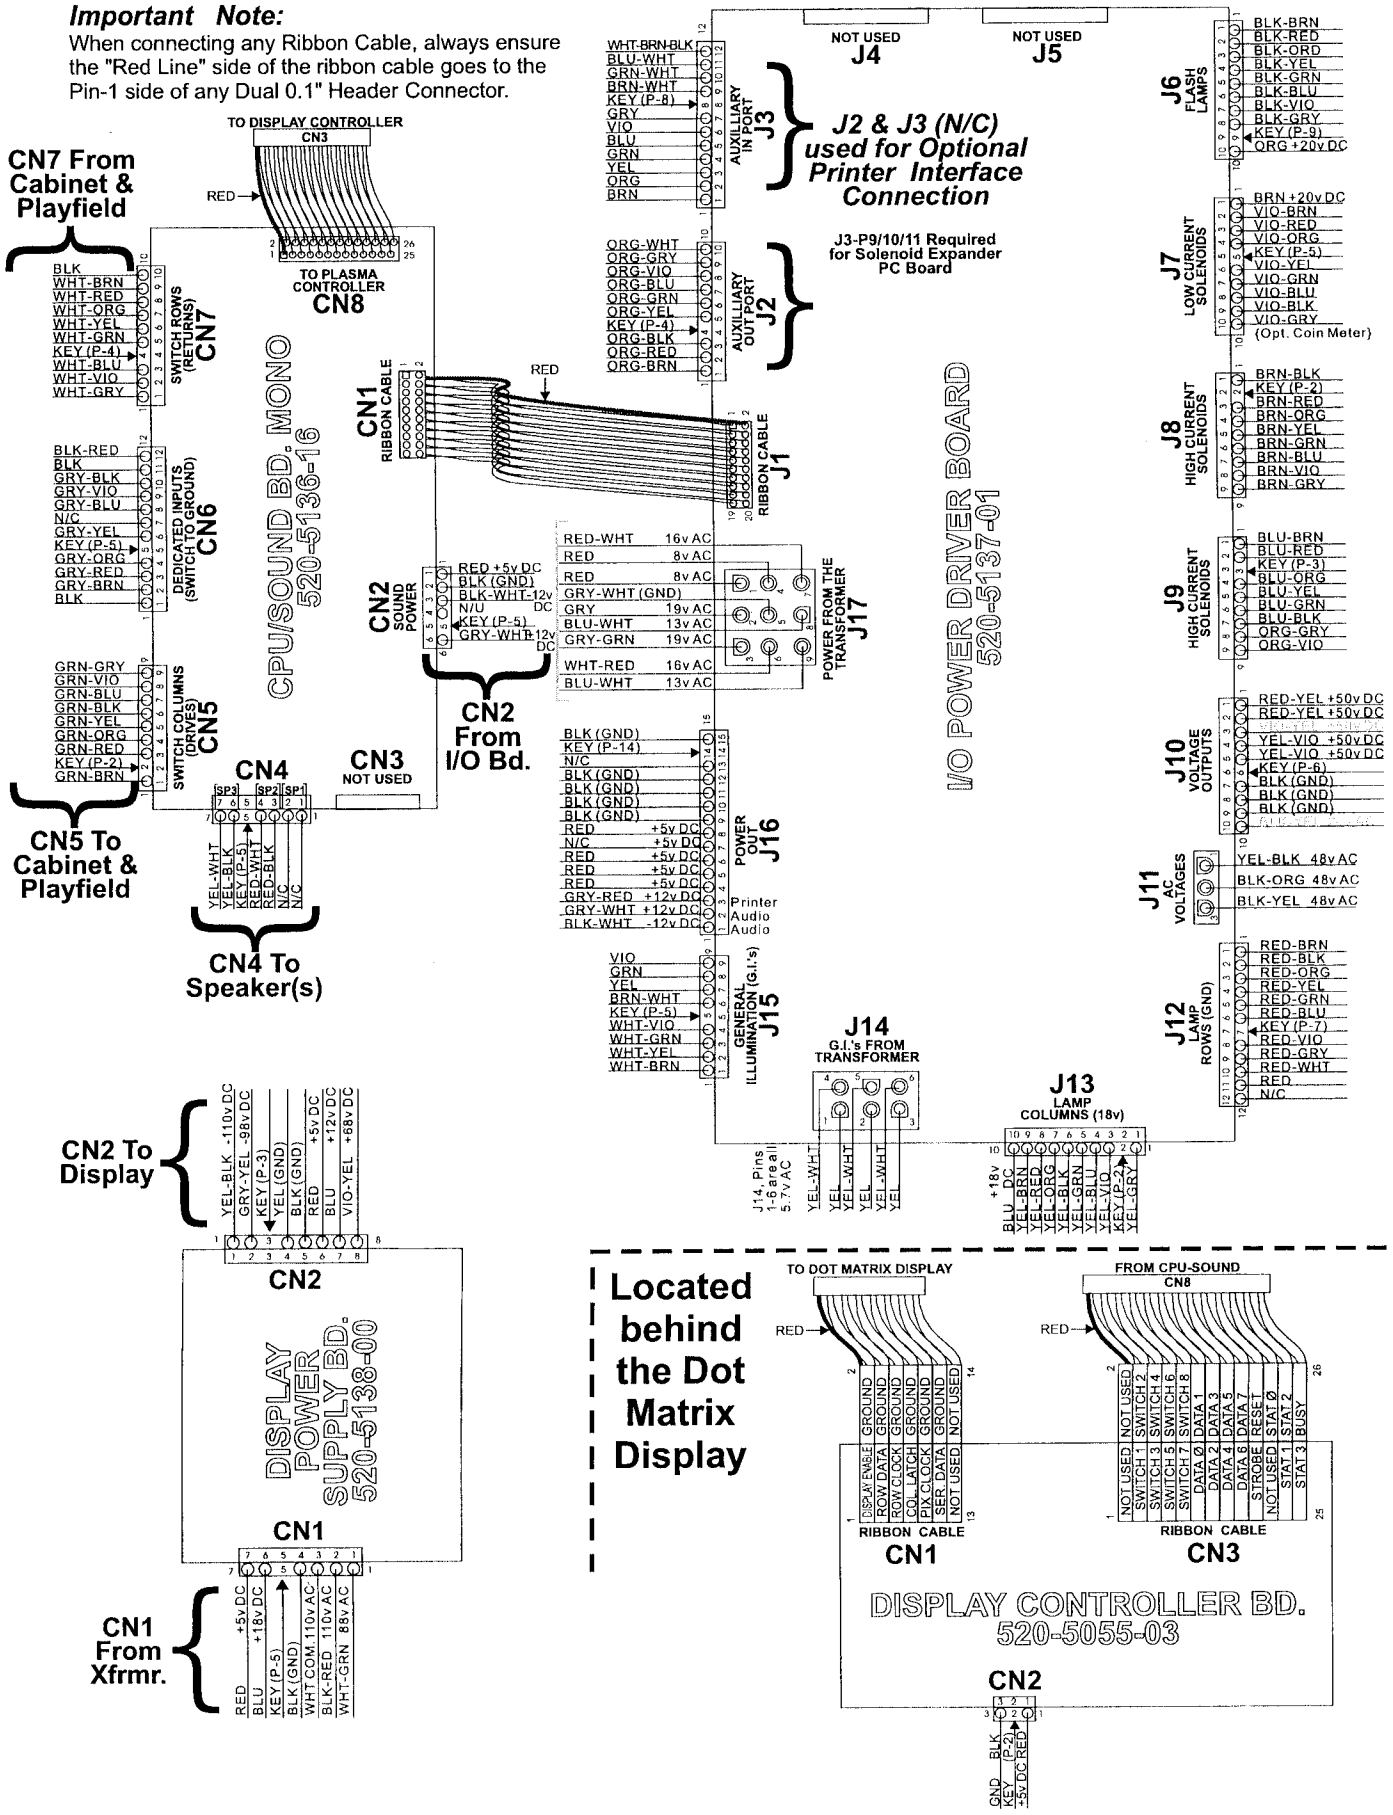
Backbox I/O Power Driver Board Detailed Wiring Diagram



Backbox Board Layout Wiring Diagram

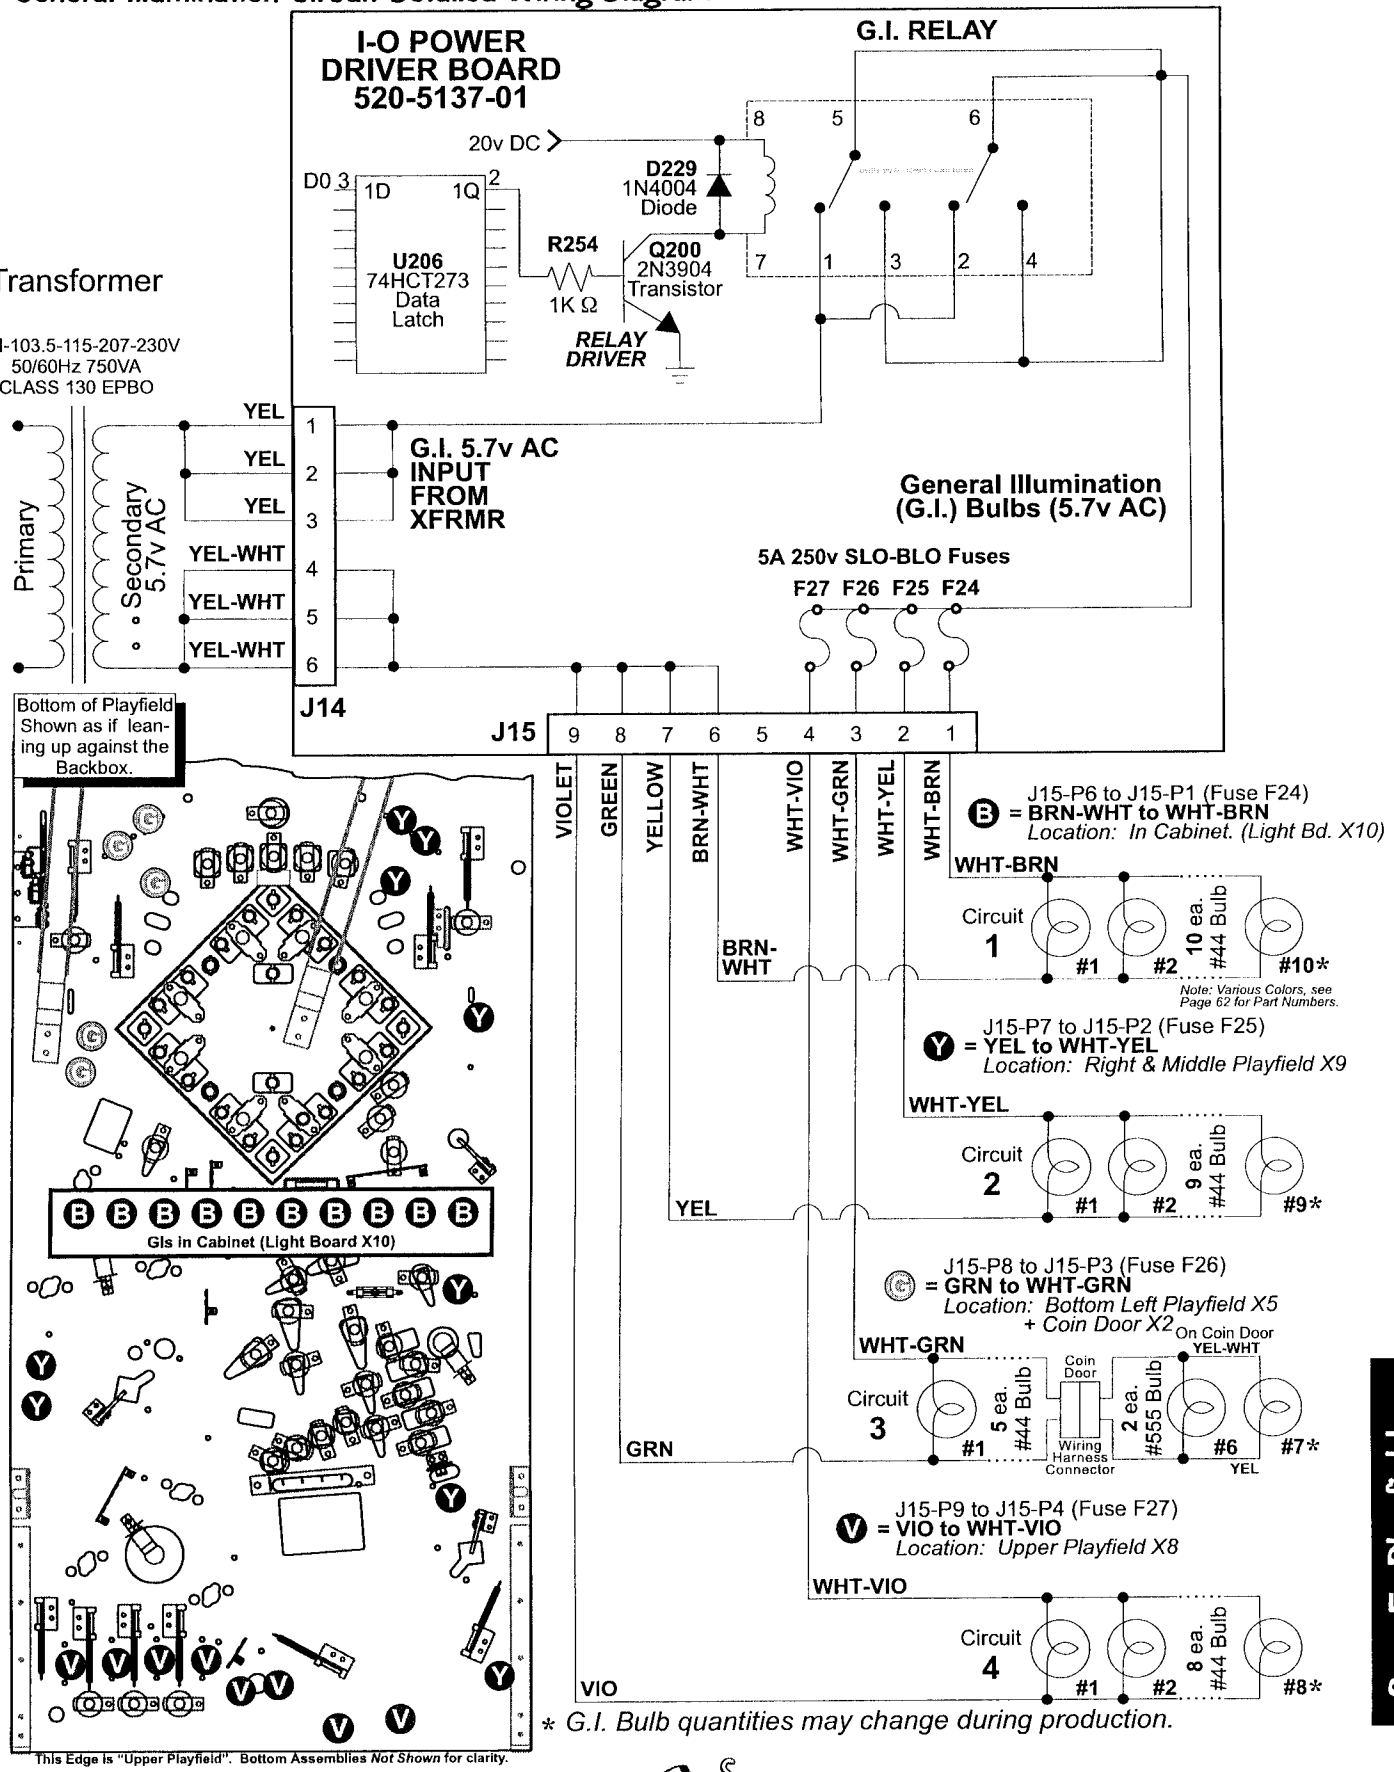
Important Note:

When connecting any Ribbon Cable, always ensure the "Red Line" side of the ribbon cable goes to the Pin-1 side of any Dual 0.1" Header Connector.



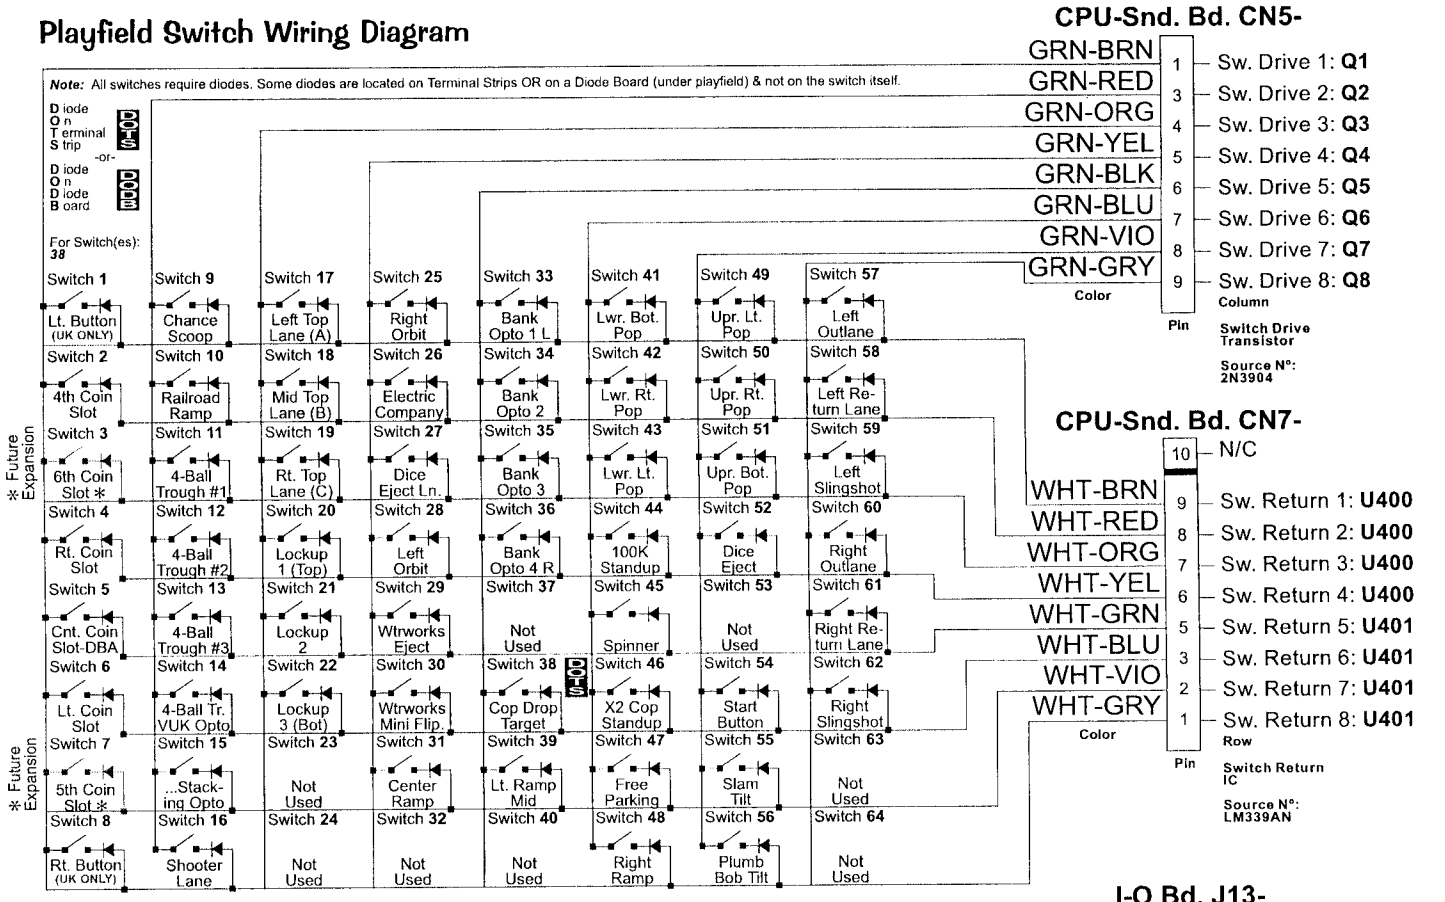
Playfield Wiring

General Illumination Circuit Detailed Wiring Diagram



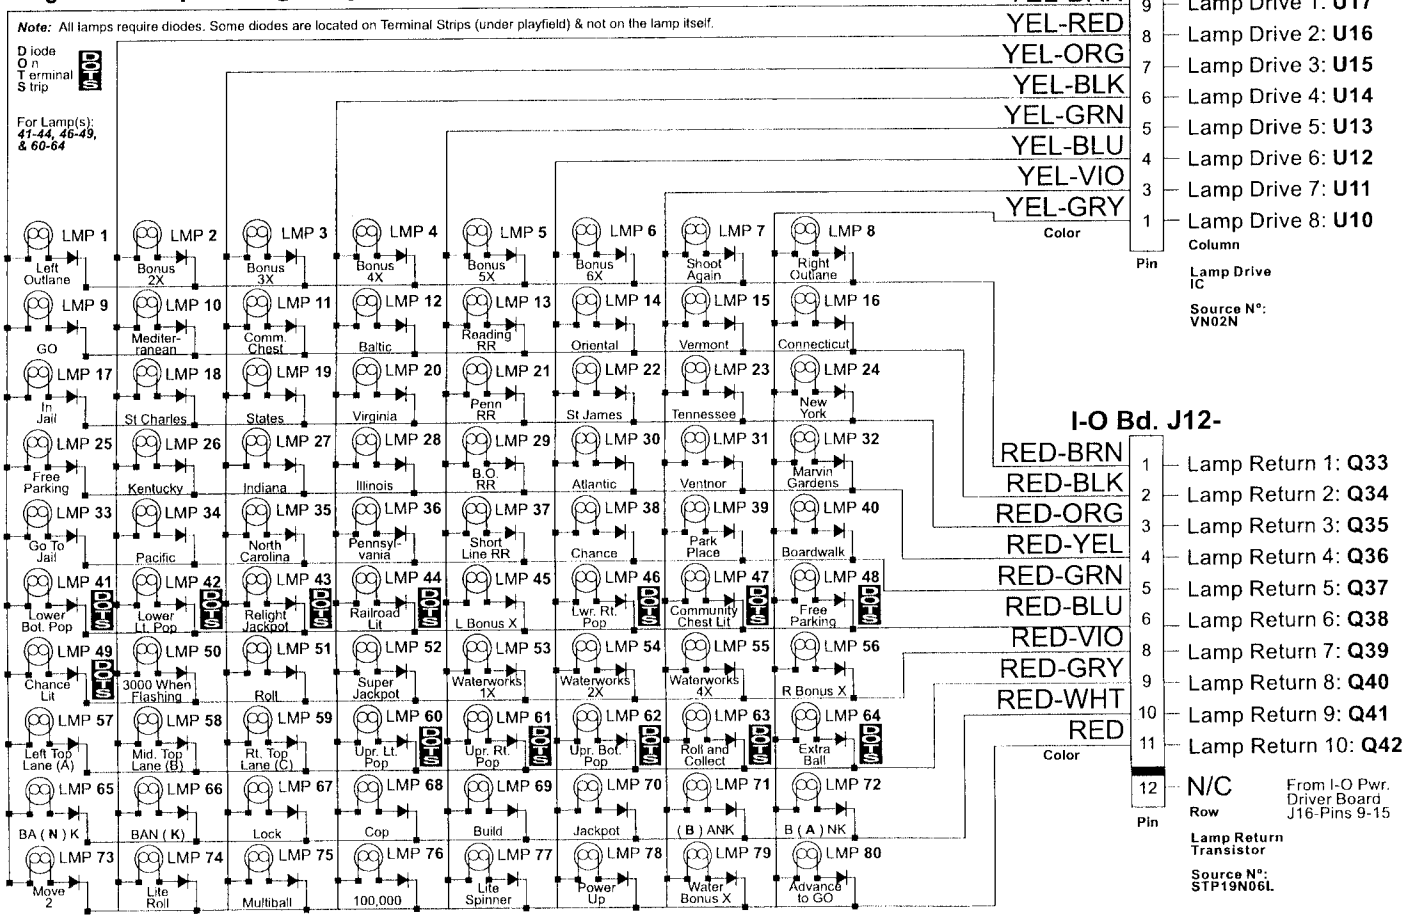
* G.I. Bulb quantities may change during production.

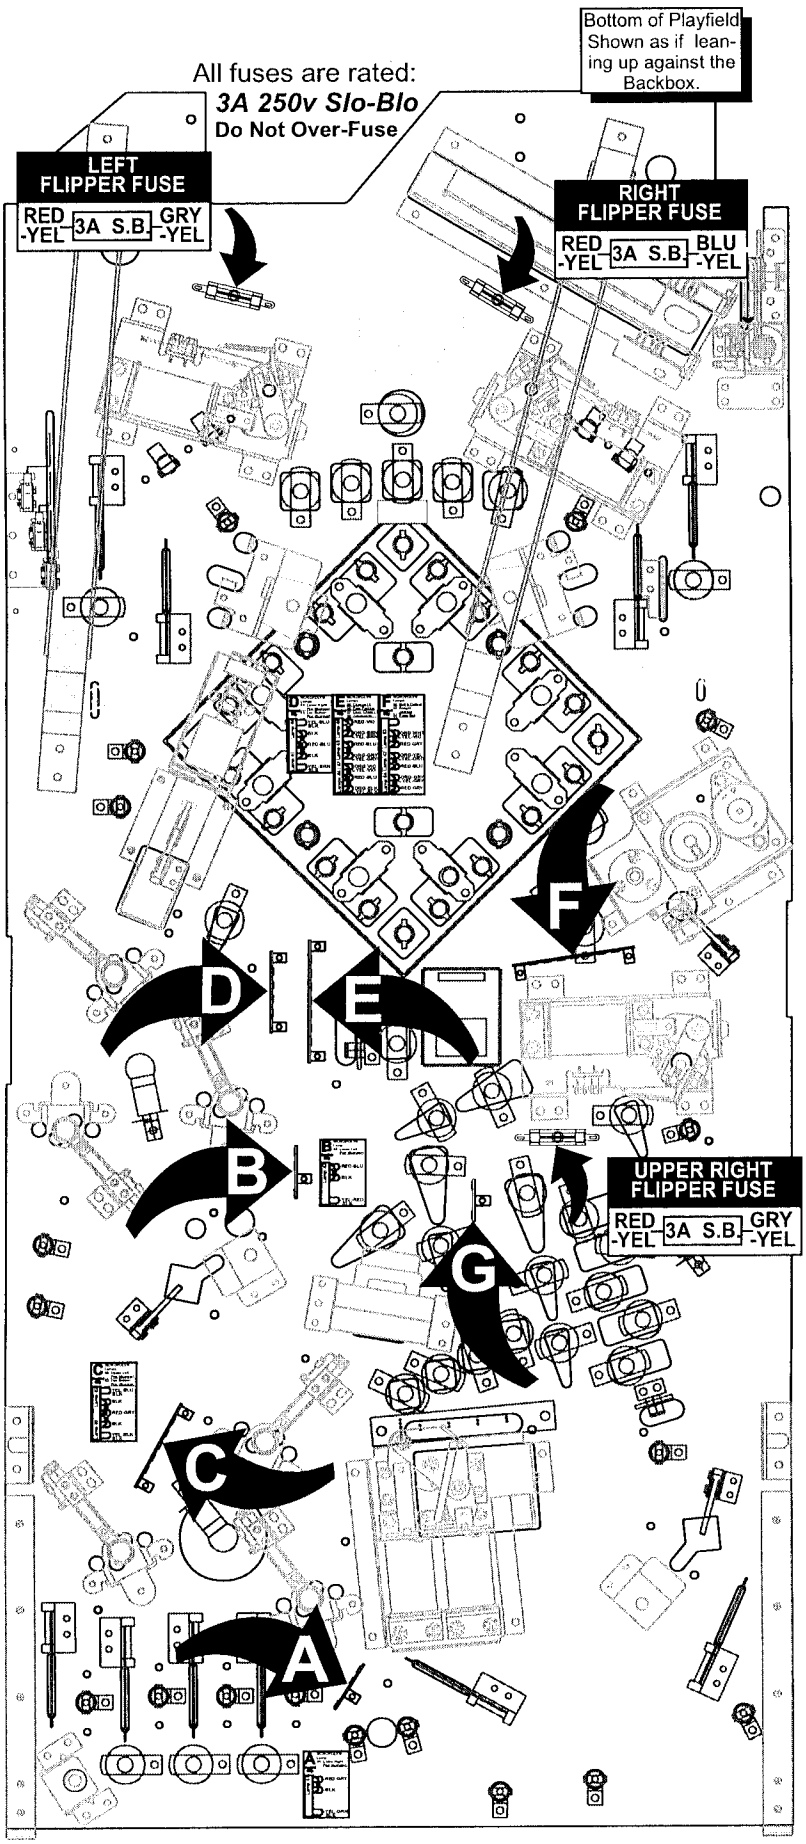
Playfield Switch Wiring Diagram



Please Note: Switch & Lamp Descriptions may differ slightly than that of the Dot Display due to space restraints.

Playfield Lamp Wiring Diagram





Explanation:
All switches, lamps, coils require diodes. The diodes not physically located on the switch, lamp or coil are located on Terminal Strips or Diode Bd. under the playfield. The Switch & Lamp Matrix Grids also note which switch or lamp has a diode on a Terminal Strip (noted by **"DOTS"** meaning: "Diode on Terminal Strip") or Diode Board (noted by **"DODB"** meaning: "Diode on Diode Board").

Please Note: *Terminal Strip(s), Diode Board(s) and/or Fuse Holder(s) locations shown, represent the general location (your game may differ slightly).*

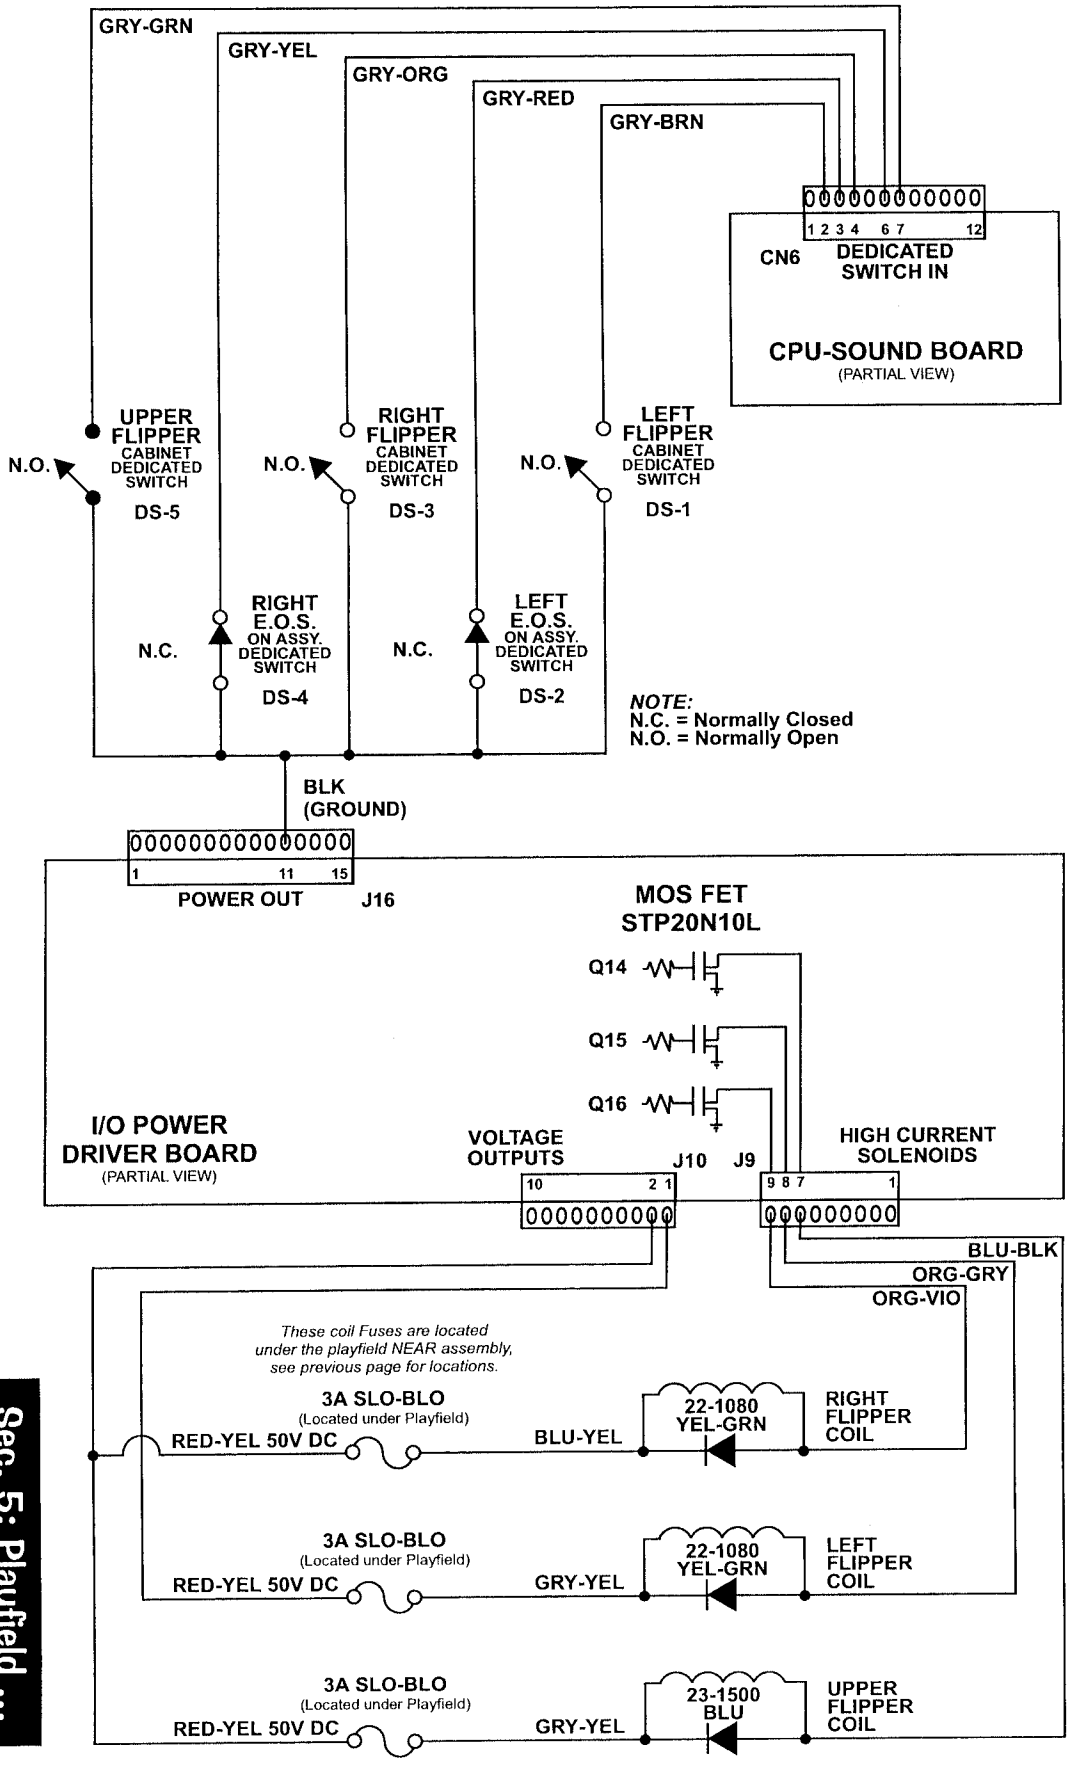
See the Pink Pages, Playfield - General Parts (Below) (Pg. 54) for Terminal Strips, Diodes, Fuses and Fuse Holders Part Nºs.

3-Flipper Circuit Wiring Diagram

The **White Star Board System™** has allowed us to *simplify* the *Flipper Circuit* to the point where we have *eliminated the Flipper Board* all together. The *Flipper Circuit* is now configured the same as any other Solenoid Drive Circuit.



Technical Overview

Our ***Flipper System*** uses one supply voltage (50v DC) for both ***kick*** & ***hold***. Once the **Game CPU** detects a Flipper Cabinet Switch closure (during game play) it applies a 40*msec* pulse to the gate of the Flipper Drive Transistor (STP-20N10L). If it continues to detect a Flipper Cabinet Switch closure *(the player holding the button in)* it will continue to pulse the flipper drive transistor 1*msec* every 12*msecs* for the duration of the hold cycle.

The **E.O.S.** (End-Of-Stroke) **Switch** serves the same function as before as it prevents foldback when the player has the flipper energized to capture balls. The **E.O.S. Switch** is a normally closed switch which opens approximately 1/16" when the flipper is energized. The **Game CPU** will detect a switch closure if the flipper bat is forced back by a high velocity shot or rebound on the playfield and will apply another 40*msec* pulse of 50v DC to the coil.

Note: *If an Upper Flipper is used, the Flipper Button (on the same side of the cabinet as the Upper Flipper) will have a* ***"Double-Stacked" E.O.S. Switch****. This allows the player to push the Flipper Button either half-way down to energize only the Lower Flipper or pushing the Flipper Button all the way down to energize both the Lower & Upper Flippers.*

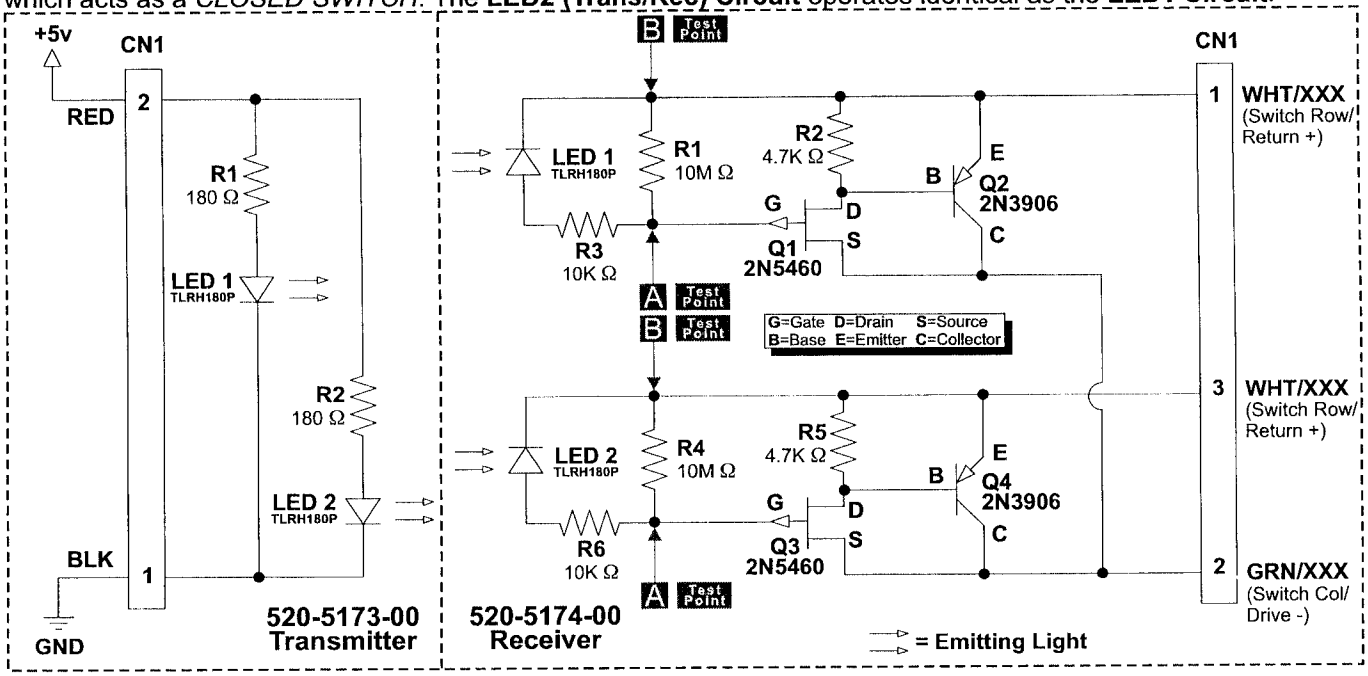
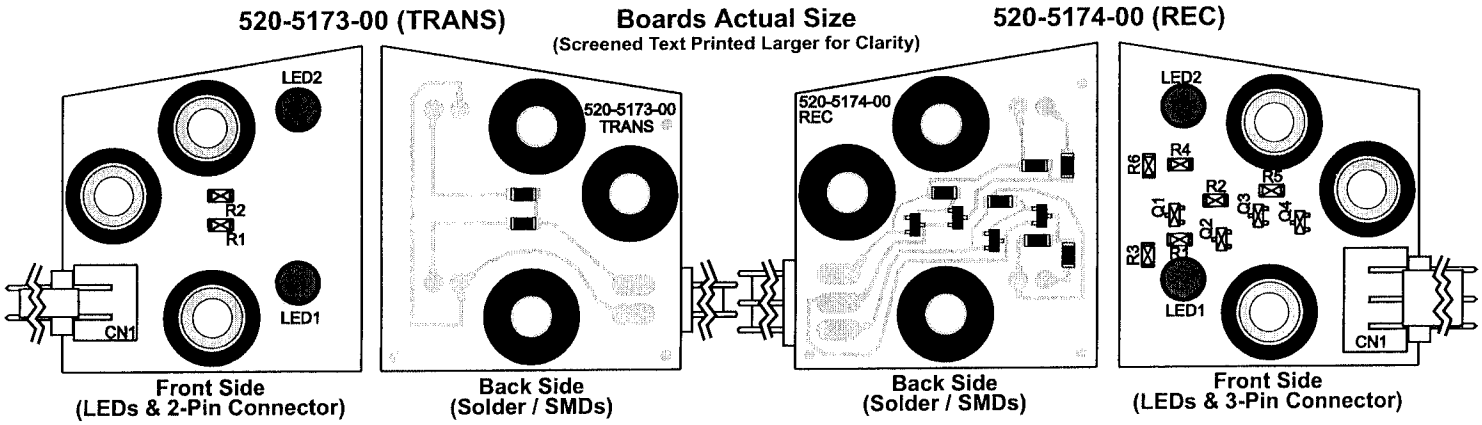
Trough Up-Kicker Dual OPTO Boards Theory of Operation & Schematic

As light from the **Transmitter LED1** falls on the **Receiver LED1**, it generates a Positive Bias Voltage (0.7v to 1.5v) which is applied to the **Gate** (**G**) of **Q1 (Fet 2N5460)** turning **Q1** off. When **Q1** is held off, no current flows through **Q2**'s **(2N3906) Base** (**B**). With no *base current,* **Q2** is off and acts as an *OPEN SWITCH.* When the light is interrupted *(BLOCKED)* **R1** (Rec. Bd.) bleeds the gate voltage off of **Q1** allowing it to conduct, switching **Q2** on, which acts as a *CLOSED SWITCH.* The **LED2 (Trans/Rec) Circuit** operates identical as the **LED1 Circuit.**



Trough Up-Kicker Dual OPTO Boards Component Layout & Parts



ITEM	QTY	PART NUMBER	REF-DESIGNATOR

Replacement Part:
LED TLRH180P
(T1-3/4 GaAlAs)
SPI Part Nº:
165-5052-00

DESCRIPTION

PCB Assy. (with all **Items 1-5**)
PCB Assy. (with Items **1-3** only)
2X, .156" Rt. Angle (26-60-5020) Conn.
LED TLRH180P (Ultra Bright Red)
OPTO PCB Brass Tube Spacer
OPTO PCB Rubber Gromment
180 Ω 1/8W Chip Res. (CRCW)
PCB Assy. (with all **Items 1-9**)
PCB Assy. (with **Items 1-7** only)
3X, .156" Rt. Angle (26-60-5030) Conn.
LED TLRH180P (Ultra Bright Red)
OPTO PCB Brass Tube Spacer
OPTO PCB Rubber Gromment
2N5460, Transistor (P-FET SOT-23)
2N3906, Transistor
10M Ω 1/8W Chip Res. (CRCW)
4.7K Ω 1/8W Chip Res. (CRCW)
10K Ω 1/8W Chip Res. (CRCW)

OPTO Troubleshooting

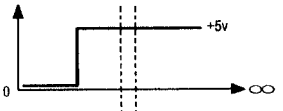
1. Volt Meter Test (indicates normal operating condition):

A. **OPEN OPTO** (Light Falling on LED) = *SWITCH OPEN.* Place meter leads across points **A** and **B** on the **LED1 Circuit** (Refer to Schematic Drawing on previos page, 520-5174-00 Receiver Side). It should read approximately 0.8 - 1.2v DC. The **LED2 Circuit** operates the same.

B. **CLOSED OPTO** (Light Blocked) = *SWITCH CLOSED.* Place meter leads across points **A** and **B** on the **LED1 Circuit** (Refer to Schematic Drawing on previous page, 520-5174-00 Receiver Side). It should read approximately 0.0 - 0.1v DC. The **LED2 Circuit** operates the same.

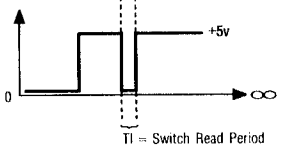
2. Oscilloscope Test (indicates normal operating condition):

Fig. A



A. **OPEN OPTO** (Light Falling on LED) = *SWITCH OPEN.* Place Scope lead at **Pin-1** of OPTO Rec. Board with Scope Grounded (see Schematic). The Scope should display a **STEADY +5v** as shown in **Fig. A**, Wave Form Diagram.

Fig. B



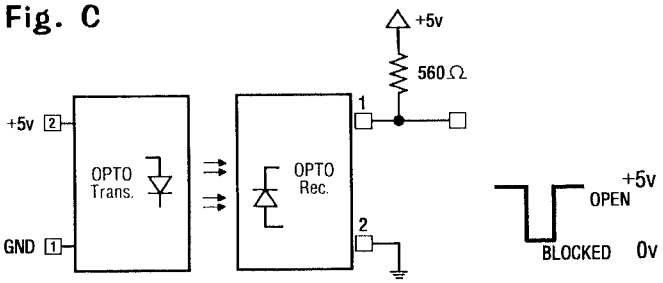
B. **CLOSED OPTO** (Light Blocked) = *SWITCH CLOSED.* Place Scope lead at **Pin-1** of OPTO Rec. Board with Scope Grounded (see Schematic). The Scope should display a **PULSE STREAM** indicating **Q2** has switched "On" as shown in **Fig. B**, Wave Form Diagram. This is your Switch Drive Pulse.

3. Bench Test (See Fig. C):

Please Note: To perform this test you must use a spare 560Ω Pull-Up Resistor, SPI Nº: 121-5047-00

Disconnect the OPTO Transmitter / Receiver Board from the circuit. Connect one side of a 560Ω Pull-Up Resistor to **Pin-1** of the OPTO Receiver Bd. and the other side of the resistor to a 5v DC source. Connect **Pin-2** to GND. Connect a +5v DC source to **Pin-1** of the Transmitter & GND to **Pin-2**. Align with the Receiver OPTO approx. 3" distance. Using your Volt-Meter or an Oscilloscope, monitor **Pin-1** while *BLOCKING* and *UNBLOCKING* the ***BEAM*** from the Trans. The output will be approx. +5v DC when the ***BEAM IS NOT BLOCKED*** and approx. 0v when the ***BEAM IS BLOCKED.***

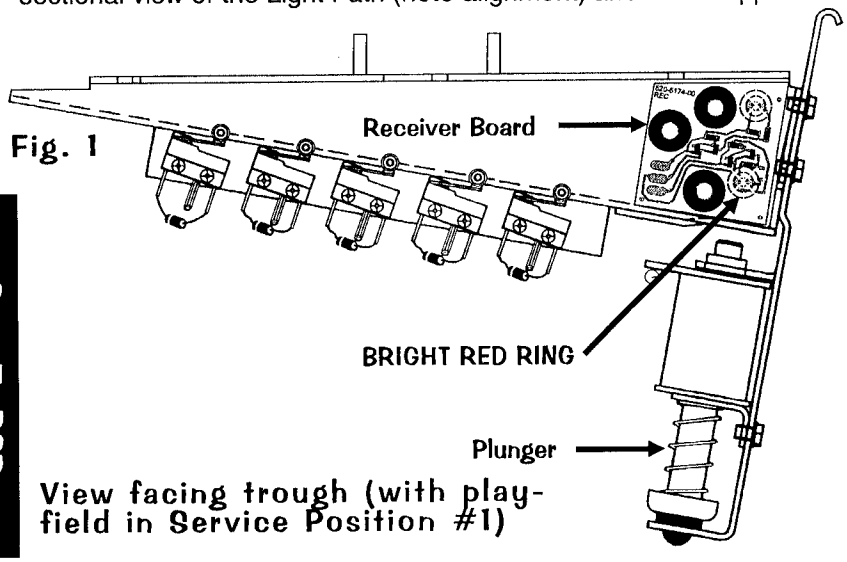
Fig. C



Trough Dual OPTO Boards Alignment / Test for LED1

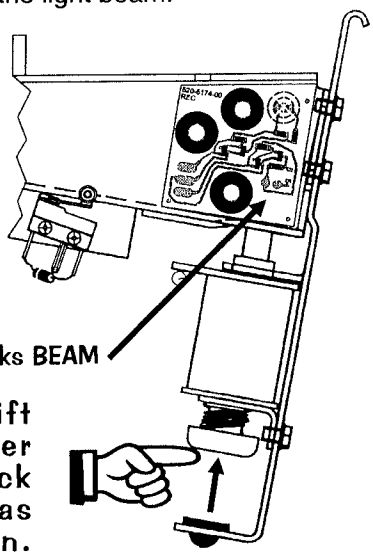
When a working **OPTO** is installed and connected in a game, the transmitter should light (LED1 lower & LED2 upper) when the power is switched on. With the playfield in Service Position #1 (playfield lifted up in the half-way position resting on the Prop Rod or edge slide support brackets) and the game on, the LED lights should show up as a **BRIGHT RED RINGS** through the back of the Receiver Board around the **Receivers LED1 & LED2** (See **Fig. 1**). Testing only **LED1:** With the game in ***Switch Test Mode***, lifting the Trough Plunger with a fingertip should block the **BEAM** and cause the Switch Position to trigger (See **Fig. 2**). View **Fig. 2a** & **2b** (on the next page) for a sectional view of the Light Path (note alignment) and what happens as a ball breaks the light beam.

Fig. 1



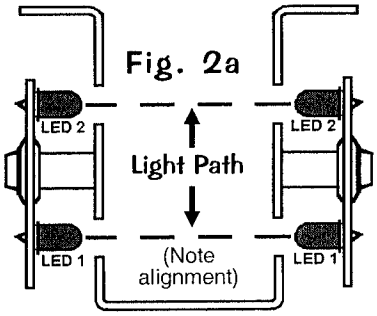
View facing trough (with playfield in Service Position #1)

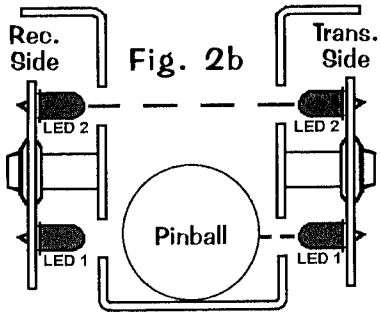
Fig. 2



Lift plunger to check switch as shown.

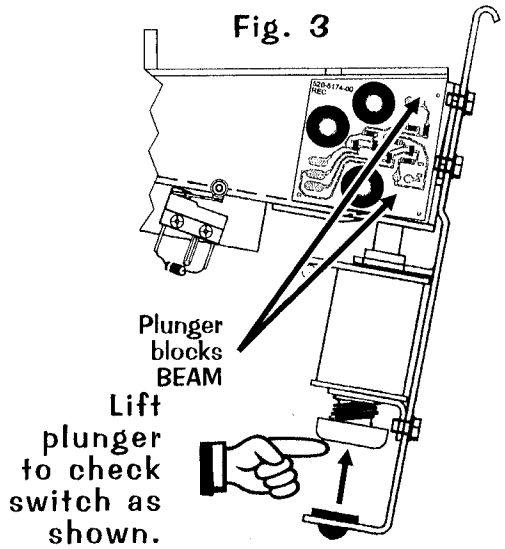
Sectional view from right (Fig. 2a & 2b)

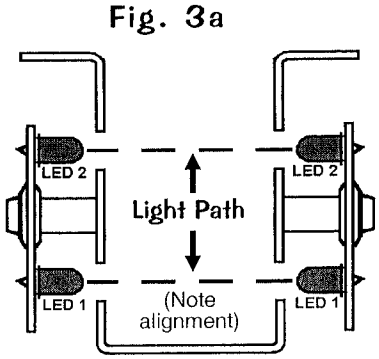


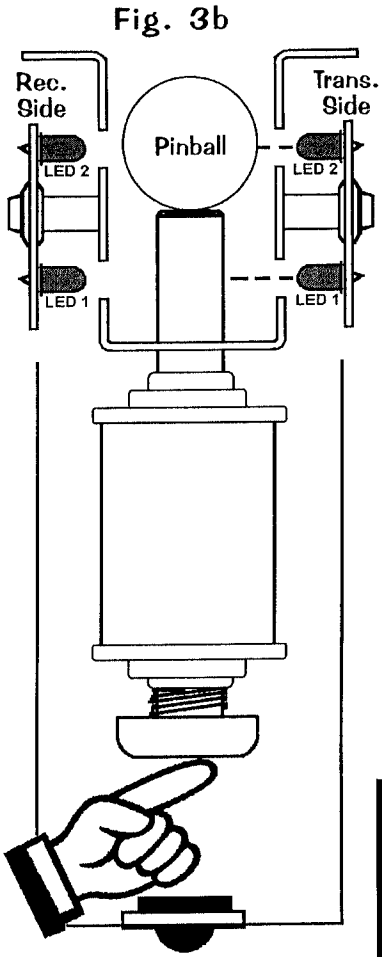


Trough Dual OPTO Boards Alignment / Test for LED2

When a working **OPTO** is installed and connected in a game, the transmitter should light (LED1 lower & LED2 upper) when the power is switched on. With the playfield in Service Position #1 (playfield lifted up in the half-way position resting on the Prop Rod or edge slide support brackets) and the game on, the LED lights should show up as a **BRIGHT RED RINGS** through the back of the Receiver Board around the **Receivers LED1 & LED2** (See **Fig. 1, previous page**). Testing only **LED2:** *TO PERFORM THIS TEST, A PINBALL MUST BE IN THE BALL TROUGH.* With the game in ***Switch Test Mode***, lifting the Trough Plunger with a finger tip should block the **BEAM** on LED2 and cause the Switch Position to trigger (See **Fig. 3**). View **Fig. 3a** & **3b** for a sectional view of the Light Path (note alignment) and what happens as a "double-stacked" ball scenario breaks the light beam.







I M P O R T A N T

If replacement of ***LED*** *is required, insure that is* ***mounted correctly before and after soldering*** *(See* ***Fig. 4a / 4b****).*

5v Supply:
An AC voltage of approximately 9v comes into the board at [**J17-**(1-4)] this AC voltage is then *full-wave rectified* by bridge **BRDG 21** and filtered by Capacitor **C203**. The resulting voltage is 11v DC which is inserted into a linear voltage regulator for the output of 5v DC. This 5v regulated voltage can be adjusted by potentiometer **R116** the voltage should be set to 5.00v. Besides powering the I/O Board the regulated 5 volts supplies power to the CPU / Sound Board, Gas Plasma (Dot Matrix) Display and Plasma (Display) Controller Board. Power for these devices comes off the I/O Board on [**J16**-(4-8)].

+5v, +20v, +50v, +18v, & +12v LED Indicators:
These DC voltages are derived on the I/O Board by rectification and filtering. Each has a **LED** indicating that power is being supplied to each of these voltage sources. The **-12v** supply comes from the same transformer winding as the **+12v** thus it does not have a **LED** indicator.

*** **Note** that the +50v & +20v power sources are turned off by the Interlock Switches when the Coin Door is OPEN.*

LED	SUPPLY VOLTAGE
L2	+5
L200	+20v
L201	+50v
L202	+18v
L203	+12v

Reset Circuitry:
The I/O will reset in three (3) cases:

1. The CPU is in reset. The CPU's reset signal is fed into the I/O through connector **J1** and forces the I/O into reset.
2. The 5v supply has fallen below 4.75v.
3. The watchdog is not being fed by the scanning of the light matrix. More specifically **Pin-19** of **U6** must be toggling once every ***50ms*** to prevent the watchdog from resetting. The scanning of the light matrix is controlled by the CPU through **J1**.

LED L204 shows the reset state of the I/O Board. If this **LED** is not lit either the 5v DC is below 4.75v or the CPU/Sound Board is holding the I/O in reset. If the **LED** is flashing this means that the watchdog is not being feed by the CPU/Sound Board and the I/O is oscillating into and out of reset. If the **LED** is continuously on the board is out of reset and communication from the CPU to the lamp matrix is confirmed. Testpoint Blanking is the actual reset signal on the I/O Board. A low voltage indicates that it is in reset this will turn off all Solenoid (Coil) Drivers, Flash Lamps, Lamp Matrix Drivers, Auxiliary Outputs and Flipper Outputs. A high voltage indicates that it is out of reset and normal operation can take place.

Address Decoding:
All Address decoding is done by two **74LS138's (U204 & U205)** (3 of 8 decoder). Both of these must be in operation for the I/O Board to function properly.

Solenoid (Coil) Drivers & Flash Lamps:
J8 & **J9** are high side drivers for driving solenoids and other heavy loads. Each connector has its own buffer driving 8 drivers. **J8** & **J9** consist of **MOSFET Drivers 20N10L** which can easily & safely be tested by clipping one end of a clip-lead to test point **FET TPL1** and then the other to the corresponding gate resistor **R1-R16** (see *Note 1*). This will apply 3.4v to the gate of the **MOSFET Transistor** thus switching it on. **J7** & **J6** each are a bank of 8 low side driver for driving lamps or other lower current solenoids (coils). They use a Bipolar Power Transistor **TIP122** which can also be tested by using **TEST POINT TIP TPL3** and the corresponding resistors **R17-R32*** *(see Note 1).*

***Note 1** • Clip on the resistor side with the white stripe. •• R1 controls Q1, R2 controls Q2, et cetera...*

Auxiliary In & Out:
J2-8 CMOS Outputs sometimes used for a printer interface.
J3-8 CMOS Inputs general purpose inputs.

Lamp Matrix:
J12 has 10 low side drivers for the lamp strobes which consist of **19N06L MOSFETS**. Only one lamp strobe should be low at any time. Again the scanning of the lamp strobes keeps the I/O from resetting. **J13** has 8 high side drivers with each having a status indicator. All the status indicators are logically 'OR'ed together and fed back to the CPU/Sound Board. The status can identify open loads (for example open lamp filaments or intermittent connections) and short circuits. These drivers are also short-circuit protected.

General Illumination (G.I.) Lights:
J15 has 6v AC switched on & off by a relay on the I/O Board. The relay is controlled by **Q200** which supplies power to the 24v coil winding to activate the relay. There are 4 taps on **J15** each fused at 5A for this 6v AC source.

CPU Section:
The CPU is a **68B09E** (**U209**) with up to 8 MBytes of CPU *Code Space* (**U210**). The CPU code is bank selected by the use of **U211** and each bank consists of 16 KBytes. 8 KBytes of **RAM** (**U212**) is available to the CPU. The RAM is battery backed and has a write protected area. Battery back up is accomplished by **3-AA Cells** (**BAT1**) which have a **TEST POINT VBATT** to check the battery voltage status. The write protected area consists of 512 Bytes used for storing game settings. This section of **RAM** can only be written to when the coin door is open. The Coin Door switch comes into the CPU on **CN6-12** and is fed into the address decoding **PAL U213**. When this memory protect signal is low writes to the protected **RAM** area are prohibited. Address decoding for the system is accomplished by one **PAL U213** and one 1-of-8 decoder **U214**.

A watchdog is used to monitor the CPU and the 5v supply. If the 5v supply is below 4.75 the watchdog will hold the CPU/Sound Board & I/O Board in *reset*. The watchdog must be fed at a rate of ***250ms*** or faster. The signal used to feed the watchdog comes from the EPROM Bank select signal used to load **U211**. The CPU has a timer interrupt used as a heartbeat for the system this signal comes from counter **U2**. The clock for this counter is the **CPU Q CLOCK**. Clearing the timer interrupt is done by reading the ***DIP Switch***. The timer interrupt can be observed at **TEST POINT FIRQ**. In normal operation **"FIRQ"** should be toggling at a rate of *976Hz*.

The I/O Interface **CN1** is buffered by two (2) **HC245** Chips (**U207 & U208**). The CPU's reset line is buffered by **Q10** and fed over to the I/O through **CN1**. An *I/O Strobe Signal* is fed through **CN1-15** and is used to notify the I/O that a valid address is being sent.

Switches:
The Switch Matrix consists of eight (8) **2N3904** Transistors(**Q1-Q8**) which pull one of 8 strobes 'low' to *activate* a Single Column of switches. The *Switch Return Signals* are fed into **CN7** [SWITCH ROWS] and are highly filtered and compared to a 2.5v *reference voltage*. The *Switch Return Voltage* must be below 2.5v to make a *Valid Switch Closure*. If *false switches* are appearing, check that none of the **2N3904** Transistors are permanently pulling the *strobe line low*. Only one strobe from **CN5** [SWITCH COLUMNS] should be *low at any time*. **CN6** [DEDICATED SWITCH IN] is a *Dedicated Bank of Input Switches*. Switches connected to **CN6** are connected to ground instead of a strobe and may be read at any time.

Plasma Interface:
The data path for communication to and from the Plasma Controller Board is 8 bits wide. There are separate *Input* and *Output Busses*. The *Input Bus* from the Plasma Controller to the CPU/Sound Board comes in on **CN8** [PLASMA CONTROL]-**Pins 3-10** and is fed into **U200** for input to the CPU's *Data Bus*. Data going out to the controller comes from the CPU's *Data Bus* through **U201** and onto **CN8-Pins 11-18**. Status back from the Plasma Controller comes in on **CN8-Pins 22-26** and is fed into **U202** for input to the CPU's *Data Bus*. Two control signals that go out to the Plasma Controller are **PRES** [PLASMA RESET] and **CN8-Pin 19** [**PSTB** - *Plasma Strobe*]. The Plasma Reset is software controllable through **U216/B** and also has a test point "Plasma Reset". The *Plasma Strobe Signal* to the controller is generated from **U216/A** and is *used to latch data* into the Plasma Controller.

Sound Section:
The audio section consists of a **BSMT SOUND CHIP U9** Sound (Voice) EPROMs (**U17 U21 U36 U37**) **68B09E U6** and Sound Code **EPROM U7**. The **BSMT** latches sound EPROM addresses in **U13** & **U12** for output to the Sound EPROMs. Sound Data from the EPROMs is read through **U19** to the **BSMT**. The EPROMs are bank selected by **U22**. When the **BSMT** has sound data to be played out to the speakers it loads 16 bits into a 16 bit shift register made up of **U24** & **U23**. The data stream from the shift register is serially shifted into a stereo 16 bit *Digital to Analog Converter* (**DAC, U26**). When the system is operating properly the ws (word select) input of the **DAC** will be toggling. The ws input is used to latch the right and left channel sound data into the **DAC**. If the ws line is not oscillating no analog signal will come out of the **DAC**. The **DAC** outputs are a controlled current source. These outputs are converted to a voltage by an operational amplifier **U30** to form the analog signal. **TEST POINTS AOR** and **AOL** are the outputs of the operational amplifier. These outputs are then fed directly into the power amplifiers (**TDA2030A**) or optionally into an analog volume control chip **U35** for a potentiometer volume control. The analog section has its own +5v & -5v derived from **VR1** & **VR2**. These separate supply voltages are for the **DAC U26** Operational Amplifier **U30** and analog volume control **U35**.

Sound calls are made from the **CPU's 68B09E U209** to the sound section by latching data into **U5**. The sound section's **CPU 68BO9E (U6)** reads in this data and handles the interfacing to the **BSMT**.

Other Test Points:
E & **Q** - The CPU signals for both **68B09E** processors. Should be at 2Mhz with **Q** leading **E** by ***500 nsec***.
24Mhz - The oscillator used for the **BSMT** & derivation of **E** & **Q**.
SND-FIRQ - The sound sections **CPU Interupt**.
6Mhz - This clock is generated internally on the **BSMT** and is used for shifting the data samples into th **DAC**.

W6 Jumper - This jumper must be installed for games that use **8MB** Sound EPROMs (**U17 U21 U36 U37**). For games which use **4MB** Sound EPROMs this jumper is not installed but will operate on boards with **W6** installed.

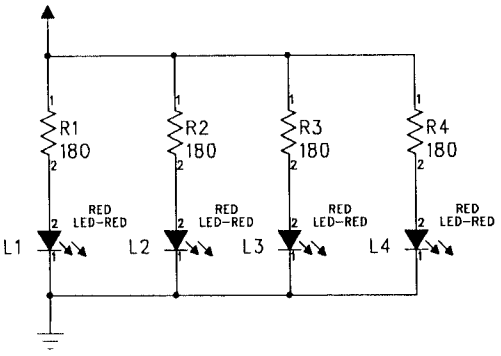
4-Position OPTO (Trans. & Rec.) PC Boards Theory of Operation & Schematic

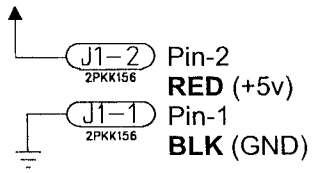
The following theory applies to circuit one (1) of four (4); apply the same logic to the other circuits, respectively.

The light falling on **LED** (**L1**) generates a voltage which is applied to the input (Pin-4) of the **LM339 Comparator** (**U1**). **R1** bleeds off excess charge. Upon receiving .1 volt input from **LED** (**L1**), the **Comparator** (**U1**) then *drives both* the **Switch Transistor** (**Q1**) *(during switch line strobes)* and the indicator **LED** (**L5**). If a switch line is being strobed, the emitter of **Q1** drops to the saturation voltage of the *Switch Line Driver,* about **.3 volts**. This, plus the **.7 volt** drop on the base, gives a **1v** forward bias voltage to **Q1**, so the current flows through the transistor during strobes. This drives **Q1** on and *makes the switch.* The normal state of the **Switch Transistor Q1** is **ON** (N.C.) and the indicator **LED (L5)** is also **ON**. When the beam is blocked, then **Q1** and **LED (L5)** are turned **OFF**.

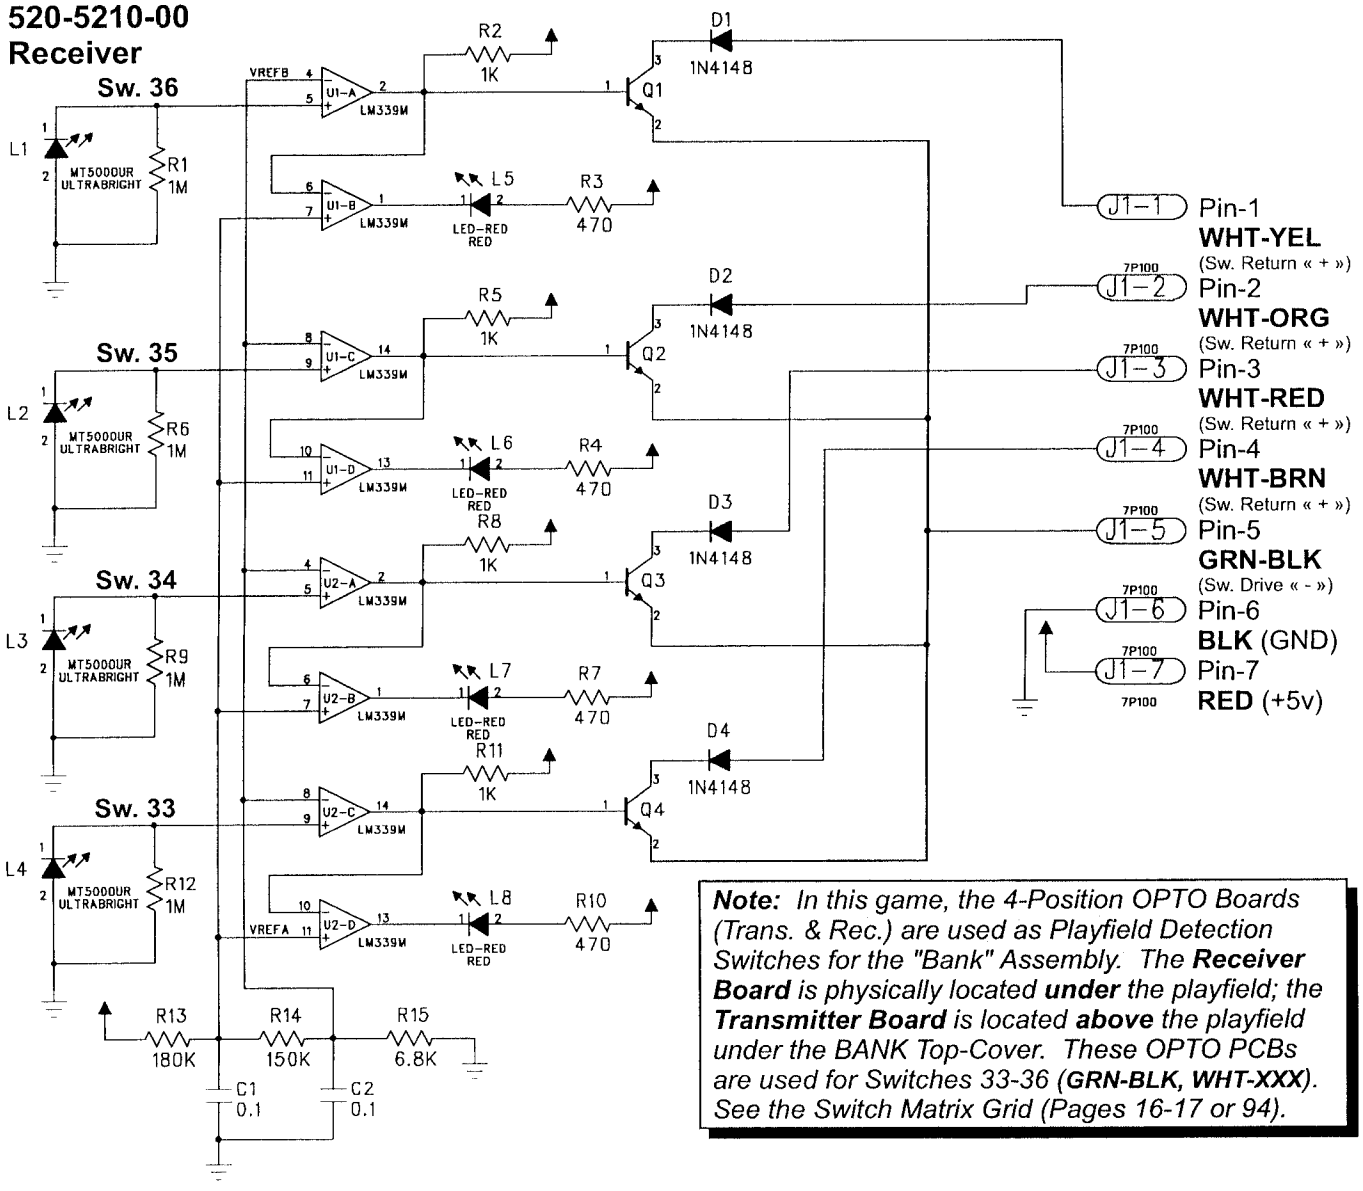
520-5218-00 Transmitter

L1 Trans. ↔ *L4, L8 Rec.*
L2 Trans. ↔ *L3, L7 Rec.*
L3 Trans. ↔ *L2, L6 Rec.*
L4 Trans. ↔ *L1, L5 Rec.*





520-5210-00 Receiver



Note: *In this game, the 4-Position OPTO Boards (Trans. & Rec.) are used as Playfield Detection Switches for the "Bank" Assembly. The* ***Receiver Board*** *is physically located* ***under*** *the playfield; the* ***Transmitter Board*** *is located* ***above*** *the playfield under the BANK Top-Cover. These OPTO PCBs are used for Switches 33-36 (****GRN-BLK, WHT-XXX****). See the Switch Matrix Grid (Pages 16-17 or 94).*

5 This game uses **8MB** VOICE ROMS at U17, U21, U36 & U37 *(if 3 ROMs use U37 will be unused)* requiring a **Jumper at Loc. W6**. Refer to CPU/Snd. Bd. Schematic (2 of 3).

Game Revisions can be updated after the Production Run. This Table is accurate as of the printing of this manual. If any changes occurred, the next game manual will include the updated information. The version stated is USA. If there is a question of as to the latest Code Revision & Check Sum call our Technical Support Department, 1-800-542-5377 or 1-708-345-7700 (Select Option 1). Visit our website www.SternPinball.com where code can be downloaded (an EPROM Burner is required).

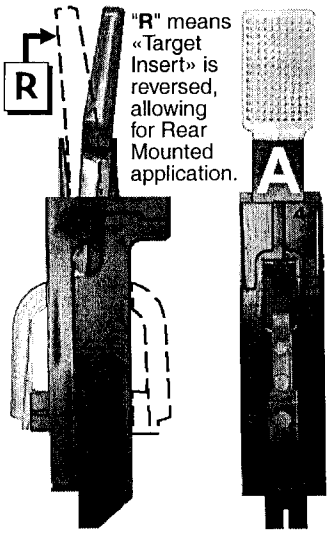
Note: The shapes and sizes shown above are not to scale. Some shapes may no longer be available in every color.

Instructions: Parts which may come in various colors (i.e. targets, some posts, playfield inserts, etc.) end in a 2-digit Nº which correspond to the color of that part. The "-XX" in Part Nºs which may come in various colors should be replaced with the desired 2-Digit Nº. corresponding to the color desired. *Not all colors may be available.*

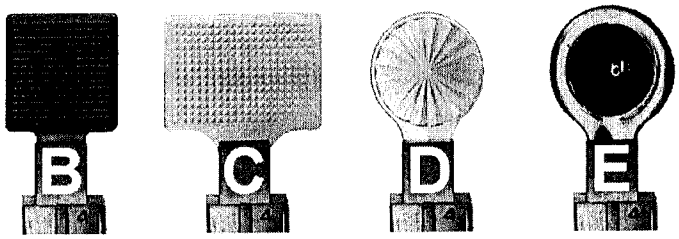
PLASTIC PART COLOR CHART											
Nº	Color	Nº	Color	Nº	Color	Nº	Color	Nº	Color	Nº	Color
-00	Black or Solid Clear	-03	Amber	-06	Yellow	-09	Purple	-12	Fluor. Blue	-15	Luminescent
-01	Clear	-04	Green	-07	Orange	-10	Fluor. Orange	-13	Teal Green	-16	Gold
-02	Red	-05	Blue	-08	White	-11	Fluor. Green	-14	Gray	-17	Trans. Brown

APPENDIX I

Stand-Up Targets



"**R**" means «Target Insert» is reversed, allowing for Rear Mounted application.



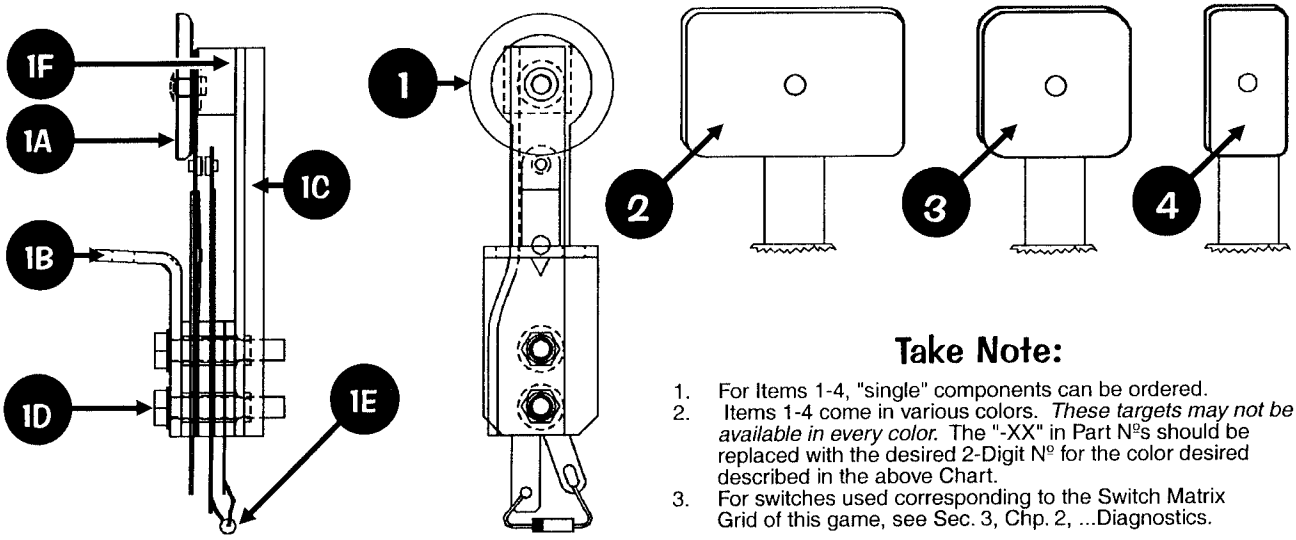
PLASTIC PART COLOR CHART	
Nº	Color
-00	Black
-01	Clear
-02	Red
-03	Amber
-04	Green
-05	Blue
-06	Yellow
-07	Orange
-08	White
-09	Purple
-10	Fluor. Orange
-11	Fluor. Green
-12	Fluor. Blue
-13	Teal Green
-14	Gray
-15	Luminescent
-16	Gold

Take Note:

1. For **Items A-E**, for the Target Assembly use the **"500-"** SPI Nº; For the Target Assy. with Rear Mount add **"R"** to **"500-"** SPI Nº; For just the «Target Insert» use the **"545-"** SPI Nº.
2. **Items A-E** come in various colors. *These targets may not be available in every color.* The **"-XX"** in should be replaced with the desired 2-Digit Nº for the color desired described in the Chart ➶. ***As of date of print, the following colors were used for Items A-E:***
   -01 Clear **(A, D)**; **-02** Red **(A, B, C, D, E)**; **-03** Amber **(D, E)**; **-04** Green **(A, B)**; **-05** Blue **(C)**; **-06** Yellow **(A, C)**, **-09** Purple **(B, D)**; **-11** Fluorescent Green **(A, B, D)**.
3. See Section 3, Chapter 2, Go To Diagnostics Menu, for switches used corresponding to the Switch Matrix Grid of this game.

Nº	STAND-UP TARGET NAME	SPI PART Nº
A	Modular Stand-Up Target Narrow Assy.	500-6138-XX
	Stand-Up Target Narrow (Insert)	545-6138-XX
B	Modular Stand-Up Target Square Assy.	500-6139-XX
	Stand-Up Target Square (Insert)	545-6139-XX
C	Modular Stand-Up Target Rectangle Assy.	500-6228-XX
	Stand-Up Target Rectangle (Insert)	545-6228-XX
D	Modular Stand-Up Target Round Assy.	500-6075-XX
	Stand-Up Target Round (Insert)	545-6075-XX
E	Mod. Stand-Up Target 1" Spherical Assy.	500-6189-XX
	Stand-Up Target 1" Spherical (Insert)	545-6189-XX

NOTE: To receive the Target Assy. with the « Target Insert » « Reversed » simply add a **"R"** at the end of the Part Nº. See Side View picture above to compare (dashed line shows target reversed).



Take Note:

1. For Items 1-4, "single" components can be ordered.
2. Items 1-4 come in various colors. *These targets may not be available in every color.* The "-XX" in Part Nºs should be replaced with the desired 2-Digit Nº for the color desired described in the above Chart.
3. For switches used corresponding to the Switch Matrix Grid of this game, see Sec. 3, Chp. 2, ...Diagnostics.

Nº	STAND-UP (FLAT) TARGET NAME	SPI PART Nº
1	1" Round Stand-Up Target Assy.	500-5835-XX
ORDERING ABOVE (ITEM 1) ASSY. PART Nº WILL INCLUDE:		
1A‡	Switch & Target Assy. 1" Round	515-5966-XX
1B	Mounting Bracket	535-6896-00
1C	Switch Back Plate	535-6452-00
1D	6-32 X ¾ HWH Swage (Qty. 2)	237-5976-05
1E	Switch Diode, 1N4001	112-5001-00
1F	Foam Pad	626-5029-00

‡ ***Note:*** Item **1A**, is a riveted Sub-Assy. which includes the following items for reference: **A1**— Stack Switch Radius End (180-5133-00), **A2**— Washer 5/16" (242-5017-00), **A3**— Rivet 1/8" ø X 3/16" (249-5001-00) **and A4**— 1" Round Target (545-5456-XX).

2	1" X 1½" Stand-Up Rect. Target Assy.	500-5321-XX
ORDERING ABOVE (ITEM 2) ASSY. PART Nº WILL INCLUDE:		
2A‡	Sw. & Target Assy. 1" X 1½" Rect. Items 2B-F are identical to 1B-F	515-6027-XX Same as 1B-F

Item 2 Table Note continued in the next column.

Nº	STAND-UP (FLAT) TARGET NAME	SPI PART Nº

‡ ***Note:*** Item **2A**, is a riveted Sub-Assy. which includes the following items for reference: **A1**— Stack Switch Radius End (180-5133-00), **A2**— Washer 5/16" (242-5017-00), **A3**— Rivet 1/8" ø X 3/16" (249-5001-00) **and A4**— Rectangular Target (545-5145-XX).

3	1" Sq. Stand-Up Target Assy.	500-5232-XX
ORDERING ABOVE (ITEM 3) ASSY. PART Nº WILL INCLUDE:		
3A‡	Sw. & Target Assy. 1" Square Items 3B-F are identical to 1B-F	515-5162-XX Same as 1B-F

‡ ***Note:*** Item **3A**, is a riveted Sub-Assy. which includes the following items for reference: **A1**— Stack Switch Radius End (180-5133-00), **A2**— Washer 5/16" (242-5017-00), **A3**— Rivet 1/8" ø X 3/16" (249-5001-00) **and A4**— 1" Square Target (545-5470-XX).

4	Narrow Stand-Up Target Assy.	500-5857-XX
ORDERING ABOVE (ITEM 4) ASSY. PART Nº WILL INCLUDE:		
4A‡	Sw. & Target Assy. Narrow Items 4B-F are identical to 1B-F	515-5967-XX Same as 1B-F

‡ ***Note:*** Item **4A**, is a riveted Sub-Assy. which includes the following items for reference: **A1**— Stack Switch Square End (180-5132-00), **A2**— Washer 5/16" (242-5017-00), **A3**— Rivet 1/8" ø X 3/16" (249-5001-00) **and A4**— Narrow Target (545-5210-XX).

GLOSSARY OF TERMS

A Followed after a number means "Amp." or Ampage in an expression relating to an electrical object. (e.g. 8**A**).

AC (Acronym) **A**lternating **C**urrent.

Adj. (Abbreviation) Adjustment(s).

Assy. (Abbreviation) Assembly.

Au. (Abbreviation) Audit(s).

Bd. (Abbreviation) Board.

BOT (Abbreviation) Bottom.

Brkt. (Abbreviation) Bracket.

Bridge Rectifier A configuration of a diode that allows current to flow in one direction producing both positive and negative pulsating DC Voltages.

Color Coding See Appendix H or I, Plastic Part Color Chart or Section 4, Chapter 1, Playfield - Plastic Posts & Spacers.

Combination (Combo) [Shot] Any variable pinball shot(s) made successively.

Conn. (Abbreviation) Connector.

CMOS Short for COSMOS (Complementary Symmetry M.O.S.); Complementary Metal-Oxide Semi-Conductor.

CN (Abbreviation) Connector (e.g. **CN**5-P3).

CT (Abbreviation) Center.

DC (Abbreviation) Direct Current.

DT (Abbreviation) Drop Target(s).

DOTS (Acronym) **D**iode **O**n **T**erminal **S**trip.

EB (Abbreviation) Extra Ball.

Eject Playfield surface device to kick ball back into play; Saucer.

EPROM (Acronym) **E**rasable **P**rogrammable **R**ead **O**nly **M**emory. Can be erased using UV Light and re-programmed.

e.g. (Abbreviation) Latin- Exempli gratia. For Example.

EOS (Acronym) **E**nd-**O**f-**S**troke (i.e. Switch for flipper).

F (Abbreviation) Fuse (i.e. F23).

GA-Turn Gauge & Turn describing the windings on a coil (e.g. 23-800, 23 is the gauge of wire and 800 is the amount of windings.

G.I. (Abbreviation) General Illumination (Lamps).

HWH (Abbreviation) Hex Washer Head.

IC (Acronym) **I**ntegrated **C**ircuit (As in after 24-Pin IC).

ID or I.D. (Acronym) **I**nside **D**imension.

i.e. (Abbreviation) Latin- Id est. That is.

IO or I/O (Abbreviation) Input / Output (e.g. I/O Power Driver Bd.)

LT, Lt. or L. (Abbreviation) Left.

Laser Kick A coil/plunger used above the playfield to kick pinball back into play.

LED (Acronym) **L**ight **E**mitting **D**iode.

Loop [Shot] Continuously up a ramp and back to the flipper.

Lwr. (Abbreviation) Lower.

Orbit [Shot] From the left or right flipper around the back rail of the playfield back to the flipper.

MB (Abbreviation) Magnet Board.

M-BALL or MBALL (Abbreviation) Multiball™ More than 1 ball in game play.

MID (Abbreviation) Middle

Non-Reflexive See Reflexive.

No. or Nº or # (Abbreviation) Number

NPF (Acronym) **N**o **P**roblem **F**ound.

N.C. or NC (Abbreviation) Normally Closed.

N.O. or NO (Abbreviation) Normally Open.

NS (Abbreviation) Not Stuffed. (Use in Part Listings, Sec. 5)

OD or O.D. (Abbreviation) Outside Dimension.

P (Abbreviation) Pin (e.g. CN5-**P**3).

PCB (Acronym) **P**rinted **C**ircuit **B**oard

P/F (Abbreviation) Playfield.

PIA LED (Acronym) **P**eripheral **I**nterface **A**dapter **L**ight **E**mitting **D**iode.. This is a diagnostic LED on the CPU; it should not be lit during normal operation of a pinball game.

Plumb Bob Tilt Weight on Tilt Assembly.

PPH (Abbreviation) Phillips Pan Head.

Pop(s) Another term for Turbo Bumper(s).

PPB (Acronym) Playfield Power Board ("Popcorn-Popping Bd.").

PREV (Abbreviation) Previous.

PSB (Abbreviation) Power Supply Board

RAM (Acronym) **R**andom **A**ccess **M**emory. RAM **can** store input instructions and supply output information.

Reflexive/Non-Reflexive Reflexive—Solenoid Drive Transistor is enabled directly by a switch closure on the (Relating to CPU Boards) solenoid assembly (Ver. 1/2).
Non-Reflexive—Solenoid Drive Transistor is enabled by the CPU after reading a switch closure in the Switch Matrix (Ver. 3). Also note: All CPU Boards are backwards compatible (e.g. Jurassic Park/Ver. 3 to Time Machine/ Ver. 2). Swapping a Ver. 2 Board to a Ver. 3 is not possible due to the special solenoids section (i.e. Slingshots, Turbo Bumpers, etc.) changing from ***REFLEXIVE*** to ***NON-REFLEXIVE*** on Ver. 3 Boards.

Relay An automatic switch operated by current in a coil.

ROM (Acronym) **R**ead **O**nly **M**emory. ROM **cannot** store input instructions but can supply output information. ROM can be programmed only once.

RMA (Abbreviation) Return Merchandise Authorization Number

RT, Rt. or R. (Abbreviation) Right; ("**R**" at the end of Target Assy. Part Nº signifies Target Insert is **R**eversed.)

RO (Abbreviation) Rollover (switches).

Saucer See Eject.

Scoop A hole into the playfield. A metal scoop is in place to guide the ball into the kick-back under the playfield.

Slam Tilt A switch which closes when the game is slammed into or the Coin Door is slammed shut. Depending on adjustable settings, will cancel game in play when the number of closures required is achieved.

SMB (Abbreviation) Shaker Motor Board.

Solenoid A coil used for Electro Magnetic devices such as relays, flippers, slingshots, etc.

SSFB (Abbreviation) Solid State Flipper Board.

STEP Refers to the service switches on the coin door.

Sub-Assy. (Abbreviation) Sub-Assembly.

S-U or S/U (Abbreviation) Stand-Up (targets).

TM (Abbreviation) Trademark

Transfer [Shot] Maneuvering the ball in play from one flipper to the other. With flipper in the up position and the ball cradled by that flipper one would activate the flipper button in a quick repetitive manner to bounce the ball to the other side. Skilled players can rebound the ball off the slingshot.

Tri-Ball Three balls in play.

TTL (Abbreviation) Transistor-Transistor Logic

Upr. (Abbreviation) Upper.

V or v (Abbreviation) Volt(s).

Ver. (Abbreviation) Version.

VUK (Acronym) **V**ertical **U**p-**K**icker (Super or Standard).

X (Abbreviation) "Times" A multiplier; also used in dimensions.

X-Ball An undetermined number of ball(s) during game play.

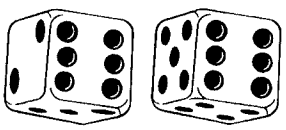
Zener Diode A semi-conductor diode used for voltage regulation. Application depends on reverse break-down voltage.

"-00B" "B" at the end of Coil Part Numbers signifies that the diode is attached to the bottom of the lug.

"-00T" "T" at the end of Coil Part Numbers signifies that the diode is attached to the top of the lug (the side nearest the coil-winding).

Parts Order Checklist Notes

Date Ordered	Part Nº	Qty.	Description	Date Received



STERN™ PINBALL, INC. LIMITED WARRANTY

STERN PINBALL, INC., ("SELLER") WARRANTS ONLY TO THE INITIAL PURCHASER OF ITS PRODUCTS THAT THE ITEMS LISTED BELOW ARE FREE FROM DEFECTS IN MATERIAL AND WORKMANSHIP UNDER NORMAL USE AND SERVICE FOR THE WARRANTY PERIOD SPECIFIED:

PRINTED CIRCUIT BOARDS (GAME LOGIC):	2 MONTHS
DOT MATRIX DISPLAY BOARDS:	9 MONTHS

NO OTHER PARTS OF SELLER'S PRODUCT ARE WARRANTED.

WARRANTY PERIODS ARE EFFECTIVE FROM THE INITIAL DATE OF SHIPMENT FROM SELLER TO ITS AUTHORIZED DISTRIBUTORS.

SELLER'S SOLE LIABILITY SHALL BE, AT ITS OPTION, TO REPAIR OR REPLACE PRODUCTS WHICH ARE RETURNED TO SELLER DURING THE WARRANTY PERIODS SPECIFIED, PROVIDED:

1. SELLER IS NOTIFIED PROMPTLY UPON DISCOVERY BY PURCHASER THAT STATED PRODUCTS ARE DEFECTIVE.
2. SUCH PRODUCTS ARE PROPERLY PACKAGED AND THEN RETURNED FREIGHT PREPAID, TO SELLER'S PLANT.

THIS WARRANTY DOES NOT APPLY TO ANY PARTS DAMAGED DURING SHIPMENT AND/OR DUE TO IMPROPER HANDLING, OR DUE TO IMPROPER INSTALLATION OR USAGE, OR ALTERATION. IN NO EVENT SHALL THE SELLER BE LIABLE FOR ANY ANTICIPATED PROFITS, LOSS OF PROFITS, LOSS OF USE, ACCIDENTAL OR CONSEQUENTIAL DAMAGES OR ANY OTHER LOSSES INCURRED BY THE CUSTOMER IN CONNECTION WITH THE PURCHASE OF A STERN PINBALL, INC. PRODUCT.

WARRANTY DISCLAIMER

EXCEPT AS SPECIFICALLY PROVIDED IN A WRITTEN CONTRACT BETWEEN SELLER AND PURCHASER, THERE ARE NO OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING ANY IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE.

CAUTIONS, WARNINGS & NOTICES

Caution

FOR SAFETY AND RELIABILITY, SUBSTITUTE PARTS AND EQUIPMENT MODIFICATIONS ARE NOT RECOMMENDED (AND MAY VOID ANY WARRANTIES). USE OF NON-STERN PINBALL INC. PARTS OR MODIFICATIONS OF GAME CIRCUITRY, MAY ADVERSELY AFFECT GAME PLAY, OR MAY CAUSE INJURIES. TRANSPORT PINBALL GAMES WITH HINGED BACKBOX IN THE DOWN POSITION ONLY! ALWAYS TAKE GREAT CARE WHEN SERVICING ANY GAME. ALWAYS READ THE SERVICE MANUAL BEFORE REPLACING OR SERVICING COMPONENTS. SUBSTITUTIONS OF PARTS OR EQUIPMENT MODIFICATIONS MAY VOID FCC TYPE ACCEPTANCE.

Always Disconnect The Line Voltage Before Servicing. Some Parts May Still Hold Current When Unplugged.

Warning

THIS EQUIPMENT GENERATES, USES, AND CAN RADIATE RADIO FREQUENCY ENERGY, AND IF NOT INSTALLED AND USED IN ACCORDANCE WITH THE INSTRUCTIONS MANUAL, MAY CAUSE INTERFERENCE TO RADIO COMMUNICATIONS. IT HAS BEEN TESTED AND FOUND TO COMPLY WITH THE LIMITS FOR A CLASS A COMPUTING DEVICE PURSUANT TO SUBPART J OF PART 15 OF FCC RULES, WHICH ARE DESIGNED TO PROVIDE REASONABLE PROTECTION AGAINST SUCH INTERFERENCE WHEN OPERATED IN A COMMERCIAL ENVIRONMENT. OPERATION OF THIS EQUIPMENT IN A RESIDENTIAL AREA IS LIKELY TO CAUSE INTERFERENCE IN WHICH CASE THE USER AT HIS OWN EXPENSE WILL BE REQUIRED TO TAKE WHATEVER MEASURES MAY BE REQUIRED TO CORRECT THE INTERFERENCE.

RF INTERFERENCE NOTICE, CABLE HARNESS PLACEMENTS AND GROUND STRAP ROUTING ON THIS GAME HAVE BEEN DESIGNED TO KEEP RF RADIATION AND CONDUCTION WITHIN LEVELS ACCEPTED BY THE FCC RULES. TO MAINTAIN THESE LEVELS, REPOSITION HARNESSES AND RECONNECT GROUND STRAPS TO THEIR ORIGINAL PLACEMENTS, IF THEY BECOME DISCONNECTED DURING MAINTENANCE.

Notices

THIS DOCUMENT AND THE DATA DISCLOSED HEREIN OR HEREWITH IS NOT TO BE REPRODUCED (EXCEPT WHERE NOTED), USED OR OTHERWISE DISCLOSED IN WHOLE OR IN PART TO ANYONE WITHOUT WRITTEN CONSENT OF STERN PINBALL, INC.. WARNING: PRODUCTS IN THIS MANUAL, THE COMPANY NAME AND DEVICES AND THE DESIGN OF THE MANUAL ITSELF, ARE PROTECTED BY FEDERAL PATENTS (AND PATENTS PENDING), DESIGN REGISTRATIONS, TRADEMARKS AND COPYRIGHTS. ACTION WILL BE TAKEN IN THE EVENT OF INFRINGEMENT OR IMITATION. THE RIGHT IS RESERVED TO CHANGE SPECIFICATIONS WITHOUT PRIOR NOTICE.

▼ U.S. ▼
Customary
Inch Ruler

Metric Conversion

1/16" .0625" 1/8" .125" 1/4" .25" 1/2" .5" 3/4" .75" 1/32" (.03125")

1" = 2.54cm /25.4mm
1cm = .3937"
1mm = .03937"

- For metric, multiply inch value by metric value. e.g. 5" X 2.54cm = 12.7cm or 127mm.
- For US, multiply metric value by inch value. e.g. 13cm X .3937" = 5.118"
