New Game Features In
Addams Family Special Collectors Edition

The Gold Special Collectors Edition has some added game play features that the original Addams Family did not have. Long term Addams Family players will have a great deal of fun discovering the new game play additions. The major changes include:

1. The addition of gold colored components as follows...

   A. The cabinet side armor.
   B. The front hand protector.
   C. The legs on the game.
   D. "Things" box at the rear of the playfield.
   E. The bookcase in the center of the playfield.
   F. The center ramp wire form.
   G. The bottom arch artwork.
   H. The cabinet artwork.

   A numbered and engraved plaque will be affixed to the front of each cabinet. Finally a certificate of authenticity will be included with each game.

2. The addition of Gomez and Morticia speech that was not included in the original game. In going back to our original studio tapes we discovered many phrases we would have liked to have included in the early version. By adding sound/music memory to the Special Collectors Edition, we have been able to include this "lost speech".

3. The game changes include the addition of the "Buy-In" button. This will allow more players to "Tour The Mansion" than was possible before.

4. Game play features include...

   A. "Cousin Its" hideout.
      In the game over sequence, the player sees Cousin It hiding many objects. These objects are "discovered" by the player by entering the mansion rooms. These objects award everything from points to lighting the "specials".

   B. Wednesday and Pugsleys secret passage.
      When a player enters the 3 million room in the mansion, they will discover the passage and move to a separate random room that will also be awarded.

   C. Extra Dot matrix displays.
      We have added game play memory to the original version.

These and other small changes make the Special Collectors Edition Some "Thing" Special In Pinball!

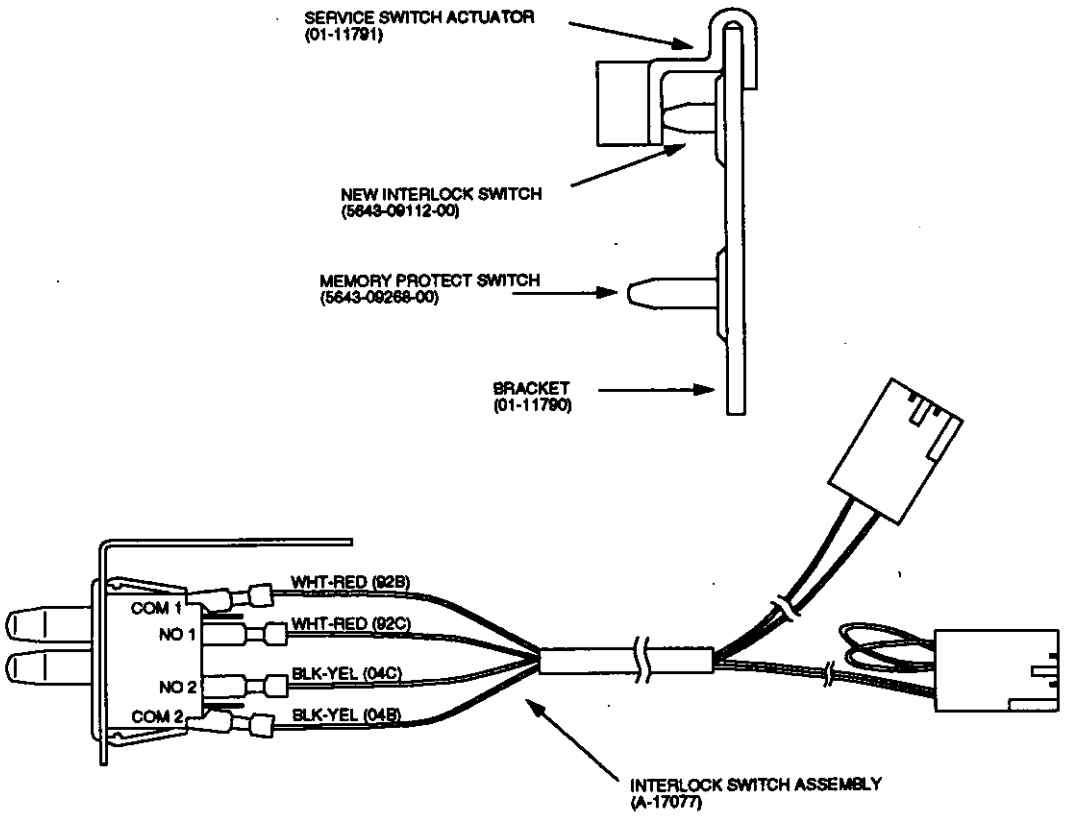
IMPORTANT NOTICE

PLEASE READ

This pinball game is equipped with a SAFETY FEATURE to prevent shocks from the solenoid circuit when the coin door is opened. A new interlock switch assembly (part no. A-17077), located at the left of the coin door opening, has been added to this game. This assembly is a bracket containing the existing memory protect switch on the bottom and a new interlock switch on the top. When the coin door is opened, this new interlock switch opens, breaking the connection to the +50V and +20V winding of the transformer secondary.

A special tool called the Service Switch Actuator is provided for the serviceman/technician that repairs the game. This tool is painted yellow and located in a bag stapled inside the cabinet. The Service Switch Actuator slips over the interlock switch and holds it closed while the coin door is opened, allowing the serviceman to test and repair the solenoid circuit.

Hold the top interlock switch in, then slide the short end of the Service Switch Actuator over the top of the interlock switch bracket and the long end over the center of the switch plunger to hold it in.



The ADDAMS FAMILY

"THING FLIPS" FEATURE, RULES & PLAYFIELD SHOT MAPS

"Thing Flips"
Automatic Calibration

The "Thing Flips" feature is an exclusive Williams/Bally pinball innovation.

Using advanced artificial intelligence systems, the game will learn to shoot the ball into the swamp from the upper left flipper. The feature is enabled by coming through the far left flipper return lane (labeled "Lite Thing Flips").

This will lite the "Thing Flips" arrow that points up the center ramp. If the center ramp is hit while this arrow is flashing, the ball will be diverted to the upper left mini-flipper and the game ("Thing") will attempt to shoot the ball into the swamp. Once the game has "learned" the specifics of the game, (slope, dirt, flipper power, etc.) it will successfully make the shot between 50-60% of the time. This is several times better than the best players are able to achieve.

The game continually monitors the performance and compensates for changes. When the game 1st begins gathering data, it quickly learns to be "in the ballpark", then it slowly refines its ability to make the shot. When the game is moved from one location to another it will eventually learn the new shot regardless of intervention, but it is possible to speed up the process by either:

a) A Full Factory Reset (Function U.8)
b) Executing "NEW LOCATION" (Function U.12)

Remember, when fully calibrated, the "Thing Flips" feature will successfully make the shot between 50-60% of the time. The BEST players make the shot under 20% of the time (this is a VERY difficult shot).

If after awhile, your game is not successfully making the shot as often as expected, check the operation of the opto, (switch 57 above the upper left mini-flipper), the 3 Swamp Targets (switches 45, 47, and 48), and the upper "Swamp Lock" switch (switch 71). The program relies on these switches to calibrate the system. Also check the upper left flipper for proper operation.

After setting the game up on location, it will automatically calibrate itself over time. If you would like to speed up this process:

1. Setup game ON LOCATION. Set the pitch and level. Calibrating the game before it is sent to its final location may help, but could actually slow down the process.

2. Activate function U.12 (New Location). This will clear out any previously learned data.

3. With the glass off, manually throw the ball up the SIDE RAMP (labeled Super Jackpot). Repeat this four times.

4. After pressing the left flipper return lane rollover (Lite Thing Flips), throw the ball up the center ramp. It will be diverted and "Thing" will shoot toward the swamp.

   Repeat this process (left flipper lane followed by center ramp) at least 30 times. After 30 attempts, it should be at a level where it will make at least 40% of its shots. The more shots you make, the more accurate it will become. It takes several HUNDRED shots for the machine to fine tune its ability to make the shot.

MANSION AWARDS RULES

There are 13 possible MANSION AWARDS. Each window of the MANSION has a different value or set of rules that can occur when awarded. Please see the diagram for the numbering from 1 to 13.

1. This window awards 3 Million points.

2. This window sets the Jet Bumpers (GRAVEYARD) to their maximum value.

3. **Hit Cousin It.** This starts a timed sequence where all targets award a special point value which can be RAISED by hitting the COUSIN IT target at (S).

4. **The Manushka.** This starts a timed sequence where all targets score a special point value.

5. This window scores 6 Million points.

6. **Quick Multi-ball.** This lights THING so that he will take the current ball in play and start Quick Multi-ball. In quick multi-ball, the Bookcase opens at (K) so that any shot to the Vault (L) scores MILLION PLUS.

7. **Festers Tunnel Hunt.** This starts a timed sequence where shots should be made to the three tunnels (G) (H) (L), in any order. These score 5, 10 and 15 Million points.

8. **Seance.** This starts a timed sequence where the player trys to shoot any three ramp shots. This is the only time a single ball causes the POWER of the ADDAMS FAMILY to appear.

9. This window awards 9 Million points.

10. **Thing.** This window starts a timed sequence where the player trys to get the ball to THING. If succesfull a point value is awarded and the Bookcase opens for a version of Quick Multi-ball. In Quick Multi-ball, any shot to the VAULT awards the original point value over and over again!

11. **Raise the Dead.** This starts a timed sequence where the player trys to get the ball into the Jet Bumpers (GRAVEYARD). Each Jet Bumper has a counter that decrements each time it is hit. If the counter reaches 0, then that spirit has been "Raised", and 5 Million points are awarded.

12. **Light Extra Ball.** This window lights THING to award an Extra Ball.

13. **?.** When all other windows are lit, this window will light to award 50 Million points, light the Specials, and begin re-awarding all other Mansion values in a special sequence.

SHOT MAPS / GAME RULES

SKILL SHOT: The plunger skill shot is made to THINGS EJECT SAUCER at (A). It awards 2 Million plus 1 addtional Million for each subsequent Skill Shot.

EXTRA BALL: There are four possible Extra Balls that can be awarded in the ADDAMS FAMILY. The first and second are lit by "Bear Kick" shots around the Center Staircase (ramp) at (B). Extra Ball is always collected by shooting the ball to THINGS EJECT SAUCER. (A). A third Extra Ball is lit from the possible MANSION AWARDS at (D). The fourth Extra Ball is lit after multiple TRAIN WRECKS from the Train Wreck feature shot at (E).

MANSION AWARDS: The available Mansion Awards are at (D) on the playfield. The currently lit award is changed by the Jet Bumpers (F). The awards are COLLECTED when the yellow lamp is lit on the ELECTRIC CHAIR (G) and the ball is shot to either the Electric Chair or the SWAMP KICKOUT (H). The yellow lamp is re-lit when the ball passes thru the right flipper lane (J). Please see the rules for the individual awards below.

MULTI-BALL: Hitting the BOOKCASE (K) spells the word G-R-E-E-D. When GREED has been spelled, the Bookcase will swing open to reveal the shot to the VAULT (L). Balls may be LOCKED at any one of the flashing LOCK arrows. When two balls have been locked, the third ball is put into play and MULTI-BALL can be started by shooting the ball into the VAULT (L) or into the ELECTRIC CHAIR (G). During the attempted release sequence the POWER of the ADDAMS FAMILY can be seen as the ball passes over the central portion of the playfield.

JACKPOT: While in MULTI-BALL any shot made to the TRAIN WRECK SHOT (E) will score single JACKPOT. Any shot made to the Left Staircase (ramp) at (N) scores a multiple of the Jackpot value depending on how many balls were LOCKED into the Vault directly prior to Multi-ball. Once the Jackpot shot on the ramp is made, the BOOKCASE (K) will open. A shot made into the Vault can re-light the JACKPOT ARROWS for another Jackpot.

THINGS REMATCH: If two balls are lost during Multi-ball before a JACKPOT is scored, then THINGS EJECT HOLE (A) lights for a restart of Multi-ball. If the player gets the ball to THING in the time period allowed, Thing will take the ball and Multi-ball will be restarted.

TRAIN WRECK: Multiple shots to the standup target at (E) produce TRAIN-WRECKS. Train wrecks hold the players current GRAVEYARD VALUE from the Jet Bumpers and award incrementing point values.

GRAVEYARD VALUE: Any shot into the Jet Bumpers increases the GRAVEYARD VALUE. This value is a one ball value unless it has been carried over because of a TRAIN WRECK. The GRAVEYARD VALUE is COLLECTED by any ball that goes into the SWAMP (P). Five times the GRAVEYARD VALUE can be collected by shooting the ball into the SWAMP with THINGS MINI-FLIPPER (Q).

THING FLIPS: Any ball thay goes thru the left outer flipper lane (R) and is then shot around the Center Staircase (B) will be diverted to THINGS MINI-FLIPPER (Q). The game will AUTOMATICALLY FLIP ON ITS OWN and attempt to shoot the ball into the SWAMP!!!!

T-H-I-N-G AWARD: Every time a ball is shot into THINGS EJECT HOLE (A), a letter is added to the THING spellout on the speaker display panel. When T-H-I-N-G has been spelled, the next shot to Thing will activate the Hand and 5 Million will be scored. If a player can do it again, then 10 Million etc., will be scored.

Order replacement ROMs from your authorized **MIDWAY MANUFACTURING CO.** distributor. Specify: (1) part number (if available); (2) ROM label color; (3) ROM level (number) on the label; (4) which game the ROM is used in.

PINBALL GAME ASSEMBLY INSTRUCTIONS

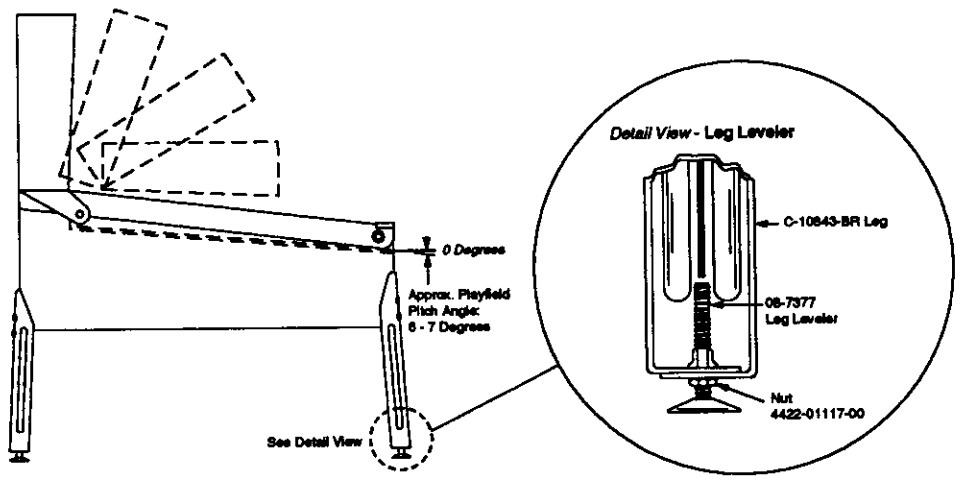
THE ADDAMS FAMILY SPECIAL COLLECTORS EDITION IS A 3 BALL GAME.

Weight: 290 Lbs.	Length: 55" Approx.
Width: 26" Approx.	Height: 85" Approx.

1. Open the shipping container; remove all cartons, parts, and other items, and set them aside.

2. Place the cabinet on a support and attach rear legs using leg bolts. Leg levelers and leg bolts are provided among the parts in the cash box.

3. Attach the front legs (after installing leg levelers), using leg bolts See diagram below.



Pinball Assembly, Playfield Pitch Angle, and Leg Leveler Details.

4. Reach into the cabinet and backbox and ensure that the interconnecting cables are free to move (not kinked or pinched). Be careful to avoid damaging wires at any stage of the assembly process.

⚠ CAUTION
FAILURE TO INSTALL the backbox mounting hardware properly can cause personal injury.
NEVER TRANSPORT a pinball game with the hinged backbox erect. Always lower the backbox forward onto the playfield cabinet on a layer of protective material to prevent marring or damage and possible personal injury.

5. Raise the hinged backbox upright and latch it into position. Unlock the backbox, and remove the backglass, storing it carefully to avoid scratches. Remove the shipping block holding the Insert Board. Unlatch and open the Insert Board. This allows access to the bolt holes used for securing the backbox upright. Install the washer-head mounting bolts through the bottom holes of the backbox into the threaded fasteners in the cabinet to secure the backbox. Close the Insert Board and latch it in position. Reinstall the backglass, and lock the backbox.

6. Extend each leg leveler slightly below the leg bottom, so that all four foot pads are extended about the same distance. Remove the cabinet from its support and place it on the floor.

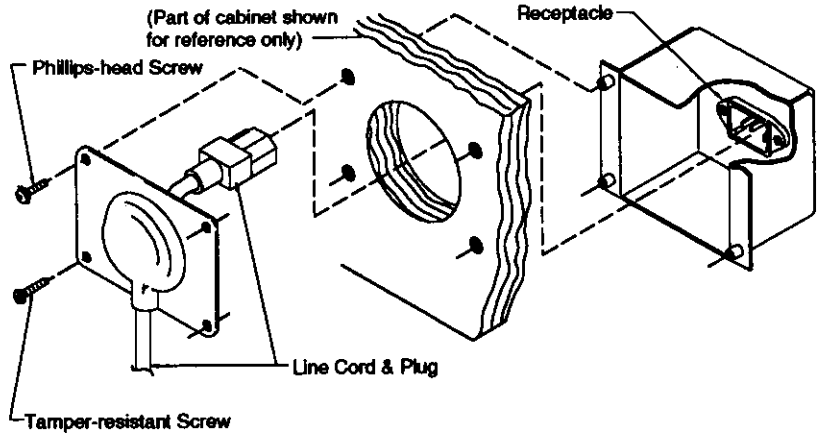
7. Unlock and open the coin door. Locate the Molding Latch Lever, and move the lever toward the left side of the game, to release the Front Molding. Lift the Front Molding off the playfield cover glass return the Latch Lever toward the right, and close the coin door. Carefully slide the glass downward, until it clears the grooves of the Left and Right Side Moldings. Lift the glass up and away from the game, storing it carefully to avoid breakage.

8. Place a level or an inclinometer on the playfield surface. Adjust the leg levelers for proper playfield level (side-to-side) and playfield pitch angle (incline) of approximately 6-7 degrees. NOTE: It is recommended that these measurements be made ON the playfield, not the cabinet nor the playfield cover glass. Tighten the nut on each leg leveler shaft to maintain this setting, as shown in Figure 3.

CAUTION

Playfield pitch angle adjustments can affect the operation of the plunb bob tilt, inside the cabinet. The plumb bob weight is among the parts in the cashbox; the operator should install the weight and adjust this tilt mechanism for proper operation, after completion of the desired playfield pitch angle setting.

9. To attach line cord, remove envelope stapled inside cabinet (near cashbox). Remove the four Phillips-head screws that mount the line cord cover plate to the rear cabinet. Match the prongs on the plug with the holes in the receptacle and push line cord securely into place. Make sure cord aligns with the indentation of plate (indentation should point toward bottom of cabinet). Remount line cord cover plate. If desired, tamper resistant screws are provided in an envelope marked "Security Screws" (located in cashbox) to remount cover plate.



10. Move the game into the desired location; recheck the level and pitch angle of the playfield.

11. Verify that the ***required number*** of balls are installed in the game. **The ADDAMS FAMILY Special Collectors Edition** uses 3 balls.

12. Install playfield mylars if desired.

    NOTE: **The ADDAMS FAMILY Special Collectors Edition** playfield has a special hardcoat surface and does not require a full protective mylar. However, playfield mylars can be purchased thru your local Bally Distributor. Specify part number 03-7960-20017-1 for full playfield mylar.

13. Clean and reinstall the playfield cover glass, reversing the procedure of step 7. Prepare the game for player operation.

GAME CONTROL LOCATIONS

Cabinet Switches

The On-Off switch is located on the bottom of the cabinet near the right front leg.
The Start Button is a pushbutton to the left of the coin door on the cabinet exterior. Press the Start button to begin a game, or during the diagnostic mode, to ask for HELP.

Coin Door Switches

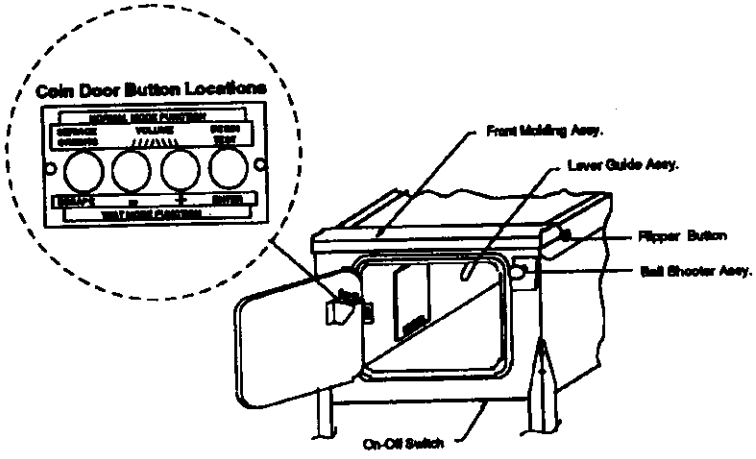
The operator controls all game adjustments, obtains bookkeeping information, and diagnoses problems, using only four pushbutton switches mounted on the inside of the coin door. The Coin Door Switches have two modes of operation Normal Function and Test Function.

Normal Function

The Service Credits switch puts credits on the game that are not included in the game audits.
The Volume Up switch raises the sound level of the game. Press and hold the button until the desired level is reached.
The Volume Down switch lowers the sound level of the game. Press and hold the button until the desired level is reached. See Adjustment A.1 28 to shut sound Off completely.
The Begin Test switch starts the Menu System Operation and changes the Coin Door Switches from Normal Function to Test Function.

Test Function

The Escape switch allows you to get out of a menu selection or return to the Attract Mode.
The Up switch allows you to cycle forward through the menu selections or adjustment choices.
The Down switch allows you to cycle backward through the menu selections or adjustment choices.
The Enter switch allows you to get into a menu selection or lock in an adjustment choice.



GAME OPERATION

⚠ CAUTION

After assembly and installation at the site location, this game must be plugged into a properly grounded outlet to prevent shock hazard, and to assure proper game operation. DO NOT use a 'cheater' plug to defeat the ground pin on the line cord. DO NOT cut off the ground pin.

POWERING UP. With the coin door closed, plug the game in and switch it On, using the On-Off Switch. In normal operation, Testing will show in the display as the game performs Start-Up Tests. Once the Start-Up Tests have been successfully completed the last score is displayed. Afterward, the game goes into the Attract Mode (playfield and backbox lamps flashing, sounds heard, etc., if the operator does not change the Factory Setting).

Note: After the game has been on location for a period of time, the Start-Up Tests may contain messages concerning game problems. The section entitled 'Problem Analysis Messages' contains more detail concerning messages displayed at each game turn-on.

Open the coin door and press the Begin Test Switch. The display shows the game name, game number and game software revision. The message changes. The display shows the sound software revision, revision level of the system software and date the game software was revised.

Example: **The ADDAMS FAMILY S.C.E. Sound Rev. L-1**
20017 Rev. L-6 Sy.3.12 1/28/94

Press the Enter button to enter the WPC Menu System (refer to the section entitled 'Menu System Operation' for more information). Perform the entire Test Menu routine to verify the game is operating satisfactorily. Successful completion of the tests in the Test Menu routine will show the game is ready to begin earning your investment return.

ATTRACT MODE*. After completing the Test Menu routine, press the Escape button three times to enter the Attract Mode. During the Attract Mode, playfield and backbox lamps blink. The display exhibits a series of messages informing the player concerning:

A. Recent highest scores*
B. A "custom message"
C. The score to achieve to obtain a Replay award*

These (or similar) displays reappear occasionally, accompanied by sounds and music, until a player initiates game play by inserting a coin, or when credits are available, pressing the Start button.

*Operator-adjustable feature.

CREDIT POSTING. Insert coin(s). A sound is heard for each coin. The display will show the number of credits purchased. So long as the number of maximum allowable credits* are NOT exceeded by coin purchase or high score, credits are posted correctly.

STARTING A GAME. Press the Start button once. A startup sound plays. The number of credits shown in the display decreases by one. The display flashes 00 (until the first playfield switch is actuated), and shows ball 1. Additional players may enter the game by pressing the Start button once for each player, before the end of play on the first ball.

TILTS. Actuating the Slam Tilt switch on the coin door inside the cabinet ends the current game and proceeds to the Game Over Mode. With the third closure* of the plumb bob tilt switch, the player loses the remaining play of that ball, but can complete the game.

END OF GAME. All earned scores and bonuses are awarded. If a player's final score exceeds the specified value, the player receives a designated award for achieving the current highest score. A random digit set* appears in the display. Credit* may be awarded when the last two digits of any player's score (1 through 4) match the random digits. Match, high score and game over sounds are made, as appropriate.

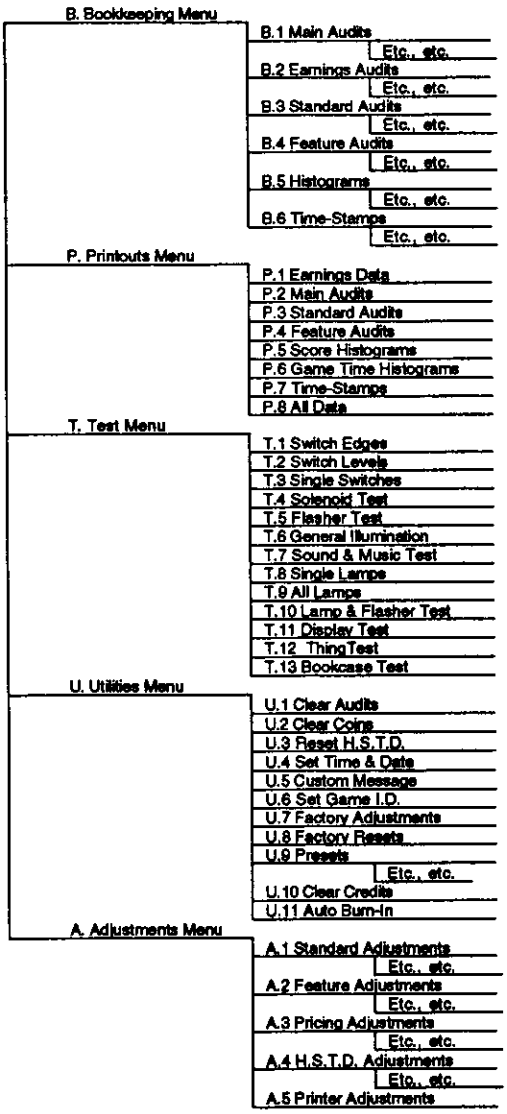
GAME OVER MODE. GAME OVER will show in the display. Afterward, the high scores will flash on the display. The game proceeds to the Attract Mode.

*Operator-adjustable feature.

MENU SYSTEM OPERATION

The ADDAMS FAMILY Special Collectors Edition operates on a Menu System. The Main Menu allows you to choose from several main categories, which in turn lead to other menus to choose from. To enter the Menu System, open the coin door and press the Begin Test button. The displays show the Game I.D. Mode. Press the Enter button and the Main Menu appears. To cycle through the Main Menu selections press either the Up or Down button. Activate any selection by pressing the Enter button when the desired selection appears in the displays. To return to the Attract Mode while viewing the Main Menu, or to return to a previous menu selection, press the Escape button. Press the Start button for HELP at any time.

Main Menu



Press Escape
To move out of a menu selection.

Press Enter
To get into a menu selection.

Press Up
Increases sequence; Example A.1, A.2, A.3, A.4.

Press Down
Decreases Sequence; Example A.4, A.3, A.2, A.1.

Use Up and Down to cycle through the selections in a menu.

Use Escape and Enter to move into and out of the selected menu

MAIN MENU

B. Bookkeeping
P. Printouts (optional board required)
T. Tests
U. Utilities
A. Adjustments

Bookkeeping is the first category available from the Main Menu. Press the Enter button to activate the Bookkeeping Menu. Press the Up or Down button to cycle through the selections. Press the Enter button to activate the desired Bookkeeping group when it appears on the display.

B. BOOKKEEPING MENU

B.1 Main Audits
B.2 Earning Audits
B.3 Standard Audits
B.4 Feature Audits
B.5 Histograms
B.6 Time-Stamps

Once you have entered the desired Bookkeeping Group, press the Up or Down button to cycle through the available audits in that group. Audits cannot be set, they can only be cleared by using U1 and U2 from the Utilities Menu.

One Button Audit System
Information from the Bookkeeping Menu is obtainable directly from the Attract Mode. Continually pressing the Enter button, while in the Attract Mode, will cycle through all of the game audits.

B.1 Main Audits

B.1	01	Total Earnings	00	These audits (which also appear
B.1	02	Recent Earnings	00	in other groups) are the most
B.1	03	Free Play Percent	00	important, and are grouped
B.1	04	Average Ball Time	00	here for easier access.
B.1	05	Average Game Time	00	
B.1	06	Total Plays	00	
B.1	07	Replay Awards	00	
B.1	08	Percent Replays	00	
B.1	09	Extra Balls	00	
B.1	10	Percent Extra Ball	00	

Press the Escape button to return to the Bookkeeping Menu. Press the Up button to advance to the next desired Bookkeeping Group, (or press the Down button to return to a previous group). Press the Enter button to activate that group. Press the Up or Down button to cycle through the available audits in that group.

B.2 Earning Audits*

B.2	01	Recent Earnings	00
B.2	02	Recent Left Slot	00
B.2	03	Recent Center Slot	00
B.2	04	Recent Right Slot	00
B.2	05	Recent 4th Slot	00
B.2	06	Recent Paid Credits	00
B.2	07	Recent Service Credits	00
B.2	08	Total Earnings*	00
B.2	09	Total Left Slot*	00

B.6	08	Last Replay
B.6	09	Last H.S.T.D. Reset
B.6	10	Champion Reset
B.6	11	Last Printout
B.6	12	Last Service Credit

Press the Escape button to return to the Bookkeeping Menu. Then, either press the Up or Down button to return to a previous Bookkeeping Menu Group, or press the Escape button again to return to the Main Menu. Once in the Main Menu either press the Up button to advance to the next menu selection, the Printouts Menu, or press the Down button to return to a previous Main Menu selection.

Press the Enter button to activate the Printouts Menu, once the menu name is shown under the Main Menu. Then, use the Up or Down button to cycle through the Printouts Menu selections. Press the Enter button to activate the desired Printouts Group when that group appears in the displays.

P. PRINTOUTS MENU
(optional board required)

P.1 Earnings Data
P.2 Main Audits
P.3 Standard Audits
P.4 Feature Audits
P.5 Score Histograms
P.6 Time Histograms
P.7 Time-Stamps
P.8 All Data

The Printouts Menu is a combination of the other menus. This menu allows you to access and print information in the available menu selections.

If no Printer is attached the the message "Waiting for Printer" appears in the displays. Note: Set the print specification from the Adjustment Menu, A.5 Printer Adjustments.

Press the Escape button to return to the Printouts Menu. Then, either press the Up or Down button to return to a previous Printouts Menu Group, or press the Escape button again to return to the Main Menu. Once in the Main Menu press the Up button to advance to the next menu selection, the Test Menu, or press the Down button to return to a previous Main Menu selection.

Use the Service Switch Actuator to hold in the top interlock switch located in the bottom left corner of the coin door opening. The actuator must be in place in order to activate the solenoids and flashlamps.

Press the Enter button to activate the Test Menu, once the menu name is shown under the Main Menu. Then, use the Up or Down button to cycle through the Test Menu selections. Press the Enter button to activate the desired test when that test appears in the displays.

T. TEST MENU

T.1 Switch Edges
T.2 Switch Levels
T.3 Single Switch
T.4 Solenoid Test
T.5 Flasher Test
T.6 General Illumination
T.7 Sound & Music Test
T.8 Single Lamps
T.9 All Lamps
T.10 Lamp & Flasher Tests
T.11 Display Test
T.12 Thing Test
T.13 Bookcase Test

T.1 Switch Edges

For all switches, the number on the left indicates the column, the number on the right indicates the row. Example-Switch 23 means 2nd column, 3rd row.

To test the Left and Right Flippers, press the Left or Right Flipper buttons during switch test. The flipper name and switch number should show in the displays. Any other results indicate the system has detected a problem with the flipper circuit.

To activate the Switch Edges Test, from the Test Menu, press the Enter button. The name and number of each switch that is pressed is shown in the displays. If any other switch, or no switch at all is indicated, the system has detected a problem with the switch circuit.

Press Escape to return to the Test Menu. Press the Up button to display the next test, (or the Down button to return to a previous test). Press the Enter button to activate that test.

T.2 Switch Levels

Once the test name is shown under the Test Menu, press the Enter button. The name and number of each switch that is activated is shown in the displays. This test automatically cycles through all switches that are detected closed. Current switch is indicated by a filled square.

Press the Escape button to return to the Test Menu. Press the Up button to display the next test, (or the Down button to return to a previous test). Press the Enter button to activate that test.

T.3 Single Switches

Once the test name is shown under the Test Menu, press the Enter button. The Single Switch Test isolates a particular switch by blocking signals from all other switches. Use the Up or Down buttons to select the switch to be tested. During the Single Switch Test, a flashing cross indicates your location in the matrix, a square indicates a closed switch, and a dot indicates an open switch. Press the Start button to obtain wire color, connector, and fuse information of any switch when that switch is displayed.

Press the Escape button to return to the Test Menu. Press the Up button to display the next test, (or the Down button to return to a previous test). Press the Enter button to activate that test.

T.4 Solenoid Test

Once the test name is shown under the Test Menu, press the Enter button. The Solenoid Test has three modes, Repeat, Stop, and Running. Only one solenoid should turn On at a time. The system has detected a problem if, more then one solenoid turns On, a solenoid comes On and stays On, or no solenoid turns On during the Repeat or Running test modes. Press the Start button to see the wire color, driver number, connector and, fuse information of any coil, when that coil is displayed.

Repeat - This test allows you to stop and pulse a single coil or flashlamp. Once you have entered the Solenoid Test, coil 1 shows in the displays and the corresponding solenoid activates. Press the Up or Down button to cycle through the solenoids, one at a time, manually. The same solenoid pulses until you press the Up or Down button to move to the next one. Either press the Escape button to return to the Test Menu, or press the Enter button to move to the next test mode.

Stop - This test allows you to stop the Solenoid Test at any point. Press Enter during the Repeat test mode and the Solenoid Test stops. There should not be any solenoids activated while the test is stopped. Either press the Escape button to return to the Test Menu, or the Enter button to move to the next test mode.

Running - This test allows you to cycle through the solenoids automatically. Press the Enter button during the Stop test mode. The displays show you the name and number of the solenoid currently being pulsed.

Either press the Enter button to return to the Repeat test mode, or press the Escape button to return to the Test Menu. Once in the Test Menu press, the Up button to display the next test, (or the Down button to return to a previous test). Press the Enter button to activate that test.

T.5 Flasher Test

Once the test name is shown under the Test Menu, press the Enter button. This test allows you to test the flashlamp part of the solenoid circuit exclusively. This test, like the Solenoid Test, has three test modes Repeat, Stop, and Running. During this test, only one flashlamp circuit should turn On at a time. If, more then one flashlamp circuit turns On, or stays On, or no flashlamp circuit turns On at all during the Repeat or Running test modes the system has detected a problem. Press the Start button to see the wire color, driver number, connector, and fuse information of any flashlamp circuit when that circuit appears in the displays.

Repeat - This test allows you to stop and pulse a single flashlamp. Once you have entered the Flasher Test the name and number of the first flashlamp circuit shows in the displays and the corresponding bulb(s) flashes. Press the Up or Down button to cycle through all of the flashlamps circuits one at a time, manually. The same flashlamp circuit pulses until you press the Up or Down button to move to the next one. Either, press the Escape button to return to the Test Menu, or press the Enter button to advance to the next test mode.

Stop - This test allow you to stop the Flasher Test at any time. Press the Enter button during the Repeat test mode. The Flasher Test stops. There should not be any flashlamp circuit turned On during this test mode. Either press the Escape button to return to the Test Menu, or press the Enter button to advance to the next test mode.

Running - This test allows you to cycle through the flashlamps automatically. Press the Enter button during the Stop test mode. The displays show you the name and number of the flashlamp currently being pulsed, and the corresponding bulb(s) flashes.

Either press the Enter button to return to the Repeat test mode or, press the Escape button to return to the Test Menu. Once in the Test Menu, press the Up button to display the next test, (or the Down button to return to a previous test). Press the Enter button to activate that test.

T.6 General Illumination

Once the test name is shown under the Test Menu, press the Enter button. This test allows you to check all of the General Illumination circuits. There are two modes of operation, Stop and Run. To obtain wire color, driver number, connector, and fuse information, press the Start button when the desired General Illumination circuit appears in the displays.

Stop - Press the Up or Down buttons to cycle through the General Illumination Test manually. All illumination is tested first, followed by an individual circuit test. The circuit name and number shows in the displays while the corresponding lamps lights. If any other results occur the system has detected an error.

Run - Press the Enter button any time during Stop test mode and the General Illumination Test cycles through automatically. For each circuit shown in the displays the corresponding bulbs should light. If any other results occurs the system has detected a problem.

Either press the Enter button to return to Stop test mode, or the Escape button to return to the Test Menu. Once in the Test Menu press the Up button to advance to the next test, (or the Down button to return to a previous test). Press the Enter button to activate that test.

T.7 Sound and Music Test

Once the test name is shown under the Test Menu, press the Enter button. The Sound and Music Test allows you to check the audio circuits. This test has three modes for testing the sound and music circuits, Running, Repeat and Stop.

Running - This test steps through a sequence of sounds and music. Pressing the Up or Down button during this portion of the Sound and Music test allows you to advance to a particular sound or tune without having to wait for the program to play all the sounds available in the test. For each name and number that appears in the displays a sound or tune should be heard. Any other results indicates the system has detected a problem.

Repeat - Press the Enter button at any time during the Running test mode to cause the program to stop and repeat a particular sound or tune. The same sound should repeat continuously until the Up or Down button is pressed. Any other results indicates the system has detected a problem.

Stop - Press the Enter button at any time during the Repeat test mode to stop this test altogether. Nothing should be heard. Any other results indicates the system has detected a problem.

Use the Enter button to return to the Running test mode, or the Escape button to return to the Test Menu. Once in the Test Menu press the Up button to display the next test, (or the Down button to return to a previous test) . Press the Enter button to activate that test.

T.8 Single Lamp Test

For all lamps, the number on the left indicates the column, the number on the right indicates the row. Example- Lamp 23 means 2nd column, 3rd row.

Once the test name is shown under the Test Menu, press the Enter button. This test allows you to test each lamp circuit individually. Press the Up or Down button to cycle through this test. For each name and number that is shown in the displays the corresponding lamp should light. Any other results indicates the system has detected a problem. Press the Start button to obtain wire color, connector, and fuse information when the desired lamp is lit.

Press the Escape button to return to the Test Menu. Press the Up button to display the next test, (or the Down button to return to a previous test). Press the Enter button to activate that test.

T.9 All Lamps Test

Once the test name is shown under the Test Menu, press the Enter button. This test causes all the controlled lamps to flash at the same time. Every controlled lamp should flash. Any other results indicates the system has detected a problem.

Press the Escape button to return to the Test Menu. Press the Up button to display the next test, (or the Down button to return to a previous test). Press the Enter button to activate that test.

T.10 Lamp and Flasher Test

Once the test name is shown under the Test Menu, press the Enter button. This test causes all the flashlamps and the controlled lamps to flash at the same time. The controlled lamps blink, while the flashlamps cycle from highest to lowest. Any other results indicates the system has detected a problem.

Press the Escape button to return to the Test Menu. Press the Up button to display the next test, (or the Down button to return to a previous test). Press the Enter button to activate that test.

T.11 Display Test

Once the test name is shown under the Test Menu, press the Enter button. This Test automatically turns On and Off every dot in the Dot Matrix Display. A series of patterns appear in sequence. It starts with one line, turned On, moving across the screen vertically, then horizontally. The screen inverses and one line, turned Off, moves across the screen vertically, then horizontally. The second pattern is a series of lines, turned On, moving across the screen diagonally. The screen inverses and there is a series of lines, turned Off, moving across the screen diagonally. The third pattern is gridlines turned On, then turned Off. The last pattern is a box forming an outline of dots around the matrix that are turned On. After the box outline the test repeats itself.

Press the Escape button to return to the Test Menu. Then, either press the Up or Down button to return to a previous Test, or press the Escape button again to return to the Main Menu. Once in the Main Menu, press the Up button to move to the next menu selection, the Utilities Menu, or press the Down button to return to a previous Main Menu selection.

T.12 Thing Test

Select T.12 from the Test Menu and press "Enter" to enter the "Thing" Test. Using the Up and Down buttons, 2 different test can be run:

T.12 01 Motor Test

This allows the operator to start and stop the motor that operates the "Thing Hand". Pressing "Enter" will alternately start and stop the motor. The status of the opto limit switches is shown on the bottom line of the display.

T.12 02 Operation Test

This allows the operator to do a normal operation of the hand mechanism. Each time "Enter" is pressed, a cycle will begin which will operate the mechanism as is don during game play. If a ball is placed in the eject hole, the hand should take the ball and drop it into its box where it will then be returned to the playfield. During the operation of this test, the status of the opto limit switches is shown on the bottom line of the display.

T.13 Bookcase Test

This allows you to start and stop the motor that operates the Bookcase. Pressing "Enter" will alternately start and stop the motor. The status of the bookcase limit switches is shown on the bottom line of the display.

Press the Enter button to activate the Utilities Menu, once the menu name is shown under the Main Menu. Then, use the Up or Down button to cycle through the Utility Menu selections. Press the Enter button to activate the desired Utility or Utility Group when it appears in the displays. If you change a utility setting and realize you have made a mistake, press the Escape button while "Saving Adjustment Value" is still in the displays. The original setting is retained and the new setting is ignored.

U.1 Clear Audits

Press the Enter button to clear the Standard Audits, Feature Audits, and Histograms.Press the Up button to display the next utility.

U.2 Clear Coins

Press the Enter button to clear the Earnings Audits. Press the Up button to display the next utility.

U.3 Reset H.S.T.D.

Press the Enter button to clear the High Score to Date Table and the Grand Champion. Press the Up button to display the next utility.

U.4 Set Time and Date

Press the Enter button to activate the time and date. Use the Up or Down button to change the value, then press the Enter button to lock in that value. If you make a mistake press the Escape button while "Saving Adjustment Value" is displayed. Press the Up button to move to the next utility.

U.5 Custom Message

Set A.1 20 to YES before writing a Custom Message. Press the Enter button to begin entry of the custom message that appears in the displays during the Attract Mode. Use the Up or Down button to rotate letters. Use the Start button to rotate punctuation marks, (if desired). Press the Enter button to lock in the desired letter and punctuation. If you make a mistake, use Up and Down to select the "back-arrow" character located before the space character and after the number nine. Press Enter while the back-arrow shows to erase the previously entered character. Once your message is complete, press and hold the Enter button until "Message Stored" is displayed.

Press the Escape button to cancel the new message. The message "Press Enter to Reset" appears. If you press Enter, the custom message is cleared and no message is displayed. If you press Escape, the original message remains intact.

U.6 Set Game I.D.
This utility allows the operator to install a message, such as game location, that only appears on printouts . Press the Enter button to activate Set Game I.D.. Use the Up or Down button to rotate letters. Use the Start button to rotate punctuation marks, (if desired). Press the Enter button to lock in the desired letter and punctuation.

U.7 Factory Adjustment
Press the Enter button to restore the adjustments to factory settings, then press the Up button to display the next utility.

U.8 Factory Reset
Press the Enter button to restore the adjustments to their factory setting, clear the Audits, H.S.T.D Table, and Custom Message/Game I.D. Press the Up button to display the next utility.

U.9 Presets
Press the Enter button to activate the Presets Group. Use the Up or Down buttons to cycle through the available Presets. When the desired Preset is displayed, press the Enter button to lock in that Preset. If you realize you have made a mistake, press the Escape button while "Saving Adjustment Value" is displayed. The new value is ignored and the original value is retained.

U.9 01 Install Extra Easy
The operator can change the game play difficulty adjustments to a combination that is MUCH LESS difficult than the Factory Settings. The Game Difficulty Setting Table lists the adjustments and the settings that comprise the 'Extra Easy' Group.

U.9 02 Install Easy
The operator can change the game play difficulty adjustments to a combination that is somewhat LESS difficult than the Factory Settings. The Game Difficulty Setting Table lists the adjustments and the settings that comprise the 'Easy' Group.

U.9 03 Install Medium
The operator can change the game play difficulty adjustments to a combination that is about the SAME difficulty as the Factory Settings. The Game Difficulty Setting Table lists the adjustments and settings that comprise the 'Medium' Group.

U.9 04 Install Hard
The operator can change the game play difficulty adjustments to a combination that is somewhat MORE difficult than Factory Settings. The Game Difficulty Setting Table lists the adjustments and settings that comprise the 'Hard' Group.

U.9 05 Install Extra Hard
The operator can change the game play difficulty adjustments to a combination that is MUCH MORE difficult than Factory Settings. The Game Difficulty Setting Table lists the adjustments and settings that comprise the 'Extra Hard' Group.

Preset Game Adjustments Table for French Games

Adj. #	Adjustment Description	French 1 U.9 23	French 2 U.9 24	French 3 U.9 25	French 4 U.9 26	French 5 U.9 27	French 6 U.9 28
U.9 06	Install 5 Ball	N/A	N/A	N/A	N/A	N/A	Yes

Press the Escape button to return to the Presets menu. Then press the Up button to display the next utility, (or the Down button to return to a previous utility).

U.10 Clear Credits

Press the Enter button to clear the game Credits. Press the Up button to display the next utility.

U.11 Auto Burn-in

Press the Enter button to activate Auto Burn-in. This utility allows you to automatically cycle through several tests. This helps in finding intermittent problems. The tests that Auto Burn-in cycles through are the Display Test, the Sound and Music Test, the All Lamps Test, the Solenoid Test, the Flashers Test, and the General Illumination Test.

U.12 New Location

This function is used to alert the "Thing Flips" calibration system that the game has been moved to a new location. Select Function U.12. Press Enter. The game will confirm that you have re-started calibration of the "Thing Flips" system.

Press the Escape button to return to the Utilities Menu. Then, either press the Up or Down button to return to a previous Utilities Menu Group, or press the Escape button again to return to the Main Menu. Once in the Main Menu either use the Up or Down buttons to return to a previous menu selection, or press the Escape button again to return to the Attract Mode.

Press the Enter button to activate the Adjustments Menu. Press the Up or Down button to cycle through the Adjustment Menu selections. Press the Enter button to activate the desired Adjustment group when it appears on the display.

A. ADJUSTMENTS MENU

A.1 Standard Adjustments
A.2 Feature Adjustments
A.3 Pricing Adjustments
A.4 H.S.T.D Adjustments
A.5 Printer Adjustments (optional board required)

Once you have entered the adjustment group desired, press the Up or Down button to cycle through the available adjustments in that group. When the desired adjustment appears press the Enter button to activate that adjustment. When an adjustment is activated, the setting value begins to flash. Use the Up or Down button to raise or lower the setting value. When the desired value is displayed press Enter to lock in the value. If you realize you have made an error, press the Escape button while "Saving Adjustment Value" is displayed. The new value is ignored and the original value is retained.

A.1 Standard Adjustments

A.1 01 Balls Per Game
The operator defines a "game" by specifying the number of balls to be played. The range of this setting is 1 through 10.

A.1 02 Tilt Warnings
The operator specifies the number of total actuations of the plumb bob mechanism that can occur before the game is "tilted". The range of this setting is 1 through 10.

A.1 03 Maximum Extra Balls
The operator chooses the number of Extra Balls that a player may accumulate. The range of this setting is 1 through 10, or "No Extra Ball" (Extra Ball disabled).

A.1 04 Maximum Extra Balls/Ball in Play
The operator chooses the number of Extra Balls to be awarded per ball in play. The range of this setting is:

OFF - No maximum number of Extra Balls per ball in play.
1-10 - 1 through 10 Extra Balls per ball in play.

A.1 05 Replay System
The operator chooses the replay system to be used. The choices are:

Fixed - Replay value is set by the operator and does not change during game play.
Auto% - Replay starting value is set by the operator and changes every 50 games to comply with the percentage of replays desired.

A.1 06 Replay Percent*
The operator chooses the percentage of replays the players are able to earn when Auto Replay is used. The range of this setting is 5% to 50%.

A.1 07 Replay Start*
The operator chooses the replay starting value when Auto% Replay is used. The range of this setting is 1, 000, 000 to 20, 000, 000.

A.1 08 Replay Levels*
The operator chooses the number of replay levels used by the Auto% Replay mode. The range of this setting is 1 through 4. When the operator chooses two replay levels, the second replay level is automatically adjusted to twice the starting replay level value. When three of four replay levels are chosen, their values are automatically adjusted to three or four times the starting replay level value.

*For Auto % Replay.

A.1 09 Replay Level 1**
The operator chooses the value to be used for the first Fixed Replay. The range of this setting is 00 to 25, 000, 000.

A.1 10 Replay Level 2**
The operator chooses the value to be used for the second Fixed Replay. The range of this setting is 00 to 25, 000, 000.

A.1 11 Replay Level 3**
The operator chooses the value to be used for the third Fixed Replay. The range of this setting is 00 to 25, 000, 000.

A.1 12 Replay Level 4**
The operator chooses the value to be used for the fourth Fixed Replay. The range of this setting is 00 to 25, 000, 000.

** For Fixed Replay

A.1 13 Replay Boost

The operator chooses if the replay score can be temporarily boosted by the selected amount EACH time the player reaches or exceeds the replay score. This temporary boost is canceled when Credits=0, when the player inserts another coin, or when Begin Test is pressed. The choices are:

ON-Score is boosted between 500, 000 and 5, 000, 000 points.
OFF-The replay score is not boosted.

A.1 14 Replay Award

For either Auto% Replay or Fixed Replay the operator can choose the form of the award automatically provided when the player exceeds any replay level. The choices are:

Credit	-	Reaching each Replay level awards credit.
Ticket	-	Reaching each Replay level awards a ticket.
Ball	-	Reaching each Replay level awards an Extra Ball.
Audit	-	Reaching each Replay level awards nothing to the player; it does increase the entry value of the Audit Item(s) maintaining a tally of these awards.

A.1 15 Special Award

The operator can choose the award automatically provided when the player scores a special. The choices are:

Credit	-	Scoring a Special awards a Credit.
Ticket	-	Scoring a Special awards a Ticket.
Ball	-	Scoring a Special awards an Extra Ball.
Points		-Scoring a Special awards 1 Million points.

A.1 16 Match Award

The operator can choose the award automatically provided when the players wins a match. The choices are:

Credit	-	Winning a Match awards a Credit.
Ticket	-	Winning a Match awards a Ticket.

A.1 17 Extra Ball Ticket

The operator can choose whether a Ticket is awarded when the player earns an Extra Ball. The choices are:

YES	-	The player is awarded a Ticket in addition to an Extra Ball.
NO	-	The player is not awarded a Ticket.

A.1 18 Maximum Ticket/Player

The operator can choose the amount of Tickets each player can earn. The range of this setting is 00 to 100.

A.1 19 Match Feature

The operator can choose the desired percentage for the Match Feature occurring at the end of the game. The range of this setting is:

OFF - Match Feature is not available.
1 -50% - 1% is 'hard'; 50% is 'extremely easy'. During the Match Feature the game selects a random two-digit number at the end of the game and compares each players score for an identical two digits in the rightmost two positions. A matching of these two digits results in an award of a Credit or a Ticket.

A.1 20 Custom Message

The operator chooses if a message is displayed during the Attract Mode. The choices are:

YES - A message is displayed
NO - A message is not displayed.

A.1 21 Language

The operator chooses what language the game uses. The choices are, English, French, or German.

A.1 22 Clock Style

The operator chooses what style of clock the game uses. The choices are A.M./P.M. or 24 Hours.

A.1 23 Date Style

The operator chooses what style of date the game uses. The choices are Month/Date/Year, or Date/Month/Year.

A.1 24 Show Date and Time

The operator chooses whether the date and time show in the Attract Mode. The choices are:

YES - Show the date, time in status report or in the Attract Mode.
NO - Do Not show date, time in status report or in the Attract Mode.

A.1 25 Allow Dim Illumination

The operator chooses whether to allow the game program to dim the General Illumination for special effects and during the Attract Mode. The choices are:

YES - Dim the General Illumination during the Attract Mode.
NO - Do Not dim the General Illumination.

A.1 26 Tournament Play

The operator chooses whether to equalize Multi-ball and Jackpots during multi-player games, (do not carry over to next player). The choices are:

YES - Keep Multi-ball and Jackpots equal.
NO - Do Not Keep Multi-ball and Jackpots equal.

A.1 27 Euro. Scr. Format

The operator chooses whether to have commas or dots between digits when numbers are displayed. The choices are:

YES - Dots instead of commas, (example- 1.000.000).
NO - Commas instead of dots, (example- 1, 000, 000).

A.1 28 Minimum Volume Control

The operator chooses whether the volume can be turned Off. The choices are:

YES - Volume can be turned Off.
NO - Volume can be turned Down but not Off.

A.1 29 General Illumination Power Saver

This adjustment allows the general illumination and controlled lamps to be dimmed following a time interval after a game is played. Power Saver Level (A.1 30) determines how dim the lamps will get. The use of this feature will substantially increase the life of the lamps.

Settings: Off 2-60 Minutes

A.1 30 Power Saver Level

When General Illumination Power Saver (A.1 29) is set to On, this adjustment controls the intensity of the G.I. and controlled lamps once the game has been idle for a specified period of time.

Settings: 4-7

A.1 31 Ticket Expansion Board

When a Ticket Expansion Board is connected, full control of the ticket dispenser is available. This includes a ticket low/error lamp, resume on ticket jam, and manual ticket dispense switch. The choices are:

Yes - Ticket Expansion Board is connected.
No - Ticket Expansion Board is NOT installed in the game.

Press the Escape button to return to the Adjustments Menu. Press the Up button to advance to the next desired Adjustments Group, (or press the Down button to return to a previous group). Press the Enter button to activate. Use the Up or Down button to cycle through the available adjustments.

A.2 Feature Adjustments

A.2 01 Extra Ball Percent

This is used to enter the desired extra ball percentage. The House and Train Wreck extra balls always remain fixed, and the Bear Kick extra ball threshold will automatically be modified to reach the desired percentage.

Range: 15% - 40%
Set to "Fixed" to disable the automatic percentaging of the Bear Kick Extra Ball.

A.2 02 Bear Kick Extra Ball 1

This is the number of Bear Kicks that will light the 1st extra ball. The machine will start with this value and modify it as necessary to achieve the percentage specified in A.2 01. To use a fixed level for the 1st extra ball, set A.2 01 to "fixed" and set this level here.

Range: OFF, 4-12

A.2 03 Bear Kick Extra Ball 2

This determines whether a 2nd extra ball is available at 50 Bear Kicks.

Range: OFF, 30-99

A.2 04 Train Wreck Extra Ball

This is the number of train wrecks that will light the Train Wreck extra ball.

Setting: On/Off

A.2 05 Bear Extra Ball Memory

This determines whether extra balls lit from the Bear Kick feature remain in memory from ball to ball.

Setting: Yes/No

A.2 06 House Extra Ball Memory

This determines whether extra balls lit from the Mansion feature remain in memory from ball to ball.

Setting: Yes/No

A.2 07 Train Extra Ball Memory
This determines whether extra balls lit from the Train Wreck feature remain in memory from ball to ball.

Setting: Yes/No

A.2 08 Last Thing Lock
This determines that last multiball in which Thing is allowed to help lock the balls.

Range: Off, 1 - 5

A.2 09 Last Swamp Lock
This determines that last multiball in which balls may be locked in the Swamp.

Range: 1 - 5

A.2 10 Last Chair Release
This determines that last multiball in which multiball may begin from an Electric Chair shot.

Range: Off, 0 - 5

A.2 11 Jackpot Carryover
When set to "Yes", a player's uncollected Jackpot will carry over to subsequent multiball. If set to "No" the Jackpot value will reset to 10 Million at the start of each multiball. Anytime the Jackpot is collected, it automatically resets to 10 Million.

Setting: Yes/No

A.2 12 Million Plus Memory
This determines whether the side ramp Million Plus feature carries over from ball to ball or is reset to one million at the start of each ball.

Setting: Yes/No

A.2 13 Million Plus Maximum
This sets the maximum value for the side ramp Million Plus feature. Subsequent shots will award this maximum value without increasing.

Range: 5,000,000 - 20,000,000

A.2 14 Hurry Up Start
This is the starting (maximum) value for the Thing "Hurry Up" quick multiball feature. The award will start at this value and count down to 3,000,000.

Range: 10,000,000 - 20,000,000

A.2 15 House From Swamp
This allows the Mansion awards to be awarded by balls entering the Swamp kickout.

Setting: Yes/No

A.2 16 Free Thing Lamps
This gives each player this many lamps in the T-H-I-N-G spell out at the start of each game.

Range: 0 - 5

A.2 17 Raise Dead Hits
This is the number of hits on each bumper required to complete the bumper for the "Raise the Dead" mode.
Range: 3 - 9

A.2 18 Train Wreck Hits
This is the number of hits required for the 1st Train Wreck. Each subsequent Train Wreck requires 1 additional hit up to a maximum of 6.

Range: 2-4

A.2 19 Special Memory
This determines the Special (which is lit by the "Tour The Mansion" feature) stays in memory from ball to ball

Setting: Yes/No

A.2 20 Disable THING
Set to "Yes" to stop the operation of the Thing hand.

Setting: Yes/No

A.2 21 Disable BOOKCASE
Set to "Yes" to stop the operation of the Bookcase.

Setting: Yes/No

A.2 22 Train Wreck Memory
This determines whether the Train Wreck progress is maintained ball to ball (yes), or reset every ball (no).

A.2 23 Quick Multiball Memory
This determines whether the quick multiball lamp (earned as a Mansion award) carries over from ball to ball

Setting: Yes/No

A.2 24 Green Lock Lamp
Certain prototype games did not have the Green Lock lamp hanging over the "Thing" shot. By setting this adjustment to "NO", the game will use the yellow "Multiball" lamp in its place.

Setting: Yes/No

A.2 25 Tour the Mansion Extra Ball Memory
When an extra ball is lit from "Tour the Mansion", this adjustment determines whether that extra ball is carried over from ball to ball.

A.2 29 Gameover Kick Out
When set to yes, any locked balls will be kicked out of the lockup at game over.
Setting: Yes/No

A.2 30 Buy Extra Ball
This determines whether each player may buy extra balls for 1 credit at the end of the game.

A.2 31 Max. Buy in Balls
This determines the number of extra balls a player is allowed to buy per game

Range: 1 - 99

A.2 32 Items in Masion
Determines the number of Cousin It's items that will be hidden in the mansion.

Range: 1 - 4

Press the Up button to advance to the next desired Adjustment Group, (or press the Down button to return to a previous Adjustment Group). Press the Enter button to activate that group. Press the Up or Down button to cycle through the available adjustments in that group.

A. 3 Pricing Adjustments

A.3 01 Game Pricing (if set to custom, then 02 to 09 are available)
The operator chooses the cost for a game from a selection of Standard pricing or by installing Custom pricing.

A.3 02 Left Coin Units
The operator can specify the number of coin units purchased by a coin passing through the left coin chute.

A.3 03 Center Coin Units
The operator can specify the number of coin units purchased by a coin passing through the center coin chute.

A.3 04 Right Coin Units
The operator can specify the number of coin units purchased by a coin passing through the right coin chute.

A.3 05 4th Slot Units
The operator can specify the number of coin units purchased by a coin passing through the fourth coin chute.

A.3 06 Units/Credits
The operator defines the number of coin units required to obtain 1 credit. A coin unit counter in the game program totals the number of coin units purchased through all coin chutes prior to each game. If the total number of these coin units exceeds or matches the Unit per Credit value by a multiple (or more, coin units) of the specified Units per Credit value the Credits display shows the proper number of credits. The coin unit counter retains any remaining coin units, until the start of Ball 2; then the coin unit counter is cleared (its contents are zeroed).

A.3 07 Units/Bonus
The operator can specify that additional credits are to be indicated in the credits display, when a certain number of coin units are accumulated.

A.3 08 Bonus Credits
The operator specifies the number of credits that are awarded when the Units/Bonus level is achieved.

A.3 09 Minimum Units
The operator can specify that No credits are to be posted (indicated in the credit display), until the credits unit counter reaches a particular value, by setting this value to 02 (or more).

A.3 10 Coin Door Type (If set to custom, then 11 to 15 are available)
This adjustment is used to preset adjustments 11 to 15 based on standard coin doors (U.S.A., German, Etc.).

A.3 11 Collection Text
The operator chooses what coin system is used to display the Earning Audits.

A.3 12 Left Slot Value
The operator can specify the monetary value of the left coin chute.

A.3 13 Center Slot Value
The operator can specify the monetary value of the center coin chute.

A.3 14 Right Slot Value
The operator can specify the monetary value of the right coin chute.

A.3 15 4th Slot Value
The operator can specify the monetary value of the 4th coin chute.

A.3 16 Maximum Credits
The operator can specify the maximum number of credits the game can accumulate, either through game play awards or coin purchases. The range of this setting is 5 through 10. Reaching the specified setting prevents the award of any credits.

A.3 17 Free Play
The operator can specify whether a player can operate the game without a coin (free play) or with a coin. The choices are:

NO - A coin is necessary for game play.
YES - Game play is free; no coin required.

A.3 18 Hide Coin Audits

The operator chooses whether or not to show the coin audits. The choices are:

YES	-	The coin audits are not displayed.
NO	-	The coin audits are displayed.
HIDE NAMES	-	The coin audit value is shown but not the audit name.

A.3 19 1 Coin Buy-in

If the game pricing is set to 1 for 50¢/2 for $1.00 the operator chooses whether the player is allowed to 'buy-in' a subsequent game for 1 coin. The number of games that may be purchased at this cost is determined by the number of players in the previous game; that is, if the previous game had three players, 3 Credits can be purchased at the rate of 1 coin per credit. **Note that this is not the same feature that allows the player to buy an extra ball at the end of the game. See A.2 30 "Buy Extra Ball".**

YES	-	The player has 10 seconds to buy-in at 1 coin per game.
NO	-	The buy-in feature is disabled.

A.3 20 Base Coin Size

This number is used for the ticket per coin calculations.

A.3 21 Coin Meter Units

It is possible to connect a coin meter to the knocker coil driver which will log all coins through all slots. This adjustment activates the use of the knocker driver for this purpose, and determines the value of each unit on the meter. For example, to show the total amount of money collected as "total quarters", set this adjustment to "0.25". To show the amount of money collected as "total dollars", set this adjustment to "1.00".

Setting this adjustment to anything other than Off establishes the coin unit for a meter attached to the knocker driver, and overrides use of the knocker during awards.

Pricing Table

Note: 1. Factory Default. 2. Standard Setting - Change by pressing Enter button. 3. Other functions are also affected.
* Only if Bill Acceptor and Center Coin Chute are available.

Press the Escape button to return to the Adjustment Menu. Press the Up button to advance to the next desired Adjustment Group, (or press the Down button to return to a previous Adjustment Group). Press the Enter button to activate that group. Press the Up or Down button to cycle through the available adjustments in that group.

A.4 H.S.T.D. Adjustments

A.4 01 Highest Scores

The operator specifies whether the game is to maintain a record of the four highest scores achieved to date. The choices are:

OFF - No high scores are recorded, or displayed.
ON - The four highest scores are stored in memory and displayed in the Attract Mode.

A.4 02 H.S.T.D. Award

The operator chooses the award given for achieving the High Score To Date, or the Champion H.S.T.D.. The choices are a Credit or a Ticket.

A.4 03 Champion H.S.T.D.

The operator chooses whether the "Highest" High Score is displayed in the Attract Mode. This score is not cleared when "High Score Reset Every" occurs. The choices are:

ON - The "Highest" High Score is retained in memory and displayed.
OFF - The "Highest" High Score is not retained.

A.4 04 Champion Credits

The operator chooses the number of credits or tickets awarded for a Grand Champion Score. The range of this setting is 00 through 10.

A.4 05 H.S.T.D. 1 Credits

The operator selects the number of credits or tickets to be awarded whenever a player exceeds the previous Highest Score. The range of this setting is 00 to 10.

A.4 06 H.S.T.D. 2 Credits

The operator selects the number of credits or tickets to be awarded whenever a player exceeds the second highest score. The range of this setting is 00 to 10.

A.4 07 H.S.T.D. 3 Credits

The operator selects the number of credits or tickets to be awarded whenever a player exceeds the third highest score. The range of this setting is 00 to 10.

A.4 08 H.S.T.D. 4 Credits

The operator selects the number of credits or tickets to be awarded whenever a player exceeds the fourth highest score. The range of this setting is 00 to 10.

A.4 09 High Score Reset Every

The operator can specify that the game will provide an automatic reset of the displayed "Highest scores", and the number of games to be played before the reset occurs. The values provided upon reset are those selected by the operator in the Back-up High Scores. The range of this setting is OFF (disabled) and 250 to 20, 000.

A.4 10 Backup Champion

The operator sets the Back-up Grand Champion Score. The range of this setting is 00 through 99, 900, 000.

A.4 11 Backup H.S.T.D. 1

The operator can set the Back-up High Score value. The game automatically restores this value when the High Score Reset Every value is reached. The range of this setting is 00 to 99,900,000.

A.4 12 Backup H.S.T.D. 2

The operator can set the second Back-up High Score value. The game automatically restores this value when the High Score Reset Every value is reached. The range of this setting is 00 to 99,900,000.

A.4 13 Backup H.S.T.D. 3

The operator can set the third Back-up High Score value. The game automatically restores this value when the High Score Reset Every value is reached. The range of this setting is 00 to 99,900,000.

A.4 14 Backup H.S.T.D. 4

The operator can set the fourth Back-up High Score value. The game automatically restores this value when the High Score Reset Every value is reached. The range of this setting is 00 to 99,900,000.

Press the Up button to advance to the next desired Adjustment Group, (or press the Down button to return to a previous Adjustment Group). Press the Enter button to activate that group. Press the Up or Down button to cycle through the available adjustments in that group.

A.5 Printer Adjustments (optional board required)

A.5 01 Column Width

The operator chooses the column width to be printed. The range of this setting is 22 through 80.

A.5 02 Lines Per Page

The operator chooses the amount of lines per page. The range of this setting is 20 through 80.

A.5 03 Pause Every Page

The operator chooses whether the printer pauses at the end of a page. The choices are:

YES - The printer does pause.
NO - The printer doesn't pause.

A.5 04 Printer Type

The operator selects which kind of printer to use. The choices are Parallel, Serial or ADP.

A.5 05 Serial Baud Rate

The operator selects which baud rate to use for Serial or ADP communications (bit rate). The choices are 300, 600, 1200, 2400, 4800. or 9600.

A.5 06 Serial D.T.R. (Data Terminal Ready)

When a Serial Printer is used, this line may be connected to a printer output line signaling that the printer is busy.

Normal = Normal D.T.R. signal goes low to indicate the printer is not ready.

Inverted = Inverted D.T.R. (busy) signal goes high to indicate printer is not ready.

Ignore = D.T.R. signal is ignored.

Press the Escape button to return to the Adjustments Menu. Then, either press the Up or Down button to return to a previous Adjustment Menu Group, or press the Escape button again to return to the Main Menu. Once in the Main Menu, either press the Up button to advance to the next menu selection, the Bookkeeping Menu, or press the Down button to to return to a previous Main Menu selection.

PROBLEM ANALYSIS MESSAGES

The WPC game program has the capability to aid the operator and service personnel. At Game Turn-on or after pressing the Begin Test switch, once the game has been operating for an extended period, the display may signal with a message, "Press ENTER for Test Report". This indicates the game program has detected a possible problem with the game.

To obtain details of the problem, open the coin door and press the Begin Test switch. Press the Enter button to begin displaying the message(s). The following messages apply to this game.

Check Switch ##.

This message indicates that at least one switch was stuck 'On' at game turn-on or has NOT been actuated during ball play (for 90 balls or ≈30 games) by displaying the message "Adjust Switch ##", listing each problem switch by number. (The game program compensates the game play requirements affected by each disabled switch to allow 'nearly normal' play. This helps keep the game earning, until the service technician can repair the problem, bringing the game back to its normal good profits!)

To verify the problem, refer to the Test Menu text describing Switch Testing, and check each reported switch using applicable switch tests. Always check switch operation using a ball, to simulate game conditions. (Switch problems may often be resolved by adjusting the wire switch actuators, fixing switch circuitry problems, securing loose connectors, etc. Mechanisms using 'opto switches' (drop targets, etc.) need to be checked for proper power connections (+12V dc and ground).

Pinball Missing.

The game normally uses three balls; however, it will operate with one ball. This message announces that a ball is missing or stuck somewhere. When the ball is located, return it to the game via the Outhole. Other possibilities for this problem could be malfunctions of the Ball Trough switches or the Ball Shooter switch.

xxxxx Sw. is Stuck On.

This message indicates that a switch, which is not usually On, remains in the On position after the game is switched On. The stuck switch is essential for game play (for example, a coin chute switch, the slam tilt switch, the plumb bob tilt switch), and should be cleared to permit proper game operation.

Ground Short Row-N, Wht-xxx.

Frequent appearance of this message requires activation of the Switch Levels Test to locate the switch causing the "WHT-xxx ROW x SHORT" message. Possible 'row short' causes are: 1) Slam Tilt (or other coin door) switch touching the grounded coin door; 2) A leaf-type, playfield switch touching a grounded part; 3) Players poking metallic objects (wires, coat hangers, etc.) into the game; 4) Switch cable insulation pierced or damaged allowing bare wire contact with a grounded part; 5) All switches in a row closing at the same time (Note: This instance is NOT a switch problem; however, for most games this is a very rare possibility).

Factory Settings Restored.

Repeated appearance of this message indicates that the CMOS RAM no longer retains any custom Pricing or Game Adjustment settings and has reverted to factory default settings. Generally, the following CPU checks will isolate the cause of the CMOS RAM memory failure. The voltage at pin 28 and pin 26 of U8 should be +5V (game turned On) and at least +4V (game turned Off). When the voltage drops below +4 V, memory reset occurs. Check the batteries and battery holder. Be sure that the batteries are good and that there is no contamination on the battery holder terminals. Turn the game OFF, and use an ohmmeter to check diodes D1 and D2 on the CPU Board. D1 should read 0 ohms when forward-biased and infinite ohms when reverse-biased. D2 should read 15 ohms when forward-biased and infinite ohms when reverse-biased.

U6 Checksum Error.

The game ROM checksum is invalid. If this occurs replace the game ROM.

Time and Date Not Set.

The real time clock is not running. If this occurs go to U.4 of the Utilities Menu and set the time and date.

CPU L.E.D.'s

The CPU has three L.E.D.'s located on the upper left side of the board: D19, D20, and D21. On game power-up D19 and D21 turn on for a moment then, D19 turns off and D20 starts to blink rapidly. D21 remains on. The system has detected a problem if the following happens:

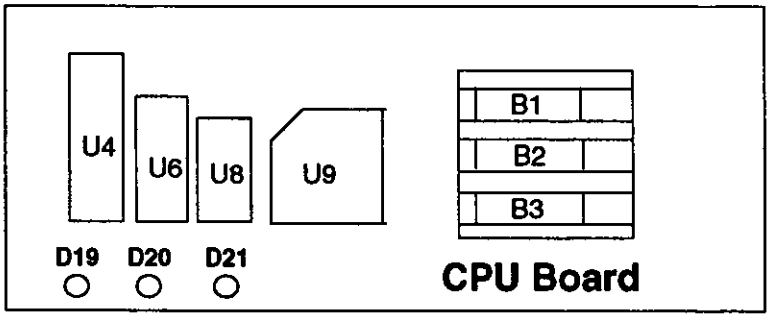
CPU Board L.E.D. Error Codes

Center L.E.D. blinks one time	-	ROM Error U6
Center L.E.D. blinks two times	-	RAM Error U8
Center L.E.D. blinks three times	-	Custom Chip Failure U9

Sound Board Beep Error Codes Upon Game Turn-On:

1 Beep	=	Sound Board O.K.
2 Beeps	=	U9 Failure (RAM)
3 Beeps	=	U18 Failure (ROM)
4 Beeps	=	U15 Failure (ROM)
5 Beeps	=	U14 Failure (ROM)

LED List



CPU Board
D19, Blanking
D20, Diagnostic

F902	Upper Right Flipper	3A, S.B.

Line Filter

Domestic Game	8A, N.B.
Foreign Game	4A, S.B.

MAINTENANCE INFORMATION

Regular maintenance is essential to a game's continuing contribution to the operator's earnings.

LUBRICATION

The two main lubrication points of the Ball Shooter Lane Feeder mechanism are the pivots for the arm. Note that the mechanism of other playfield devices are somewhat similar to the Ball Shooter Lane Feeder Device; and have the same lubrication requirements as the Ball Shooter Lane Feeder Device. A switch target grease is satisfactory for these devices.

Because of the functional design (arm-actuated via solenoid plunger operation), the pivot points of the Left and Right Kickers ("Slingshots") all require lubrication as a regular servicing procedure.

Lubrication to ensure proper operation also applies to the target blades of the Drop Targets. MBI Instrument Grease, also known as Drop Target Switch Lubricant, with a Williams' part number of 20-8886, is a recommended lubricant.

SWITCH CONTACTS

For proper game operation, switch contacts should be free of dust, dirt, contamination, and corrosion. Blade switch contacts are plated to resist corrosion. Cleaning blade switch contacts requires gentle closing of the contacts on a clean business card or piece of paper, and then pulling the paper about 2 inches, which should restore the clean contact surface. Adjust the switch contacts to a 1/16-inch gap.

CLEANING

Good game action and extended playfield life are the results of regular playfield cleaning. During each collection stop, the playfield glass should be removed and thoroughly cleaned and the playfield should be wiped off with a clean, lint-free cloth. The game balls should be cleaned and inspected for any chips, nicks, or pits. Replace any damaged balls to prevent playfield damage.

Regular, more extensive, playfield cleaning is recommended. However, avoid excessive use of water and caustic or abrasive cleaners because they tend to damage the playfield surface. Playfield wax (or any carnauba based wax), or polish may be used sparingly, to prevent a buildup on the playfield surface. Do not use cleaners containing petroleum distillates on any playfield plastics because they may dissolve the plastic material or damage the artwork.

5.	A-18203-1	3-Ball Cashbox Assembly
6.	*	Line Filter Assembly
7.	5610-12835-00	Transformer, 115/230v
8.	5555-12929-00	Speaker, 4Ω, 6", 25w
9.	20-9347	Toggle Latch
10.	A-14689-1	Coin Door Interface Bd.
11.	C-10843-BR	Metal Leg Assembly, Brass
12.	A-18257	Front Molding Assembly, Brass
13.	20-6502-A	Plum Bob
14.	A-15361	Tilt Mechanism Assembly
15.	*	Cordset
16.	A-17316	Opto Flipper Assembly (2 Used)
17.	01-10714	Line Cord Cover
18.	A-12359-3-BR	Side Molding, Brass (2 Used)
19.	11-1177	Wood Cabinet

*See Application Chart (p.2-30).

Item	Part Number	Description
20.	01-11408	Spacer (2 Used)
21.	02-4329	Pivot Nut, 1/2 (2 Used)
22.	02-4352	Pivot Bushing (2 Used)
23.	A-17175-1	Cable & Interlock Switch Assy.
24.	A-18524	Switch Button & Cable Assembly
	20-9663-9	Buy-In Button
25.	A-15267	Knocker Assembly

■ Miscellaneous Parts:

08-7028-1	Tempered Playfield Glass, Wide Body: 23.75" x 43"
01-10797	Playfield Support Bar, 18" Long
01-11791	Service Switch Actuator
01-12352	Clip Bracket
08-7377	Leg Leveler Adjuster, 3"
20-6500	Steel Ball, 1-1/16" (3)
A-17195	Tilt Switch Assy. w/Cable
01-9011-R	Backbox Mounting Brkt., Left
01-9011-L	Backbox Mounting Brkt., Right

A-12742-50038 WPC CPU Board Assembly

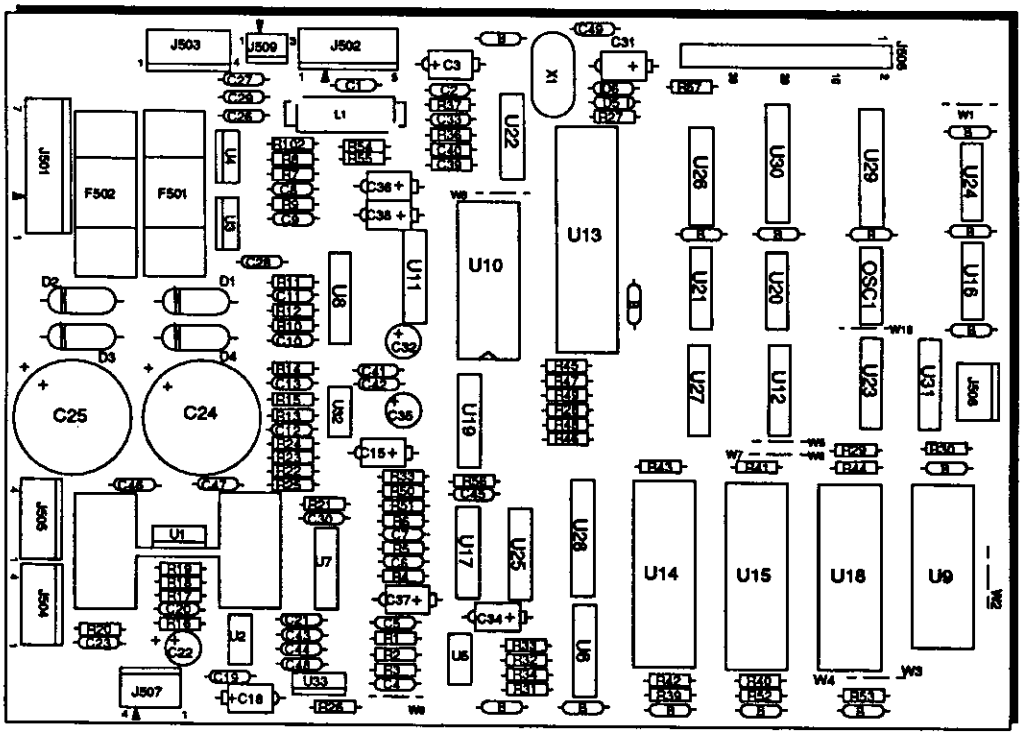
5010-09534-00	W1, W3, W4, W7	Resistor, 0Ω
5010-10258-00	R95, R99	Resistor, .01µfdΩ, 1/4w, 5%
5010-10989-00	R92	Resistor, 470KΩ, 1/4w, 5%
5010-12104-00	R91	Resistor, 22µfd, 1/4w, 5%
5019-09362-00	SIP 1	SIP, 9R, 10-pin, 4.7KΩ, 5%
5040-08986-00	C31	Capacitor, 100µfd, 10v (±20%)
5043-08980-00	B	Capacitor, .01µfd, 50v, (+80, -20%)
5043-09030-00	C27	Capacitor, 0.047µfd, 50v (±20%)
5043-09065-00	C3 - C26	Capacitor, 470pfd, 50v (±20%)
5043-09491-00	C2, C29, C30, C34	Capacitor, 22pfd, 1KV, (±10%)
5043-09492-00	C28	Capacitor, 100pfd, 50v, (±10%)
5043-09845-00	C32, C33	Capacitor, 1KP, 50v, (±20%)
5070-08919-00	D2 - D18	Diode, 1N4148, 150MA
5070-09266-00	D1, D25	Diode, 1N5817, 1.0A.
5160-10269-00	Q1	Transistor, 2N3904, NPN
5162-12422-00	U20	IC, ULN, 2803A
5281-09308-00	U3	IC, 74LS245, Octal Bus Tmcv
5281-09486-00	U14	IC, 74LS374, 8D F/F

Part Number	Designator	Description
5281-09851-00	U5	IC, 74LS14, SMT/TRG
5281-09867-00	U1, U2, U7	IC, Octal Buffer, 74LS244
5281-10182-00	U11, U12, U13, U15	IC, 74LS240 Driver
5284-12651-00	U21	IC, 4584
5340-13062-00	U8	IC/RAM 32K x 8
5370-12272-00	U18 - U19	IC, LM339, Quad. Comp
5370-12687-00	U10	MC, 34064 Reset Chip
5520-10438-00	X2	Crystal, 8.0MHz.
5520-12084-00	X1	Crystal 32.768 KHz
5551-09822-00	L1	ILN, 4.7 UH 3A
5671-13732-00	D19 - D21	DSPL LED RED
5700-08985-00	U4	Socket, IC 40P, .6"
5700-12088-00	U6	Socket, IC 32P, .6"
5700-12424-00	U9	Socket, 84 Pin PLCC
5791-10850-00	J201, J204	Connector, 26-pin Header Str Sq.
5791-10862-07	J210	Connector, 7-pin Header Str Sq.
5791-13830-08	J212	Connector, 8-pin Header Str Sq.
5791-13830-09	J206 - J209	Connector, 9-pin Header Sq. pin
5791-13830-12	J205	Connector, 12-pin Header Sq. pin
5791-12516-00	J202, J211	34 Hen 2x17 STR
A-15814	B1 - B3	Battery Holder "AA"
5048-11033-00	C50	Capacitor, 0.022µf, 10v
A-5343-50038-1	U6	Game PROM Assembly
5410-12426-00	U9	WPC-89 ASIC
5400-10320-00	U4	IC MPU 68B09E
5880-09022-00	B1 - B3	Battery, Alkaline, 1.5v ("AA")
5645-09025-00	W11 - W18	Switch Dip 8 Pos

A-12738-50038 WPC Audio Board Assembly



PPart Number	Designator	Description
01-9980		Shield: Wire Protector
4004-01005-06	U1	Mach. Screw, 4-40 x 3/8

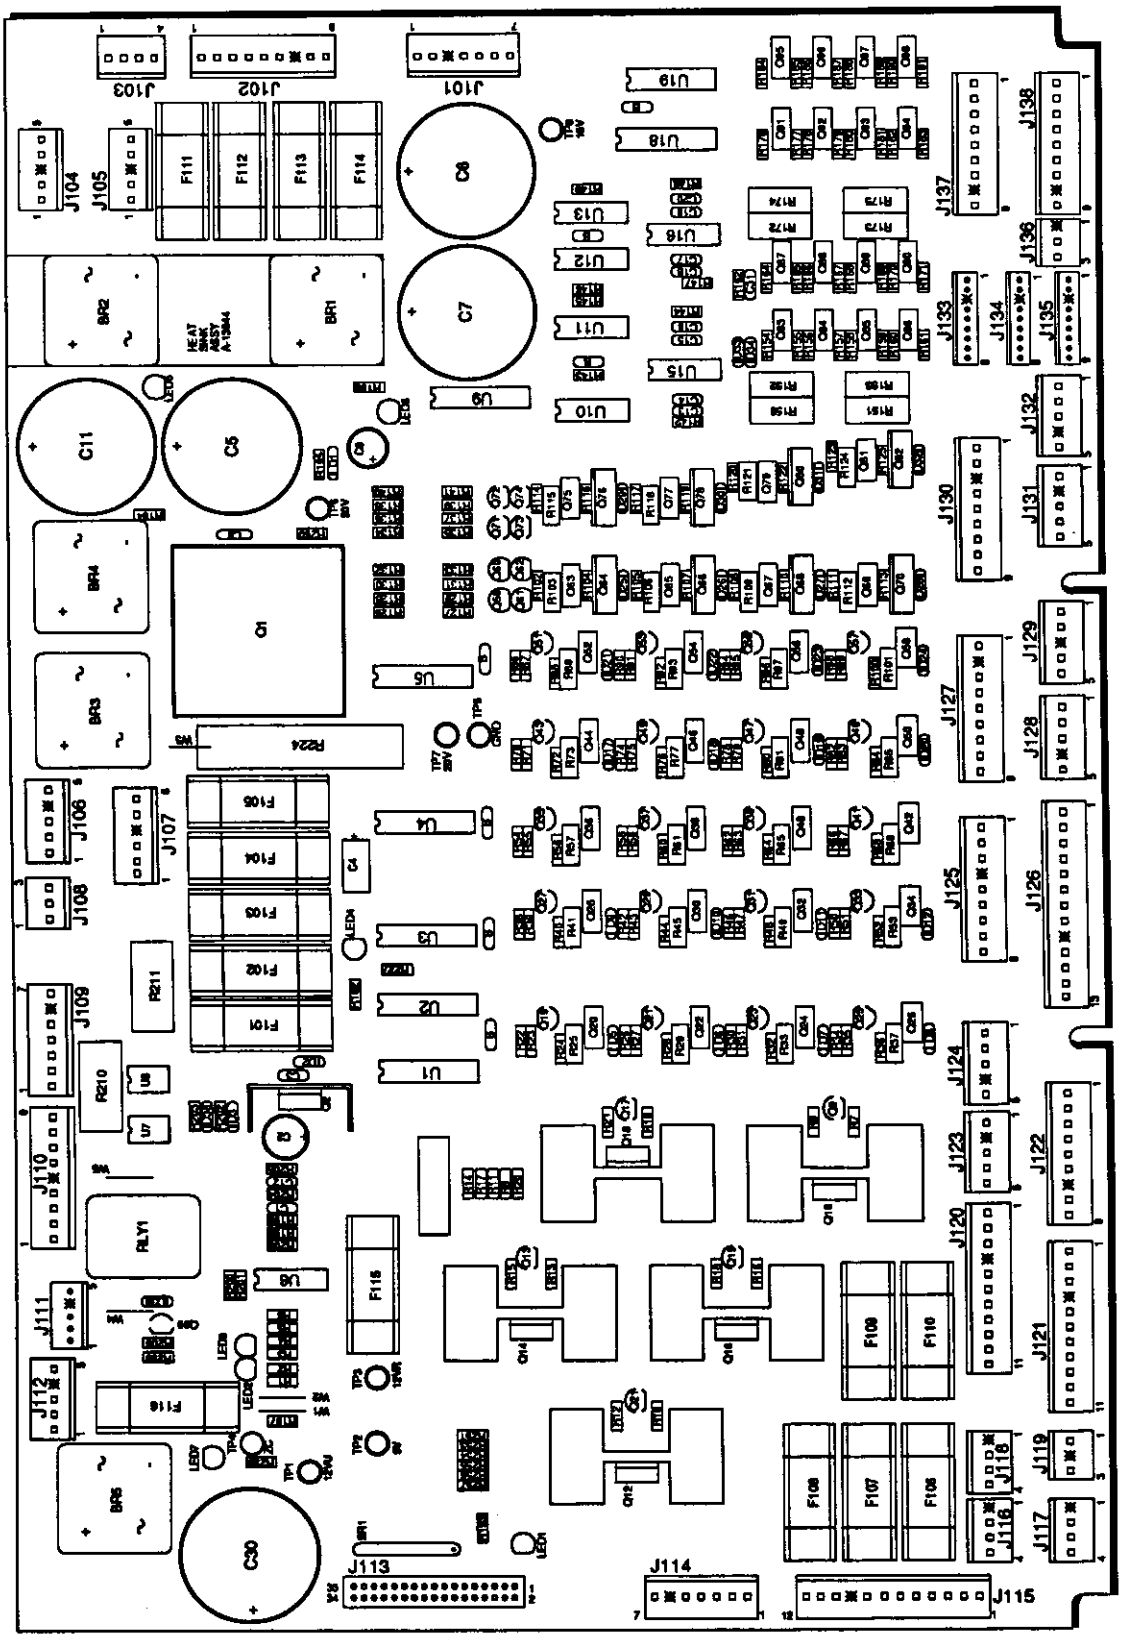
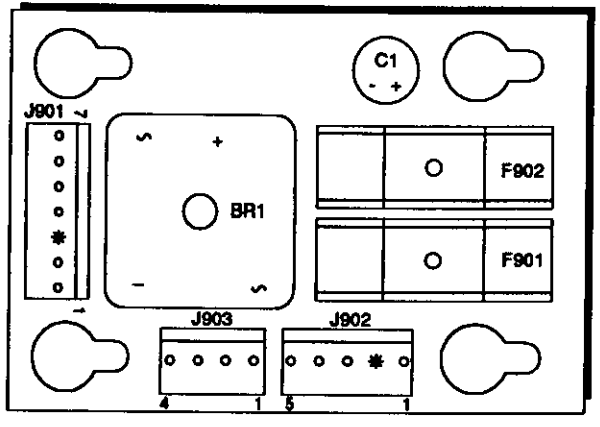
5730-09797-00	F115	Fuse, S-B, 3/4A., 250v
5705-12698-00		Heatsink #62365
4010-01006-00		Mach. Screw, 10-32 x 5/8

A-12697-3 WPC Power Driver Assembly

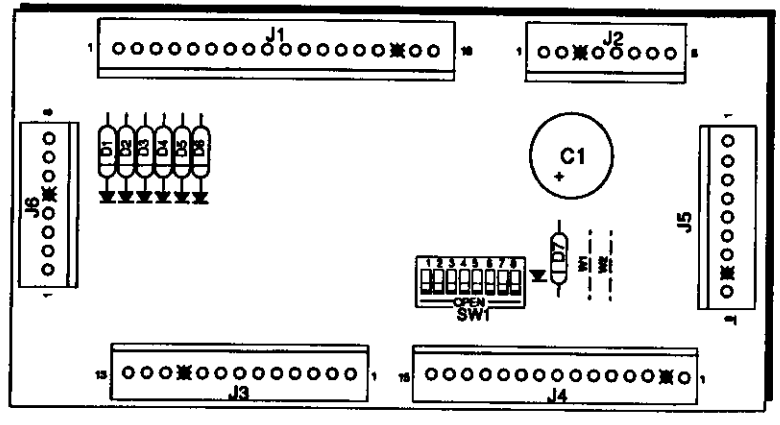


A-15416
Extra Flipper Supply Board



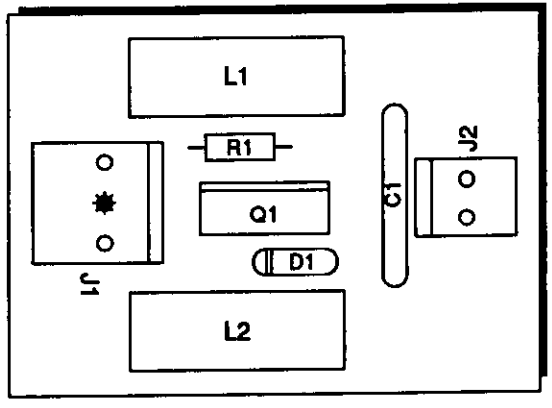
Part Number	Designator	Description
5791-10862-05	J902	Connector, 5-pin Header
5791-10862-04	J903	Connector, 4-pin Header
5791-10862-07	J901	Connector, 7-pin Header
5100-09690-00	BR1	Bridge Rectifier
5733-12060-01	-	Fuse Holder (F901, F902)
5731-10356-00	F901, F902	Fuse, S-B, 3A., 250v

A-14689-1
WPC Coin Door Interface Board



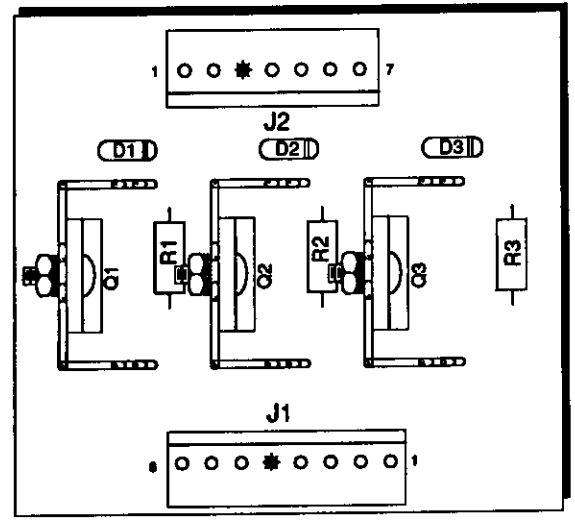
Part Number	Designator	Description
5070-09054-00	D1-D7	Diode, 1N4004, 1.0A.
5791-10862-18	J1	Connector, 18-pin Header Str Sq.
5791-10862-08	J2, J6	Connector, 8-pin Header Str Sq.
5791-10862-13	J3	Connector, 13-pin Header Str Sq.
5791-10862-15	J4	Connector, 15-pin Header Str Sq.
5010-09534-00	W2	Resistor, 0Ω (Jumper)
5645-09025-00	SW1	Switch DIP 8-Position

A-15340
Motor EMI Board



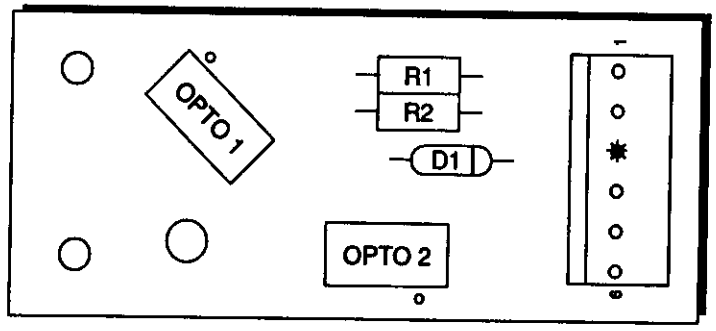
Part Number	Designator	Description
5551-09822-00	L1, L2	Ind. 4.7MH3AMP
5791-12273-03	J1	Connector, 3-pin Header Sq.
5791-12273-02	J2	Connector, 2-pin Header Sq.
5010-08998-00	R1	Resistor, 2.2KΩ, 1/4w, 5%
5070-09054-00	D1	Diode 1N4004, 1.0A.
5162-12635-00	Q1	Transistor TIP 102

A-15139
High Power Board



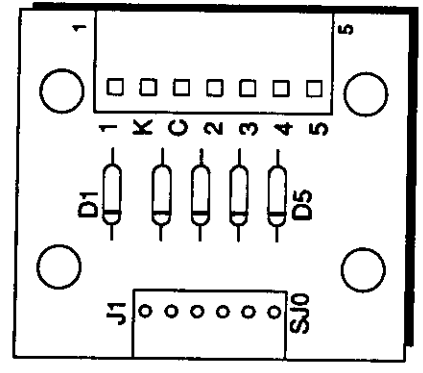
Part Number	Designator	Description
5705-09199-00	-	Heatsink 6030B
5791-10862-08	J1	Connector, 8-pin Header
5791-10862-07	J2	Connector, 7-pin Header
5010-09361-00	R1-R3	Resistor, 220Ω, 1/2w, 5%
5070-09054-00	D1-D3	Diode 1N4004 1.0A.
4006-01003-06	-	Mach. Screw, #6-32 x 3/8 P-PH
4406-01128-00	-	Nut 6-32 KEPS
5191-12179-00	Q1-Q3	Trans. TIP 36C PNP

A-15285
2-Opto Switch Assembly



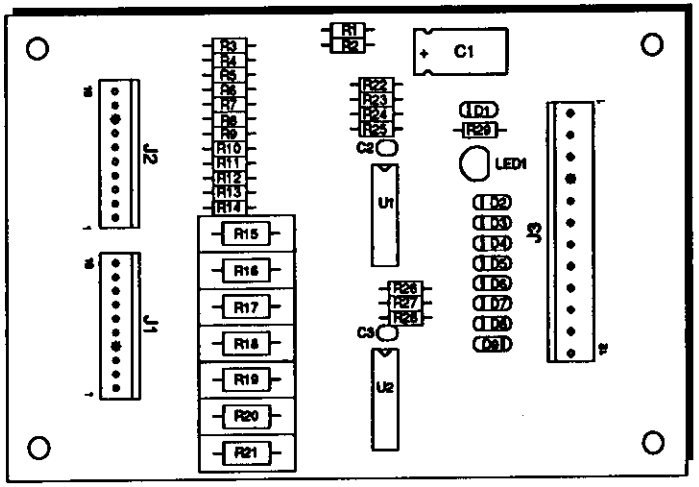
Part Number	Designator	Description
5070-09054-00	D1	Diode 1N4004 1.0A.
5010-08930-00	R1, R2	Resistor, 470Ω, 1/2w, 5%
5490-12451-00	OPTO1, OPTO2	Opto Inter Lg 10MA
5791-10862-06		Connector, 6-pin Header

C-13940
5-Switch & Diode Board



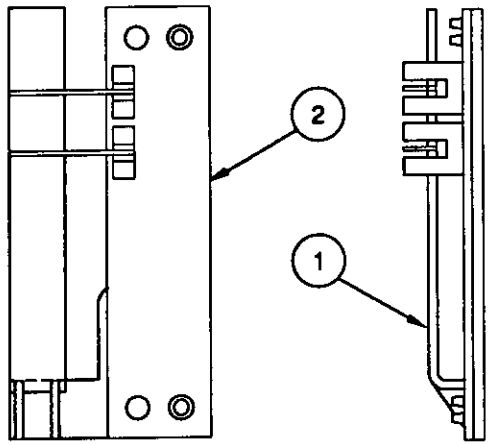
Part Number	Designator	Description
5070-09054-00	D1 - D5	Diode 1N4004, 1.0A.
5791-10862-07	J2	Connector, 7-pin Header Sq.
5791-12462-06	J1	Connector, 6-pin Header Sq.

A-15576
7-Switch Opto PCB Assembly



Part Number	Designator	Description
5040-12298-00	C1	Cap., 100µfd, 40v (±50%)
5043-08980-00	C2, C3	Capacitor, .01 M 50v
5671-09019-00	LED 1	Display LED Red
5370-12272-00	U1, U2	IC LM339 Quad.
5070-09054-00	D1 - D9	Diode 1N4004 1.0A.
5010-12928-00	R15 - R21	Resistor, 270KΩ, 2w, 5%
5010-09999-00	R1 - R14	Resistor, 2KΩ, 2w, 5%
5010-10631-00	R29	Resistor, 1.2KΩ, 2w, 5%
5010-09162-00	R23, R25, R26	Resistor, 100KΩ, 2w, 5%
5010-08774-00	R22, R24	Resistor, 22KΩ, 1/4w, 5%
5010-09034-00	R28	Resistor, 10KΩ, 1/4w, 5%
5791-10862-12	J3	Connector, 12-pin Header Str Sq.
5791-12462-10	J1, J2	Connector, 10-pin Header Str Sq.

A-17316
Flipper Opto PCB Assembly



Item	Part Number	Description
1.	03-9001	Interrupter Flip-Opto
2.	A-16384	Flipper Opto Switch Assembly
	5010-08930-00	Resistor, 470Ω, 1/2w, 5%
	5490-12451-00	Opto Inter Lg. 10mA.
	5791-12462-07	Connector, 7-pin Header

A-15849-R-6 Flipper Assembly - Lower Right
A-15849-L-6 Flipper Assembly - Lower Left

Item	Part Number	Description
1.	B-13104-R	Flipper Base Assy., Right
	B-13104-L	***Flipper Base Assy., Left***
2.	SW-1A-194	Switch Assembly
3.	4701-00002-00	Lockwasher, #6 Split
4.	4105-01019-10	Sh. Metal Screw, #5 x 5/8 P-RH-A
5.	4008-01079-05	Mach. Screw, 8-32 x 5/16 H-SOC
6.	4701-00003-00	Lockwasher, #8 Split
7.	01-9375	Switch Mounting Bracket
8.	20-6516	Speednut, Tinnerman
9.	4010-01066-06	Cap Screw, 10-32 x 3/8, SH
10.	4701-00004-00	Lockwasher, #10 Split
11.	A-12390	Flipper Stop Assembly
12.	FL-15411	Flipper Coil (Orange)
a)	03-7066-5	Coil Tubing
13.	01-7695	Solenoid Bracket
14.	4006-01017-04	Mach. Screw, 6-32 x 1/4 P-RH-S
15.	10-364	Spring
16.	A-15848-R	Crank Link Assembly, Right
	A-15848-L	***Crank Link Assembly, Left***
a)	A-17050-R	Flipper Crank Assembly, Right
	A-17050-L	***Flipper Crank Assembly, Left***
b)	A-15847	Flipper Link Assembly
c)	02-4676	Link Spacer Bushing
d)	4010-01086-14	Cap Screw, 10-32 x 7/8 SH
e)	4700-00023-00	Flatwasher, 5/8 x 13/64 x 16ga.
f)	4701-00004-00	Lockwasher #10 Split
g)	4410-01132-00	Nut, 10-32 ESN
17.	23-6577	Bumper Plug, 5/8"
18.	03-7568	Flipper Bushing
19.	4006-01005-06	Mach. Screw, 6-32 x 3/8 P-PH
20.	4406-01117-00	Nut, 6-32 Hex

■ **Associated Parts for Left & Right Flippers:**

21.	23-6519-4	Flipper Rubber Ring, Red (3 used)
22.	20-9250-6	Flipper & Shaft, Yellow (3 used)

A-15849-R
Flipper Assembly - Upper Right
(Parts listed replace same items of **A-15849-R-6**)

Item	Part Number	Description
12.	FL-17630	Flipper Coil (Red)

A-15849-L-1
Flipper Assembly - Upper Left
(Parts listed replace same items of **A-15849-L-6**)

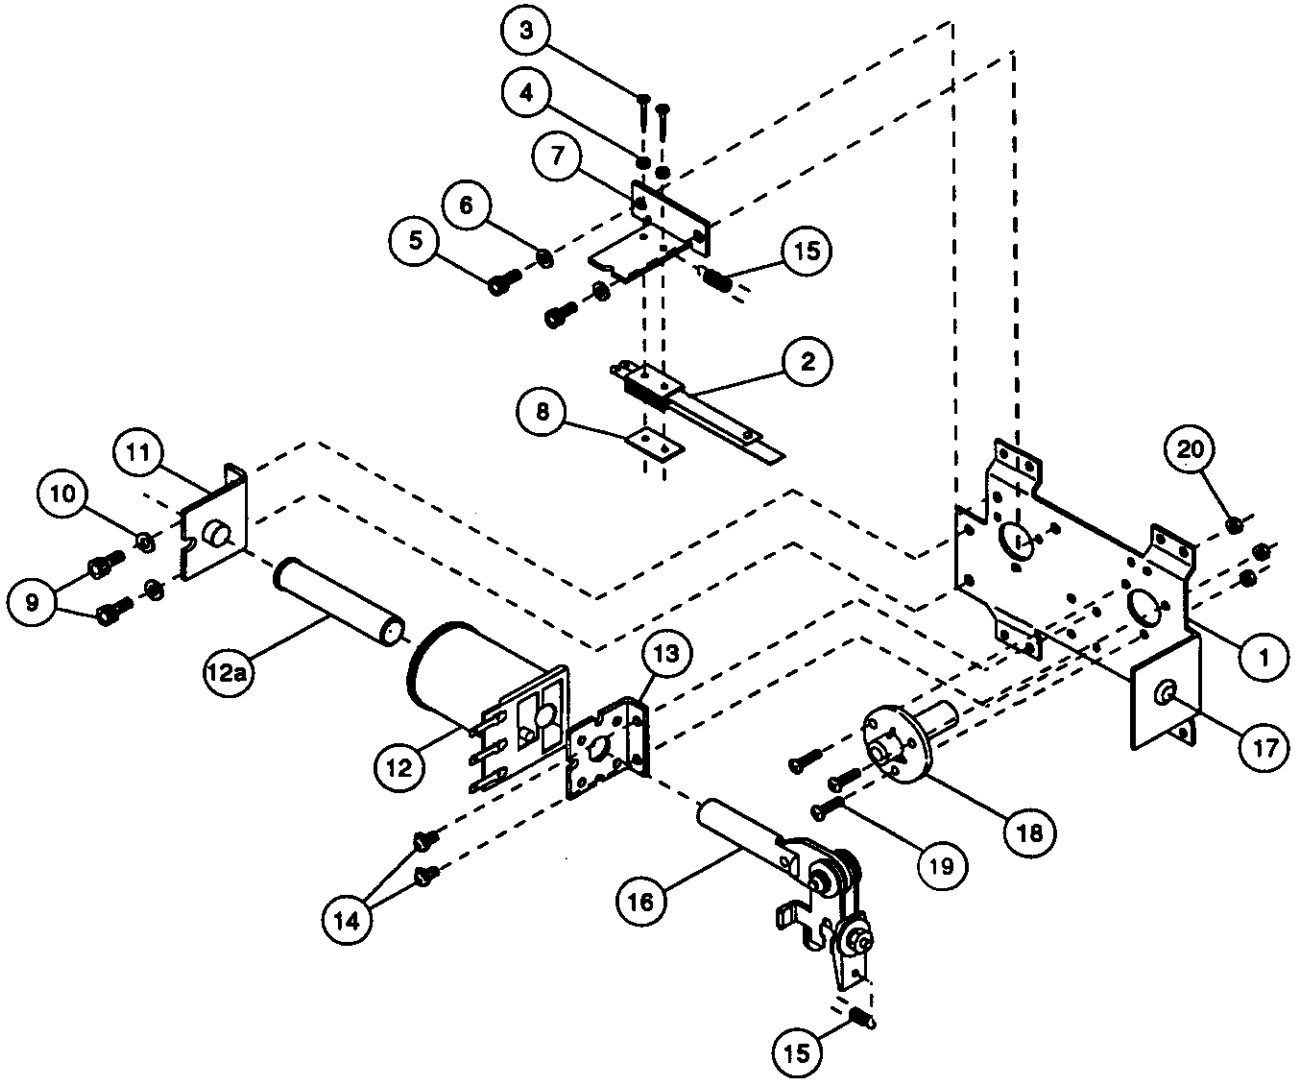
Item	Part Number	Description
12.	FL-11753	Flipper Coil (Yellow)

■ **Associated Parts:**

21.	23-6553-4	Small Flipper Rubber Ring, Red
22.	20-9264-6	Small Flipper & Shaft

Flipper Assembly

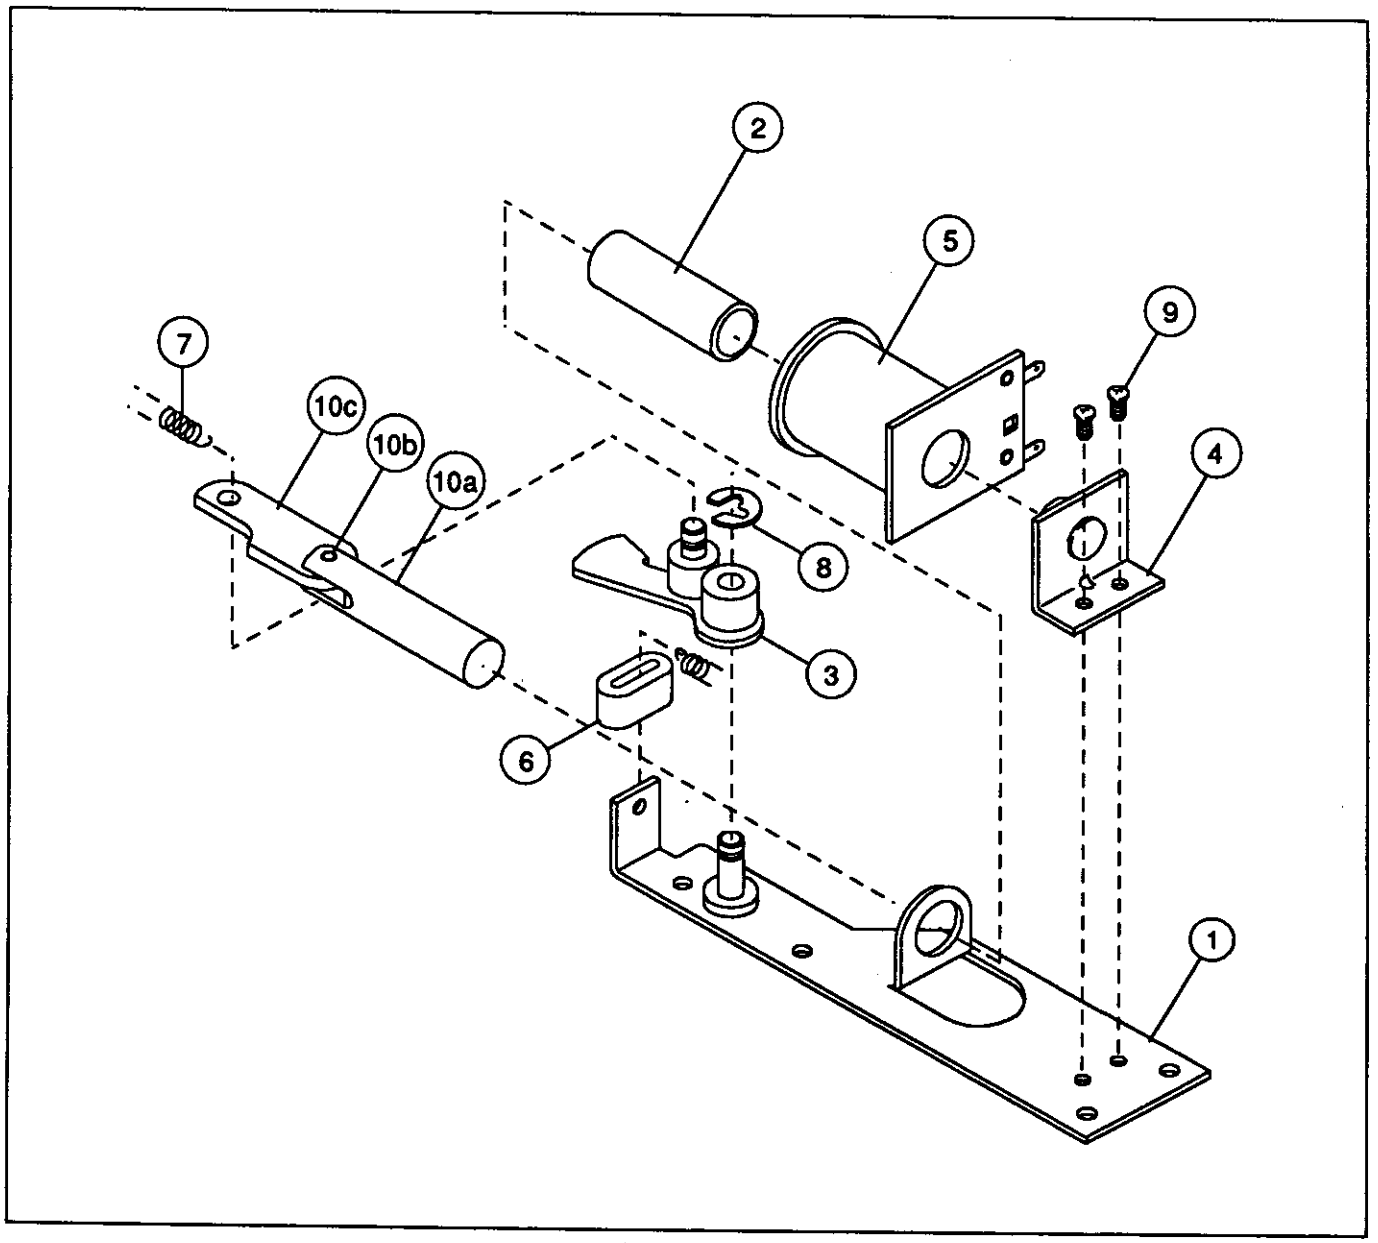
A-15849-L-6 Lower Left Flipper



■ **Flipper Notes:**

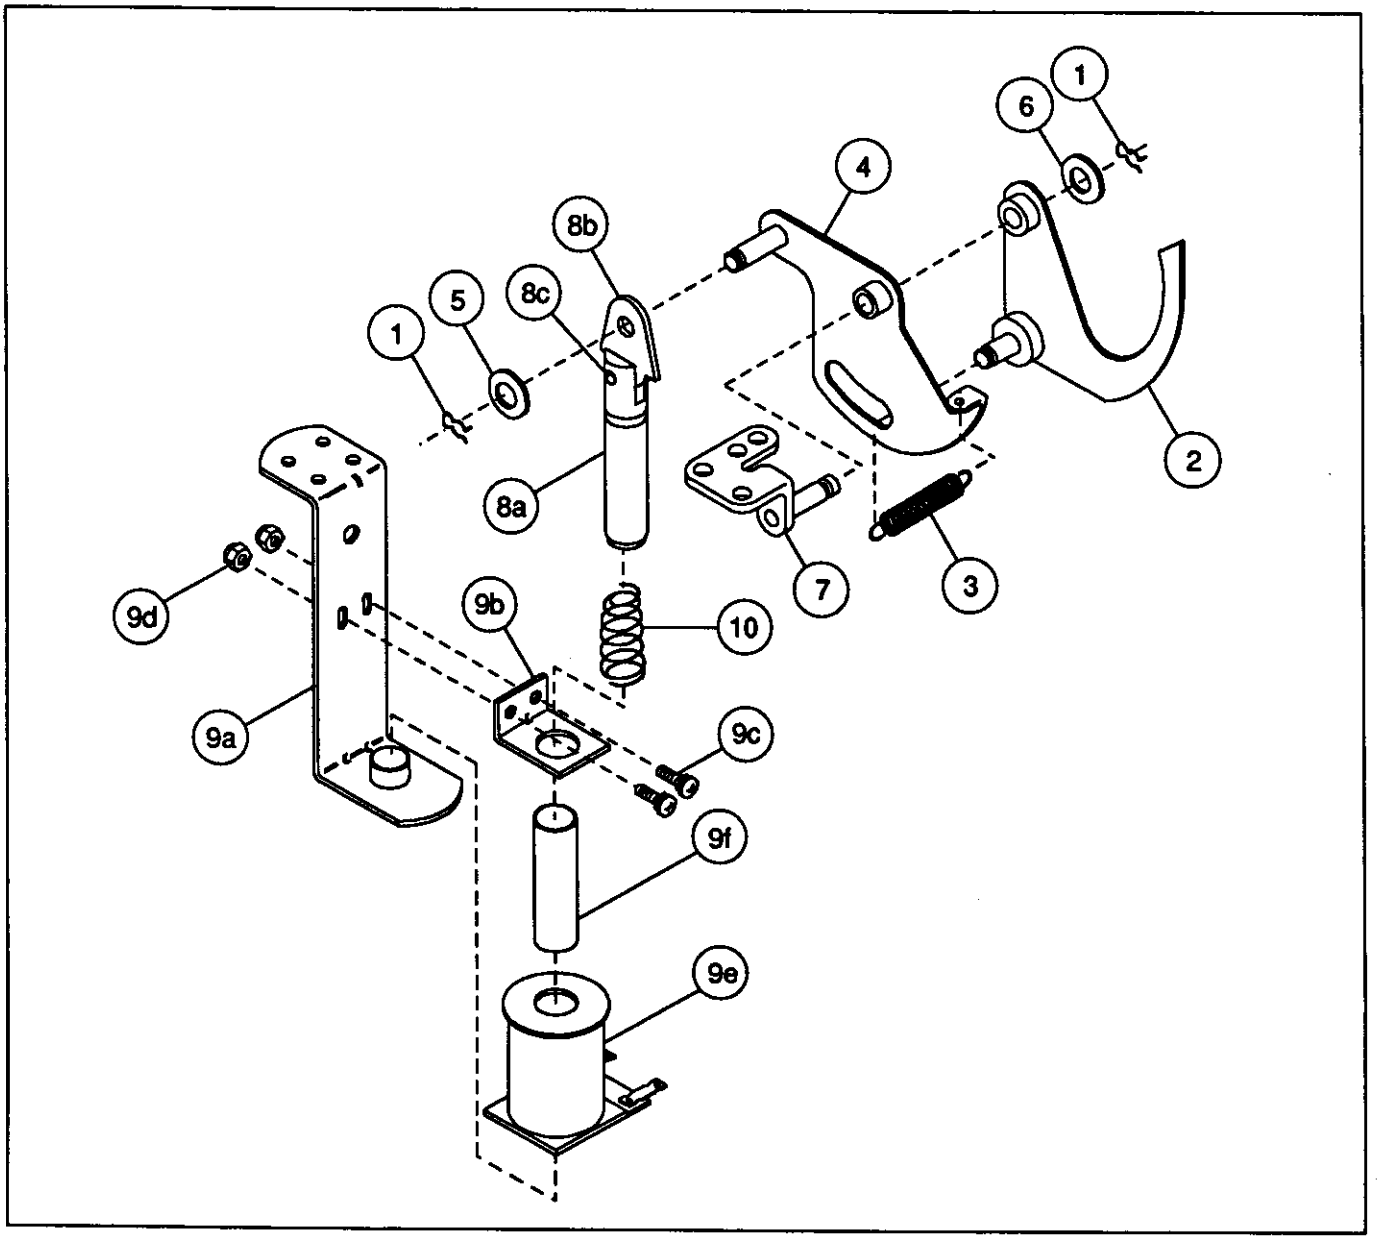
1. Each Flipper Assembly is mounted beneath the playfield, in conjuction with the Plastic Flipper & Shaft, and Flipper Rubber on the upper side of the playfield.
2. With the flipper, in the non-activated position, the E.O.S. Switch contacts must have a gap of .062 (±.015) inch. When flipper is activated switch must close.
3. Any adjustment of the E.O.S. Switch must be made at a minimum distance of 0.25 inch from the switch body.
4. Longer blade of E.O.S. Switch must be straight. Gap adjustment is done by adjusting shorter blade.
5. All moving elements of the assembly must operate freely without any evidence of binding.
6. Apply Loctite™ 245 when reatacching screws to the Flipper Stop Assembly, the Solenoid Bracket, and the Flipper Bushing.

A-8039-3 Outhole Kicker Assembly



Item	Part Number	Description
1.	A-6378	Mounting Plate Assembly
2.	03-7066	Coil Tubing
3.	A-6889	Kicker Lever Assembly
4.	A-8038	Coil Stop Assembly
5.	AE-27-1200	Coil Assembly
6.	03-7176-1	Striker Ring
7.	10-101-4	Spring-Reset
8.	20-8712-25	"E" Ring, 1/4" Shaft
9.	4006-01003-03	Mach. Screw, 6-32 x 3/16"
10.	A-8335	Coil Plunger Assembly
a)	02-2364	Coil Plunger
b)	20-8716-5	Roll Pin, 1/8 x 7/16"
c)	01-4251	Ball Return Link

C-9638 Ball Shooter Lane Feeder Assembly

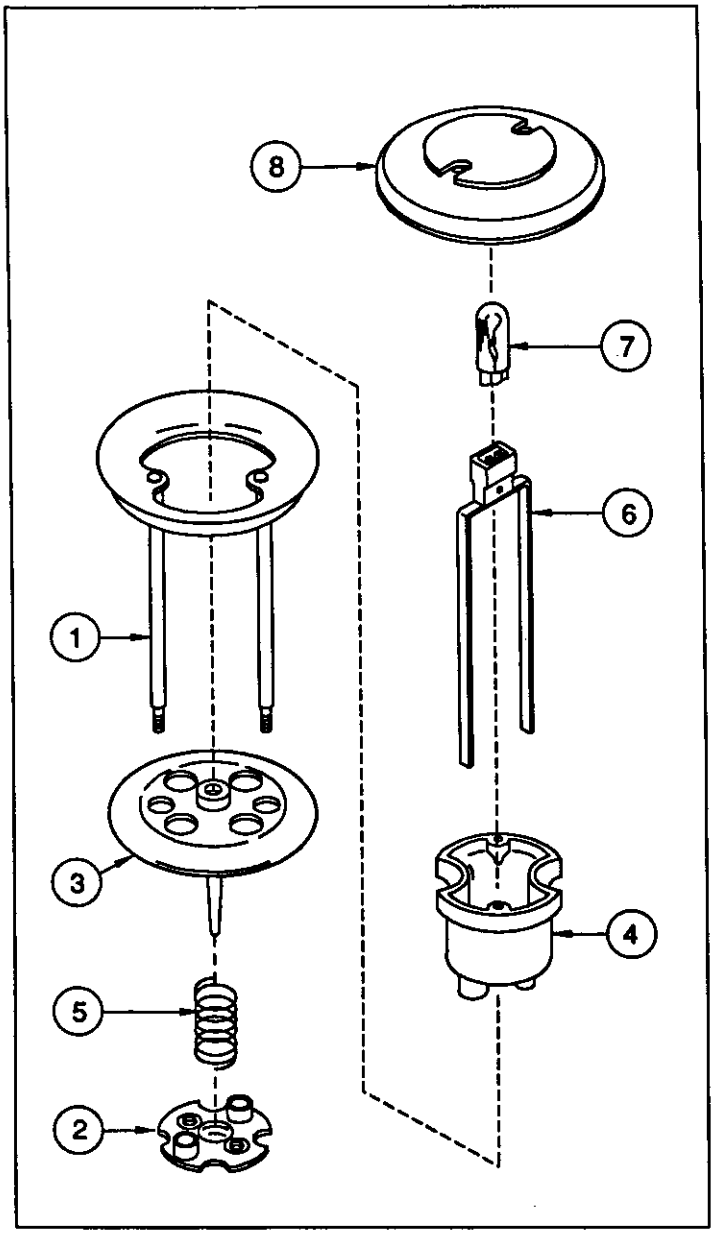


Item	Part Number	Description
1.	12-6227	Hairpin Clip
2.	A-8247	Eject Cam Assembly
3.	10-362	Ejector Spring (Plain)
4.	A-6949-L	Spring Plate Assembly
5.	4700-00030-00	Flatwasher, 17/64 x1/2 x 15ga.
6.	4700-00103-00	Flatwasher, 17/64 x1/2 x 28ga.
7.	A-8268	Mounting Bracket Assembly
8.	A-8050-1	Coil Plunger Assembly
a)	02-3407-2	Coil Plunger Assy, 2-1/8"
b)	03-8085	Armature Link
c)	20-8716-5	Roll Pin, 1/8 x 7/16"

■ **Associated Parts:**

Item	Part Number	Description
9.	B-9362-L-2	Coil & Bracket Assembly
a)	B-7572-1	Bracket & Stop Assembly
b)	01-8-508-S	Coil Retaining Bracket
c)	4006-01017-06	Mach. Screw, 6-32 x 3/8
d)	4406-01119-00	Nut, 6-32 ESN
e)	AE-26-1200	Coil Assembly
f)	03-7066	Coil Tubing
10.	10-128	Spring

B-9414-3
Jet Bumper Assembly

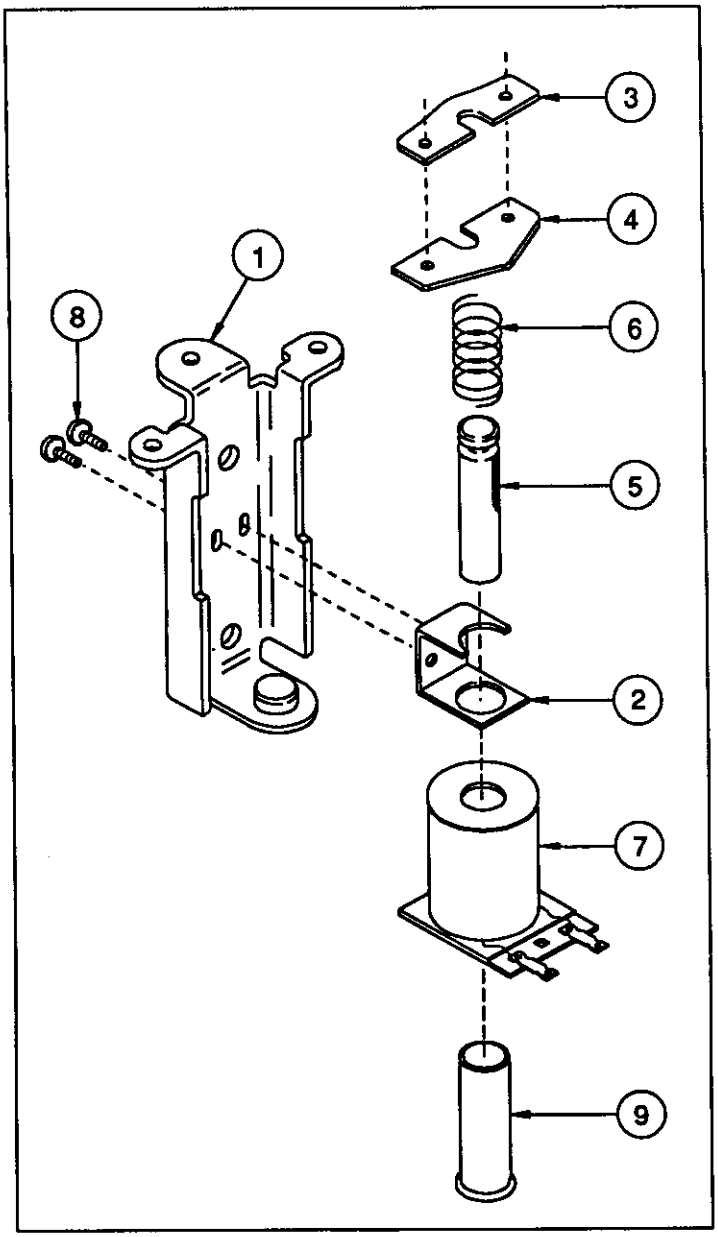


Item	Part Number	Description
1.	A-4754	Bumper Ring Assembly
2.	03-6009-A5	Bumper Base, White
3.	03-6035-4	Bumper Wafer, Red
4.	03-7443-5	Bumper Body, White
5.	10-7	Spring
6.	24-8776	Socket - Wedge Base
7.	24-8768	Bulb #555 (6.3V., 0.25A.)

■ **Associated Parts:**

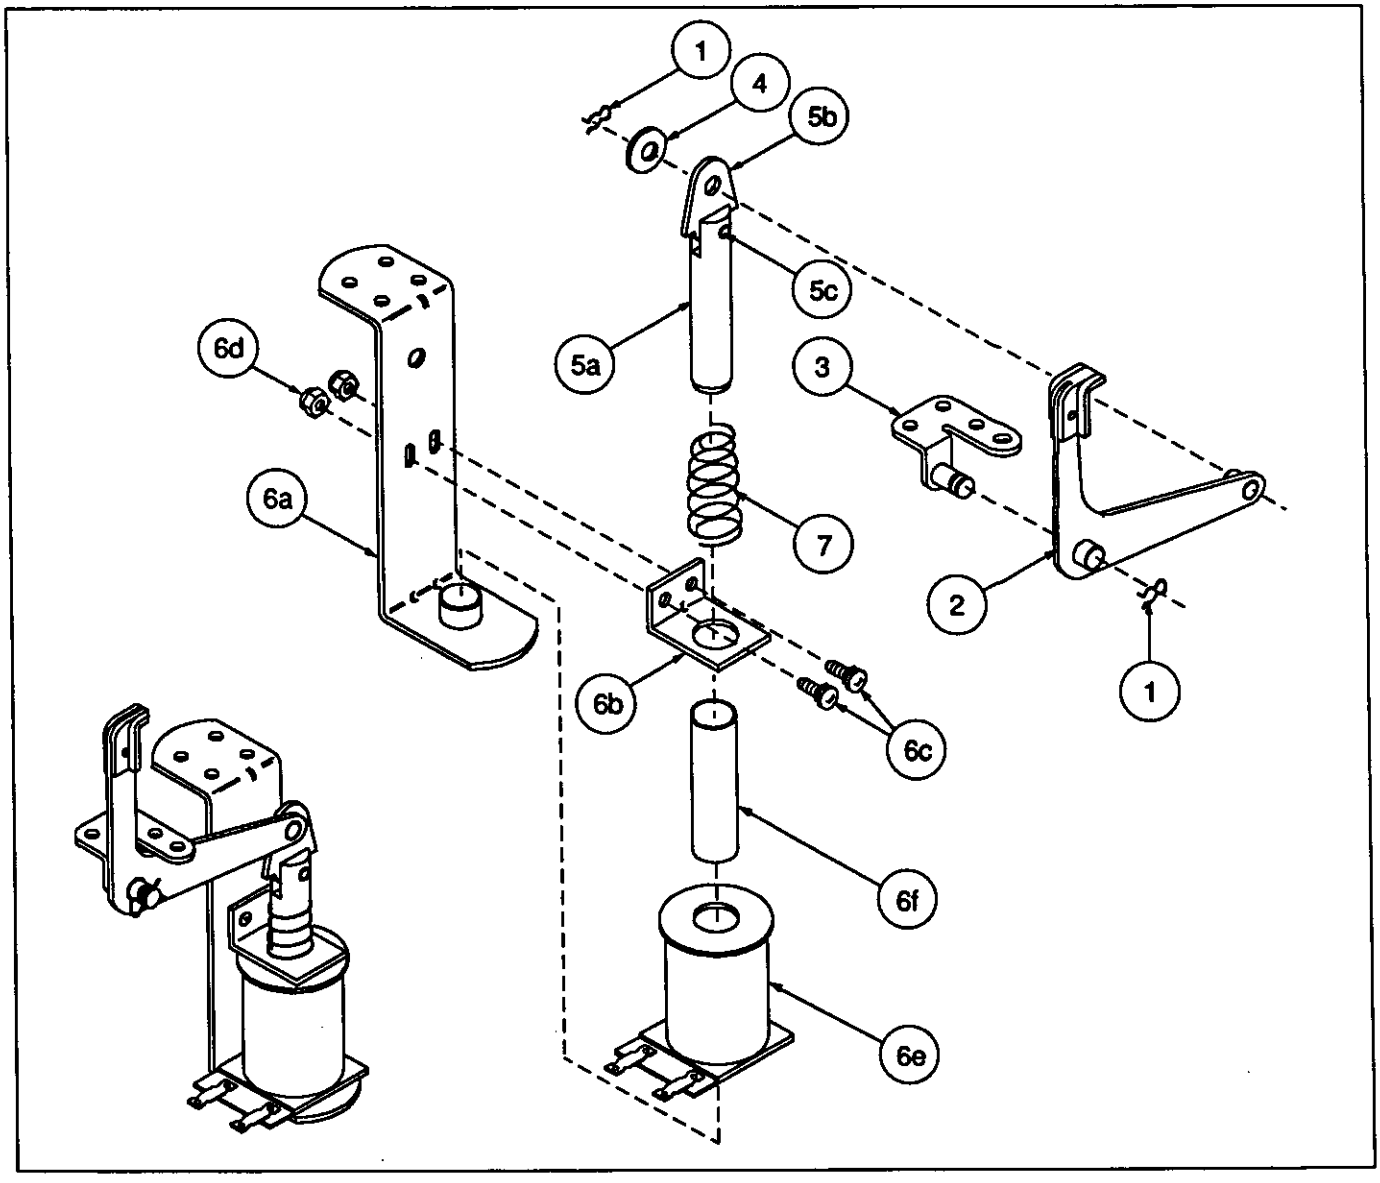
8.	03-8254-8	Jet Bumper Cap, Amber
	03-8254-9	Jet Bumper Cap, Red
	03-8254-16	Jet Bumper Cap, Yellow
	03-8254-28	Jet Bumper Cap, Op. Gold
	03-8651-13	Jet Bumper Cap, Tr. Clear

A-9415-2
Jet Bumper Coil Assembly



Item	Part Number	Description
1.	B-7417	Bracket & Stop Assembly
2.	01-1747	Coil Retaining Bracket
3.	01-5492	Armature Link, Steel
4.	01-5493	Armature Link, Bakelite
5.	02-3406-1	Coil Plunger
6.	10-326	Armature Spring
7.	AE-26-1200	Coil Assembly
8.	4006-01017-04	Mach. Screw, 6-32 x 1/4"
9.	03-7066	Coil Tubing

B-12665 Kicker Arm (Slingshot) Assembly

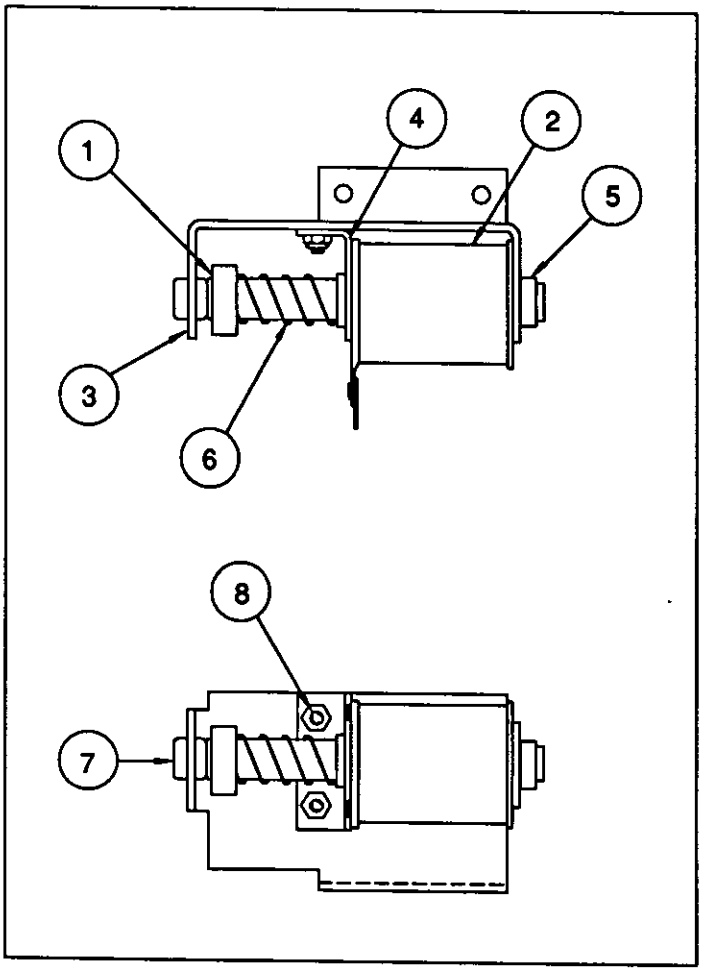


Associated Parts for **Right & Left Kickers:**

Item	Part Number	Description
1.	12-6227	Hairpin Clip
2.	A-12664	Kicker Crank Assembly
3.	A-5653	Mounting Bracket Assembly
4.	4700-00030-00	Flatwasher, 17/64 x 1/2 x 15ga.
5.	A-5103	Coil Plunger Assembly
a)	02-2364	Coil Plunger
b)	03-8085	Armature Link
c)	20-8716-5	Roll Pin, 1/8 x 7/16"

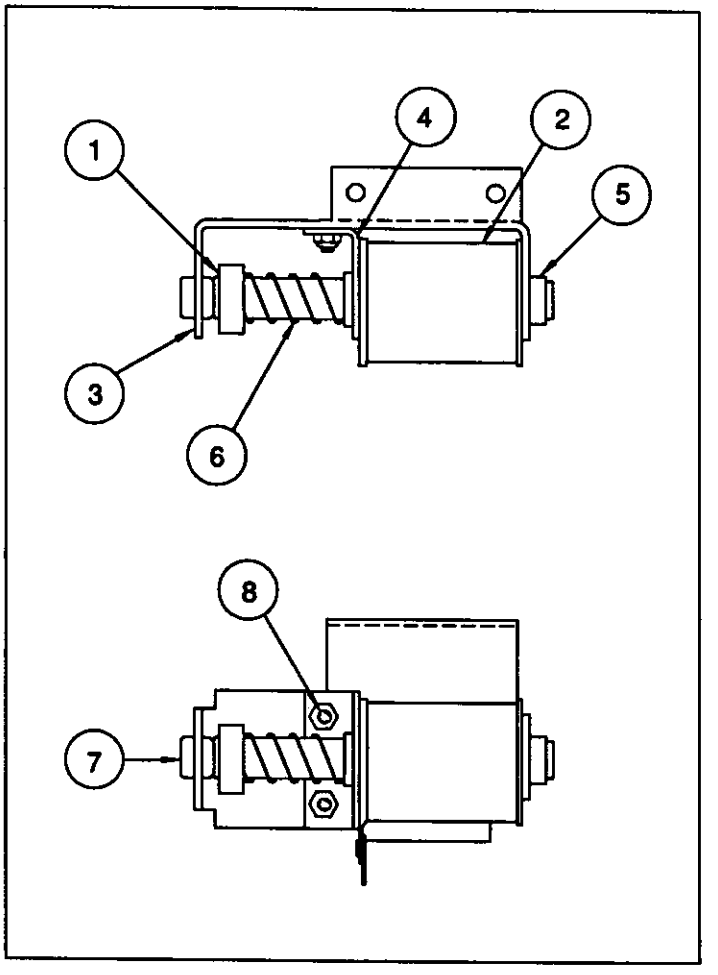
Item	Part Number	Description
6.	**A-14369-L**	**Coil & Bracket Assy., Left**
a)	B-7572-1	Bracket & Stop Assembly
b)	01-8-508-S	Coil Retaining Bracket
c)	4006-01017-06	Mach. Screw, 6-32 x 3/8
d)	4406-01119-00	Nut, 6-32 ESN
e)	AE-27-1200	Coil Assembly
f)	03-7066	Coil Tubing
7.	10-128	Spring

A-14107
Kicker Assembly



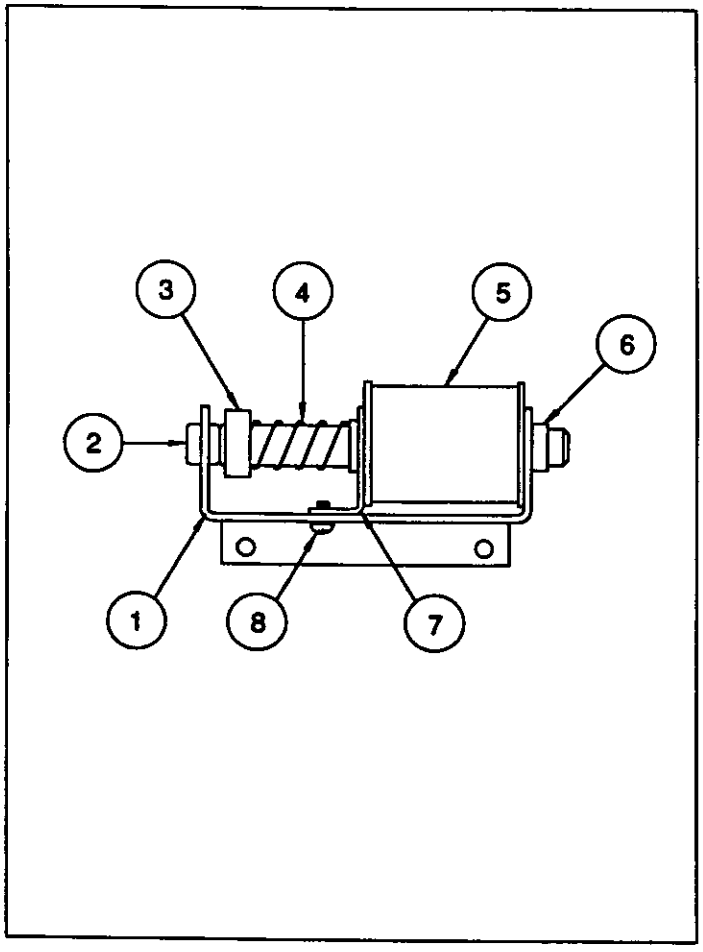
Item	Part Number	Description
1.	A-17767	Bell Armature Assembly
2.	AE-26-1200	Coil Assembly
3.	A-14106	Mtg. Bracket Assembly
4.	01-9423	Coil Bracket
5.	03-7067	Coil Tubing
6.	10-135	Solenoid Spring
7.	23-6420	Rubber Grommet
8.	4408-01119-00	Nut 8-32 ESN

A-15115
Kicker Assembly



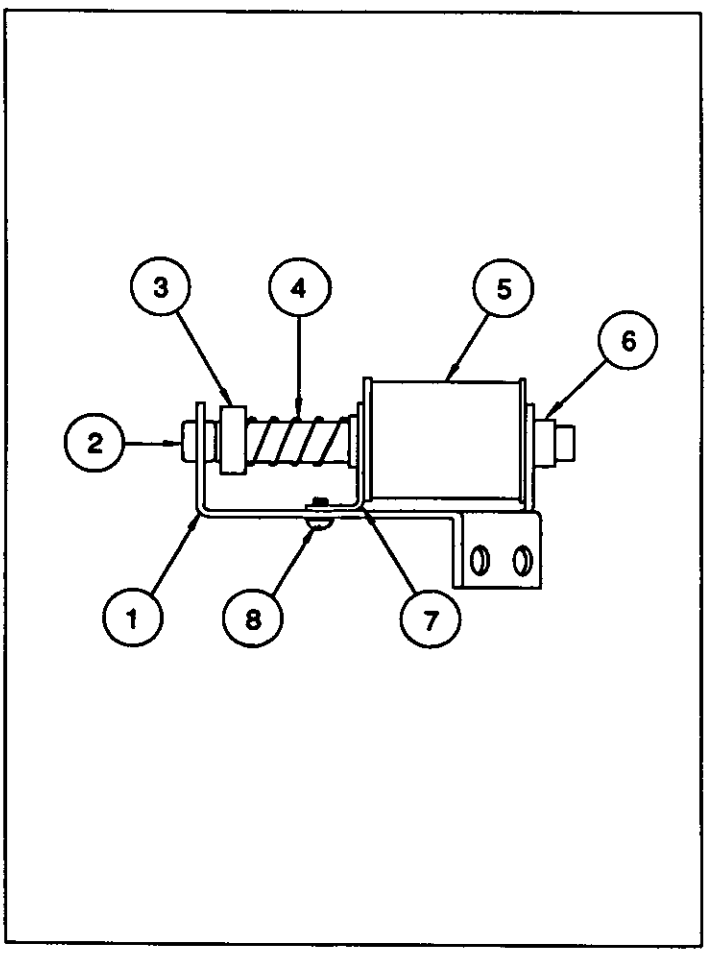
Item	Part Number	Description
1.	A-17767	Bell Armature Assembly
2.	AE-26-1200	Coil Assembly
3.	A-15116	Mtg. Bracket Assembly
4.	01-9423	Coil Bracket
5.	03-7067	Coil Tubing
6.	10-135	Solenoid Spring
7.	23-6420	Rubber Grommet
8.	4408-01119-00	Nut 8-32 ESN

A-15367
Knockoff Assembly



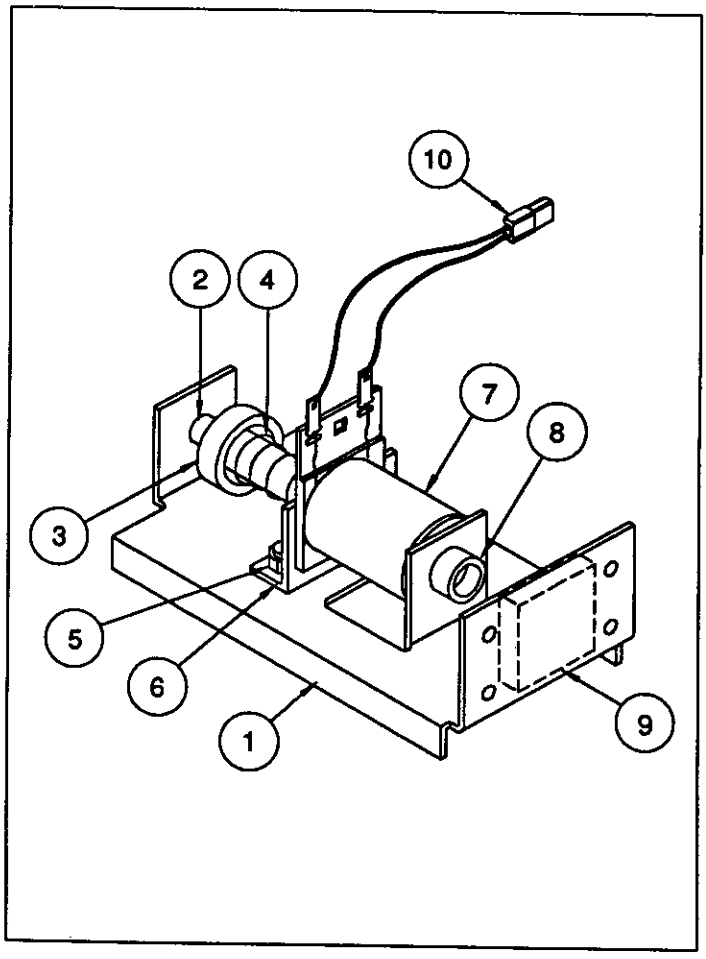
Item	Part Number	Description
1.	01-10651	Bracket Assembly
2.	23-6420	Rubber Grommet
3.	A-15370	Plunger Assembly
4.	10-135	Solenoid Spring
5.	AE-30-2000	Coil Assembly
6.	03-7067-5	Coil Tubing
7.	01-8-508-T	Solenoid Bracket
8.	4008-01017-04	Mach. Screw, #8-32 x 1/4"

A-15368
Eject Assembly



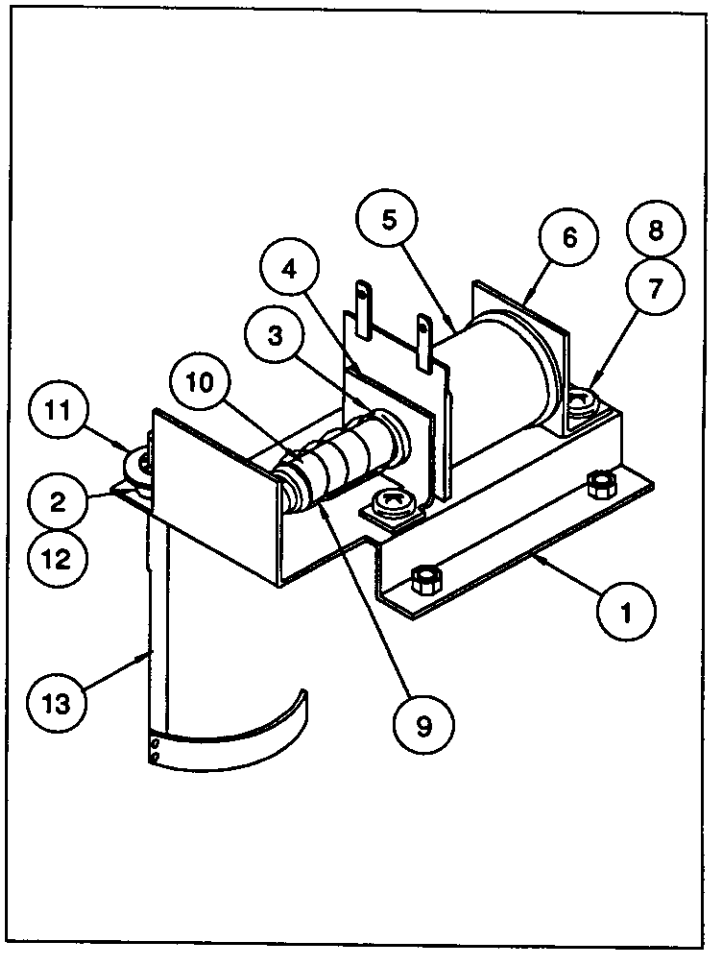
Item	Part Number	Description
1.	01-10652	Bracket Assembly
2.	23-6420	Rubber Grommet
3.	A-15371	Plunger Assembly
4.	10-135	Solenoid Spring
5.	AE-27-1200	Coil Assembly
6.	03-7067-5	Coil Tubing
7.	01-8-508-T	Solenoid Bracket
8.	4008-01017-04	Mach. Screw, #8-32 x 1/4"

A-15267
Knocker Assembly



Item	Part Number	Description
1.	A-15266	Knocker Bracket Assy.
2.	23-6420	Rubber Grommet
3.	A-17767	Bell Armature Assembly
4.	10-135	Solenoid Spring
5.	4408-01119-00	Nut 8-32 ESN
6.	01-9423	Coil Bracket
7.	AE-23-800	Coil Assembly
8.	03-7067	Coil Tubing
9.	23-6629	Bumper Pad
10.	H-11835	Cable

A-15040
Diverter Assembly

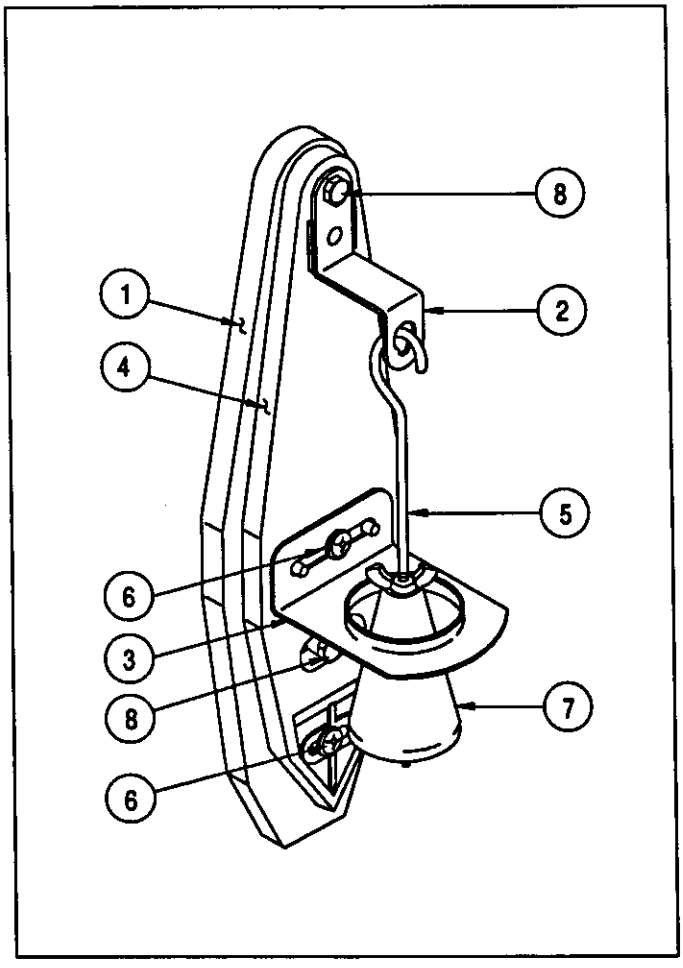


Item	Part Number	Description
1.	A-15041	Mounting Bracket
2.	20-8790	Nylined Bearing
3.	03-7066	Coil Tubing
4.	01-8413	Coil Mounting Bracket
5.	AE-26-1500	Coil Assembly
6.	A-10821	Flipper Stop Bracket Assy.
7.	4010-01008-06	Mach. Screw, 10-32 x 3/8
8.	4701-00004-00	Lockwasher #10 Split
9.	10-437	Spring Kicker
10.	A-13278	Plunger Assembly
11.	A-14185	Drive Arm Assembly
12.	4010-01082-04	Set Screw, 10-32 x 1/4" SH-CP

■ **Associated Part:**

13.	A-15039	Diverter Assembly

A-15361
Tilt Mechanism Assembly

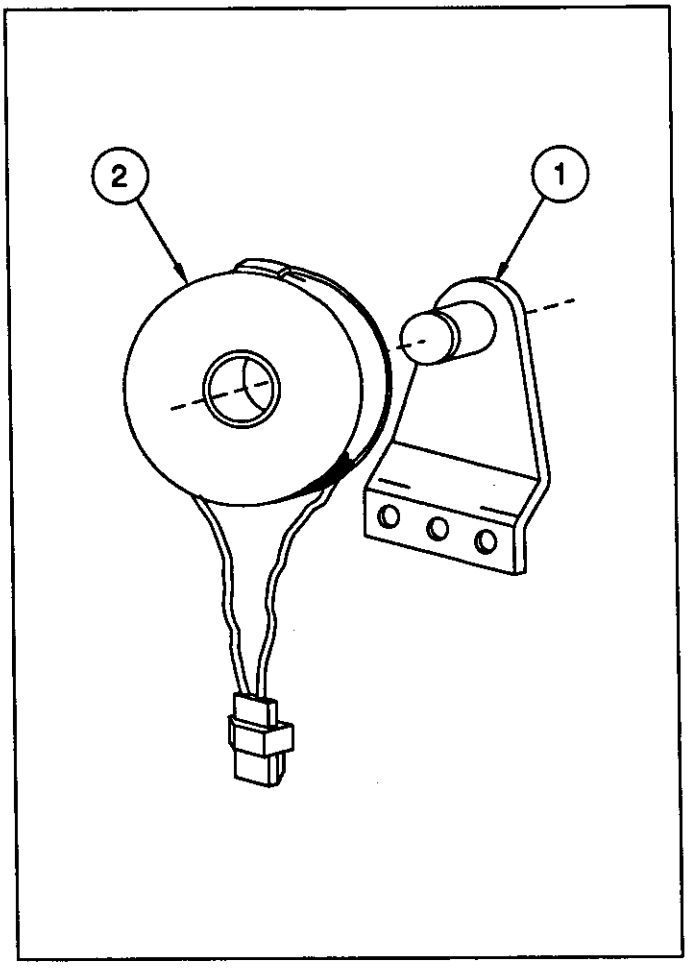


Item	Part Number	Description
1.	A-15360	Mount Plate, Tilt Mech.
2.	01-3444	Bracket, Tilt Upper
3.	01-3445	Bracket, Tilt Lower
4.	03-8668	Pendulum, Tilt Mech.
5.	12-6231	Wire, Plum Bob
6.	4006-01113-06	MS, 6-32 x 3/8 PL-HEX-WHD

■ **Associated Parts**

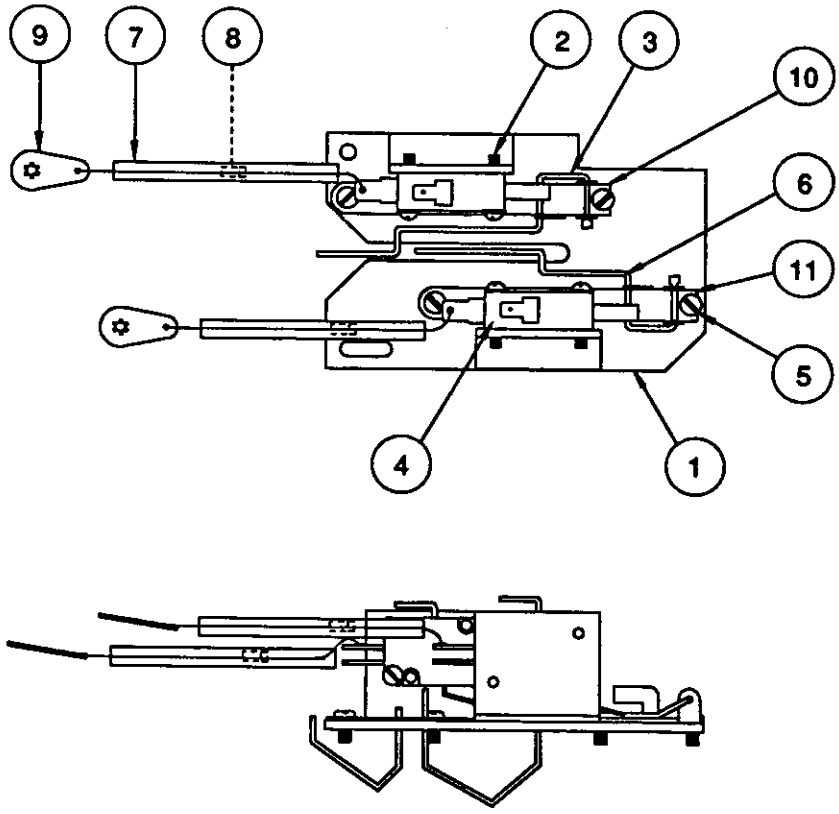
7.	20-6502-A	Plum Bob
8.	4406-01120-00	Wing Nut (2)

Coil Magnet & Bracket Assembly



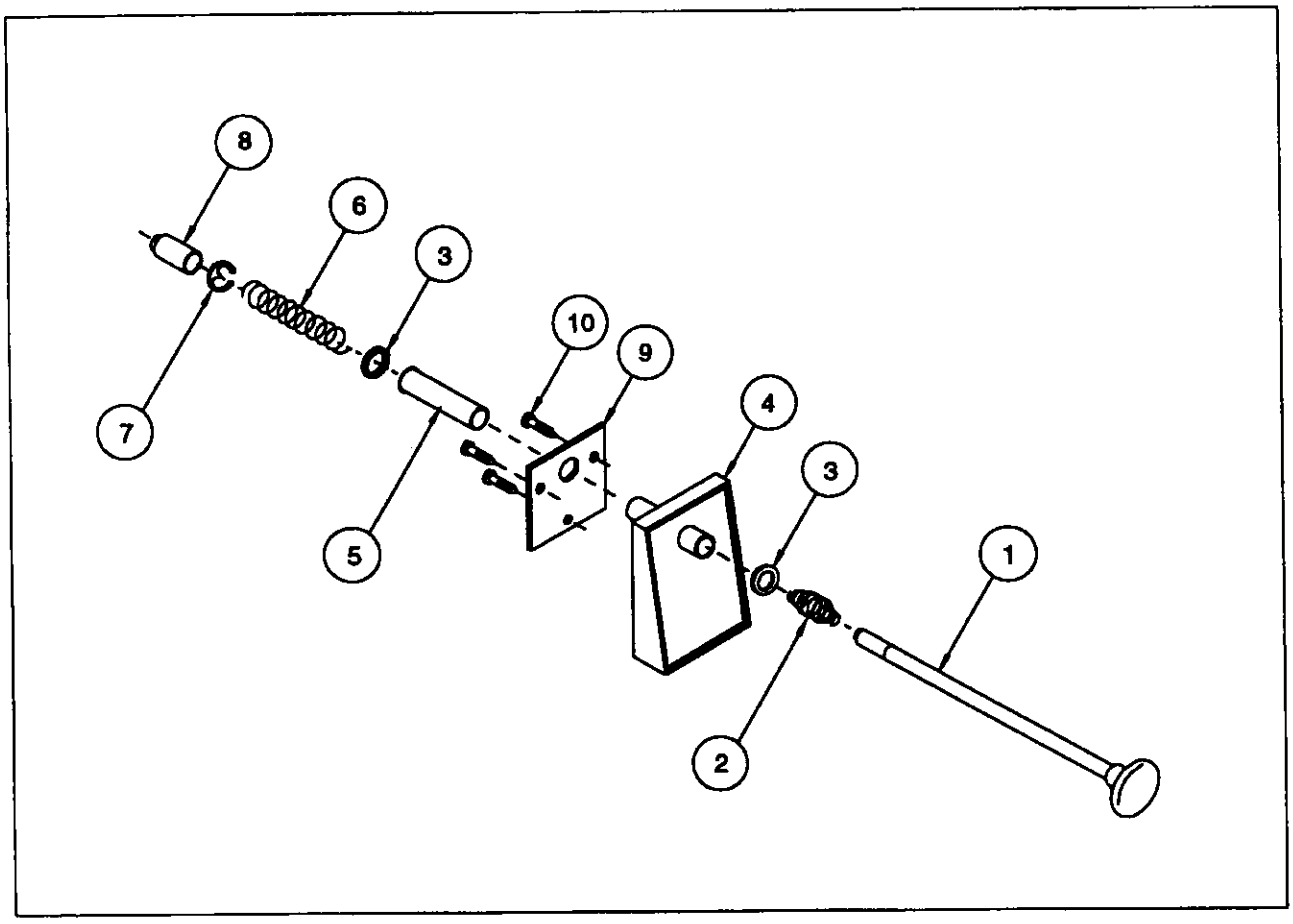
Item	Part Number	Description
1.	A-15257	Bracket & Pole Piece Assy.
2.	20-9247	Coil Magnet

B-8925 Ball Trough Switch Plate Assembly



Item	Part Number	Description
1.	A-8924	Mounting Plate Brkt. Assembly
2.	4004-01003-10	Mach. Screw, 4-40 x 5/8 P-PH-S
3.	12-6546	Ball Switch Wireform
4.	5647-09957-00	Mini-Micro Switch
5.	4005-01005-02	Mach. Screw, #5-40 x 1/8 P-PH
6.	12-6547	Ball Switch Wireform
7.	23-6710-2	Coil tubing #10
8.	5070-09054-00	Diode 1N4004
9.	5825-09372-00	#6 Solder Lug
10.	01-60-A	R.O. Switch Bracket
11.	01-60-F	R.O. Switch Bracket

B-12445-4-BR Ball Shooter Assembly

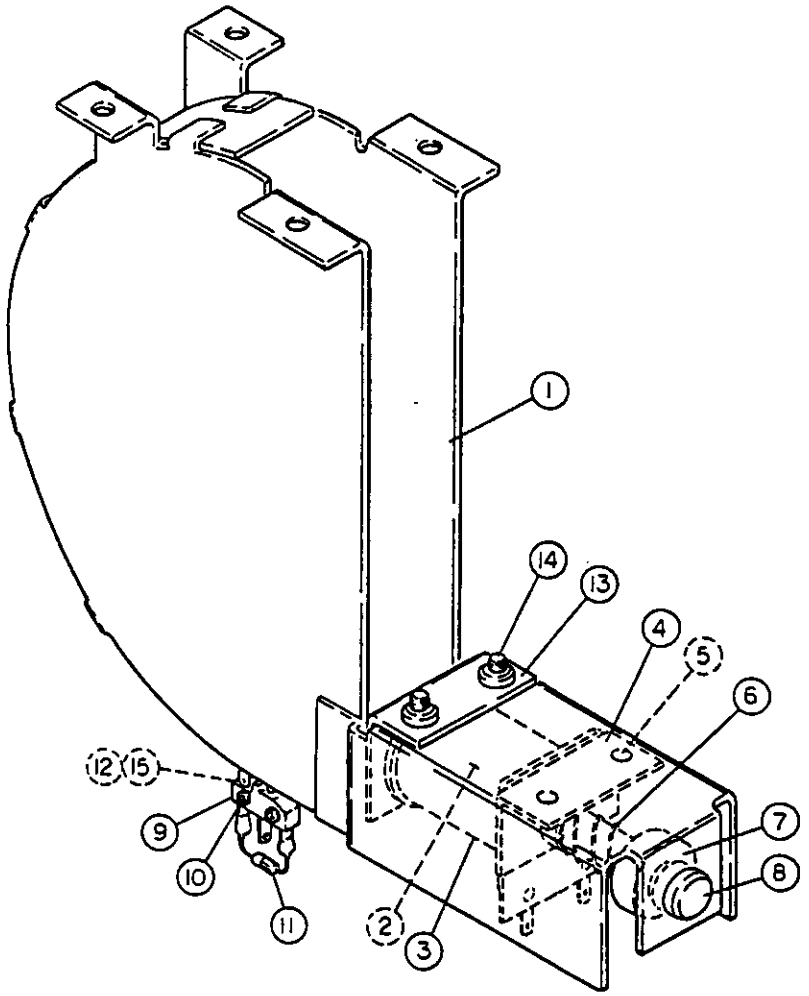


Item	Part Number	Description
1.	20-9253-7	Rod Assembly
2.	10-149	Rod Spring
3.	4700-00051-00	Flatwasher, 25/64 x 5/8 x 16ga.
4.	21-6645-1-BR	Ball Shooter Housing, Brass
5.	03-7357	Shooter Sleeve
6.	10-148-4	Shooter Spring
7.	20-8718-1	"C" Retaining Ring
8.	23-6327	Rubber Shooter Tip

■ **Associated Parts:**

9.	01-3535	Mounting Plate
10.	4010-01006-10	Mach. Screw, #10-32 x 5/8

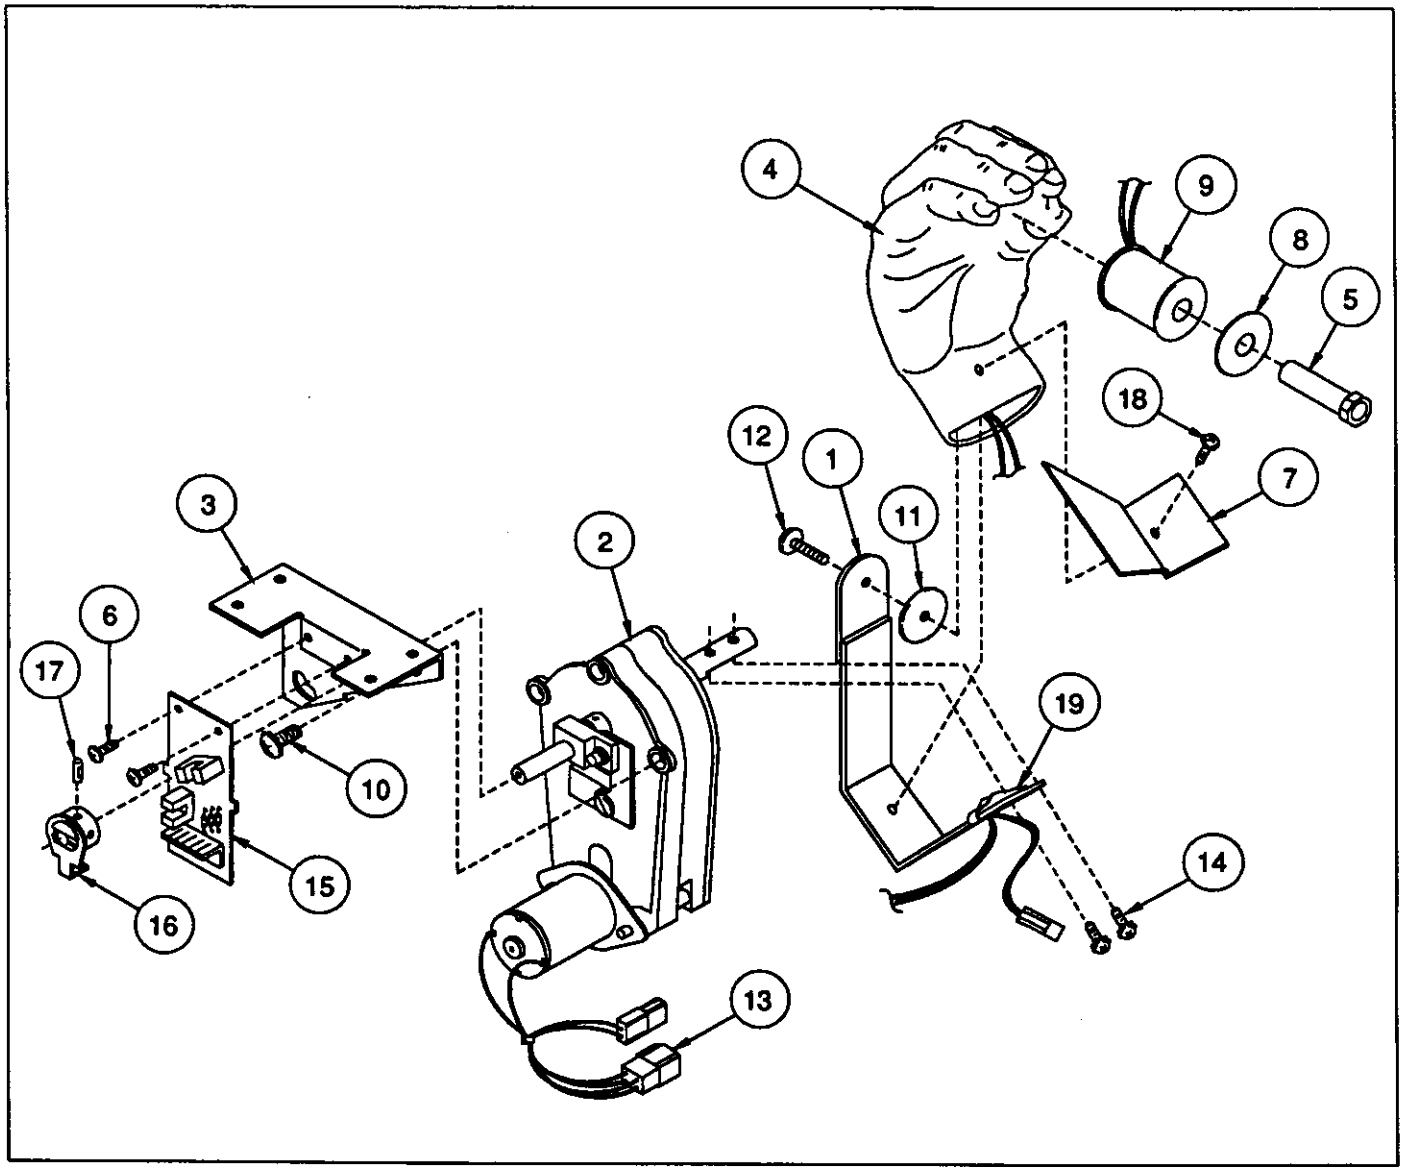
A-15200 Kickout Assembly



Item	Part Number	Description
1.	A-15201	Kickout Sub-Assembly
2.	03-7067	Coil Tubing
3.	AE-23-800	Coil Assembly
4.	01-9423	Coil Bracket Assy.
5.	4408-01119-00	Nut 8-32 ESN
6.	10-135	Solenoid Spring
7.	A-17767	Bell Armature Assembly
8.	23-6420	Rubber Grommet

Item	Part Number	Description
9.	5647-12693-25	Mini Micro Switch
10.	4002-01105-07	Mach. Screw, 2-56 x 7/16P-PH-S
11.	5070-09054-00	Diode 1N4004
12.	01-8240	Nut Plate, #2-56
13.	A-15376	Coil Bracket - Front
14.	4008-01003-06	Mach. Screw, 8-32 P-PH-S
15.	01-8600	Insulator

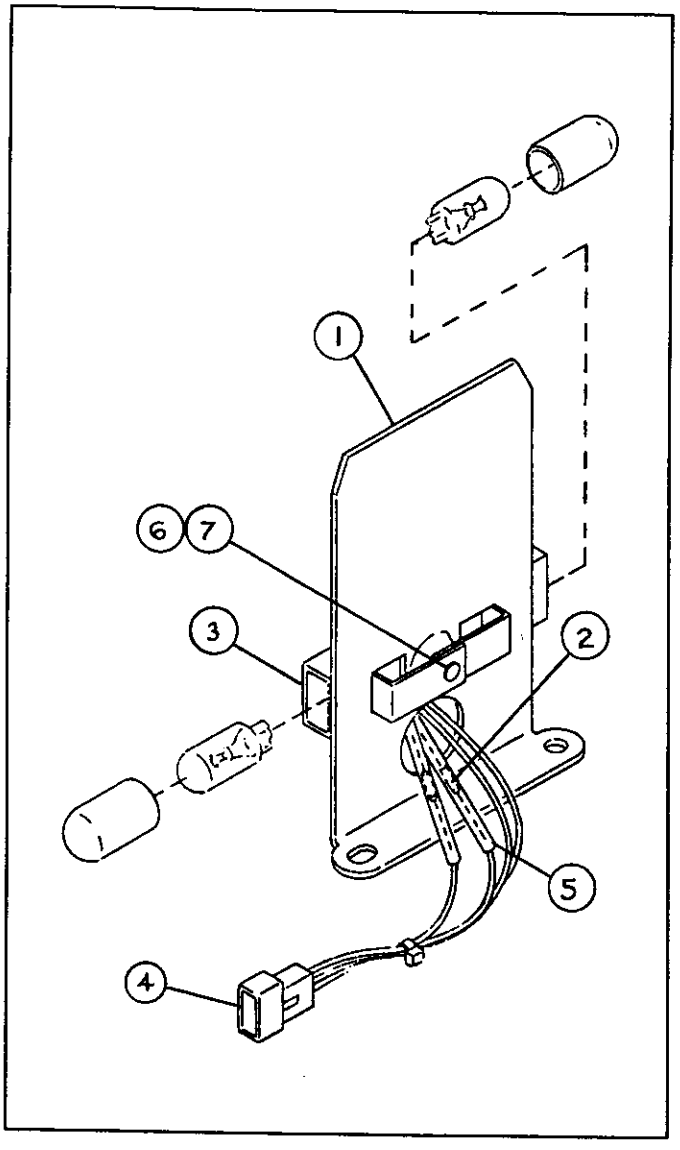
A-17411 Hand Drive Assembly



Item	Part Number	Description
1.	A-15303	Bracket Assembly
2.	14-7966	Motor 140
3.	01-10561	Motor Bracket
4.	31-1684	Hand - Decorated
5.	02-4603	Magnet Core
6.	4006-01003-04	Mach. Screw, 6-32 x 1/4"
7.	01-10655	Anti-Trap Bracket
8.	31-1677	Washer, Color
9.	A-12158-1	Coil Assembly
10.	4020-01003-08	Mach. Screw, 1/4-20 x 1/2"

Item	Part Number	Description
11.	4700-00130-00	Flatwashwer, 1 x 2 x 16ga.
12.	4010-01062-10	Mach. Screw, 10-32 x 5/8"
13.	H-15228	Hand Cable Assembly
14.	4008-01003-08	Mach. Screw, 8-32 x 1/2"
15.	A-15285	Opto Switch-2 PCB Assy.
16.	A-15310	Interrupter Assembly
17.	4010-01082-04	Set Screw, 10-32 x 1/4"
18.	4010-01006-10	Mach. Screw, 10-32 x 5/8"
19.	03-7520	Ty-Wrap Nylon

A-15258
Chair Bracket Assembly

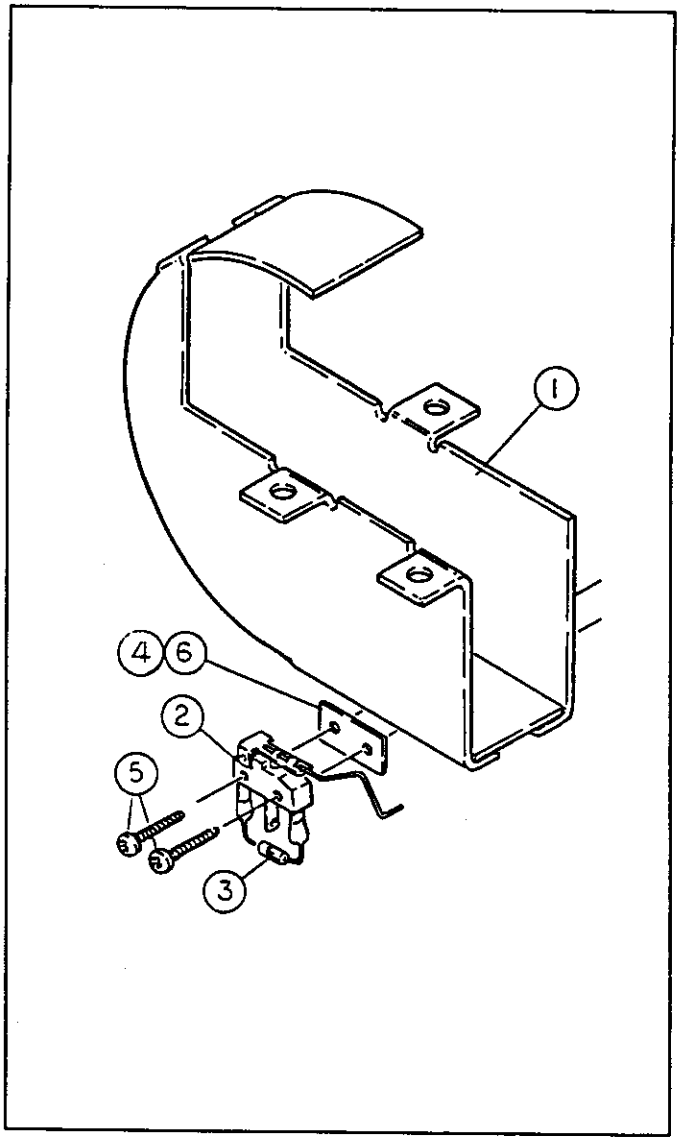


Item	Part Number	Description
1.	01-10593	Chair Bracket
2.	5070-09054-00	Diode 1N4004, 1.0A
3.	24-8807-1	Wedge Socket w/Brkt (2)
4.	H-15237	Cable Assembly
5.	23-6710-3	Tubing #10 (2")
6.	4700-00003-00	Flatwasher, 1/8 x 9/32 x 22ga.
7.	07-6688-17N	Rivet, 1/8 x 5/32'

■ **Associated Parts:**

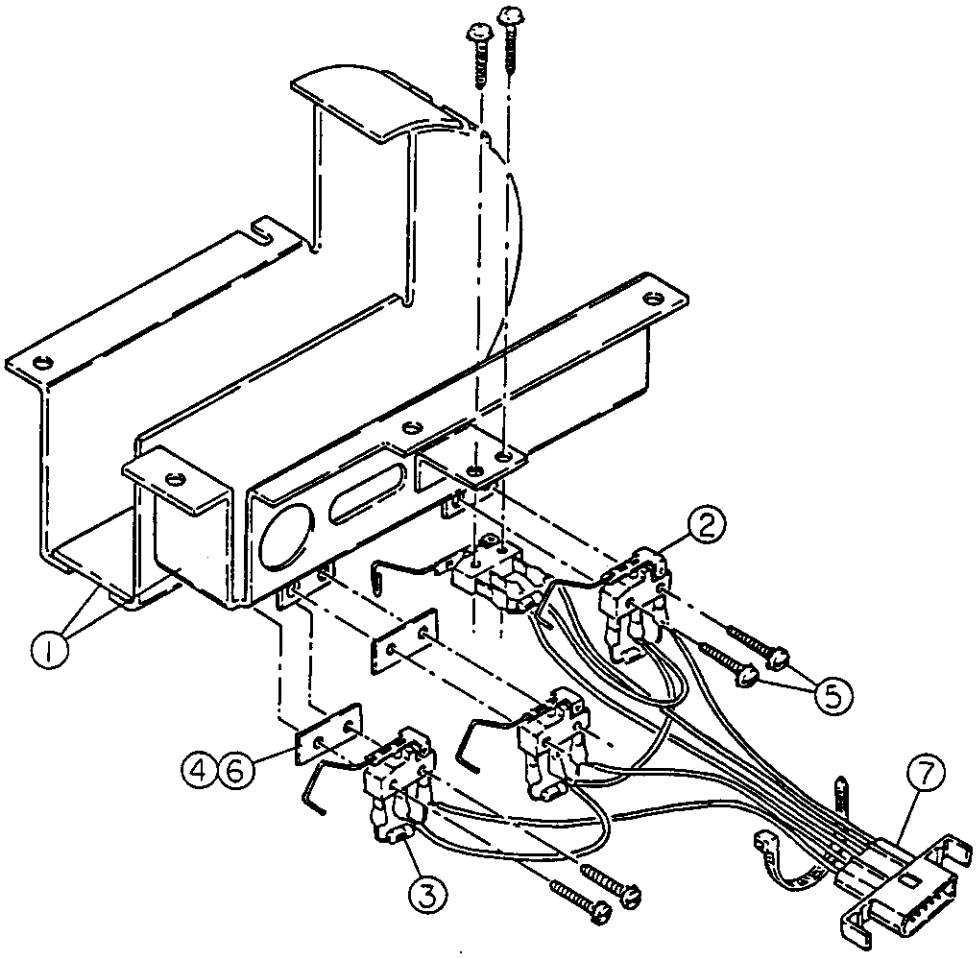
24-8768	Bulb #555 (2)
03-8063-4	Sleeve, Red
03-8063-6	Sleeve, Yellow
03-8647	Plastic Molded Chair

A-14962
Loop Assembly



Item	Part Number	Description
1.	A-14963	Loop Assembly
2.	5647-12693-25	Mini Micro Switch
3.	5070-09054-00	Diode 1N4004
4.	01-8240	Nut Plate, #2-56
5.	4002-01105-07	Mach. Screw, 2-56 x 7/16 P-PH-S
6.	01-8600	Insulator

A-14964 Lockup Loop Assembly



Item	Part Number	Description
1.	A-14965	Lockup Loop Assembly
2.	5647-12693-25	Mini Micro Switch
3.	5070-09054-00	Diode 1N4001
4.	01-8240	Nut Plate #2-56
5.	4002-01105-07	Mach. Screw, 2-56 x 7/16 P-PH-S
6.	01-8600	Insulator
7.	H-15433	4-Switch Cable

A-14970-1 Bookcase Assembly

Item	Part Number	Description	Qty.
1	01-10398	Mounting Bracket	1
2	A-15474	Motor & Crank Assembly	1
a)	14-7969	Motor, Bookcase (1)	
b)	03-8619	Crank, Bookcase (1)

Wiring Diagrams and Schematics

CONNECTOR & COMPONENT IDENTIFICATION

Each plug or jack receives a number that identifies the circuit board and position on that board that it connects to. J-designations refer to the male part of a connector. P-designations refer to the female part of a connector. For example, J101 designates jack 1 of board 1 (a Power Driver Board Board jack); P206 designates plug 6 of board 2 (a CPU Board plug). Identifying the specific pin number of a connector involves a hyphen, which separates the pin number from the plug or jack designation. For example, J101-3 refers to pin 3 of jack 1 on board 1.

Other game components may also have similar numbers to clarify their locations or related circuits. For example, F501 refers to a fuse located on the Sound Board.

Prefix numbers for the WPC circuit boards are listed below.

1- Power Driver Board
2- CPU Board
5- Sound Board
6- Dot Matrix Controller
Dot Matrix Display/Driver Board
8 - Flipper Controller Board
9 - Extra Flipper Supply Board

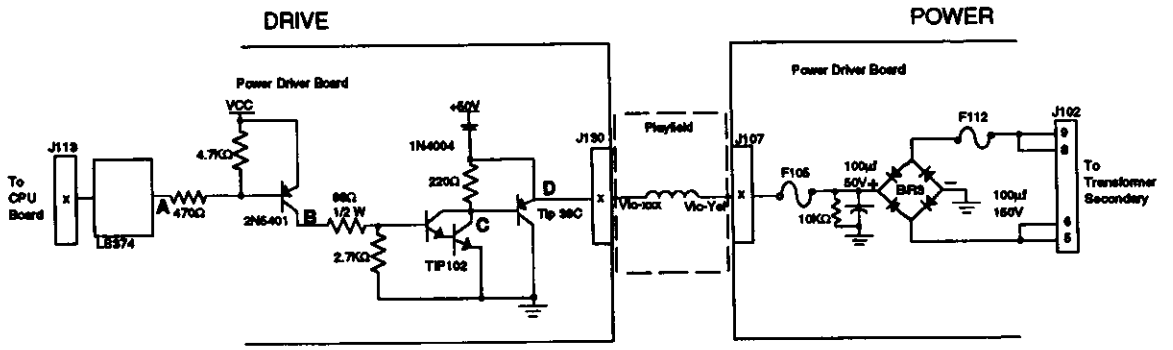
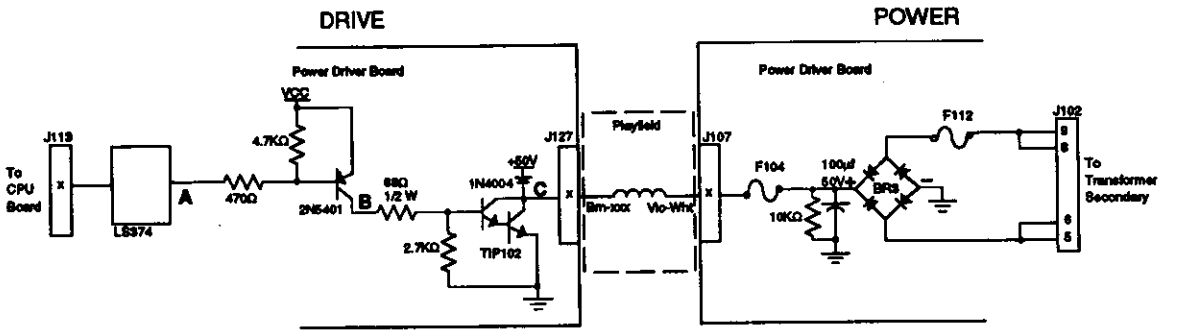
*Magnet fuse is a 5 Amp S.B. located on the underside of the playfield.

High Power Solenoid Circuit



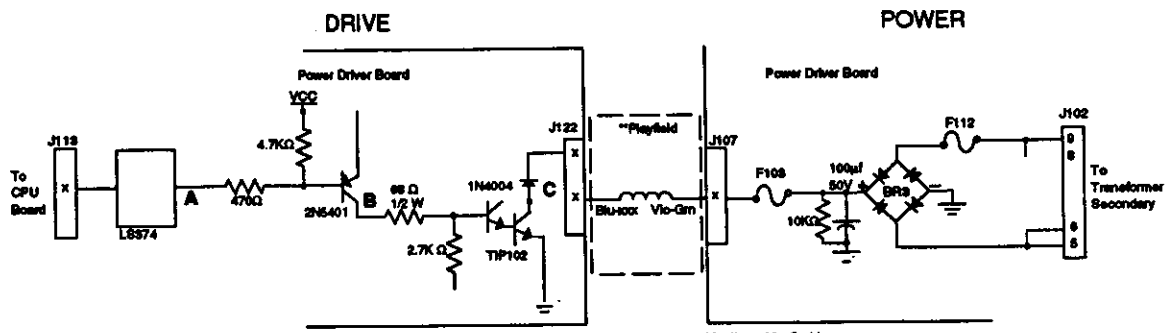
The microprocessor toggles the outpot of the 74LS374. When point "A" drops low, point "B" the collector of the 2N5401 transistor is high. A high at point "B" causes point "C" the collector of the TIP102 transistor, and point "D" the emitter of the TIP36 transistor to drop low. When point "D" is low the coil is grounded through the transistor and the coil turns On. The coil shuts Off when point "A" toggles high.

Low Power Solenoid Circuit



The microprocessor toggles the outpot of the 74LS374. When point "A" is low, point "B" the collector of the 2N5401 transistor is driven high. A high at point "B" turns On the TIP102 transistor and causes point "C" to drop low. When point "C" is low the coil is grounded through the transistor and the coil turns On. The coil shuts Off when point "A" toggles high.

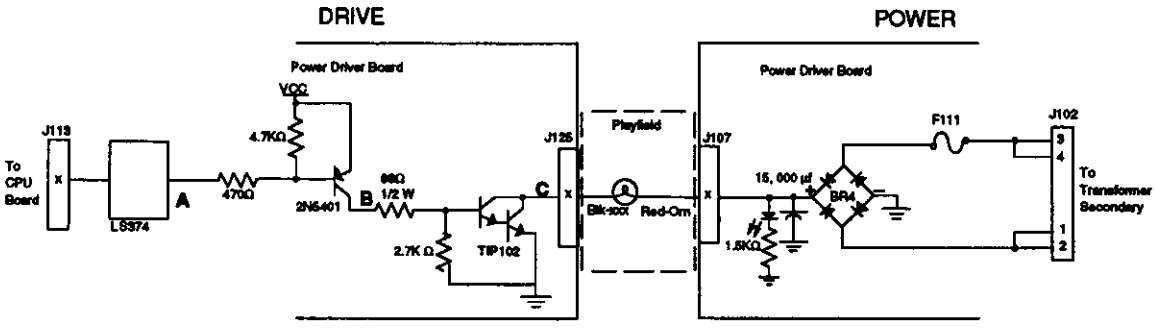
Special (General Purpose) Solenoid Circuit



** Playfield Circuit When used for coil driver only (either +50V or +20V). If used for flashlamp driver see playfield circuit below. Flyback Diode is not used for flashlamp circuit.

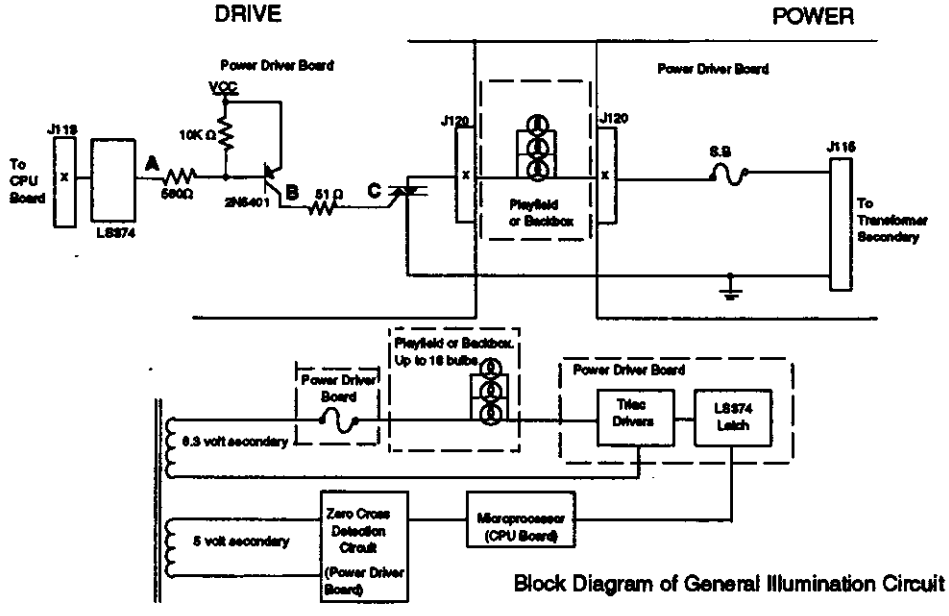
The microprocessor toggles the output of the 74LS374. When point "A" drops low, point "B" is high. A high at point "B" causes a low at point "C". When point "C" is low the coil/flashlamp is grounded through the transistor and the coil/flashlamp turns On. When point "A" toggles high the coil/flashlamp turns Off.

Flashlamp Circuit



The Microprocessor toggles the output of the 74LS374. When point "A" is low, point "B" the collector of the 2N5401 transistor is high. Once point "B" is high, point "C" the collector of the TIP102 transistor is low. When Point "C" is low the flashlamp is grounded through the transistor and the flashlamp turns On. When point "A" toggles high the circuit shuts Off.

General Illumination



Block Diagram of General Illumination Circuit

When point "A" toggles low, then points "B" and "C" are high. This turns On the triac and the desired General Illumination string lights.

WARNINGS & NOTICES

WARNING

FOR SAFETY AND RELIABILITY, substitute parts and equipment modifications are not recommended. Use of Non-BALLY parts or modifications of game circuitry, may adversely affect game play, or may cause injuries.

SUBSTITUTE PART OR EQUIPMENT MODIFICATIONS may void FCC Type Acceptance.

BECAUSE THIS GAME IS PROTECTED by Federal copyright, trademark, and patent laws, unauthorized game conversions may be illegal under Federal law.

THIS 'CONVERSION' PRINCIPLE ALSO APPLIES to unauthorized facsimiles of BALLY equipment, logos, designs, publications, assemblies and games (or game feature not deemed to be public domain), whether manufactured with BALLY components or not.

All rights reserved.

WARNING

NOTE: This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generated, uses, and can radiate radio frequency energy and if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

RF Interference Notice

CABLE HARNESS PLACEMENTS and ground strap routing on this game have been designed to keep RF radiation and conduction within levels accepted by the FCC Rules.

TO MAINTAIN THESE LEVELS, reposition harnesses and reconnect ground straps to their original placements, if they become disconnected during maintenance.

FCC STICKER. Check the back of your game to verify that an FCC-certification sticker was attached to your game at the factory. All Games that leave the BALLY plant have been tested and found to comply with FCC Rules. Because the sticker is proof of this fact, legal repercussions to the owner and distributor may result, if the sticker is missing. If you receive a game, manufactured after December 1982, that has no FCC sticker, call BALLY for advice or write us a note on your Game Registration Card. Be sure that the card bears your game's serial number.
